PROCEEDINGS AND DEBATES OF THE 95th CONGRESS, FIRST SESSION

HOUSE OF REPRESENTATIVES—*Friday, August 5, 1977*

The House met at 9 o'clock a.m.

Rev. Napp N. Granade, pastor, Shirley Hills Baptist Church, Warner Robins, Ga., offered the following prayer:

Our Eternal Heavenly Father, we lift up our hearts to You in praise and adoration for being our Father and our God. We praise You for the manifold blessings that you have showered upon us.

We praise You for sending Jesus Christ that we might know your likeness. We praise You for holding mankind in such esteem that all men are created in Your image with inherent dignity.

We thank You for this honorable Congress. May each of them be led by an insight from You as they study and work.

Bless our Nation and lead us in the paths of righteousness for Thy name's sake. And may Thine be the power and glory forever. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate has passed without amendment a bill and a concurrent resolution of the House of the following titles:

H.R. 1952. An act to amend the corporate name of AMVETS (American Veterans of World War II), and for other purposes; and

H. Con. Res. 327. Concurrent resolution to correct the enrollment of the bill H.R. 6161.

The message also announced that the Senate vitiated its action on the concurrent resolution (H. Con. Res. 317) providing for an adjournment of the House from August 5 until September 7, 1977, and an adjournment of the Senate from August 6 until September 7, 1977, thus clearing the concurrent resolution for approval.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6161) entitled "An act to amend the Clean Air Act, and for other purposes."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1377) entitled "An act to extend the time for commencing actions on behalf of an Indian tribe, band, or group."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7555) entitled "An act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending September 30, 1978, and for other purposes," and it further announced that the Senate disagreed to the amendment of the House to the amendment of the Senate numbered 82, to the foregoing bill and requested a further conference with the House.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 926. An act to amend the Federal Election Campaign Act of 1971, and for other purposes;

S. 948. An act for the relief of Chin Ah Park and Chin Suk Park;

S. 1003. An act for the relief of Me Young Lee;

S. 1306. An act to provide temporary authority to the Administrator of the Small Business Administration to facilitate water conservation practices and emergency actions to mitigate the impacts of the 1976–1977 drought; and

S. 1617. An act to establish a program of ocean pollution research and monitoring and for other purposes.

The measure also announced that the Vice President, pursuant to Public Law 84–689, appointed Mr. SPARKMAN (chairman), Mr. BAYH, Mr. ABOUREZK, Mr. BIDEN, Mr. CASE, Mr. JAVITS, Mr. PEARSON, and Mr. HEINZ to attend, on the part of the Senate, the North Atlantic Assembly, to be held in Paris, France, September 18–24, 1977.

REV. NAPP N. GRANADE

(Mr. BRINKLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BRINKLEY. Mr. Speaker, it is a joy for me to welcome Brother Napp Granade, the pastor of the Shirley Hills Baptist Church, Warner Robins, Ga., to our midst today. Warner Robins is within my congressional district and Napp Granade was formerly pastor of my church in Columbus, Ga., Wesley Heights Baptist Church.

It is a double joy, because today is an unusual session beginning at 9 o'clock. It is also a privilege to have here as guests the dear wife of Napp Granade, Sarah, and their son, Nelson, together with Tom and Betty Garrett of Columbus, Ga., and their sons Ward and Tim.

I want to say that Napp Granade serves in the spirit of a town in our district of Georgia called Andersonville.

A man incarcerated there in the war between the States, on his release, boarded a train at Millen, got on a ship at Savannah Harbor and returned to New York. Later in the dedication of the New York Monument at Andersonville, and his return, he said he thought the earlier occasion was the finest hour of his life. But he said on that day in 1916 when the New York Monument was being dedicated, that that was the finest hour of his life, for he said we are all friends and comrades in the service of our fellow man, with a free country, a free education, a free press, and freedom of religion. He said this is the finest country upon which the sun has ever shone.

It is in that spirit that Napp Granade has come to us, and we welcome him today.

FUNDING INVESTIGATIONS AND STUDIES TO BE CONDUCTED BY HOUSE PERMANENT COMMITTEE ON INTELLIGENCE

Mr. THOMPSON. Mr. Speaker, by direction of the Committee on House Administration, I call up House Resolution 729 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 729

Resolved, That, effective August 1, 1977, expenses of investigations and studies to be conducted by the House Permanent Select Committee on Intelligence, acting as a whole or by subcommittee, not to exceed $302,499 including expenditures for the employment of investigators, attorneys, and clerical, and other assistants, and for the procurement of services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(i)), shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House

Administration. Not to exceed $12,500 of the total amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(i)); but this monetary limitation on the procurement of such services shall not prevent the use of such funds for any other authorized purpose.

SEC. 2. No part of the funds authorized by this resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House; and the chairman of the House Permanent Select Committee on Intelligence shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. The authorization granted by the resolution shall expire immediately prior to noon on January 3, 1978.

SEC. 4. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

The SPEAKER. The Chair recognizes the gentleman from New Jersey (Mr. THOMPSON) for 1 hour.

Mr. THOMPSON. Mr. Speaker, House Resolution 729 provides funding in the amount of $302,499 to support the studies and investigations to be conducted by the Select Committee on Intelligence, chaired by our distinguished friend and colleague, the gentleman from Massachusetts (Mr. BOLAND). This is for the remainder of the first session. The Committee on House Administration heard testimony of the gentleman from Massachusetts (Mr. BOLAND) and the gentleman from California (Mr. BOB WILSON), the ranking member. Each expressed strongly his support of this resolution. The select committee met and considered thoroughly its organizational structure which is contained in the report. That organizational structure requires a projected staff of 31.

The staffing of the select committee is somewhat unusual, but the mandate of the committee is broad in its operation because its studies and investigations are quite sensitive. For example, the select committee must employ a small stenographic corps with high security clearances to record its proceedings, and a security director to oversee the integrity of the documents provided the committee by the intelligence agencies. Parenthetically, the select committee will look into the activities of intelligence agencies throughout the Government.

I am most appreciative to the chairman of the select committee and its ranking minority member for the thoroughness of the presentation they made to the Committee on House Administration.

I understand the gentleman from Ohio (Mr. ASHBROOK), a member of that committee, would like to have me yield to him for debate only on this subject.

Mr. ASHBROOK. I thank my colleague, the gentleman from New Jersey, for yielding. I merely want to indicate that our ranking minority member, the gentleman from California (Mr. BOB WILSON), is not present but we are completely in accord with this resolution, and I appreciate the expeditious nature of the actions of the House Administration Committee.

As a matter of fact, I am not known as one who spends a lot of money. I am inclined to think this is a modest start.

Mr. THOMPSON. I quite agree, having traveled extensively with the gentleman, he is exactly correct.

Mr. ASHBROOK. I thank the gentleman for yielding. I hope the Members will support this resolution.

Mr. THOMPSON. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. ROUSSELOT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 342, nays 10, not voting 81, as follows:

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMITTING HOUSE EMPLOYEES TO CONTRIBUTE, THROUGH PAYROLL WITHHOLDINGS, TO CHARITABLE ORGANIZATIONS

Mr. THOMPSON. Mr. Speaker, by direction of the Committee on House Administration, I call up the resolution (H. Res. 12) to permit all employees of the House of Representatives to contribute, through payroll withholdings, to charitable organizations in coordination with the Combined Federal Campaign and other fundraising in the executive branch of the Federal Government, and ask unanimous consent for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER pro tempore (Mr. MOAKLEY). Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 12

Resolved, That (a) until otherwise provided by law and except as provided in subsection (c), the Clerk of the House of Representatives shall—

(1) notify employees of the opportunity to have amounts withheld from their compensation for contribution to charitable organizations; and

(2) if an employee files with such officer a voluntary request specifying the amount to be withheld and one Combined Federal Campaign Center in the Washington metropolitan area to receive such amount—

(A) withhold such amount from the compensation of such employee, and

(B) transit (not less than once each calendar quarter) the amount so withheld to the Combined Federal Campaign Center as specified in such request.

(b) The Clerk shall, to the extent practicable, carry out subsection (a) at or about the time of the Combined Federal Campaign and other fundraising in the executive branch of the Federal Government conducted pursuant to Executive Order 10927, dated March 18, 1961, and at such other times as such officer deems appropriate.

(c)(1) No amount shall be withheld under subsection (a) from the compensation of any employee for any pay period if the amount of such compensation for such period is less than the sum of—

(A) the amount specified to be withheld from such compensation under subsection (a) for such period, plus

(B) the amount of all other withholdings from such compensation for such period.

(2) No amount may be specified by an employee to be withheld for any pay period under subsection (a) which is less than—

(A) 50 cents, if the pay period of such individual is biweekly or semimonthly; or

(B) $1, if the pay period of such individual is monthly.

(d) This resolution imposes no duty, burden, or requirement upon the United States, the House of Representatives, or any officer or employee of the United States, except as specifically provided in this resolution. Nothing in this resolution shall be deemed to consent to the application of any provision of law which has the effect of subjecting the United States, the House of Representatives, or any officer or employee of the United States to any penalty or liability by reason of the provisions of this resolution. Any paper, form, document, or any other item filed with, or submitted to, the Clerk under this resolution is considered to be a paper of the House of Representatives within the provisions of the Rules of the House of Representatives.

SEC. 2. For purposes of this resolution—

(1) the term "charitable organization" means national voluntary health and welfare agencies designated by the Chairman of the Civil Service Commission pursuant to Executive Order 10927, dated March 19, 1961;

(2) the term "Clerk" means the Clerk of the House of Representatives;

(3) the term "employee" means any employee of the House of Representatives whose compensation is disbursed by the Clerk.

Mr. THOMPSON (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. THOMPSON) is recognized for 1 hour.

Mr. THOMPSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the purpose of this resolution, which is authorized by the gentleman from Illinois (Mr. ANDERSON) and the gentleman from Virginia (Mr. FISHER), is to authorize the Clerk of the House to provide for voluntary payroll withholding for charitable contributions to the Combined Federal Campaign. This resolution represents a bipartisan effort supported by some 58 Members.

The minimum deduction provided under House Resolution 12 is, first, 50 cents, if the pay period of such an individual is biweekly or semimonthly, or $1 if the pay period of such individual is monthly.

The Subcommittee on Accounts chaired by our distinguished colleague, the gentleman from Pennsylvania (Mr. DENT), considered the subject of voluntary payroll withholding for charitable organizations to the Combined Federal Campaign during its meeting of June 16, 1977. The subcommittee received testimony from the gentleman from Virginia (Mr. FISHER), the gentleman from Illinois (Mr. ANDERSON), Mr. William A. Schaffner, director of the Combined Federal Campaign, Mr. Boyd Alexander, the acting Director of the House Information System, and from the Hon. Edmund L. Henshaw, the Clerk of the House. The subcommittee, by voice vote, adopted the motion to refer House Resolution 12 favorably to the full committee; and by voice vote, the full committee on June 23, adopted a motion to report House Resolution 12.

Mr. Speaker, I am before the House now because the Combined Federal Campaign gets under way in August; and if the House adopts this resolution, the Clerk can begin preparing the necessary forms and procedures for implementation.

The CFC of the National Capital Area is a once-a-year solicitation on behalf of the 120 voluntary health and welfare agencies of the United Way, 11 national health agencies, and 6 international service agencies. The CFC brings the solicitation of all of these charitable organizations together for the benefit of both the charitable agencies and the Federal employee. It is the most practical way for Federal employees to contribute to these charitable agencies, and the contribution is usually in the form of an annual pledge. The provision for payroll deductions is critically important.

Mr. Speaker, when the Federal campaigns were authorized by Executive Order No. 10927 of March 18, 1961, to deal in a meaningful way with the growing multiplicity of separate fund drives, it was recognized that a single gift to replace many would have to be relatively large, and that a pledged gift paid over time through a payroll deduction would be the only way most contributors could give a reasonably large amount. This is done in the executive agencies and by private businesses and is an almost universal practice. It is somewhat analogous to the checkoff allowed for those who have State and local income taxes deducted from their Federal salary.

Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. DEVINE) for debate only.

Mr. DEVINE. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, this resolution has been offered and sponsored by my colleague, the gentleman from Illinois (Mr. ANDERSON), who, unfortunately, is not able to be here this morning.

I find myself in a very difficult position because I think I am the only member of the Committee on House Administration who spoke against and voted against this resolution, not because I am against the United Way; but it is just a question of whether, in fact, the checkoff system for Federal employees is actually a voluntary participation in giving funds.

If somebody else in the office decides that he or she wants to have a 100-percent quota, the voluntariness of this program goes down the drain. It seems to me that this is merely to ease the collection problems of those who are promoting these worthy causes.

Therefore, Mr. Speaker, I just do not think that it is something that we, the Federal Government, should involve ourselves in because the collection of such charitable funds is for the benefit of a private agency and not a public agency. If Federal employees want to contribute voluntarily, all they have to do is write a check.

Mr. THOMPSON. Mr. Speaker, I yield such time as he may consume to the gentleman from Virginia (Mr. FISHER) for debate only.

Mr. FISHER. Mr. Speaker, I thank the gentleman for yielding.

I would like to assure my colleague across the aisle, the gentleman from Ohio (Mr. DEVINE), that this would, indeed, be voluntary. There would be no pressure. The individual employee could or could not sign up for the automatic deduction of contributions to the campaign.

I accepted the appointment from the Speaker last year to work on this matter for both sides of the House. The gentleman from Illinois (Mr. ANDERSON) did the job the year before. It is not what one would call one of the major appointments that are made in this House.

But the gentleman and I went through this experience and determined that we would try to set this up in a way that would make some sense so that employ-

ees of the legislative branch could contribute to the United Way charities in the Combined Federal Campaign in the same way that employees of the executive branch do and in the same way that employees of over 90 percent of the medium and large private firms, at least in this area, do.

So the resolution is no great thing. It would simply allow the numerous employees on the legislative side to take part conveniently and easily in this program.

I realize that Members would contribute back in their home districts but there are many, many employees in the different units in the legislative branch who live here, plus a few in Chicago, Denver, San Francisco, or New York, who would like to have this convenient way of participating in the private charitable and philanthropic work in their communities.

Mr. JOHN T. MYERS. Mr. Speaker, will the gentleman yield?

Mr. FISHER. The gentleman from New Jersey (Mr. THOMPSON) has control of the time.

Mr. THOMPSON. Mr. Speaker, I yield to the gentleman from Indiana for the purpose of debate only.

Mr. JOHN T. MYERS. Mr. Speaker, I thank the gentleman for yielding. I have a question about the application and purpose of this program. As an example, we have three jurisdictions here, Maryland, Virginia, and the District of Columbia. If the individual contributing lives in one of the outside areas, either Maryland or Virginia, do the benefits also go to these jurisdictions, or are they kept in the District of Columbia, or how are they applied?

Mr. FISHER. As I understand it, that has been worked out over the years and it is a combined campaign for the region. The distribution of the funds to charitable organizations serving all three jurisdictions, and those serving only one or two of them, has long since been agreed to. But the individual contributor, as I understand it, if he does not wish to have his money dispensed according to the agreed-upon formula of distribution, may specify in his contribution pledge the particular charity to which he would like his money to go.

Mr. JOHN T. MYERS. Mr. Speaker, if the gentleman will yield still further, could I interpret that to mean if someone lives in Colorado that they could contribute to the District of Columbia charities and the benefits would go back to their Colorado charities, or some other area?

Mr. FISHER. I doubt if it has been worked out to that degree of sophistication. In that case I believe the individual, if he wished to give in both metropolitan regions, would have to make two contributions. But that is a good idea and I will pass it on to the United Way that serves the whole country.

Mr. JOHN T. MYERS. I thank the gentleman.

Mr. ANDERSON of Illinois. Mr. Speaker, as one of the principal sponsors of House Resolution 12 along with the gentleman from Virginia (Mr. FISHER), I rise in strong support of the resolution and urge its adoption. This resolution would permit House employees to have their contributions to the Combined Federal Campaign deducted from their payrolls on a voluntary basis—a time-tested procedure in the executive branch since 1961. As past chairmen of the House CFC drive, Mr. FISHER and I are embarrassingly aware of the abysmal CFC participation and giving levels of the House and Senate as compared to other agencies of Government. We think the procedure provided for in this resolution will encourage more giving and greater giving to this very worthy umbrella charity organization which encompasses some 120 voluntary health and welfare agencies of the United Way, 11 national health agencies, and 6 international service agencies. I am pleased to report that over 50 of our colleagues are cosponsors of this resolution, and I think it is deserving of the support of all our colleagues today when we vote on it.

Mr. THOMPSON. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. THOMPSON. Mr. Chairman, I ask unanimous consent that all Members may have general leave to extend their remarks on the two resolutions just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

TO ABOLISH JOINT COMMITTEE ON ATOMIC ENERGY AND REASSIGN CERTAIN FUNCTIONS AND AUTHORITIES THEREOF

Mr. PRICE. Mr. Speaker, I ask unanimous consent that the Committee on Rules be discharged from further consideration of the Senate bill (S. 1153) to abolish the Joint Committee on Atomic Energy and to reassign certain functions and authorities thereof, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. LATTA. Mr. Speaker, reserving the right to object, I would assume that this matter has been cleared with the chairman of the Committee on Rules and also with the ranking member?

Mr. PRICE. Mr. Speaker, if the gentleman will yield, I have discussed this matter with almost everybody involved in the Atomic Energy Committee. I might add that the Senate has already acted upon this. It has been pending since the beginning of this Congress. The Senate has already abolished their section of the committee so that, in fact, there is no committee.

This is just a final step to take it out of existence legally and formally.

Mr. LATTA. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1153

An act to abolish the Joint Committee on Atomic Energy and to reassign certain functions and authorities thereof, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States in Congress assembled,

PURPOSES

SEC. 101. The purposes of this Act are—

(1) to abolish the Joint Committee on Atomic Energy and to provide for the transfer of its statutory functions and authority to other committees of the Congress which under the rules of the House and Senate, are assigned jurisdiction over the development, utilization, or application of atomic energy;

(2) to preserve the security of information relating to the national security considerations of nuclear technology;

(3) to make necessary conforming amendments to the Atomic Energy Act of 1954, as amended, and certain other laws which pertain to the Joint Committee on Atomic Energy; and

(4) to provide for the disposition of staff personnel of the Joint Committee on Atomic Energy.

TITLE II—JOINT COMMITTEE ON ATOMIC ENERGY

SEC. 201. The Joint Committee on Atomic Energy is abolished.

TITLE III—TRANSFERS OF CERTAIN FUNCTIONS OF THE JOINT COMMITTEE ON ATOMIC ENERGY AND CONFORMING AMENDMENTS TO CERTAIN OTHER LAWS

SEC. 301. (a) Sections 201, 202, 203, 204, 205, 206, and 207 of the Atomic Energy Act of 1954, as amended, are repealed.

(b) Section 103 of the Atomic Energy Community Act of 1955, as amended, is repealed.

SEC. 302. Section 3 of the Congressional Budget Act of 1974 is amended by—

(1) striking the subsection designation "(a)"; and

(2) repealing subsection (b).

SEC. 303. Section 252(a)(3) of the Legislative Reorganization Act of 1970 is repealed.

SEC. 304. Section 502 of the Mutual Security Act of 1954, as amended, is amended by striking the words "the Joint Committee on Atomic Energy and".

SEC. 305. Section 3 of the International Atomic Energy Agency Participation Act of 1957 is amended by striking the words "the Joint Committee on Atomic Energy,".

SEC. 306. (a) Section 11 of the Atomic Energy Act of 1954, as amended, is amended by repealing subsection o.

(b) Section 11c of the Atomic Energy Act of 1954, as amended, is amended by deleting the words "The term 'atomic energy' means" and inserting the words "The terms 'atomic energy' or 'nuclear energy' mean".

(c) Section 11d of the Atomic Energy Act of 1954, as amended, is amended by deleting the words "The term 'atomic weapon' means" and inserting the words "The terms 'atomic weapon' or 'nuclear weapon' mean".

SEC. 307. Section 120 of the Atomic Energy Community Act of 1955, as amended, is amended by striking the second proviso and all that follows, and substituting the following: "*Provided further*, That before the Commission makes any disposition of property under the authority of this section, the basis for the proposed disposition (with necessary background and explanatory data) shall be

submitted to the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section, and a period of forty-five days shall elapse while Congress is in session (in computing such forty-five days, there shall be excluded the days on which either House is not in session because of adjournment of more than three days): *Provided, however,* That after having received the basis for the proposed disposition, such congressional committees may by resolution in writing agreed to by such committees waive the conditions of all or any portion of such forty-five-day period.".

SEC. 308. Section 91 d. of the Atomic Energy Community Act of 1955, as amended, is amended by striking the words "Joint Committee on Atomic Energy" and substituting "congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section,".

SEC. 309. Section 51 of the Atomic Energy Act of 1954, as amended, is amended by—

(1) striking the words "Joint Committee" the first time they appear and substituting "congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section,"; and

(2) striking the proviso and substituting *"Provided, however,* That the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section, after having received such determination, may by resolution in writing agreed to by such committees waive the conditions of all or any portion of such thirty-day period.".

SEC. 310. Section 54 a. of the Atomic Energy Act of 1954, as amended, is amended by deleting the words *"Provided, however"* the second time they appear and all that follows up to the next sentence and substituting the following: *"Provided, however,* That before they are established by the Commission pursuant to this subdivision (ii), such proposed amounts and periods shall be submitted to the Congress and referred to the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section, and a period of sixty days shall elapse while Congress is in session (in computing such sixty days, there shall be excluded the days on which either House is not in session because of an adjournment of more than three days): *And provided further,* That any such proposed amounts and periods shall not become effective if during such sixty-day period the Congress passes a concurrent resolution stating in substance that it does not favor the proposed action: *And provided further,* That prior to the elapse of the first thirty days of any such sixty-day period the congressional committees to which have been referred such proposed amounts and periods shall report to their respective Houses concerning their views and recommendations respecting the proposed amounts and periods and shall report to their respective Houses an accompanying proposed concurrent resolution stating in substance that the Congress favors, or does not favor, as the case may be, the proposed amounts or periods.".

SEC. 311. Section 61 of the Atomic Energy Act of 1954, as amended, is amended by—

(1) striking the words "Joint Committee" the first time they appear and substituting "congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section,"; and

(2) striking all after the words *"Provided, however,"* and substituting "That the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section, after having received such determination, may by resolution in writing agreed to by such committees waive the conditions of all or any portion of such thirty-day period.".

SEC. 312. (a) Section 123 c. of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

"c. the proposed agreement for cooperation, together with the approval and the determination of the President, has been submitted to the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over such proposed agreements, and a period of thirty days has elapsed while Congress is in session (in computing such thirty days, there shall be excluded the days on which either House is not in session because of an adjournment of more than three days): *Provided, however,* That the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over such proposed agreements, after having received such agreement for cooperation, may by resolution in writing agreed to by such committees waive the conditions of all or any portion of such thirty-day period; and".

(b) Section 123 d. of such Act is amended by—

(1) striking the words "Joint Committee" the first time they appear and substituting congressional committees which, under the rules of the House and Senate are assigned jurisdiction over such proposed agreements,"; and

(2) striking the remainder of the sentence following the word *"Provided"* and substituting the following: "That prior to the elapse of the first thirty days of any such sixty-day period the congressional committees to which have been referred the proposed agreement shall each submit a report to their respective Houses of the views and recommendations of the committee respecting the proposed agreement and an accompanying proposed concurrent resolution stating in substance that the Congress favors, or does not favor, as the case may be, the proposed agreement for cooperation.".

SEC. 313. Section 161 v. of the Atomic Energy Act of 1954, as amended, is amended by striking the third proviso and substituting the following: *"Provided further,* That before the Commission establishes such criteria, the proposed criteria shall be submitted to the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this subsection, and a period of forty-five days shall elapse while Congress is in session (in computing the forty-five days there shall be excluded the days in which either House is not in session because of adjournment for more than three days): *Provided, however,* That the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this subsection, after having received such proposed criteria, may by resolution in writing agreed to by such committees waive the conditions of all or any portion of such forty-five-day period.".

SEC. 314. Section 164 of the Atomic Energy Act of 1954, as amended, is amended by—

(1) striking the words "Joint Committee" the first time they appear and substituting "congressional committees which under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section,"; and

(2) striking the proviso and substituting *"Provided, however,* That the thirty-day period may be waived by resolution in writing agreed to by the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section.".

SEC. 315. Section 107(c) of Public Law 88-332 (42 U.S.C. 2204 a) is amended by—

(1) striking the words "Joint Committee" the first time they appear and substituting "congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section"; and

(2) striking the proviso and substituting *"Provided, however,* That the forty-five-day period may be waived by resolution in writing agreed to by the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section.".

SEC. 316. Section 170 i. of the Atomic Energy Act of 1954, as amended, is amended by striking the words "Joint Committee" each time they appear and substituting "congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section.".

TITLE IV—INFORMATION AND ASSISTANCE TO CONGRESSIONAL COMMITTEES

SEC. 401. (a) The Energy Research and Development Administration and the Nuclear Regulatory Commission shall keep the committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the functions of the Administration or the Commission, fully and currently informed with respect to the activities of the Administration and the Commission.

(b) The Department of Defense shall keep the committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over national security considerations of nuclear technology, fully and currently informed with respect to such matters within the Department of Defense relating to national security considerations of nuclear technology which are within the jurisdiction of such committees.

(c) Any Government agency shall furnish any information requested by the committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the development, utilization, or application of nuclear energy, with respect to the activities or responsibilities of such agency in the field of nuclear energy which are within the jurisdiction of such committees.

SEC. 402. The committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the development, utilization, or application of nuclear energy, are authorized to utilize the services, information, facilities, and personnel of any Government agency which has activities or responsibilities in the field of nuclear energy which are within the jurisdiction of such committees: *Provided, however,* That any utilization of personnel by such committees shall be on a reimbursable basis and shall require, with respect to committees of the Senate, the prior written consent of the Committee on Rules and Administration, and with respect to committees of the House of Representatives, the prior written consent of the Committee on House Administration.

SEC. 403. All records, data, charts, and files of the Joint Committee on Atomic Energy which are not transferred under section 501 of this Act are transferred to the committees of the Senate which, under the rules of the Senate, have jurisdiction over the subject matters to which such records, data, charts, and files primarily relate. Such committees of the Senate shall make available such records, data, charts, and files to other committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the subject matters to which such records, data, charts, and files relate.

TITLE V—PROTECTION OF NATIONAL SECURITY INFORMATION

SEC. 501. (a) All records, data, charts, and files of the Joint Committee on Atomic Energy relating to national security matters, including the military applications of nuclear technology, shall be transferred to the committees of the Senate which, under the rules of the Senate, have jurisdiction over the subject matters to which such records, data, charts, and files relate. In the event that any record, chart, or file shall be within the jurisdiction of more than one committee of the Senate, duplicate copies shall be provided upon request.

(b) The committees of the Senate which receive the records, data, charts, and files of the Joint Committee on Atomic Energy under subsection (a) shall make available such records, data, charts, and files to the committees of the House of Representatives which, under the rules of the House, have jurisdiction over the subject matters to which such records, data, charts, and files relate.

(c) The committees of the Senate which receive the records, data, charts, and files of the Joint Committee on Atomic Energy under subsection (a) may utilize the Office of Classified National Security Information established by section 502 of this Act or make other suitable arrangements for safeguarding such records, data, charts, or files.

SEC. 502. (a) There is established for the period beginning on the effective date of this Act and ending March 31, 1979, an office of the Senate to be known as the "Office of Classified National Security Information" (hereafter in this section referred to as the "Office"). The Office shall be under the policy direction of the majority leader, the minority leader and the chairman of the Committee on Rules and Administration of the Senate, and shall be under the administrative direction and supervision of the Secretary of the Senate. The Office shall have the responsibility for safeguarding such restricted data and such other classified information as any committee of the Senate may from time to time assign to it.

(b) The Office shall have the authority—

(1) upon application of any committee of the Senate, to perform the administrative functions necessary to classify and declassify information relating to the national security considerations of nuclear technology in accordance with guidelines developed for restricted data by the responsible executive agencies;

(2) to provide appropriate facilities for hearings of committees of the Senate at which restricted data or other classified information is to be presented or discussed; and

(3) to establish and operate a central repository in the United States Capitol for the safeguarding of restricted data and other classified information for which such Office is responsible.

(c) The Secretary of the Senate, with the approval of the majority leader, the minority leader, and the chaiman of the Committee on Rules and Administration of the Senate, is authorized to appoint and fix the compensation of not more than two professional staff members and three clerical staff members for the Office. One of such professional staff members may be paid compensation at a rate not to exceed the rate provided for the two employees of a standing committee of the Senate referred to in section 105(e)(3)(A) of the Legislative Branch Appropriation Act, 1968, as amended and modified (2 U.S.C. 61–1), and the other professional staff member may be paid compensation at a rate not to exceed the rate provided for professional staff members of a standing committee of the Senate by section 105(e)(1) of such Act. The clerical staff members may be paid compensation at a rate not to exceed the rate provided for the four clerical assistants of a standing committee of the Senate referred to in section 105(e)(2)(A) of such Act.

(d) The salaries and expenses of the Office shall be paid from the contingent fund of the Senate pursuant to appropriations made to the contingent fund for such purpose. Until funds are first so appropriated, such salaries and expenses shall be paid from the contingent fund out of funds appropriated ior "Miscellaneous Items". Such salaries and expenses shall be paid out of the contingent fund upon vouchers approved by the Secretary of the Senate, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate.

(e) Within thirty days of the date of enactment of this Act, the Office shall furnish the Committee on Armed Services, the Committee on Energy and Natural Resources, the Committee on Environment and Public Works, and the Committee on Foreign Relations of the Senate with a listing of all those records, data, charts, and files of the Joint Committee on Atomic Energy which are to be transferred to such committees under section 501(a) of this Act indicating which committee(s) may have jurisdiciton over each item. The chairman of the committees involved shall be responsible for resolving any case of doubt regarding jurisdiction over particular records, data, charts, or files.

TITLE VI—COMMITTEE STAFF

SEC. 601. For purposes of this title, the term—

(1) "effective date" means the effective date of title II of this Act;

(2) "eligible staff member" means an individual who is a member of the staff of the Joint Committee on Atomic Energy on the day prior to the effective date and has served continuously (except for any period of four days or less) as a member of the staff of the Joint Committee on Atomic Energy since October 1, 1976;

(3) "new committees" means the Committee on Armed Services, the Committee on Energy and Natural Resources, the Committee on Environmental and Public Works, and the Committee on Foreign Relations of the Senate; and

(4) "transition period" means the period beginning on the effective date and ending June 30, 1977, or, if later, on the ninetieth day after the effective date.

SEC. 602. (a) On the effective date, those eligible staff members who are required to carry out the provisions of section 502 of this Act, as designated by the majority and minority leader and the chairman of the Committee on Rules and Administration of the Senate in accordance with such section, shall be transferred to the Office of Classified National Security Information.

(b) On the effective date, each eligible staff member not transferred to the Office of Classified National Security Information under subsection (a) shall be transferred to the staff of a new committee. The determination of the eligible staff members transferred to the staff of each of the new committees shall be made by the Committee on Rules and Administration in consultation with the chairmen and ranking minority members of the new committees. The chairman of each new committee (and the ranking minority member with respect to minority employees) shall notify the Secretary of the Senate of the eligible staff members transferred to that new committee.

(c) During the transition period, each eligible staff member transferred to a new committee—

(1) shall, notwithstanding the limitations contained in section 105(e) of the Legislative Branch Appropriation Act, 1968, as amended and modified, receive compensation at a rate not less than the rate of compensation such staff member was receiving on March 1, 1977; and

(2) may not be removed, except for cause, as a member of the staff of the new committee.

(d) The provisions of subsection (c)(2) shall not apply in the case of an eligible staff member who would be entitled to an annuity under section 8336(d) of title 5, United States Code, upon his involuntary removal from service as an employee of the Senate if such staff member (but for the provisions of subsection (c)(2)) would be subject to involuntary removal from such service and such staff member elects to have the provisions of this subsection apply.

SEC. 603. Not later than the effective date, the Committee on Rules and Administration shall report a resolution which authorizes expenditures out of the contingent fund of the Senate during the transition period by the new committees sufficient to enable each new committee to pay the compensation and expenses of the eligible staff members transferred to its staff under section 602.

TITLE VII—MISCELLANEOUS PROVISIONS

SEC. 701. Titles II, III, IV, and V of this Act shall take effect on the tenth day after the date of enactment of this Act.

SEC. 702. Any reference in any rule, resolution, or order of the Senate or the House of Representatives or in any law, regulation, or Executive order to the Joint Committee on Atomic Energy shall, on and after the effective date of title II, be considered as referring to the committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the subject matter of such reference.

SEC. 703. The provisions of section 502 and title VI (except section 602(c)(1)) are enacted—

(1) as an exercise of the rulemaking power of the Senate, and as such they shall be considered as part of the rules of the Senate, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of the Senate to change such rules at any time, in the same manner, and to the same extent as in the case of any other rule of the Senate.

MOTION OFFERED BY MR. PRICE

Mr. PRICE. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. PRICE moves to strike out all after the enacting clause of S. 1153 and insert in lieu thereof the text of H.R. 8542, as follows:

That the Atomic Energy Act of 1954 (Public Law 83–703), as amended, is amended to read as follows:

"CHAPTER 20. JOINT COMMITTEE ON ATOMIC ENERGY ABOLISHED; FUNCTIONS AND RESPONSIBILITIES REASSIGNED

"SEC. 301. JOINT COMMITTEE ON ATOMIC ENERGY ABOLISHED.—

"a. The Joint Committee on Atomic Energy is abolished.

"b. Any reference in any rule, resolution, or order of the Senate or the House of Representatives or in any law, regulation, or Executive order to the Joint Committee on Atomic Energy shall, on and after the effective date of this Act, be considered as referring to the committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the subject matter of such reference.

"c. All records, data, charts, and files of the Joint Committee on Atomic Energy are transferred to the committees of the Senate and House of Representatives which, under the rules of the Senate and the House, have ju-

risdiction over the subject matters to which such records, data, charts, and files relate. In the event that any record, data, chart, or file shall be within the jurisdiction of more than one committee, duplicate copies shall be provided upon request.

"SEC. 302. TRANSFERS OF CERTAIN FUNCTIONS OF THE JOINT COMMITTEE ON ATOMIC ENERGY AND CONFORMING AMENDMENTS TO CERTAIN OTHER LAWS.—

"a. Sections 201, 202, 203, 204, 205, 206, and 207 of the Atomic Energy Act of 1954, as amended, are repealed.

"b. Section 103 of the Atomic Energy Community Act of 1955, as amended, is repealed.

"c. Section 3 of the Congressional Budget Act of 1974 is amended by—

"(1) striking the subsection designation '(a)'; and

"(2) repealing subsection (b).

"d. Section 252(a)(3) of the Legislative Reorganization Act of 1970 is repealed.

"SEC. 303. INFORMATION AND ASSISTANCE TO CONGRESSIONAL COMMITTEE.—

"a. The Energy Research and Development Administration and the Nuclear Regulatory Commission shall keep the committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the functions of the Administration or the Commission, fully and currently informed with respect to the activities of the Administration and the Commission.

"b. The Department of Defense and Department of State shall keep the committee of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over national security considerations of nuclear energy, fully and currently informed with respect to such matters within the Department of Defense and Department of State relating to national security considerations of nuclear technology which are within the jurisdiction of such committees.

"c. Any Government agency shall furnish any information requested by the committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the development, utilization, or application of nuclear energy, with respect to the activities or responsibilities of such agency in the field of nuclear energy which are within the jurisdiction of such committees.

"SEC. 304. The committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the development, utilization, or application of nuclear energy, are authorized to utilize the services, information, facilities, and personnel of any Government agency which has activities or responsibilities in the field of nuclear energy which are within the jurisdiction of such committees: *Provided, however,* That any utilization of personnel by such committees shall be on a reimbursable basis and shall require, with respect to committees of the Senate, the prior written consent of the Committee on Rules and Administration, and with respect to committees of the House of Representatives, the prior written consent of the Committee on House Administration.".

Mr. PRICE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL ENERGY ACT

Mr. BOLLING. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 8444) to establish a comprehensive national energy policy.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Missouri (Mr. BOLLING).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 8444, with Mr. BOLAND in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Thursday, August 4, 1977, part III of title II was under consideration.

AMENDMENT OFFERED BY MR. CONABLE

Mr. CONABLE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CONABLE: Page 488, strike out line 18 and all that follows down through line 23 on page 512 and insert:

SEC. 2033. TEMPORARY INCOME TAX RATE REDUCTION FOR 1978.

(a) GENERAL RULE.—Section 1 (relating to tax imposed on individuals) is amended by adding at the end thereof the following new subsection:

"(f) RATE REDUCTION FOR 1978.—

"(1) IN GENERAL.—The Secretary shall prescribe tables which shall apply in lieu of the tables contained in subsections (a), (b), (c), and (d) for taxable years beginning after December 31, 1977, and before January 1, 1979.

"(2) METHOD OF PRESCRIBING TABLES.—The table prescribed by the Secretary under paragraph (1) with respect to subsection (a), (b), (c), or (d), as the case may be, shall be in the same form as the table contained in such subsection, except that—

"(A) in the case of—

"(i) subsection (a), (c), or (d), the 14, 15, 16, and 17 percent tax rates shall be reduced to 11, 13, 14, and 16 percent, respectively, and

"(ii) subsection (b), the 14, 16, 18, and 19 percent tax rates shall be reduced to 11, 14, 16, and 18 percent, respectively; and

"(B) the amounts set forth as the amounts of the tax shall be adjusted to reflect the reduction in tax rates."

(b) WITHHOLDING.—The tables prescribed under section 3402(a) of the Internal Revenue Code of 1954 which apply to wages paid during 1978 shall reflect the reduction in withholding amounts which the Secretary of the Treasury determines to be appropriate in light of the amendment made by subsection (a).

SEC. 2034. TEMPORARY INCREASE IN EARNED INCOME CREDIT.

(a) GENERAL RULE.—Subsection (a) of section 43 (relating to earned income credit) is amended by striking out "10 percent" and inserting in lieu thereof "15 percent".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1977, and before January 1, 1979.

Mr. CONABLE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CONABLE. Mr. Chairman, I have offered an amendment to replace the rebate and payment scheme recommended by the Ways and Means and ad hoc committees with a 1-year tax cut and an increase in the earned income credit which will provide lower-income taxpayers with an additional $150 of tax reduction and other taxpayers with up to $80 in tax reduction.

The details of this tax-cut proposal are in the August 1 RECORD at page 25922. I call it to the attention of my colleagues.

It is important, Mr. Chairman, to understand that the crude oil equalization tax is a consumption tax. It will increase gasoline taxes by approximately 7 cents a gallon and will be passed through by those who have to pay it in the first instance in higher prices of all goods that utilize oil. The American people will be paying a greater amount of their income for the everyday goods and services they require as a result of this and the other taxes in this energy bill.

The administration proposed and both the Ways and Means Committee and the ad hoc committee have adopted a rebate and payment scheme almost identical to that which the President earlier in the year jettisoned when it became clear that the support for the $50 rebate was marginal. The administrative difficulties associated with a $50 or a $22 rebate are horrendous. In testimony before the Committee on Ways and Means earlier this year, Treasury officials estimated that it would take several months to provide these payments in view of the fact that complex administrative procedures would have to be put in place to guard against double and triple dipping.

Let me describe what this rebate proposal is. It will amount to roughly $22 in the first year for every American, and 75 percent of it under the rebate proposal in the bill will go to taxpayers. The other 25 percent will be passed out to people on welfare, social security, SSI, and so forth, and there is a roundup provision for anybody who did not get a rebate to be able to put in for it and get it also.

This rebate of $22 will go back sometime after the collection of the money, after an administrative procedure to be sure it does not go repetitively to the same people in more than one category.

Quite frankly, it is an administrative nightmare. It amounts to such an insignificant amount of money that it represents very bad public policy, because to tax and then to return money is foolish if we can simply reduce the taxes of the American people by that amount in the first place.

My proposal would adjust the tax rates for the first four brackets, and that means that all taxpayers who are above those four brackets will participate, but it mean also that 70 percent of the value

of the tax reduction will go to people under $20,000.

It is a tax cut for all Americans who pay taxes however, and in order to insure that low-income Americans who suffer the most under this kind of tax energy policy will be reimbursed to a greater extent, we have adjusted the earned income credit by moving it from 100 to 150 percent on the first $8,000.

Mr. Chairman, I hope my colleagues will consider this seriously. It seems to me absolutely ridiculous to take money away in the wellhead tax and then return it in this kind of rebate procedure. It would make a lot more sense simply to adjust our taxes so that automatically within the withholding they will get some money back.

I have had some Members from the Northeast talk to me about my amendment. I am a Member from the Northeast who supported in the committee the home heating oil rebate which the first year amounts to 5 percent of the crude oil equalization tax revenues. It is important for them to understand this is wiped out by my proposal, but if they really believe they are going to benefit a lot from the home heating oil rebate, let me explain what that does.

The home heating oil rebate is an illegal rebate in addition to the $22. In theory those who use home heating oil are going to be paying a substantially larger part of the additional energy cost burden than others under this tax energy bill. This provision in the bill rebates 5 percent of the oil equalization tax revenues to retailers of home heating oil on condition that they flow it through to the consumers.

Now maybe that is possible, Mr. Chairman, but I would just like to see it. I think the administrative procedures for that home heating oil rebate are horrendous also. I hope people from the Northeast will understand their constituents will benefit a great deal more from a tax cut than they would from this kind of home heating oil rebate that goes to the retailers and has to be flowed through to the consumer.

The CHAIRMAN. The time of the gentleman from New York has expired.

(By unanimous consent, Mr. CONABLE was allowed to proceed for an additional 2 minutes.)

Mr. CONABLE. Mr. Chairman, it is my hope that the Members will follow the views that many of them have had in the past and reject what I think is a very ill-advised and administratively infeasible procedure for rebating a tiny portion of the added cost to the American people in this bill through a Rube Goldberg rebate scheme. It is a lot better, in my view, if we are going to have a crude oil equalization tax, and I frankly hope that will be stricken before we finish this bill, to return the proceeds to the economy in a simple way to the advantage of all taxpayers as I propose here.

Mr. Chairman, I yield to the gentleman from New York (Mr. KEMP), who has shown leadership in tax-cut proposals, who understands the economics of taxation and who has made many constructive proposals similar to this.

Mr. KEMP. Mr. Chairman, I appreciate the gentleman yielding and I commend the gentleman for his leadership of this extremely important initiative on behalf of American taxpayers.

I also congratulate my friend, the gentleman from Ohio (Mr. GRADISON) who has played such an important role in bringing this measure to the floor of the House for a vote.

Mr. Chairman, I rise in support of the Conable amendment to cut tax rates instead of the rebates proposed by this energy bill in order to disperse revenues which will be generated by the crude oil equalization tax.

As Mr. CONABLE has so ably pointed out, this entire energy bill that we have before us is essentially a tax increase bill. It proposes to raise taxes by $93 billion by 1985. The goal is to encourage energy conservation. Insofar at it achieves this goal it will be by bringing on a severe slowdown in the American economy. Therefore, the tax revenues must be returned to the people in some way that encourages production while discouraging energy use. The administration proposes rebates to accomplish this purpose which will only redistribute income.

I would have thought by now that the rebate concept would be totally discredited. The President himself bowed to this fact in April when he announced the abandonment of his earlier rebate proposal. The arguments which caused him to make this decision then are still valid.

The main problem is that there is no incentive effect from a rebate. It is simply a stimulus to demand. So on the one hand we are trying to hold down demand for energy, while doing nothing to encourage new supplies, and at the same time stimulating general demand while doing nothing to stimulate production. This is the best formula I can imagine for inflation and recession, and that is exactly what we are going to have if H.R. 8444 passes in its present form.

A better program would be to offer price incentives for energy production by dismantling the system of controls which presently exist. This is obviously not going to happen, as shown by the earlier vote on the Brown amendment. Therefore, we should at least attempt to prevent the recession which will surely result from the imposition of these vast new taxes on the American economy, which will exacerbate the already too heavy tax burden that presently exists. This tax burden, which is going up daily as the result of inflation, is the main reason for persistently high levels of unemployment and low levels of production.

A tax rate reduction is the best way to lift the burden of taxation from the economy and stimulate employment and investment. I have been speaking out in favor of this approach to the economy for some time and believe it is also appropriate here. Therefore, I urge my colleagues to support the Conable amendment and reject the administration's rebate proposal particularly as it relates to the Northeast United States.

Mr. Chairman, I want to join my friend Mr. CONABLE in saying this energy bill's rebates are an administrative nightmare and, secondly, the taxes it raises is an attempt to redistribute the people's income. This Conable-Gradison amendment seeks to lower the tax burden on the American people, particularly those in the Northeast.

Mr. Chairman, I am wholeheartedly in favor of the gentleman's amendment.

Mr. CONABLE. Mr. Chairman, may I say, the gentleman from Ohio has had a great part in developing this specific proposal. I am grateful for his help.

I yield to the gentleman from Ohio (Mr. GRADISON).

Mr. GRADISON. Mr. Chairman, I thank the gentleman for yielding.

I want to associate myself with the remarks of the gentleman.

In my opinion, the rebate scheme before us is really a warmed-over version of the thoroughly discredited rebate scheme which the President proposed and later withdrew earlier this year. The difference is only in the numbers.

I think we would be far better off in this instance to accept the final judgment of the President who withdrew an almost identical rebate scheme.

Mr. CONABLE. Mr. Chairman, that we tried to rebate twice the amount of money. Yet the administrative problems are just as great for the lesser amount.

Mr. GRADISON. That is right, for the purpose inherent in that scheme.

Mr. ULLMAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this matter came up in the Committee on Ways and Means. We discussed it very thoroughly. It was turned down by the committee. I think it would be a grave mistake, by making this kind of move in this bill, to preempt the basic tax reform proposals and the adjustments in rates that are going to be coming to Congress later this year in a Presidential recommendation.

Let me read very briefly from a letter from the Assistant Secretary of the Treasury regarding some of the problems of this approach. He says;

DEPARTMENT OF THE TREASURY,
Washington, D.C., August 4, 1977.

The Honorable AL ULLMAN,
Chairman, Committee on Ways and Means, House of Representatives, Washington, D.C.

DEAR MR. ULLMAN: The Administration strongly opposes the Conable amendment which would substitute an income tax rate reduction in the first four taxable brackets and an increase in the earned income credit for 1978 for the Ways and Means Committee plan of returning the crude oil equalization taxes to all Americans.

There are many difficulties with the Conable amendment, which suggests that it has not been adequately worked out. For example, about 59 percent of the relief under the Committee bill would go to those with incomes below $10,000, while the Conable amendment would only give this group 32 percent of the relief. On the other hand, the Conable amendment gives 25 percent of the relief above $20,000, while the Committee bill provides only about 14 percent of the relief above this income level.

The Committee amendment in effect returns the amount collected from the oil equalization tax on the basis of the number of adult individuals or taxpayers involved. The Conable amendment departs entirely from this concept and returns funds to consumers based upon income taxes they have paid in certain tax brackets.

The Conable amendment also eliminates the provision for a heating oil rebate for homes, which will remove relief provided

after careful study by the Committee as to the need for special attention in this area.

The Conable amendment also provides tax relief without any regard to the interrelationship of the rate reductions proposed and the tax reform proposals to be presented this fall. The earned income credit proposal, for example, presents high marginal rate problems through the area where the credit is recaptured for many taxpayers not presently affected.

We believe the amendment is undesirable and urge that it not be adopted.

Sincerely,

LAURENCE N. WOODWORTH,
Assistant Secretary.

Mr. Chairman, it is my hope that we can come to an expeditious vote on this matter. The rebate proposals in the bill are well worked out.

They are equitable. They spread the benefits to all American consumers in a meaningful way. In my judgment, at this time, to reject that formula which has been so well worked out would be a grave mistake. I urge the members of the committee to vote down the amendment.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. ULLMAN. I am happy to yield to my distinguished friend from New York.

Mr. CONABLE. Is it not true, however, that the rebate proposal gives $22 back to the taxpayers, regardless of income, which is a little less than 50 cents a week in withholding, and to that extent it is considerably less a part of a progressive system than the proposal which I have made?

Mr. ULLMAN. Well, let me say to the gentleman that the impact of the increased costs of heating oil and gasoline affect all the people of this country. In the committee proposal, the rebate provision spreads the revenue raised by the crude oil tax as broadly as we can to the people who are impacted by the higher prices. I think that is the proper procedure, rather than trying to do it in tax rates, which puts it back much more unevenly and not nearly as fairly toward the poor consumers who are most harshly impacted by the increased cost of energy.

Mr. CONABLE. If the gentleman will yield further, may I say that SSI and social security are on a cost-of-living basis, and to the extent that increased energy costs go into the cost of living they will be reflected in increases for those beneficiaries. It is virtually impossible, however, to administer this rebate without some sort of double dipping occurring.

I find it remarkable that the Secretary of the Treasury would think that any across-the-board tax cut is more difficult to administer than the kind of Rube Goldberg rebate procedure which involves $22, as opposed to the $50 rebate procedure that was jettisoned by the President, at least in part because it was unworkable.

The CHAIRMAN. The time of the gentleman from Oregon has expired.

(By unanimous consent Mr. ULLMAN was allowed to proceed for 2 additional minutes.)

Mr. ULLMAN. Just to comment, first the cost-of-living increases in social security are there to meet the increases in the cost of food, the cost of housing, and all the costs across the board. This tax is a cost item on top of that, and so we think it is extremely reasonable and proper that we return this tax to those people who are on social security and to all the people across this country, as broadly as we possibly can. It is a procedure that can be used under computerized technology now. It has been all worked out so that it is a case of punching a lot of buttons, and out go the checks. We have a cross-check to eliminate double dipping. It has been well worked out, and I think it is a mechanism that will put these benefits back in the body politic in a proper way to meet this increased cost.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. ULLMAN. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, I am confused about the charts that are on page 60 and the following pages in volume I of the National Energy Act report of the ad hoc committee on energy. How have these been changed in any way by the action that has been taken by this body during our 3 days of consideration? Do I properly understand that, again referring to page 60, the only real change we have made is the total impact of title II, the transportation tax provisions, and that this figure is now not $69 billion net revenue impact, but rather $40 billion less than that; so that the net impact of the taxes in this program are $53 billion to the Federal Treasury? Is that correct?

Mr. ULLMAN. I would say to the gentleman that in the report of the Committee on Ways and Means, on page 28, there is a table that now reflects the revenue impact.

Under transportation, we have an amount of $29,488 million. And that, with the other revenues, is reflected in the total impact of $53,944 million. That is where we are.

Mr. BROWN of Ohio. So, in effect, right now what this bill has in it is a total net impact of taxes taken out of the body politic of $54 billion. This is after the rebate and everything else. So that is a total plus for the Federal Government of $54 billion taken from the American people in the next 8 years.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. ULLMAN) has expired.

(By unanimous consent, Mr. ULLMAN was allowed to proceed for 1 additional minute.)

Mr. BROWN of Ohio. If the gentleman will yield further, is that correct? I do not want to make the wrong assumption here if that is not right.

Mr. ULLMAN. Let me say that the latest computation varies just very slightly from the Ways and Means Committee. We have made a few additional changes which result in total figures, in place of $54, $52.9 billion, about $53 billion for the total revenue impact.

Mr. BROWN of Ohio. But that is after the rebate; is that correct?

Mr. ULLMAN. Yes. Remember, the rebates are only for 1 year. This $52 billion to $53 billion reflects the whole package for 8 years, and the rebate provisions in the bill only apply to the 1 fiscal year. Therefore, yes, this does exclude that amount of rebate for 1 year.

Mr. BROWN of Ohio. So the $53 billion is the net tax take after all of the rebates that we are enacting here; is that right?

Mr. ULLMAN. Yes. But let me say this: It is the full intention—and I think the Committee on Ways and Means so indicated—that we only wanted to move a rebate for 1 year so that we could better assess how best to return the tax most equitably after that 1 year. But it is the intent to go on in our actions in the tax reform bill this fall and next year and provide rebates or tax adjustments that are proper and get it all back into the economy.

Mr. BROWN of Ohio. If the gentleman will continue to yield, I understand that the gentleman met with the President on the welfare plan, and I read this little item in the paper this morning which fascinated me. It said:

> One of the two-penny mysteries around town surrounds President Carter's decision to announce his new welfare plan Saturday—dog days in August, when Congress will be out of town.
>
> That little mystery was unraveled yesterday.
>
> House Speaker Thomas P. (Tip) O'Neill (D-Mass.) was responsible. The welfare plan, he told the administration, is certain to upset a lot of Democrats in Congress. If it were announced before they got out of town tonight for a long recess, O'Neill warned there might be enough defections to defeat Carter's energy bill.
>
> Heeding that message, Carter decided to drop his plan on the country on Saturday, when Members of Congress will be scattering to the four winds.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. ULLMAN) has again expired.

(On request of Mr. BROWN of Ohio and by unanimous consent, Mr. ULLMAN was allowed to proceed for 2 additional minutes.)

Mr. BROWN of Ohio. If the gentleman will yield further, I would like to ask the gentleman if he has had an opportunity to be privy to the welfare plan, whether other rebates of this energy tax of $53 billion are anticipated, or whether it will just be recovered to the Treasury, and if any of those rebates relate to the welfare plan that the President is not going to announce until we are out of town because it could impact on this bill.

Mr. ULLMAN. Let us fully understand how that $53 billion comes about. $21 billion of it comes through the extension of gas tax.

Mr. BROWN of Ohio. I think the gentleman misunderstood me.

Mr. ULLMAN. That is properly disposed of in the trust fund through September 1979 and in the highway programs.

So we are not looking at any rebate of this $21 billion. That is an extension of the gas tax that would expire had we not extended it.

Mr. BROWN of Ohio. Mr. Chairman, let me ask the gentleman this: Does that go into the highway trust fund?

I was under the impression it did not.

Mr. ULLMAN. We have not extended the highway trust fund, but we have extended the tax. We just assume that

when Congress extends the trust fund, that is where it will go. So I think it is not proper that we take those gas tax funds and put them in a rebate proposal.

That leaves $26 billion as the amount of revenue raised by the equalization tax, and we expect that that $26 billion will be fully rebated in the economy. We have only done it for 1 year in this bill, but I think we have done it wisely, with the idea that we can assess how it works and extend it or change it in any way that we consider most proper. We fully intend to do that.

Mr. BROWN of Ohio. Mr. Chairman, if the gentleman will continue to yield, there is a paragraph in a little story that appeared in the Post yesterday that says that, "Other HEW suggestions for saving money included gains through moves to reduce welfare fraud and abuse plus revenues from wellhead tax revenues in Carter's new energy program."

My question really is this: Was Mr. Schlesinger right a couple of months ago when he said that revenues generated from this tax will come back in the welfare program?

I thought the gentleman discussed this with the President, and I wondered if he could advise us as to what the plan is.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. ULLMAN) has expired.

(By unanimous consent, Mr. ULLMAN was allowed to proceed for 1 additional minute.)

Mr. ULLMAN. Mr. Chairman, I hope we can conclude this debate very quickly.

Let me say that there is certainly no intention on the part of the chairman of the Committee on Ways and Means to use these revenues for general welfare reform. We think the whole theory and composition of the program is built around an equalization tax that will result in an increase in the cost of energy, and that these costs will then be rebated to the body politic in the most equitable way possible. We think the formula we have devised will accomplish that purpose.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield further?

Mr. ULLMAN. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, the gentleman has told me his purpose. Can the gentleman tell me what the President's position is?

Is the President's proposal going to be to rebate it through welfare?

Mr. ULLMAN. Mr. Chairman, I did not read the article in the paper to which the gentleman referred. I have not discussed this with the President, and I have no way that I can speak for him.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. ULLMAN. I yield to the chairman of the ad hoc committee.

Mr. ASHLEY. Mr. Chairman, I think it is very important to understand the tax implications to which the gentleman from Ohio (Mr. BROWN) has been alluding.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. ULLMAN) has again expired.

(On request of Mr. ASHLEY and by unanimous consent, Mr. ULLMAN was allowed to proceed for 1 additional minute.)

Mr. ASHLEY. Mr. Chairman, will the gentleman yield further?

Mr. ULLMAN. I yield to the gentleman from Ohio.

Mr. ASHLEY. Mr. Chairman, If I may continue, it is a fact that $52.9 billion will be generated in taxes by virtue of this legislation.

Mr. BROWN of Ohio. Mr. Chairman, if the gentleman will yield, is that new taxes?

Mr. ASHLEY. That is correct. That will take place from 1978 through 1985.

$21.2 billion of this $52.9 billion results from the extension of the gasoline tax. This leaves $31.7 billion, of which the crude oil equalization tax rebates will make up $26.6 billion.

What this means is that the net additional cost of the program over 8 years is $5 billion.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. ULLMAN. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, the gentleman said that was the figure for the crude oil equalization tax rebates. I do not think that is correct. I think that that is the net, after the rebates, of what the crude oil equalization tax takes in. Is that right?

The CHAIRMAN. The time of the gentleman from Oregon (Mr. ULLMAN) has again expired.

(By unanimous consent, Mr. ULLMAN was allowed to proceed for 2 additional minutes.)

Mr. ASHLEY. Mr. Chairman, will the gentleman yield so I may answer the gentleman from Ohio (Mr. BROWN).

Mr. ULLMAN. I yield to the gentleman from Ohio.

Mr. ASHLEY. Mr. Chairman, we have covered the point, and that is to say that the Committee on Ways and Means acted with respect to the first year rebates. The committee did not address itself to the later year rebates.

Mr. BROWN of Ohio. Mr. Chairman, if the gentleman will yield, that is really what I am trying to find out.

Are there any plans for rebates? I gather that there are not, from what I have been told.

So the net tax impact of this is $53 billion, unless we decide to extend the Highway Trust Fund, in which case I understand, from what the committee chairman, the gentleman from Oregon (Mr. ULLMAN), said, that that action would have to be taken by the House of Representatives at a later date.

If we put all the revenues from transportation taxes into the Highway Trust Fund, we would still have some $32 billion that will go somewhere, although nobody really knows what is going to happen to that, unless the stories in the Post about putting it in welfare are correct.

I just do not know whether they are correct. That is what I am asking because the President has not consulted with me on this matter.

Mr. ULLMAN. Let me say to the gentleman that the Committee on Ways and Means will bring proposals to the Congress to properly handle the balance of the equalization tax.

We think that the initial 1-year proposal is going to be a good model, and it may very well be that the rebate will be the model which we will develop further.

Let me remind the gentleman that the Conable amendment we are discussing now provides for only a 1-year reduction of the tax rate. It leaves it open to the committee to bring back a tax change or the rebate proposal for the rest of the period of the crude oil equalization tax.

I would add that it is the intention of the chairman of the Committee on Ways and Means to have the committee develop a proper rebate system, apart from welfare and everything else, that would put back in the economy the amount of the equalization tax.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. ULLMAN) has expired.

(On request of Mr. BROWN of Ohio and by unanimous consent, Mr. ULLMAN was allowed to proceed for 1 additional minute.)

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield further?

Mr. ULLMAN. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, I appreciate the gentleman's taking this time to respond.

I just want to ask the gentleman from Oregon (Mr. ULLMAN) one more question.

In 1972, our foreign oil imports were about 27 or 29 percent of our total consumption. They cost us $3 billion.

Two years later, after the Arabs had raised the price, they cost us about $24 billion. That was a $21 billion impact on the economy over 2 years.

As I understand this proposal, there will be a $53 billion tax over a period of 5 years.

I am just curious to know, since many of us thought that the Arab boycott price increase helped create that recession that we had after the oil shortages and the high prices, whether the economic impact of this is thought to be in that same range.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. ULLMAN) has again expired.

(By unanimous consent, Mr. ULLMAN was allowed to proceed for 1 additional minute.)

Mr. ULLMAN. Mr. Chairman, to answer the gentleman's question, to get the figures in proper focus, we should not include the $21 billion gas tax, which is an extension of what is now in place. So, we have to forget about the $53 billion figure and consider $31 billion.

Of that, there is $5 billion which will be offset to pay for the strategic petroleum reserve storage program and some of the other increased costs that will result from the energy program.

Therefore, $26 billion is the amount that we fully intend to rebate and put back into the economy, either under formulas in this bill or under other formulas which we expect to bring to the Congress

next year. Therefore, we expect the equalization tax to have a neutral impact on the economy, and we expect, insofar as possible, that we will be able to return to the American people the increased costs that they are going to have.

Mr. BROWN of Ohio. Mr. Chairman, I thank the gentleman.

Mr. STEERS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I wonder whether the chairman of the Committee on Ways and Means would respond to a question or two.

The question I have relates to the gentleman's statement that adopting the Conable amendment would preempt action by the Committee on Ways and Means. I want to point out to the chairman of that committee that there are only two possibilities really. Either the Committee on Ways and Means will come in with a key administration plan before the end of this year or it will not. If it does not come in with a plan before the end of this year, this House will either adopt it or will not. If it does adopt it, of course, it would very readily preempt the action taken today on the Conable amendment.

I therefore would ask the chairman if he would not admit and acknowledge that, in fact, any action taken on the Conable amendment can only be effective, on the presumption I have been making, if the action by the Committee on Ways and Means on an administration proposal does not occur until after the first of the year. In that case the Conable amendment would be very much in order and would not require all this exhaustive examination that the chairman has thought necessary.

Mr. ULLMAN. Mr. Chairman, let me say in reply that there have been altogether too many changes in tax procdures. What we believe is the proper thing to do is to adopt the rebate system this fall then look at the rate structure in the tax reform bill and make our basic adjustment in rates. If now, for a 1-year period, we change the rate structure, then that is just going to compound our problem in looking toward the long range changes this fall and will result in changes each year. It is our hope we can make the changes in an orderly way. We can make the rebate, which is eminently sensible and has been worked out very well. This fall when we get the tax reform recommendations we can work on the whole rate structure and examine it properly and next year bring in the basic adjustment and rates that we think are due the American people.

Mr. STEERS. Mr. Chairman, I would ask the gentleman from Oregon did the gentleman say that he will be bringing in a tax proposal next year, after the end of this year, and therefore it will not be effective and cannot possibly be effective until after 1978?

Mr. ULLMAN. Let me say, if the gentleman will yield further, it is our hope that we can bring to the Congress next year, early, fairly early in the year, a basic tax reform package that will include the desired adjustment in rates that we think are needed in the tax reform.

Mr. STEERS. But will it be effective for 1978?

Mr. ULLMAN. It will, of course, not be. I cannot, of course, obviously, speak to that in all finality but it would most likely impact in calendar year 1979.

Mr. STEERS. I thank the gentleman. The gentleman has answered my question.

Mr. ULLMAN. But it would be a lot better than to adjust the rate for next year and for the following year again. I think we should do it in one action.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. STEERS. I yield to the gentleman from New York

Mr. CONABLE. Mr. Chairman, in reponse to what the chairman, the gentleman from Oregon (Mr. ULLMAN), said that my amendment would result in some tinkering with the tax law, I think that is an odd comment to make in an energy tax bill that adds five new taxes and nine additional tax preferences.

I would like to say that my proposal is a very simple one, a 1-year tax rate cut as opposed to a really complicated rebate proposal which will send $22 back across the board to the American people.

Mr. STEERS. I thank the gentleman from New York.

Mr. CONTE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I rise in strong opposition to the amendment offered by the gentleman from New York (Mr. CONABLE).

Mr. Chairman, I do so because the effect of this amendment would be to strike the provision mandating a dollar-for-dollar rebate for the home heating oil consumer. This exemption from the full effect of the crude oil equalization tax, in the form of the rebate, was adopted by both the Ways and Means Committee and the Ad Hoc Energy Committee, both after lengthy debate.

Mr. Chairman, I would first like to correct a misconception surrounding this issue that the tax will only benefit the heating oil consumers of New England. While it is true that the New England consumers of this expensive heating fuel stand to benefit, it is also true that consumers in the remaining States, and especially in the Mid-Atlantic, North Central, and South Atlantic regions will also benefit. In total, 19 States will derive major relief from this provision of the ad hoc committee's bill.

Mr. Chairman, a recently released study compiled by the Bureau of Mines found the total amount of savings to these already overburdened heating oil customers would be $1.406 billion in 1980. Additionally, the Federal Energy Administration just released their study which shows that the rebate, in 1985, would have a greater impact on the consumers in the New York, New Jersey area and in the Midwest area than it would have on New England. I hope we can lay the misconception to rest, once and for all.

Mr. Chairman, I strongly support the proposal in the energy bill which grants the exemption from the tax for these home heating oil consumers. But it is not accurate to say that these consumers will receive a special benefit, direct from Washington, assuming this amendment is defeated, since these consumers have been and will be saddled with high energy costs for years to come. This amendment would, in essence, allow these "captive consumers" to retain a stable price level, while the other users of petroleum products would experience some cost increases. But, make no mistake about it, the cost to these other consumers will, in no way, be as high as those borne by the heating oil consumer. Without this dollar-for-dollar rebate, the home heating oil consumer will be paying an average of 20 cents more per gallon by 1980, than home heating consumers of natural gas, on a Btu equivalent.

Mr. Chairman, the President supports this proposal and opposes the amendment now before this body. In fact, the President stated in his energy message to Congress last April that—

> Home heating oil users would receive an additional share of the equalization tax as a dollar-for-dollar reduction in the price when they buy fuel oil.

The proposal contained within the energy bill accomplishes that stated goal.

Finally, Mr. Chairman, I was pleased to hear the President state that one of the cornerstones of his comprehensive national energy policy was the assurance to the public that the policies are equitable across the country, and that the special needs of special regions are met. The amendment now before us will get that cornerstone, and thus we will revert back to the previous policies of forcing some groups of individuals to pay exorbitant prices while others reap the benefits of this sacrifice. I trust this body does not want to go on record in support of such a policy. I therefore, urge my colleagues to oppose this amendment, in the interest of equity.

Thank you, Mr. Chairman.

Mrs. HECKLER. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentlewoman from Massachusetts.

Mrs. HECKLER. I thank the gentleman for yielding.

I would like to congratulate the gentleman in the well on the validity of his statement and his leadership in this area over the many years during which he has served the Congress. I wish to identify myself with the contents of his remarks.

Mr. CONTE. I thank the gentlewoman.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from New York.

Mr. CONABLE. I thank the gentleman for yielding.

I trust the gentleman understands that 5 percent of the proceeds of wellhead tax will be remitted to the retailers of home heating oil and not to the consumers. There is going to be a very serious administrative problem in assuring that the benefits flow through the gentleman's constituents, and then it can be only to the extent of one-twentieth of the added cost put on them by this crude oil tax.

Mr. CONTE. I feel fairly confident about this. We have met with the representatives of the retailers, and I think we have this thing worked out where it will be passed on to the user of home heating oil.

Mr. TSONGAS. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Massachusetts.

Mr. TSONGAS. I thank the gentleman for yielding.

I would like to concur in the statements made about the gentleman from Massachusetts describing his activities over the years and congratulate him on the position he has taken.

Mr. CONTE. I thank the gentleman.

Mrs. HECKLER. Mr. Chairman, I must support the rebate for those who use heating oil in their residences. Any amendment which would strike that rebate would work an inequity against those homeowners who must rely on oil, instead of natural gas, to heat their homes.

The overall costs of the crude oil equalization tax are staggering. Total collections of the wellhead tax on crude oil will come to $163 billion for the period between 1978 and 1985. Even if we take into consideration the rebate, there is still a $40.8 billion cost to the public.

The overall rebate of the crude oil equalization tax will spread across the country on an equal basis. The same formula would apply under the Conable amendment, except that there would be some preference given to low-income individuals.

The inequity of these two methods lies in the fact that those who use oil to heat their homes pay more for oil and therefore bear a greater share of the equalization tax than do those who use natural gas.

Natural gas is now about 10 cents cheaper per unit when compared with heating oil. Homeowners who use oil are not paying 10 cents more per gallon than those who use natural gas. Under the equalization tax, they will pay an additional 10 cents per gallon, for a total of 20 cents over the costs of those who use natural gas.

Yet, under the general rebate plan—and under this amendment—these homeowners receive no more than those who use natural gas.

The average heating oil bill per season for a typical residential customer is $600. The crude oil equalization tax would increase that bill by 23 percent, or about $140. Under the heating oil rebate this customer will be refunded, dollar for dollar, the costs of this tax. Under this amendment, the tax cut to the customer will only amount to $20 or $25 per family.

This will penalize the heating oil customer to the tune of $100 or more per year. And I do not believe these homeowners should be penalized merely because they use—and have used for years—heating oil instead of natural gas.

As my distinguished colleague knows so well, users of heating oil are concentrated in the Northeastern, North Central, and Mid-Atlantic States. That fact is true, not because these users prefer heating oil, but because it is the fuel which is most abundant.

Natural gas is not available in most of these areas, but must be sent thousands of miles through pipelines. Heating oil is more readily available and therefore, that is the fuel which has been used.

The costs of heating a typical family home during a hard winter is burdensome enough without imposing a system that would add $100 or more to each family's heating bill.

I feel I must oppose this amendment on the grounds that it would be excessively burdensome to one type of taxpayer—those who already pay more for heating each year. I urge the Members to oppose this amendment and avoid this inequity.

Mr. BOLAND. Mr. Chairman, I do want to go on record as opposing the Conable amendment. I want to emphasize that a home heating oil rebate is absolutely necessary if the energy conservation provisions of this bill are going to work.

Many Members have seen the data that has been prepared by both the Ways and Means Committee and by the Federal Energy Commission. For example, the annual homeowner cost increase resulting from the crude oil equalization tax in 1980 will be $335,000,000 per year for New York State alone. The total for the six New England States will be $407,000,000. The North Central States cost for 1980 will be $320,000,000. It does not seem to me that there is any concentration of this cost one area. Everybody is bearing part of the burden. Consequently, a home heating oil rebate does not unduly favor one region over another.

According to FEA figures for 1985, the rebate to New England will only be 19 percent of the total U.S. rebate. The Mid and South Atlantic States will receive 21 percent of the rebate, and the Midwest, 22 percent of the rebate. Of course, Mr. Chairman, the Southwest States will receive only a small percentage of the total U.S. rebate, but those same States will consume only a minute fraction of the home heating oil used in this country. The home heating oil rebate revision is not intended to be a Federal giveaway program.

It is intended, however, to rebate part of the equalization tax to those areas most severely affected by high home heating oil costs. The legislation as written fairly distributes the rebate. No one area is favored unjustly. Mr. Chairman, the argument that the rebate is intended for the benefit of any one area just does not hold water.

Again, I want to stress to the Members we are considering a comprehensive program here. The home heating oil rebate is an absolutely essential element of that package. If we are going to have a crude oil equalization tax—and I believe we must—then we must also make provisions for rebating part of the revenues raised from that tax to those who by reason of geography or climate are in a more disadvantageous energy position than others. I urge the defeat of this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. CONABLE).

The question was taken; and the Chair announced that he was in doubt.

RECORDED VOTE

Mr. CONABLE. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 175, noes 232, not voting 26, as follows:

[Roll No. 508]

NOT VOTING—26

Andrews, N.C.	Flippo	O'Brien
Bellenson	Hawkins	Pease
Burke, Mass.	Holt	Pepper
Collins, Ill.	Koch	Quie
Conyers	Lloyd, Calif.	Rhodes
Dent	McCloskey	Seiberling
Dornan	McKinney	Teague
Duncan, Oreg.	Michel	Young, Alaska
Fascell	Mitchell, Md.	

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Burke of Massachusetts against.

Mr. Rhodes for, with Mr. Hawkins against.

Mr. O'Brien for, with Mr. Mitchell of Maryland against.

Mr. Michel for, with Mr. Pepper against.

Ms. Holt for, with Mr. Seiberling against.

Mr. SMITH of Iowa changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. The Clerk will designate the heading of the part now pending.

The Clerk read as follows:

Page 513, line 1, part IV—excise tax on business use of oil and natural gas.

(Part IV of title II reads as follows:)

PART IV—EXCISE TAX ON BUSINESS USE OF OIL AND NATURAL GAS

SEC. 2041. EXCISE TAX ON BUSINESS USE OF OIL AND GAS.

(a) IN GENERAL.—Chapter 45 (as added by section 2031(a)) is amended by adding at the end thereof the following new subchapter:

"Subchapter B—Tax on Business of Oil and Gas; Rebates

"Part I. Tax on business use of oil and gas.

"Part II. Credits against section 4991 tax.

PART I—TAX ON BUSINESS USE OF OIL AND GAS

"Sec. 4991. Imposition of tax.

"Sec. 4992. Taxable use defined.

"Sec. 4993. Tiers; downward reclassification.

"Sec. 4994. Amount of natural gas tax.

"Sec. 4995. Definitions and special rules.

"SEC. 4991. IMPOSITION OF TAX.

"(a) IN GENERAL.—There is hereby imposed a tax on each taxable use of oil or natural gas.

"(b) AMOUNT OF TAX ON OIL.—The amount of the tax imposed by subsection (a) with respect to oil shall be determined in accordance with the following table (adjusted in the case of calendar year 1981 and thereafter for the inflation adjustment provided in subsection (d)):

"If the taxable use occurs during calendar year—	The tax per barrel is— Tier 1	Tier 2	Tier 3
1979	$.30	$.30	None
1980	.60	.60	None
1981	1.00	1.00	None
1982	1.00	1.45	None
1983	1.00	2.00	$1.50
1984	1.00	2.50	1.50
1985 or thereafter	1.00	3.00	1.50

"(c) AMOUNT OF TAX ON NATURAL GAS.—

"(1) TIER 1 AND TIER 2.—The amount of the tax imposed by subsection (a) with respect to each million Btu of taxable use of natural gas which is classified in Tier 1 or Tier 2 is the excess (if any) of—

"(A) the natural gas target price per million Btu for the calendar year (determined under section 4994(a)) which is applicable with respect to such gas, over

"(B) the user acquisition cost per million Btu for such gas (determined under section 4994(d)).

"(2) TIER 3.—The amount of the tax imposed by subsection (a) with respect to a taxable use of natural gas which is classified in Tier 3 shall be determined in accordance with the following table (adjusted in the case of the calendar year 1981 and thereafter for the inflation adjustment provided in subsection (d)):

"If the Tier 3 taxable use ocurs during calendar year	The tax per million Btu of taxable use is—
1979	None
1980	None

"If the Tier 3 taxable use occurs during calendar year	The tax per million Btu of taxable use is—
1981	None
1982	None
1983	$.55
1984	.65
1985 or thereafter	.75

For cap on a Tier 3 taxable use of natural gas, see section 4994(f).

"(d) INFLATION ADJUSTMENT.—The inflation adjustment for any calendar year is the percentage by which—

"(1) the implicit price deflator for the gross national product for the preceding calendar year (as shown in the first revision thereof), exceeds or is less than

"(2) the similar deflator for 1979 (as shown in the final revision thereof).

"(e) ROUNDING.—If, but for this subsection—

(1) the amount of any per barrel tax under subsection (b), or

"(2) the amount of any tax per million Btu under subsection (c),

would include a fraction of a cent, such fraction shall be rounded to the nearest whole cent (or, in the case of ½ cent, rounded upwards to the nearest whole cent).

"(f) LIABILITY FOR TAX.—The tax imposed by this section shall be paid by the user.

"(g) TAX DUE ON JULY 1 OF FOLLOWING YEAR—The tax imposed by this section for any calendar year shall be paid on or before July 1 of the succeeding year.

"(h) AUTHORITY OF PRESIDENT TO SUSPEND IMPOSITION OF TAX.—

"(1) GRANT OF AUTHORITY.—If the Presi-

dent determines that the imposition of the tax imposed by subsection (a) would have an adverse economic effect, he may submit to the Congress a suspension plan providing for the suspension of part or all of such tax for the period (not exceeding 1 year) specified in the plan.

"(2) PLAN MUST STATE CIRCUMSTANCES.—Any plan submitted under paragraph (1) shall set forth the circumstances leading to the submission of the plan and the considerations which the President took into account in formulating the scope and duration of the plan.

"(3) TAKING EFFECT OF PLAN.—A suspension plan described in paragraph (1) shall take effect only if—

"(A) such plan is submitted to the Congress in accordance with section 2081(a) of the Energy Tax Act of 1977, and

"(B) before the close of the 15th day (as defined in section 2081(c)(5) of such Act) after the day on which such plan is delivered to the Congress, neither the House of Representatives nor the Senate disapproves such plan in accordance with the procedures set forth in section 2081(b) of such Act.

"SEC. 4992. TAXABLE USE DEFINED.

"(a) IN GENERAL.—For purposes of this part, the term 'taxable use' means any use (in the United States) as a fuel in a trade or business. Such term does not include—

"(1) any exempt use, and

"(2) so much of what would (but for this paragraph) be taxable use during the calendar year as does not exceed the exempt amount for the calendar year (determined under subsection (c)).

"(b) EXEMPT USE.—

"(1) IN GENERAL.—For the purposes of subsection (a), the term 'exempt use' means—

"(A) use in an apartment, hotel, motel, or other residential facility,

"(B) use in a vehicle, aircraft, or vessel, or in transportation by pipeline,

"(C) use on a farm for farming purposes (within the meaning of section 6420(c)),

"(D) use in—

"(i) a shopping center,

"(ii) an office building,

"(iii) a wholesale or retail establishment or

"(iv) any other facility which is not an integral part of manufacturing, processing, or mining,

"(E) use in the exploration for, or the development, extraction, transmission, or storage of, crude oil, natural gas, or natural gas liquids, and

"(F) any exempt process use (within the meaning of paragraph (2)).

"(2) EXEMPT PROCESS USE DEFINED.—For purposes of this subsection, the term 'exempt process use' means the use of oil or natural gas in any manufacturing process where there is no substitute fuel—

(A) which may be used without materially and adversely affecting the manufacturing process or the quality of the manufactured goods, and

"(B) the use of which is economically and environmentally feasible.

Such term does not include any use in a boiler or in a turbine or other internal combustion engine. For purposes of this paragraph, the 'substitute fuel' means any fuel other than oil and natural gas.

"(3) USE PRECLUDED BY FEDERAL OR STATE AIR POLLUTION REGULATIONS.—

"(A) IN GENERAL.—For purposes of subsection (a), the term 'exempt use' includes any use of oil or natural gas in a facility if—

"(i) the use of coal in such facility is precluded by Federal or State air pollution regulations, and

"(ii) such facility was in existence on April 20, 1977, on such date construction of such facility had begun, or on such date there was a binding contract for the construction of such facility.

This subparagraph shall not apply to any use of oil or natural gas in a facility which is substantially different from the use contemplated for such facility on April 20, 1977.

"(B) STATE REGULATIONS MUST HAVE BEEN IN EFFECT ON APRIL 20, 1977, ETC.—For purposes of subparagraph (A), a State regulation shall be taken into account with respect to any use only if—

"(i) such use would also have been precluded by a regulation of such State which was in effect on April 20, 1977, or

"(ii) the Secretary, after consultation with the appropriate Federal and State agencies, determines that the adoption of the State regulation meets a requirement of Federal law.

"(C) REGULATIONS PURSUANT TO STATE IMPLEMENTATION PLAN.—For purposes of this paragraph, a regulation of an agency having jurisdiction over the facility under an approved State Implementation Plan shall be treated as a State regulation. For purposes of the preceding sentence, the term "approved State Implementation Plan" means a plan of a State for the control of air pollution which has been approved by the appropriate Federal agency as implementing Federal laws relating to air pollution.

"(c) EXEMPT AMOUNT.—

"(1) IN GENERAL.—For purposes of this part, the exempt amount for the taxpayer for any calendar year is the Btu content of 50,000 barrels of oil.

"(2) ALLOCATION.—Under regulations prescribed by the Secretary, the taxpayer may allocate the exempt amount for any calendar year—

"(A) between oil and natural gas, and

"(B) among the various tiers of taxable use, in such manner as the taxpayer may elect.

"(3) ENTITIES UNDER COMMON CONTROL.—

"(A) TREATMENT AS TAXPAYER.—For purposes of this subsection—

"(i) persons who are members of the same controlled group of corporations, and

"(ii) trades or businesses (whether or not incorporated) which are under common control,

shall be treated as 1 taxpayer.

"(B) ALLOCATION OF EXEMPT AMOUNT.—The exempt amount for the calender year shall be divided among the entities treated as 1 taxpayer under subparagraph (A)—

"(i) in proportion to their respective taxable use (determined without regard to subsection (a)(2)) during the calendar year, or

"(ii) if all such entities agree, in such proportions as may be agreed upon in such agreement.

"(C) DEFINITIONS.—For purposes of this paragraph—

"(i) CONTROLLED GROUP OF CORPORATIONS.—The term 'controlled group of corporations' has the meaning given to such term by section 1563(a), except that 'more than 50 percent' shall be substituted for 'at least 80 percent' each place it appears in section 1563(a).

"(ii) COMMON CONTROL.—The determination of whether trades or businesses are under common control shall be made under regulations prescribed by the Secretary which shall be based on principles similar to the principles which apply in the case of clause (i).

"(4) PER PLANT ADJUSTMENT IN CASES OF COMPETITIVE DISADVANTAGE.—If—

"(A) the taxpayer engages in a trade or business at any plant,

"(B) facilities located in the same region as the plant referred to in subparagraph (A) which are competitive with such plant do not incur any liability for the tax imposed by section 4991 by reason of the exempt amount, and

"(C) the liability for the tax imposed by section 4991 which the taxpayer would, but for this paragraph, incur with respect to uses in such plant would result in a substantial competitive disadvantage to the taxpayer.

the Secretary shall provide an additional exempt amount for the calendar year which may be usable only in such plant but only to the extent that such additional exempt amount is necessary to alleviate the competitive disadvantage. The Secretary shall, as soon as practicable after any exempt amount is provided under the preceding sentence, publish in the Federal Register the name of the plant and the additional exempt amount for the calendar year.

"SEC. 4993. TIERS; DOWNWARD RECLASSIFICATION.

"(a) TIERS.—For purposes of this part, a taxable use shall be classified in one of the following 3 tiers:

"(1) Tier 1, which includes any use which is not classified in Tier 2 or 3.

"(2) Tier 2, which includes any use in a boiler or in a turbine or other internal combustion engine (other than a use classified in Tier 3).

"(3) Tier 3, which includes any use by entity—

"(A) in the production of electricity—

"(i) for sale to another entity which is not under common control (within the meaning of section 4992(c)(3)(C)(ii)), or

"(ii) in a plant with a rated capacity of 100 megawatts or more of electricity, or

"(B) in the production of steam by a regulated public utility the principal activity of which is the production of electricity for sale.

"(b) RECLASSIFICATION DOWNWARD.—

"(1) IN GENERAL.—The Secretary shall prescribe by regulations a procedure under which he may reclassify, for a temporary period or permanently, a use to a Tier which is subject to a lower tax or in an exempt use category.

"(2) STANDARDS FOR RECLASSIFICATION.—The Secretary shall reclassify a use under paragraph (1) only after consulting the appropriate Federal agency, and only if he determines that such action is not inconsistent with the goal of encouraging the conversion from, or significant conservation in, the use of oil and natural gas as a fuel.

"(c) SPECIAL TEMPORARY CLASSIFICATIONS.—If an exemption or exception with respect to any facility is granted under—

"(1) section 611 (relating to new electric power plants),

"(2) section 612 (relating to new major fuel burning installations), or

"(3) section 616 (relating to qualifying cogeneration facilities)

of the National Energy Act, the Secretary shall, for the duration of such exception or exemption, classify the use of oil or natural gas in the facility in the exempt use category.

"SEC. 4994. AMOUNT OF NATURAL GAS TAX.

"(a) NATURAL GAS TARGET PRICE.—For purposes of section 4991(c)(1)(A)—

"(1) IN GENERAL.—The natural gas target price per million Btu for the calendar year applicable to gas used in any region is—

"(A) the Btu equivalency price for the calendar year for such region (determined under subsection (c)), reduced by

"(B) the amount of the taxable use adjustment (if any) provided by subsection (b).

"(2) INFLATION ADJUSTMENT.—In the case of a calendar year beginning after 1980, the amount taken into account under paragraph (1)(B) shall be adjusted for the inflation adjustment provided in section 4991(d)).

"(b) TAXABLE USE ADJUSTMENT.—For pur-

poses of subsection (a), the taxable use adjustment for 1 million Btu is the amount of the subtraction determined in accordance with the following table:

"If the taxable use occurs during calendar year—	The amount subtracted for tier 1 is—	The amount subtracted for tier 2 is—
1979	$1.35	$1.05
1980	.70	.40
1981	.65	.35
1982	.55	.25
1983	.50	.20
1984	.45	.15
1985 or thereafter	.30	Zero

"(c) DETERMINATION OF EQUIVALENCY PRICE.—For purposes of subsection (a)(1)(A)—

"(1) IN GENERAL.—The Btu equivalency price for the calendar year for any region shall be based on the average regional price per barrel of all No. 2 grade distillate oil sold during the preceding calendar year for taxable use in such region. For purposes of the preceding sentence, the Btu content of a barrel of No. 2 grade distillate oil is 5,800,000 Btu.

"(2) SECTION 4991 TAX NOT TAKEN INTO ACCOUNT.—The determination of Btu equivalency price shall be made without taking into account any tax imposed by section 4991.

"(3) DETERMINATION OF BTU EQUIVALENCY PRICE.—The Btu equivalency price for the calendar year shall be determined by the Secretary of Energy and certified to the Secretary on or before March 31 of the calendar year.

"(d) USER ACQUISITION COST.—For purposes of section 4991(c)(1)(B)—

"(1) IN GENERAL.—The user acquisition cost of any person per million Btu for any acquisition of natural gas is—

"(A) the aggregate amount paid by such person for such gas, divided by

"(B) the number of million Btu so acquired.

"(2) IMPUTED COST.—In the case of natural gas—

"(A) used—

"(i) by the producer thereof,

"(ii) by any person who is a member of the same controlled group of corporations as the producer thereof, or

"(iii) in any trade or business (whether or not incorporated) which is under common control with the producer, or

"(B) acquired in a transaction which is not an arm's length transaction.

the user acquisition cost shall not exceed the maximum lawful price (or special price) applicable with respect to a sale by the producer of such natural gas under law of the United States.

"(3) COST TO INCLUDE TRANSPORTATION COSTS.—For purposes of this subsection—

"(A) transportation costs include imputed transportation costs, and

"(B) transportation costs shall not exceed the reasonable transportation costs which would be incurred in an arm's length transaction.

"(4) NEW OR INCREASED STATE USER TAXES NOT TAKEN INTO ACCOUNT.—

"(A) IN GENERAL.—For purposes of this subsection—

"(i) any State natural gas user tax imposed on or after April 20, 1977, and

"(ii) any increase on or after such date in the rate of a State natural gas user tax,

shall not be taken into account.

"(B) DEFINITIONS.—For purposes of subparagraph (A)—

"(i) the term 'State' includes a political subdivision of a State, and

"(ii) any tax, fee, or other amount having the effect of a user tax shall be treated as a user tax.

"(e) REDUCTION IN TIER 1 AND TIER 2 TAX FOR INTERRUPTIBLE CONTRACTS.—

"(1) IN GENERAL.—If any portion of the natural gas is acquired pursuant to an interruptible contract, the amount of the tax determined under section 4991(c)(1) with respect to such portion shall be reduced by an amount equal to 10 percent of the amount determined without regard to this paragraph.

"(2) INTERRUPTIBLE CONTRACT DEFINED.—For purposes of paragraph (1), the term 'interruptible contract' means a contract or schedule which anticipates and permits interruptions by the supplies on short notice in nonemergency situations.

"(f) CAP ON TAX ON UTILITY USE.—

"(1) IN GENERAL.—The tax on any taxable use of natural gas classified in Tier 3 shall not cause the cost of such use to exceed the Btu equivalency price for residual fuel oil.

"(2) BTU EQUIVALENCY PRICE.—For purposes of paragraph (1), the Btu equivalency price for residual fuel oil shall be determined—

"(A) on the basis of the average regional price per barrel of all residual fuel oil sold during the preceding calendar year for taxable use in the region in which the natural gas is used, as determined by March 31 of the calendar year by the Secretary of Energy, and

"(B) by including in the cost of the natural gas, and in the regional price for residual fuel oil, the taxes imposed by this chapter.

"(3) BTU CONTENT OF RESIDUAL FUEL OIL.—For purposes of this subsection, the Btu content of a barrel of residual fuel oil is 6,200,000 Btu.

"(g) DETERMINATION OF REGIONS.—For purposes of this section, the Secretary, after consultation with the Secretary of Energy, shall divide the United States into such regions as may be appropriate to carry out the purposes of the tax imposed by section 4991 on the taxable use of natural gas.

"SEC. 4995. DEFINITIONS AND SPECIAL RULES.

"(a) OIL.—

"(1) IN GENERAL.—For purposes of this part, except as provided in paragraph (2), the term 'oil' means—

"(A) crude oil,

"(B) refined petroleum products, and

"(C) natural gas liquids.

"(2) EXCEPTIONS.—The term 'oil' does not include—

"(A) natural gas,

"(B) gasoline (within the meaning of section 4082(b)), and

"(C) any substance of a kind which is not generally marketable for use as a fuel.

"(b) NATURAL GAS.—

"(1) IN GENERAL.—For purposes of this part, except as provided in paragraph (2), the term 'natural gas' means—

"(A) natural gas, petroleum, or a product of natural gas or petroleum, which

"(B) has an API gravity of 110 or more.

"(2) EXCEPTION.—The term 'natural gas' does not include any substance of a kind which is not generally marketable for use as a fuel.

"(c) BARREL.—For purposes of this part, the term 'barrel' means 42 gallons.

"(d) AMOUNT OF TAX ON FRACTIONAL UNITS.—In the case of a fraction of a barrel of oil or (in the case of a fraction of a barrel of oil or (in the case of natural gas) a fraction of 1 million Btu, the amount of the tax shall be the same fraction of the amount determined under subsection (b) or (c) of section 4991 (whichever applies).

"(e) BTU CONTENT.—For purposes of this part—

"(1) OIL.—Except as otherwise provided in this part, the Btu content of a barrel of oil is 6,000,000 Btu.

"(2) NATURAL GAS.—The Secretary shall by regulations establish Btu content for the various types and grades of natural gas.

"(f) UNITED STATES.—For purposes of this part, the term 'United States' means the 50 States and the District of Columbia."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to uses after December 31, 1978.

AD HOC COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will designate the page and line number of the first ad hoc committee amendment to part IV of title II.

The Clerk read as follows:

Ad hoc committee amendment: Page 523, line 19, delete the stricken word and insert the matter printed in italics on line 22 through line 2 of page 524.

(The ad hoc committee amendment to part IV, title II, reads as follows:)

Page 523, line 19, strike: "or".

Page 523, line 22, through line 2 on page 524, insert: or

"(C) in the production of electricity or other useful energy in a qualifying cogeneration facility (within the meaning of section 546(b)(2) of the National Energy Act).

Mr. ASHLEY. Mr. Chairman, I move to strike the last word, and I rise in support of the amendment.

Mr. Chairman, a number of Members have expressed an interest as to when consideration of the bill before us might be concluded and a vote reached. In concert with the gentleman from Wisconsin, I simply want briefly to bring the Members up to date on where we stand. We have yet to consider three committee amendments. With the conclusion of consideration, the disposition of these amendments, we will then be ready to consider the Republican substitute. Upon the conclusion of that consideration, we will proceed to a motion to recommit and final passage.

What I am suggesting, Mr. Chairman, is that, even without trying to get an agreement on time, at least at this juncture, it seems to me that, if we move the debate along, we should be able to plan on getting out of here about 1 o'clock or 1:30.

Mr. STEIGER. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from Wisconsin.

Mr. STEIGER. I thank the gentleman for yielding.

Mr. Chairman, the distinguished chairman of the ad hoc committee has accurately summed up where we are. I hope on our side, and I trust on the gentleman's side, we can move expeditiously. There is no interest on anyone's part to prolong the debate. I think everybody knows what the issues are. On at least two of the remaining three amendments there is very little debate, I sus-

pect, which will take place. One amendment might be somewhat more debatable. But even that one I do not think will take long, and I hope we can wrap it up at about that time.

Mr. ASHLEY. I appreciate the comments of the gentleman.

Mr. Chairman, addressing myself to the committee amendment before us, under the Ways and Means Committee bill, cogeneration facilities of a utility are placed in tier 3, in which no tax is imposed until 1983 and then is imposed at a lower rate. The ad hoc committee amendment provides similar tier 3 treatment for the use of oil or natural gas in the production of electricity or other useful energy in a "qualifying" industrial cogeneration facility. This treats cogeneration facilities the same for purposes of the tax regardless of whether it is an industrial or utility cogeneration facility, which is consistent with the provisions in title I of the bill.

Mr. Chairman, I urge adoption of the ad hoc committee amendment.

Mr. ULLMAN. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I will be happy to yield to the chairman of the Committee on Ways and Means.

Mr. ULLMAN. Mr. Chairman, the Committee on Ways and Means looked at this problem, and we did exempt the larger category of private cogenerators and put them over into the same category as utilities.

We at that time had some question as to whether in fact we could properly manage to grant a reduction in taxes to all private users who had cogeneration. Subsequently, I think that I would personally have to agree that it would be equitable to do so. I think it would be proper.

Mr. Chairman, I have no objection to the ad hoc committee amendment, and I hope we can agree to it quickly and get on with the consideration of the bill.

Mr. STEIGER. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from Wisconsin.

Mr. STEIGER. Mr. Chairman, the chairman of the Committee on Ways and Means reflects the thinking on my part and on this side.

Yes; the amendment does make sense, and I urge its adoption.

The CHAIRMAN. The question is on the ad hoc committee amendment to part IV, title II.

The ad hoc committee amendment was agreed to.

The CHAIRMAN. The Clerk will designate the page and line numbers of the next ad hoc committee amendment to part IV, title II.

The Clerk read as follows:

Ad hoc committee amendment: Strike the language beginning on line 16, page 524, through line 3, page 525.

(The ad hoc committee amendment to part IV, title II, reads as follows:)

Strike line 16, page 524, through line 3, page 525, as follows:

"(c) SPECIAL TEMPORARY CLASSFICATIONS.—If an exemption or exception with respect to any facility is granted under—

"(1) section 611 (relating to new electric power plants),

"(2) section 612 (relating to new major fuel burning installations), or

"(3) section 616 (relating to qualifying cogeneration facilities)

of the National Energy Act, the Secretary shall, for the duration of such exception or exemption, classify the use of oil or natural gas in the facility in the exempt use category.

Mr. ASHLEY. Mr. Chairman, I rise in support of the ad hoc committee amendment.

Mr. Chairman, I will be very brief.

Mr. Chairman, the Ways and Means Committee bill provides an exemption from the users tax for the duration of certain exemptions prescribed under the regulatory conversion program as set forth under title I of the bill. The ad hoc committee amendment deletes this exemption from the users tax, in recognition of the fact that it may not be consistent with the tax program. Appropriate safeguards for hardships are provided in the Ways and Means Committee bill for administrative reclassifications from the users tax where conversion or conservation of oil or natural gas is not possible.

With that, Mr. Chairman, I yield back the balance of my time.

Mr. STEIGER. Mr. Chairman, I rise in opposition to the ad hoc committee amendment.

Mr. Chairman, as with yesterday, I am under no illusions as to what will happen here. It depresses me—perhaps that is the best way to say it—to think that we even have to come to the consideration of this amendment at all.

All of us who have followed this bill know that a strenuous effort was made by the President of the United States to undo parts of the version of the bill proposed by the Committee on Ways and Means under title II, particularly the so-called process fuel amendment, the Martin amendment. When the President was unable to break the solid wall of opposition of our chairman, the distinguished gentleman from Oregon (Mr. ULLMAN), and others on the ad hoc committee, he looked around for the next best candidate to gut. That happened to be this simple amendment that I had offered and that had been accepted by the administration and unanimously adopted by the committee.

I would hope that all the Members will look at this, because, frankly, if and when the Corman amendment passes—as I am sure the amendment offered by the gentleman from California (Mr. CORMAN) will—it is not the end of the issue and it is not the end of the problem that is posed by the Corman amendment.

Let me, if I may, take just a few moments to simply explain to the Members where we are.

Under the bill, both titles I and II, there is a consistency between what is exempt from conversion to coal and what is taxed for existing facilities, that is, those already in place. A facility will not be taxed if it is exempt under title I.

For new facilities, that is, those that come into being after the 20th of April, 1977, under the version of the Committee on Ways and Means, if one got an exemption under very tight regulations, very tightly drawn regulations, under title I so that one did not have to convert from oil or gas to coal, he then could receive an exemption from the tax under title II for new facilities.

Mr. Chairman, the result of the Corman amendment is that even though one is exempt under title I from a mandatory conversion for environmental reasons, for siting reasons, for all of those that are contained under the definition of the Committee on Interstate and Foreign Commerce, it will be taxed for the oil and gas that issued under title II.

Now, it is true that under title II, as the chairman of the ad hoc committee, the gentleman from Ohio (Mr. ASHLEY), has said, there is an exemption privilege.

Mr. Chairman, this fact is what bothers me. I got into this matter not because it affects my district, at least so far as I know. I got into this because of a concern expressed by my colleague, the gentleman from New York (Mr. RANGEL) and myself as to what the impact would be on different portions of the country if we kept the inconsistency.

It is that which I will leave with the Members because the adoption of the Corman amendment will, in my judgment, create a situation in which 3 or 5 or whatever years down the road, those who live in New England or in California or in Texas or in New Jersey or in Pennsylvania and who might seek additional plant expansion, who might seek the opening of new industrial facilities and new jobs for workers in their areas, will find that there will not be a willingness on the part of a plant to open because even though they cannot burn coal because of environmental reasons, they will go and get an exemption so that they can continue to burn oil and gas. However, if they are located in that area, they are going to pay a tax. Admittedly, it is a conservation tax. It is not much of a tax, but the incentive is then to go away from those areas and go some place else where one does not have to have any exemptions at all under either title I or title II and where one can simply go about his business.

Mr. Chairman, that is the end result of the adoption of the Corman amendment. It is a discrepancy among areas of the country and between States. It is a discrepancy between title I, under which one is exempt, and title II, under which one is not exempt.

It is that fact only that I will ask the Members to look at as they consider today how they think a national energy policy ought to be structured.

Mr. STRATTON. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, the gentleman from Wisconsin (Mr. STEIGER) has explained the impact of the Corman amendment.

I would like to comment, perhaps somewhat less technically, but a little bit more practically, on exactly what this means in my district and probably in a number of other districts as well.

The fundamental principle of this bill, as I understand it, is for us to try to conserve energy, but to do it, insofar as pos-

sible, with a minimum impact on our Nation's economy and with minimum damage to jobs and economic development.

In recent years, we are all aware of the fact that with the increasing emphasis on the environment and with the increasing emphasis on technology, in a number of electric-generating facilities and other production facilities we have moved away from coal to oil as a cleaner and more efficient source of energy.

In some cases we have even developed other more sophisticated forms of power generation which are not only cleaner but less wasteful. One of those forms has been the gas turbine, or more generally referred to as the combustion turbine.

So as a result there has grown up in my district, in Schenectady, to be precise and I think in other parts of the country as well, this new gas turbine industry which is providing a new source of energy and of electrical power that is more efficient, less wasteful and more clean than what we have had before. As a result this new gas turbine industry has generated new jobs and new production and all of the other things that go along with them.

Now today we are seeking to conserve oil and to try to eliminate or reduce the consumption of oil. And in this bill we have provided certain devices which are designed to force or entice businesses back into coal from oil. This, of course, can be done fairly easily in an electrical generating plant that has a boiler. It does not really matter whether you heat it with oil or with coal. But, if instead you have moved to something that is a little bit more technically modern and more efficient like a gas turbine, you cannot put coal in a gas turbine.

That is the kind of case that the gentleman from Wisconsin (Mr. STEIGER) was referring to with those who, for one reason or another, find it technically impossible to switch back to coal. If the Corman amendment is passed, those plants which want to modernize or expand with gas turbines are going to be estopped because, with the Corman amendment, a continuing tax will be placed on their operations. So, as a practical matter, we are going to shut down the gas turbine industry and this will result in the layoff of thousands of people.

I just do not think we want to do that. I think that would be a very damaging kind of thing. The real impact of the amendment of the gentleman from California (Mr. CORMAN), will be a tax penalty on anyone who wants to use modern gas turbine technology. So either they will refuse to use gas turbines, or else they will undertake their plant expansions in other sections of the country than the northeast.

That is the thing that I am most concerned about.

The Steiger amendment, which is already in the Ways and Means bill, provides an exemption for those facilities which cannot, for technical reasons, switch to coal. It exempts them for paying a special tax penalty. I believe that exemption ought to remain in the bill because, in the long run, it is going to be to our benefit to encourage the use of gas and combustion turbines because they are more efficient, they use less oil, and they are technologically better. If we approve the Corman amendment, we will damage a valuable new industry, we will put people out of work, and we will impair industrial progress in the Northeast.

I do not think that is what we ought to do and I urge defeat of the Corman amendment.

Mr. MIKVA. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the amendment.

Mr. Chairman, there seems to be a tendency to try to separate out this bill on parochial grounds. It is true that as to any one piece of it, if one looks at it strictly from a "what does it do to me" point of view, there are gains and there are pains. But, overall, I think there has been a balance. I think that there will be some problems created for various sections of the country, and they are offset by gains for these sections of the country.

I would point out to those people who come from the New England section, or the Midwest or California, and the other industrial sections of the country, that, in many respects, the overall thrust of this users tax is in their benefit because what we have done is remove the largest single advantage that the Southwest and the South and the other areas have had in terms of attracting new plants, and that is cheap energy. No longer is there any cheap energy.

Under this bill, with or without the Corman amendment, the use of gas and oil in a new plant must be as expensive as coal. And that, indeed, was the whole purpose in the user tax.

Now, you cannot have your cake and eat it too.

Obviously a part of this problem also turns on what happens when a plant is going to be required to use coal, where should it settle? And the answer is it certainly ought to consider the impact on the environment in that part of the country.

As the gentleman from Wisconsin points out, there are two pieces to this scheme. One is a regulatory scheme which says you cannot use gas and oil in such-and-such circumstances; you must use coal. Another seeks to be more permissive, and that is the section we are dealing with now; this section says you can use gas and oil, but if you do, you should pay a tax.

In the Committee on Ways and Means we properly exempted certain portions of the industrial sector from even that tax. We exempted the textile industry, for instance, because it physically cannot use coal. The use of coal in the heat-treating process will apparently discolor the fabrics. There are other kinds of uses like that where we specifically exempted them from the tax. We exempted existing plants which are under environmental disability because obviously if a plant is in a part of the country where it cannot use coal, we cannot ask them to pick up their plant and move it elsewhere. But the Corman amendment deals only with new plants, and the question is whether they should or should not pay the tax if they insist on using gas and oil. The answer is that under the Corman amendment they will be required to pay the tax. If the Corman amendment is not adopted, they will not be required to pay the tax.

I would point out that there is a substantial piece of conservation action here. We are talking about 300,000 or 400,000 barrels of oil-saving a day. Perhaps one-sixth of the total saving that the President's package proposes is involved in this amendment.

I come from the Midwest—not from Chicago as our chairman says, but from Illinois—from an industrial part of Illinois. It would be great if we could take away all of the incentives that people have for settling in the Southwest and settling in the less-urban areas and give all the advantages to ourselves, but we cannot do that and still save energy. If the main purpose of this bill is not to penalize the Southwest or to benefit the Midwest but to save energy, then the equation that has to be kept in mind here is that there are 300,000 or 400,000 barrels of oil a day that turn on whether this amendment will be adopted or not.

It is for those reasons that I would hope that the Corman amendment is adopted. I think that a new plant settling for the first time has all kinds of flexibility in terms of where it settles, why it settles, and what price it is prepared to pay for its energy. If there are other reasons why it should settle in the industrial North that make it worthwhile, then maybe it should settle there and pay the tax. But in any event we ought not give it a pass and give up this very important piece of energy-saving.

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. MIKVA. I yield to the gentleman from South Carolina.

Mr. MANN. I thank the gentleman for yielding.

The gentleman mentioned new plants. Let us take a situation in an urban community where a powerplant obviously from time to time has to expand its capacity. It is on oil and it would like to convert to coal. It cannot convert to coal because of space with reference to the plant itself. It ought not, nevertheless, to be punished by this so-called conservation tax, when it has no choice.

The CHAIRMAN pro tempore. The time of the gentleman has expired.

(At the request of Mr. CORMAN, and by unanimous consent, Mr. MIKVA was allowed to proceed for 2 additional minutes.)

Mr. MIKVA. Let me say to my colleague that that is true because that is true of every other piece of the industrial sector. I think we ought to bear in mind that, first of all, this applies only to the large users. We are not talking about the small users. It is those very people through whom savings can be effected.

Mr. MANN. That is true, but equity and fairness apply equally to the large and the small.

Mr. CORMAN. Mr. Chairman, will the gentleman yield?

Mr. MIKVA. I yield to the gentleman from California.

Mr. CORMAN. I thank the gentleman for yielding.

It does not affect existing plants. The Steiger amendment and the Corman effort to repeal it consider only new plants. We will try to get into more detail on that in a moment. But the existing plants are not affected by this amendment.

Mr. MANN. If the gentleman will yield further, I am advised that it does apply to existing plants if they seek to expand their capacity.

Mr. MIKVA. I will say to my colleague the passage or nonpassage of the Corman amendment will not affect that because the enhancement of an existing plant is treated differently than a new plant.

Mr. MANN. We would like to see it converted to coal, but it cannot because there is not room. Under those circumstances it cannot carry out the conservation intention, and it is taxed anyhow.

Mr. MIKVA. Let me say that an existing plant that cannot convert for environmental reasons is exempt from the tax. That is one of the two exemptions we can put on. New plants that can make the decision where to settle are not exempt, and they ought not be exempt, because, if necessary, that means they either ought to settle someplace else or they ought to pay the tax.

Mr. STEIGER. Mr. Chairman, will my colleague, the gentleman from Illinois, yield?

Mr. MIKVA. I yield to the gentleman from Wisconsin.

Mr. STEIGER. Mr. Chairman, to go to the question asked by the gentleman from South Carolina, under title I, plant expansion is considered a new facility, so in effect it does have an effect on existing facilities

The CHAIRMAN. The time of the gentleman from Illinois has expired.

(By unanimous consent, Mr. MIKVA was allowed to proceed for 1 additional minute.)

Mr. MIKVA. Mr. Chairman, let me just respond, that because it is treated as a new plant it only comes under this prohibition if the total use exceeds 50,000 barrels a year, and if it does not exceed that it does not become impacted in the first place.

Let me remind everybody listening to this debate, we are talking about the 1,400 largest users in the country. That is all. Every other small plant and every other small manufacturer that uses less than 50,000 barrels a year is not covered by this tax. Only the largest users in the country are covered. That is where the savings are.

If someone can figure out how to conserve oil without biting someone, I wish he would have come to our committee a long time ago and made our job a little easier.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. MIKVA. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Chairman, is it not true by banning gas turbines in some industries we are going to wipe out an industry which is more efficient than one that uses a boiler system; so in effect we are wiping out more efficient industries?

Mr. MARTIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I oppose this ad hoc committee amendment to strike the provision authored by the gentleman from Wisconsin (Mr. STEIGER). It is another feature of this user tax that I wish to address. During general debate on this bill, I took the floor to discuss a provision in title II, part IV of this bill, which I introduced in the Ways and Means Committee, to exempt from the proposed excise tax on industrial users of gas and oil any process fuel use which could not be converted to a substitue fuel like coal. So I have already explained in general how this exemption will apply, and that is reported on page H 8215 of the CONGRESSIONAL RECORD.

In summary, if gas or oil must be utilized because of technical characteristics of the flame, and these requirements could not be met with coal, then it would be recognized that the proposed excise tax would not lead to conversion to coal and the industry in question would not have to pay the tax for that part of its fuel. Furthermore, if conversion to another fuel, such as synthetic gas derived from coal, or to any fuel other than oil or natural gas, was not economically feasible for a given process use then it would be acknowledged that the excise tax would not lead to that substitution and, therefore, that process use would be exempt. In short, a process use of oil or natural gas would be subject to the excise tax only if there is an alternative fuel which is technically acceptable without adverse effect on the product or process, and which does not raise the unit cost of the process.

Let me now engage the gentleman from Oregon, the distinguished chairman of the Committee on Ways and Means, in a discussion of some particulars on this issue.

The Committee on Ways and Means spent considerable time hearing and considering testimony regarding the need for this process fuel exemption.

I would like to ask the distinguished gentleman from Oregon, the chairman of the Committee on Ways and Means, several questions with regard to language in the committee's report. The section of the report which explains the excise tax on business and industrial use of oil and natural gas contains several examples of process uses of oil and gas which would be exempt from the tax, regardless of the amendment under consideration.

One such example is the reference to "reheating, annealing and heat treating in the fabricated metals industry." My first question is whether this exemption would be restricted to the fabricated metals industry, or alternatively, could the use of fuels in these processes in other metals industries, such as primary metals, also be exempt, if they qualify otherwise?

Another example is the reference to "melting high-quality glass in the glass industry." My second question is whether this exemption would apply only to optical glass, or could it include use in melting any high-quality glass, where the desired quality could not be achieved with coal?

Another example of an exempt process use cited in the committee report is dyesetting in the textile industry. My third question is whether this exemption would apply only to dyesetting or, alternatively, whether other types of heatsetting might qualify for the exemption?

Mr. ULLMAN. Mr. Chairman, I want to commend the gentleman for his expertise in this area and for his contribution in working out in the bill a set of exemptions and procedures for exemptions that I think will make this a very excellent part of the bill.

In response to your question, it would be appropriate for me to describe the standards under which particular process users will be placed in the exempt category. The bill exempts from the tax use in any manufacturing process, other than use in a boiler or turbine or other internal combustion engine, in which there is no fuel other than oil and gas which may be used without materially and adversely affecting the manufacturing process or the quality of the manufactured goods, and the use of which would be economically and environmentally feasible.

In the short time available to write the committee report, the staff was able to gather very little information on specific processes which would be covered by the exemption from the tax. Thus the report contains only a few examples of such processes. However, I wish to assure the gentleman that the list of examples cited in the report is not intended to be an exhaustive list of the processes which would be exempt or the industries which contain such processes.

Thus, the language in the committee report is not intended to restrict the exemption for the specific processes the gentleman cites to the fabricated metals industry; this exemption would be allowed in the metals industry generally if the standards specified in the bill are met. Similarly, the exempt processes in the glass industry would not necessarily be restricted to use in melting optical glass. Rather, use in any process which is used in making any high-quality glass and which meets the standards of the bill would be exempt. Likewise, the exempt process in the textile industry would not necessarily be confined to dyesetting. Any heat-setting process for which the criteria specified in the bill are met would be exempt from the tax.

Mr. MARTIN. I thank the chairman for his clarification. It is important to have clear examples to guide those who will administer this exemption in these and other industrial processes which have not been mentioned, such as in the chemical and paper industries and others. The examples, however, should not, and are not intended to, exclude other processes which are not specified.

For example, it was pointed out that many kilns can and do use coal as a fuel. It would then be our intention that those

which can switch to coal, but which continue to use gas or oil, should pay the excise tax. We do not, however, intend that a kiln which cannot use coal because it damages the product or adversely affects its quality and which has no other economically and environmentally feasible fuel alternative to oil and gas would have to pay the tax just because it is a kiln. Rather, the language of the bill might be met by a kiln making lime for a pulp and paper operation or by kilns for a particular quality of face brick. If these or other processes meet the test of the language in the bill, then they could qualify for the exemption.

The CHAIRMAN. The time of the gentleman from North Carolina has again expired.

(At the request of Mr. HOLLAND, and by unanimous consent, Mr. MARTIN was allowed to proceed for 1 additional minute.)

Mr. HOLLAND. Mr. Chairman, will the gentleman yield?

Mr. MARTIN. I yield to the gentleman from South Carolina.

Mr. HOLLAND. Mr. Chairman, I thank the gentleman from North Carolina for yielding.

Mr. Chairman, I share the gentleman's concern about the report language. I believe we made it clear, however, in the Committee on Ways and Means by a motion actually to include certain language and that that language was anything but restrictive, particularly in the field I know best, the textile industry, where such processes as singeing, preparation, dyeing, finishing, printing, heat setting and curing would be included.

I would ask the chairman to respond to this: I believe the same answer would apply in the printing industry, magazine printing, printing for literary purposes. They have a color setting process where they have to have a precise temperature control. The product is adversely affected if they do not have that and they cannot obtain it with any fuel other than natural gas.

The CHAIRMAN. The time of the gentleman from North Carolina has again expired.

(At the request of Mr. HOLLAND, and by unanimous consent, Mr. MARTIN was allowed to proceed for 1 additional minute.)

Mr. HOLLAND. Mr. Chairman, I believe it is clear that the committee report language was illustrative of that.

I would ask the chairman if the response he made previously would not apply to almost any example we might bring up in the area particularly where precision and/or open flame are required.

Mr. ULLMAN. Mr. Chairman, if the gentleman will yield, as I understand the situation in that case, there does not now exist an alternative technology which would allow the use of fuels other than natural gas in the drying of ink used with these specific types of presses. Thus, if this is the case, the use of gas in this process would be exempt from the tax under the bill.

I should point out, however, that if, in the future, manufacturers develop a technology which would make the use in drying ink with a fuel other than oil or gas economically, environmentally, and technically feasible, then the use of gas in this process would no longer be exempt.

Mr. HOLLAND. Mr. Chairman, I thank the gentleman.

Mr. DINGELL. Mr. Chairman, I move to strike the requisite number of words.

Mr. HARRINGTON. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from Massachusetts, for purposes of colloquy only.

Mr. HARRINGTON. Mr. Chairman, I thank the gentleman for yielding. Mr DINGELL, I have a few questions concerning the committee's intent and your knowledge of the administration's wishes regarding the use of combined-cycle generating equipment. As you know, this is the most efficient form of generation available today, and uses exhaust heat to produce steam and generate additional electric energy.

Mr. DINGELL. While our committee did not take specific action with reference to the combined cycle, it was the subject of colloquy between Congressman MARKEY and the staff during mark-up of the coal conversion part of this legislation. I did discuss the matter with the administration, and I am familiar with their views.

Mr. HARRINGTON. It is my understanding that this colloquy disclosed many advantages to the combined-cycle, and indicated that the administration's intent was to permit the continued development of this technology.

Mr. DINGELL Yes, that is so. There is nothing in the part VI to preclude the use of this technology.

Mr. HARRINGTON. I support the intent of the administration in advancing this technology so we can be assured of achieving the even higher efficiencies possible with this concept. However, I am concerned that the language of part VI might be interpreted in a manner that will prohibit the use of this form of generation.

Mr. DINGELL. Part VI does not define acceptable or unacceptable technologies. Instead, it specifies criteria that must be met to get an exemption from the general prohibition against the use of natural gas and petroleum as primary energy sources. Accordingly, so long as the criteria set forth in part VI are met, any technology—including, of course, combined cycle—may be employed.

Mr. HARRINGTON. I thank the gentleman for responding to my questions.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I will be delighted to yield.

Mr. BROWN of Ohio. In connection with the colloquy, I want to ask about the language on page 321 of the bill, which says:

(10) The terms "major fuel-burning installation" and "installation" mean a unit, other than an electric powerplant, consisting of a boiler, gas turbine unit, combined cycle unit, or internal combustion engine which—

(A) has a design capability of consuming any fuel (or mixture or combination thereof) at a fuel heat input rate of 100 million Btu's per hour or greater; or

(B) is a combination, of two or more such units (excluding, if determined appropriate by the Administrator, any such unit having a design capability to consume any fuel (or mixture or combination thereof) at a fuel heat input rate of less than 100 million Btu's per hour) which are located at the same site and which in the aggregate have a design capability of consuming such fuel at a fuel heat input rate of 250 million Btu's per hour or greater.

Nothing in the colloquy between the gentleman from Massachusetts and the gentleman from Michigan changes those definitions as a major fuel-burning installation, does it?

Mr. DINGELL. The gentleman is correct. Both the gentleman and I are well aware of the fact that colloquies cannot amend the legislative provisions of the bill.

Mr. BROWN of Ohio. So these would be covered as major fuel-burning installations, and the administrator would have the authority to deal with them under the provisions requiring conversion of the 100 million Btu per hour and over major fuel-burning installations?

Mr. DINGELL. The gentleman is correct, he would deal with them in accordance with the provisions of the bill.

Mr. WAGGONNER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, there is a principle involved with regard to this amendment that the Members should give some consideration to.

The ad hoc committee proposes to nullify an amendment adopted by the Committee on Ways and Means offered by the gentleman from Wisconsin (Mr. STEIGER). The Committee on Interstate and Foreign Commerce adopted the attitude that because it was totally impossible, for any number of reasons, for some segments of industry to convert from their present fuel supply source—whether it be natural gas or fuel oil—to coal, they should not be mandated to do something they could not do.

The Committee on Ways and Means reacted to the amendment offered by the gentleman from Wisconsin (Mr. STEIGER) in a rather rational way, in my personal opinion, because the Committee on Ways and Means said if they cannot, for reasons totally beyond their control, convert to coal from whatever their present source of fuel is, why should they have to pay the tax? And there is not anything wrong with that. If they cannot convert, they should not have to pay the tax. But if the House adopts this amendment, we are going to say to people who have been exempted from the conversion mandate, "Look, we know you cannot convert, but we are going to tax you anyhow."

If they cannot convert, they ought not to have to pay the tax. That is common sense.

So I suggest that we ought to reject the pending amendment.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. WAGGONNER. I yield to the gentleman from South Carolina.

Mr. MANN. I think the gentleman from Louisiana (Mr. WAGGONNER) has stated the principle involved here very well. What is intended to be a conservation tax in the Corman Amendment or in the bill itself turns out under the ad hoc committee amendment to be a punitive tax, based on an equitable determination of what can and cannot be done, as the gentleman has described, by plants in certain situations.

Mr. Chairman, I associate myself with the gentleman's remarks, I associate myself with the remarks of the gentleman from New York (Mr. STRATTON), and I urge that the committee reject the ad hoc committee amendment.

Mr. WAGGONNER. Mr. Chairman, the gentleman from South Carolina is completely correct. It does become, under these circumstances, a punitive tax.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. WAGGONNER. I yield to the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. I thank the gentleman for yielding.

Mr. Chairman, I want to commend the gentleman.

Does not the gentleman agree that if this amendment were to pass, we would be damaging jobs, we would be destroying jobs and hurting industrial development? Is that not the case?

Mr. WAGGONNER. Mr. Chairman, the gentleman is completely correct.

Mr. STRATTON. Is not this situation entirely on all fours with the move we took last night, where we eased the clean-air standards so that there would not be massive unemployment in the automobile industry? And the gentleman from Michigan (Mr. DINGELL) was one of the leaders in that fight.

Should we not do the same thing with regard to other industries—such as the gas turbine industry—that are seeking to protect jobs and improve technology?

Mr. WAGGONNER. Mr. Chairman, with reference to the Clean Air Act, I fear the end result of what we did last evening will be to insure that nobody can really convert. Our mandate is going to be a rather hopeless and futile effort.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. WAGGONNER. I yield to the gentleman from New York.

Mr. CONABLE. Mr. Chairman, I would like to associate myself also with the remarks of the gentleman from Louisiana (Mr. WAGGONNER).

It does not make any sense to me to force people who have no alternative to buy their oil at prices above the world price. That is what we would do if we adopt this amendment.

Mr. WAGGONNER. Not only that, but when we force them to buy their fuel at something above the world price, this increases the price of everything we produce for consumption in world markets, and it makes American industry less competitive.

Mr. CONABLE. And that means jobs; right?

Mr. WAGGONNER. That means jobs, j-o-b-s.

Mr. HUCKABY. Mr. Chairman, will the gentleman yield?

Mr. WAGGONNER. I yield to the gentleman from Louisiana.

Mr. HUCKABY. Mr. Chairman, I thank the gentleman for yielding.

I would also like to associate myself with the excellent remarks of the gentleman from Louisiana (Mr. WAGGONNER).

Is it not true that this additional tax will also be applied upon utilities that find it impossible to convert, that this would be reflected in prices to the consumers who happen to live in one particular part of the country, and that hence the tax is not fair, just because of the geographical fact as to where one lives?

Mr. WAGGONNER. Mr. Chairman, this is going to be applied on American industry, whoever they are and wherever they are. If they cannot convert, if conversion is beyond their accomplishment, every added cost of doing business as a result of this action is going to be passed on to consumers in the form of higher power prices or higher prices for whatever commodity we are dealing with.

Mr. FRENZEL. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the ad hoc committee amendment.

Mr. STEIGER. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Wisconsin.

Mr. STEIGER. Mr. Chairman, I thank my colleague for yielding.

I hope we can close this debate fairly soon, may I say to my friend, the gentleman from Ohio (Mr. ASHLEY), but I would simply offer this first, because I want to make sure the RECORD is absolutely clear.

If we read the report of the Committee on Ways and Means, I think we will find that sums up the situation. My friend, the gentleman from Louisiana (Mr. WAGGONNER), did an excellent job, as did my colleague, the gentleman from New York (Mr. STRATTON). If we look at that committee report we will find that this is what it says:

> Sections 104 and 106 of the Energy Supply and Environmental Coordination Act (ESECA), as amended by proposed section 601 of H.R. 6831 would allow the Federal Energy Administration to exempt certain new facilities, either temporarily or permanently, from the prohibition orders which would otherwise be issued under ESECA. The committee does not feel it would be appropriate to impose a tax on any such exempt facilities, so use of oil and gas in these facilities would be automatically exempt from the tax for the duration of the exemption under ESECA.

The report then goes on to say this:

> Because there would appear to be little potential for conversion from oil and gas under these circumstances, the committee does not believe that a tax should be imposed on the use of these fuels at such facilities.

Mr. Chairman, that, I think, is the whole issue, and I do not think this amendment is fair. I urge rejection of the amendment.

Mr. FRENZEL. Mr. Chairman, I thank the gentleman for his contribution.

Mr. Chairman, I would like to endorse the statements of the gentleman from Louisiana (Mr. WAGGONNER), the gentleman from New York (Mr. STRATTON), and the gentleman from Wisconsin (Mr. STEIGER). They are exactly right on this particular item.

If an area where there are environmental laws prohibiting the use of coal has a chance to get a new plant or a plant expansion, there is no way the area can get it without paying a punitive price, thus raising the costs in that plant above the costs incurred in any other plant elsewhere in the world.

We can pay this tax in terms of not getting jobs for our people in this country. Therefore this amendment might be called a "jobs tax." On the other hand one might call it a "surtax on clean air." We can pay it with higher consumer prices or we can pay it with fewer jobs. In my judgment, both those alternatives are absolutely intolerable.

There is no reason why we should place a punitive tax on people when they cannot make the change to coal.

To be sure, it applies only to new and expanded installations. But are there any of us here who do not want expanded factories and more jobs for our districts?

If the Members want to build a wall around their districts, and if they do not want new jobs, then they will vote for the Corman amendment. But if they do not want to pay a surtax on clean air, or a jobs tax; and they want to generate some new jobs in their districts, then I urge the Members to vote down the Corman amendment.

Mr. TUCKER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would first like to engage in a brief colloquy with the chairman of the Committee on Ways and Means.

Section 2041 of the bill imposes an excise tax on business use of oil and gas, but it also provides an exemption from the tax for process use of oil and gas where there is no substitute fuel which may be used without materially and adversely affecting the manufacturing process or the quality of the manufactured goods, or where the use of such substitute fuel would not be economically or environmentally feasible.

The committee report, on pages 101 and 102, discusses the exemption at some length and lists several examples of exempt process uses. The question has been raised as to whether baking would qualify for this exemption.

Would the chairman of the committee comment on that?

Mr. ULLMAN. Mr. Chairman, will the gentleman yield?

Mr. TUCKER. I yield to the chairman of the committee.

Mr. ULLMAN. Mr. Chairman, as I indicated in my colloquy with the gentleman from North Carolina (Mr. MARTIN), the language in the committee report is not intended to restrict the exemption to the specific processes cited in the report. To the extent that clean, even heat provided by natural gas is required for baking, and to the extent that conversion to electricity or any other source of fuel would not be feasible economically or environmentally under the standards specified in the bill, baking would qualify for the exemption proposed in the bill.

Mr. TUCKER. I thank the chairman.

I would now like to inquire of my

friend, the gentleman from Wisconsin (Mr. STEIGER), as to a couple of aspects of the Corman amendment that concern me.

As my friend knows, my State and, indeed, other States in the South and Southwest that have natural gas available to them are going to be penalized rather heavily under the bill as a result of the variable gas tax, which will pretty much equalize prices for gas throughout the country and take away the regional advantage that we, at least in the past, have enjoyed.

The bill as drafted, with the language we put into it in the Committee on Ways and Means, provides that if one expands a plant or builds a new plant in the northern or eastern section of the country where there are severe environmental problems, then one would have available to him an exemption from the use tax; is that correct?

Mr. STEIGER. Mr. Chairman, if the gentleman will yield, that is correct.

Mr. TUCKER. If we try to build a new plant in my section of the country where we will have already experienced greatly increased prices as a result of the variable tax gas, but where we have clean air, there will be no exemption available to us; is that correct?

Mr. STEIGER. Under title I of the bill, you would be prohibited from building a facility that used oil or gas.

Mr. TUCKER. Some prohibitions would apply. But I could build and just pay the tax if I wanted to under some circumstances. However, there would be no escape hatch, no exemption, for people in my area of the country.

There may be a catch. That is, whether the clean air standards that we have recently adopted have so narrowed the scope of definition of dirty air and so narrowed our ability to burn coal that we might at some point want to use the exemption that is now in the bill.

But it seems to me, the way things stand right now, that as a parochial matter, I am probably going to want to vote for the Corman amendment unless somebody can convince me that the clean air standards are going to provide a necessity for my State to have this exemption provision in the future.

Mr. MIKVA. Mr. Chairman, will the gentleman yield?

Mr. TUCKER. I yield to my friend, the gentleman from Illinois.

Mr. MIKVA. Mr. Chairman. I think the gentleman from Arkansas (Mr. TUCKER) has precisely stated the point I was trying to make before.

Let us take a new plant—because that is all this amendment deals with—which decided to settle in Illinois or in Arkansas. If it comes into Illinois and if the Corman amendment is not adopted but the Steiger amendment remains in effect, it can get an exemption from paying the tax on oil and gas because of environmental reasons.

If it decides it wants to go into Arkansas, it is going to have to pay that same tax because in Arkansas it could use coal, presumably.

It is that kind of invidious parochial distinction we have been trying to avoid.

It seems to me that that is the best reason for passing the Corman amendment.

Mr. TUCKER. Mr. Chairman, I thank the gentleman.

I wonder whether my friend, the gentleman from Wisconsin (Mr. STEIGER), would care to comment on that.

Mr. STEIGER. Surely.

My friend, the gentleman from Illinois (Mr. MIKVA), is wrong because one does not get an exemption, period, in Arkansas. Under title I it is prohibited.

Mr. TUCKER. That is precisely the point.

Mr. STEIGER. If the gentleman will yield further, in all of this, it does cut both ways. I am not going to kid anybody, of course. It cuts both ways.

The CHAIRMAN pro tempore. The time of the gentleman from Arkansas (Mr. TUCKER) has expired.

(On request of Mr. STEIGER and by unanimous consent, Mr. TUCKER was allowed to proceed for 2 additional minutes.)

Mr. STEIGER. Will the gentleman yield?

Mr. TUCKER. I yield to the gentleman from Wisconsin.

Mr. STEIGER. Mr. Chairman, I have looked for my colleague, the gentleman from Arkansas (Mr. TUCKER), to respond to the gentleman from Illinois' statement that we should rise above parochial interests and look at national interests. If we look at national interests, we will vote against the Corman amendment.

Mr. TUCKER. Mr. Chairman, I appreciate the gentleman's comments.

They have clarified the matter pretty well for me because, if I may reclaim my time, I say to my friends in the South that I fought very hard against one provision of the tax in the Committee on Ways and Means, the variable tax on natural gas. I have grave reservations about the regional implications of it, but our committee passed it.

In all candor, I recognized the necessity for it in the national interest; but I am worried about what it does to my section of the country.

I think, after listening to the debate, that I have to agree with the gentleman from California (Mr. CORMAN) that without this particular amendment, my region of the country will be damaged and the national interest will be damaged as well.

The objective of this bill is to reduce the use of oil and natural gas through a use tax—a penalty tax. However, without the Corman amendment, a huge loophole will exist. Without the amendment, those wanting to build a new plant, and who want to use oil or gas as a fuel for the plant, could totally escape any use tax and could totally escape the expense of pollution control equipment by simply building the new plant in an area with existing dirty air. Without the amendment, in fact, we would not only have a loophole but an actual incentive for some companies to use oil or gas.

I urge the adoption of the Corman amendment.

Mr. STOCKMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, a moment ago the gentleman from Minnesota (Mr. FRENZEL) described this amendment as a surtax on clean air, but if you look at it carefully, at the economic impact, you will find that is a mild description. What it really is, is a forced industrial relocation policy because you are dividing the country into two areas, those that are attainment areas for SO_2 and those that are in nonattainment status—SO_2 being the major pollution output from coal. Now, take a look at it and just see how it would impact these areas.

First of all the gas and oil user tax is applied after the crude oil equalization tax is put into the economy. Let us talk about the early 1980's when all of the taxes have been fully phased in. At that time, the refineries, no matter where they are located, are going to be buying $14 oil, all of it, because the crude oil equalization will take them up to that level. Then you have got refinery and distribution costs and that raises it to about $18 a barrel, when you get the distillate out, and if you put it on a Btu basis, that means you are buying distillate or residual for about $3 roughly speaking per 1 million Btu's. Then you will pay a $3 per barrel user tax on top of that—or about 60 cents per million Btu's.

That means when this program is fully operative, if you are located in a nonattainment area where you cannot burn coal, you will be paying $3.60, at minimum, per 1 million Btu for fuel oil or distillate. And if the OPEC nations raise their prices then all of this goes up with it because all of the taxes are tuned to the OPEC prices. It is reasonable and logical to assume that between now and the 1980's that the OPEC nations will raise their prices and it can therefore be estimated that we are talking about a $4 cost to the user in the nonattainment area where he has to use oil or gas fuel because he cannot burn coal.

The same thing is true for natural gas because the excise tax on natural gas is tied to the distillate price, so the price of natural gas will be somewhere in the range of $3.50.

I would ask all of the Members to consider the price of coal today on a million Btu basis, just so that we can put them all together and not be comparing apples and oranges. It is $1.10 a million Btu's, and in the years ahead the prices will rise somewhat, but basically it will remain at roughly that range. We are talking, then, about a 2-to-1 or 3-to-1 differential in the price or cost that a user in a nonattainment area, being tied to oil and gas, will face relative to the cost for coal that a user in an attainment area that can burn coal will face.

The question before the House is what is the final result? And the result is when you have such a wide spread the big industrial corporations that are affected by this tax are going to make plans and location decisions, based on those cost differentials; and with that kind of a spread and with that kind of a cost differential, they will put those new plants in attainment areas, that means not

Pennsylvania, Michigan, New York, or New England or the other areas of the country that have the SO_2 nonattainment problem that prevents burning coal, but in other parts of the country which are in attainment status.

So the implication is clear. If you are in such a nonattainment area then you will not have any new plants or new jobs because the force of this amendment will be so great. All new plants will be built in those areas that can burn coal, because they will have a tremendous cost advantage from this artificial distortion. These are the basic economics of the amendment.

For that reason it ought to be rejected unless we want to have this kind of forced industrial relocation in this country and I do not see that any good arguments have been made for that.

Mr. JENKINS. Mr. Chairman, I move to strike the last requisite number of words.

Mr. Chairman, if I could, I would like to engage for just a moment in colloquy with the chairman of the Committee on Ways and Means, the gentleman from Oregon (Mr. ULLMAN).

Mr. Chairman, a few moments ago in colloquy with the gentleman from North Carolina (Mr. MARTIN), the gentleman from Oregon indicated that various textile process uses would be exempt, and he indicated that it would not be restricted to such an extent that other similar processers would likewise not be exempt. I am assuming that this exemption would also apply to the carpet industry as well as the textile industry.

Mr. ULLMAN. If the gentleman will yield, in my remarks I have always made it very, very clear that only if the standards in the bill are met will they be exempted. I did say very clearly that the particular exemption in the report by no means indicated the extent of those exemptions, but I further say that as long as they meet the standards that we have set forth in the bill for an exemption, they certainly are eligible for that exemption. That is correct.

Mr. JENKINS. I thank the Chairman.

Some time ago a question was asked by the gentleman from South Carolina, (Mr. MANN) I believe, as to whether or not the Corman amendment would only apply to new plants or whether or not it would also apply to existing plants that desired to expand. Could the gentleman from Wisconsin enlighten me on whether or not this would also apply to expansions?

Mr. STEIGER. Mr. Chairman, will the gentleman yield?

Mr. JENKINS. I yield to the gentleman from Wisconsin.

Mr. STEIGER. I thank the gentleman for yielding.

The answer is that it does apply to expansion.

Mr. JENKINS. It does apply.

Mr. STEIGER. It does apply, because you have got title I in which the definition of new facilities includes a brand new facility or an expansion of an existing facility.

Mr. JENKINS. So that if an existing plant is now exempt because it cannot convert and desires to expand and double the size of its existing plant, then it would be liable for the tax as far as the expansion portion?

Mr. STEIGER. It would, if it were a large enough facility.

Mr. JENKINS. I thank the gentleman.

Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from California. I understand fully the desire of my good friend, the gentleman from Illinois (Mr. MIKVA), who wants to bring all of this industry down to the South to give us all of these jobs by this particular amendment, but, frankly, I doubt that this will be the result of this proposed amendment. It is purely and simply a punitive tax, imposed on new and expanded plants that cannot convert from gas or oil to coal. I want all of us to be treated alike. If the people in other parts of the country are going to have to pay this tax, everyone should be liable. I hope my colleagues will defeat this amendment.

Mr. CORMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I sometimes think that the quantity of misinformation concerning the technical aspects of a proposal is incredible, and I have never seen more than in connection with this amendment. I would oversimplify but I suggest to the Members that there is some evidence that the adoption of the Steiger amendment will not solve this Nation's employment problem, cure the common cold, or remove houseflies from the land, and passage of the Corman amendment will not cause the sky to fall in Schenectady.

Let us look at who it is who will pay the tax. The only corporations that will pay this tax are corporations who are heavy energy users, 50,000 barrels a year or more, and they will only pay this tax if they have plants which may be converted from oil or gas to coal.

The purpose of this amendment is to provide a tax incentive to cause that conversion as early as possible.

The tax will not be collected but rather will be rebated dollar for dollar if the plants convert. So far as the conversion tax is concerned, we are talking about the 1,400 largest plants in the Nation and we are talking about those who have within their corporate structure some facility that can be converted.

How much is this tax? On natural gas it is a variable amount under the conversion portion. It is only enough to bring the cost of gas up to the Btu equivalent of oil.

I would point out to the Members, we had quite a battle not long ago when there was an effort to do just that by deregulating gas. Somehow at that time those who cried jobs could not see anything wrong at that time so long as all the money went to gas producers. But because these dollars are going to convert from oil and gas to coal, somehow that makes it all bad.

Mr. STRATTON. Mr. Chairman, if the gentleman will yield, the gentleman is talking about a conversion. The problem is where they cannot convert.

Mr. CORMAN. The gentleman must be patient with me. Let me have the 5 minutes to try to explain this amendment. It is terribly difficult. I am trying to explain that if a firm cannot convert, the tax is not going to be imposed. If the firm has some piece of its big chain operation that can be converted, that must be converted.

We have talked about almost everything else except this tax. Let us try to bring it into perspective.

Who is the taxpayer? The taxpayer is a corporation that has facilities that may be converted. Otherwise they do not fall within the requirement of paying the conversion tax.

On what must they pay? They have to pay an amount to bring the natural gas up to the oil equivalency or, if they use oil, a maximum of $3 above the world market price.

But on what? That is where the Steiger amendment comes in. On what facilities may they have to pay that tax? We said under Ketchum if they have an existing plant that is exempt under the clean air requirements, that facility is exempt and they do not pay under the fuel tax to use it. We said under Martin that if the process requires, they must burn oil or gas, they do not have to pay on existing or new facilities.

The bill before the Steiger amendment said that if they build a new plant, whether they use oil or gas or coal does not matter under this part of the bill. But if they have to use gas or oil and they have another plant someplace that can be converted, they have to pay the tax on the fuel that they use in that new plant. That affects corporate decisions, I assume, as to where they will locate. It does not prohibit them. This is an effort to encourage through tax incentives the conversion.

The CHAIRMAN. The time of the gentleman from California has expired.

(By unanimous consent, Mr. CORMAN was allowed to proceed for 2 additional minutes.)

Mr. CORMAN. Mr. Chairman, when this was considered it was as if we were trying to paint a lady's face. And Ketchum came along and said, "Why don't we paint her lips red?" We tried it and made the picture look better.

Then Martin came along and said, "Why don't we paint her cheeks red?"

We did that and it made her look better.

Then Steiger came along and said, "Why don't we paint her face red?" We did that, and all our faces were red when we realized that when we did that we had cut the heart out of this whole tax portion of the bill.

Mr. MANN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I direct this question to the gentleman from Wisconsin (Mr. STEIGER) to give him an opportunity to respond to the assertion that companies which cannot convert are exempt from the tax.

Mr. STEIGER. Mr. Chairman, will my colleague yield?

Mr. MANN. I yield to the gentleman from Wisconsin.

Mr. STEIGER. By the time I got through looking at that lady's face that

had been painted, I had lost track of exactly what it was we were painting.

It is absurd, may I say to my colleagues in this Committee, to say that this simple amendment somehow guts the whole tax title. It does not.

The whole problem began with the crude oil equalization tax. We will get to that later.

But this deals with one issue. If a new facility is exempt under title I from a mandatory conversion to coal from oil and gas, should they be taxed under title II?

That is the inconsistency. That is the issue that the committee has to deal with.

Mr. MANN. I thought I understood that issue. If I may restate my understanding, and the gentleman from Wisconsin may correct me if I am wrong, and so may the gentleman from California.

Under the Steiger amendment, if an industry could not convert, it would not pay the tax.

Under the Corman amendment, if it cannot convert, it still pays the tax.

Mr. CORMAN. Mr. Chairman, will the gentleman yield?

Mr. MANN. I yield to the gentleman from California.

Mr. CORMAN. That is incorrect. I think one of the points of confusion is that some Members think that a taxpayer is a specific plant, but that is not the way taxes are paid. We are talking about taxpayers who have a great number of plants, usually in a great number of States, but certainly a great number of plants. If, in truth, there is a taxpayer who uses more than 50,000 barrels a year, and that taxpayer as a totality has no plant which he can convert, he will probably not be subjected to the tax. He will have opportunity for administrative relief.

Now, when he builds a new plant he is adding a unit to whatever his operation may be. If he has the option of building that plant where he can use coal, or oil and gas, then if he builds that plant and he does use oil and gas, he has to pay the tax to bring the cost of gas up to Btu equivalency of oil, or, if he uses oil, up to $3 higher than the world price.

Mr. MANN. Is that on the full operation?

Mr. CORMAN. He has to pay on the entire operation until he converts to coal, if he has a plant that may convert to coal. That is the reason that the Steiger amendment makes it so difficult to bring about conversion to coal in the areas where you can build a coal-fired plant, because it so substantially slows down the flow of the tax obligation which would be rebated for tax purposes.

Mr. WAGGONNER. Mr. Chairman, will the gentleman yield?

Mr. MANN. I yield to the gentleman from Louisiana.

Mr. WAGGONNER. Mr. Chairman, I would like to engage the gentleman from California (Mr. CORMAN) further in colloquy and let the gentleman explain what is involved in this opportunity which is there to be forgiven the tax, because that is the crux of the matter.

Mr. MANN. Mr. Chairman, is the gentleman from California talking about the discretionary power of the Secretary of the Treasury to forgive a tax?

Mr. CORMAN. Yes. It is on page 524 of the bill.

I would suggest that any time we write a tax law, we get some problems. Under the same statute you may be imposing a tax on somebody that you do not want to. As a matter of fact, the gentleman in the well has a subcommittee that is used to correct those problems every day. They are called the "Member's Day bills."

It is very difficult to classify every industry in this Nation as to which have an opportunity to convert some part of their operation to coal; so we need some administrative opportunity to determine that. I believe it would not be possible by statute to exempt each entity that ought to be exempted without somebody being able to take a look at it.

Mr. MANN. I would suggest that relying on the Secretary of the Treasury to forgive a tax is like trusting a rabbit with a leaf of lettuce and relying upon him not to eat it.

Mr. WAGGONNER. Mr. Chairman, if the gentleman will yield further, the gentleman has put his finger right on the problem. Why put the taxpayer through the ordeal of doing business with the bureaucracy and the Secretary of the Treasury, when we can do it here by rejecting the amendment.

The CHAIRMAN. The question is on the amendment of the ad hoc committee to part IV, title II.

The question was taken.

RECORDED VOTE

Mr. CORMAN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 221, noes 198, answered "present" 2, not voting 12, as follows:

Dent	Koch	Santini
Findley	McKinney	Teague
Flippo	Michel	Young, Alaska

The Clerk announced the following pairs:

On this vote:

Mr. Burke of Massachusetts for, with Mr. Teague against.

Mr. Koch for with Mrs. Holt against.

Messrs. DE LA GARZA, HOLLENBECK, DORNAN, BIAGGI, RINALDO, GLICKMAN, and CHARLES WILSON of Texas changed their vote from "aye" to "no."

Mr. ROGERS and Mr. FOUNTAIN changed their vote from "no" to "aye."

So the ad hoc committee amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. The Clerk will now designate the heading of the part now pending.

The Clerk read as follows:

Page 532, line 3, "part V—credit against tax on business use of oil and gas."

(Part V of title II, read as follows:)

PART V—CREDIT AGAINST TAX ON BUSINESS USE OF OIL AND GAS

SEC. 2051. CREDIT AGAINST TAX ON BUSINESS USE OF OIL AND GAS.

Subchapter B of chapter 45 (as added by section 2041) is amended by adding at the end thereof the following new part:

"PART II—CREDITS AGAINST SECTION 4991 TAX

"Sec. 4996. Allowance of credit.
"Sec. 4997. Amount of credit.
"Sec. 4998. Section 4996 property.
"Sec. 4999. Special rules.

"SEC. 4996. ALLOWANCE OF CREDIT.

"(a) GENERAL RULE.—There shall be allowed as a credit against the tax imposed by section 4991 for the calendar year the amount determined under this part.

"(b) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary to carry out the purposes of this part.

"(c) TERMINATION OF CREDIT.—

"(1) IN GENERAL.—Except as provided in paragraph (2), no credit shall be allowed under this section for any calendar year beginning after December 31, 1990.

"(2) EXCEPTION WHERE CONSTRUCTION, ETC., BEGINS BEFORE 1991.—Paragraph (1) shall not apply to property—

"(A) the physical construction, reconstruction, or erection of which is begun before January 1, 1991, or

"(B) which is acquired by the taxpayer before such date.

"(d) CREDIT AVAILABLE ONLY WHERE ELECTION MADE.—No credit shall be allowed under this section for any calendar year unless an election under section 4999(a) is in effect for such year.

"(e) APPLICATION OF CREDIT IN THE CASE OF CONTROLLED GROUP, ETC.—

"For application of the credit in the case of 2 or more related entities, see section 4999(b).

"SEC. 4997. AMOUNT OF CREDIT.

"(a) GENERAL RULE.—The amount of the credit allowed under section 4996 for the calendar year shall be an amount equal to the lesser of—

"(1) 100 percent of the qualified energy investment for such year, or

"(2) the section 4991 tax for such year.

"(b) QUALIFIED ENERGY INVESTMENT FOR YEAR.—For purposes of this part—

"(1) IN GENERAL.—The qualified energy investment for any calendar year is the sum of—

"(A) the aggregate bases of section 4996 property (as defined in section 4998(a)) placed in service by the taxpayer during such year (reduced in a manner similar to that provided by section 46(c)(4)),

"(B) the qualified progress expenditures with respect to section 4996 property, and

"(C) the energy investment carryover to such year.

"(2) DETERMINATION OF QUALIFIED PROGRESS EXPENDITURES.—For purposes of paragraph (1)(B), qualified progress expenditures shall be determined in a manner similar to that provided by section 46(d) (including the requirement of an election), except that—

"(A) the term 'person' shall be substituted for 'taxpayer' each place it appears in section 46(d), and

"(B) paragraph (7) of section 46(d) shall not apply.

"(3) ENERGY INVESTMENT CARRYOVER TO SUCCEEDING YEAR.—If the sum described in paragraph (1) for any calendar year exceeds the tax imposed by section 4991 for such year, such excess shall be an energy investment carryover to the succeeding calendar year.

"(c) SECTION 4991 TAX FOR YEAR.—For purposes of this part—

"(1) IN GENERAL.—Except as provided in paragraph (2), the section 4991 tax for any calendar year is the amount of the tax imposed by section 4991 for such year.

"(2) TAX LIABILITY FOR 1979 AND 1980 MAY BE CARRIED TO 1981.—

"(A) 1979 LIABILITY.—Any excess of—

"(i) the liability for the tax imposed by section 4991 for 1979, over

"(ii) the qualified energy investment for 1979,

shall be treated as tax imposed by section 4991 for 1980.

"(B) 1980 LIABILITY.—Any excess of—

"(i) the liability for the tax imposed by section 4991 for 1980 (including any excess determined under subparagraph (A)), over

"(ii) the qualified energy investment for 1980,

shall be treated as tax imposed by section 4991 for 1981.

"(C) OVERPAYMENTS OF TAX.—Any portion of the excess described in subparagraph (A) or (B), which is offset by a credit for the year under section 4996 shall be treated as an overpayment of the tax imposed by section 4991 for such credit year.

"(d) LIMITATION IN CASE OF CERTAIN REGULATED COMPANIES.—No credit shall be allowed under section 4996 for any section 4996 property which is public utility property (within the meaning of section 46(f)(5)) unless requirements similar to those provided by section 46(f) are met.

"(e) SPECIAL RULE WHERE PROPERTY IS FINANCED BY INDUSTRIAL DEVELOPMENT BONDS.—In the case of any property which is financed in whole or in part by the proceeds of an industrial development bond (within the meaning of section 103(b)(2)) the interest on which is exempt from tax under section 103, the amount of the credit allowed under section 4996 shall be determined by substituting '50 percent' for '100 percent' in subsection (a)(1) of this section.

"SEC. 4998. SECTION 4996 PROPERTY.

"(a) SECTION 4996 PROPERTY DEFINED.—For purposes of this part, the term 'section 4996 property' means alternative energy property which is tangible property (not including a building and its structural components) and—

"(1) which is used by the taxpayer in the taxpayer's trade or business (other than the trade or business of leasing),

"(2) with respect to which depreciation (or amortization in lieu of depreciation) is allowable,

"(3) which has a useful life (determined as of the time such property is placed in service) of 3 years or more,

"(4) which is not used predominantly outside the United States (determined in a manner similar to that provided by subparagraphs (A) and (B) of section 48(a)(2)), and

"(5) which is new property.

"(b) ALTERNATIVE ENERGY PROPERTY DEFINED.—For purposes of this part—

"(1) IN GENERAL.—The term 'alternative energy property' means—

"(A) a boiler the primary fuel for which will be an alternate substance,

"(B) a burner (including necessary on-site equipment to bring the alternate substance to the burner) for a combustor other than a boiler if the primary fuel for such burner will be an alternate substance,

"(C) equipment used in the production of energy by nuclear, hydroelectric, or geothermal power, but not including the fuel and not including turbines or equipment beyond the turbine stage,

"(D) equipment for converting an alternate substance into synthetic gas,

"(E) pollution control equipment required (by Federal, State, or local regulations) to be installed on or in connection with equipment described in subparagraph (A), (B), or (D),

"(F) equipment used for the unloading, transfer, storage, reclaiming from storage, and preparation (including washing, crushing, drying, and weighing at the point of use) of an alternate substance for use—

"(i) in equipment described in subparagraph (A), (B), (C), (D), or (E), or

"(ii) in a facility which uses coal as a feedstock for the manufacture of chemicals or other products (except coke), and

"(G) the basis for plans and designs for equipment described in subparagraph (A), (B), (C), (D), (E), or (F).

"(2) ALTERNATE SUBSTANCE.—The term 'alternate substance' means any substance other than—

"(A) oil and natural gas, and

"(B) any product of oil and natural gas.

"(3) SPECIAL RULE FOR CERTAIN POLLUTION CONTROL EQUIPMENT.—The term 'pollution control equipment' does not include any equipment which—

"(A) is installed on or in connection with property which, as of April 20, 1977, was using coal, and

"(B) was required to be installed by Federal, State, or local regulations in effect on such date.

"(4) EQUIPMENT USING OIL AND ANOTHER SUBSTANCE.—

"(A) IN GENERAL.—A qualified oil-alternative substance boiler shall be treated as a boiler described in paragraph (1)(A).

"(B) QUALIFIED OIL-ALTERNATIVE SUBSTANCE BOILER DEFINED.—For purposes of subparagraph (A), the term 'qualified oil-alternative substance boiler' means an existing boiler for an existing electric generator facility—

"(i) before modification the fuel for which is oil or natural gas, and

"(ii) after modification the fuel for which will be oil mixed with an alternate substance, with such substance providing not less than 25 percent and not more than 50 percent of the total fuel.

For purposes of this subparagraph, the term 'existing' has the meaning given to such term by section 48(l)(9).

"(C) PARTIAL CREDIT.—The amount of the credit allowed under section 4996 with respect to any qualified oil-alternative substance boiler shall be determined by sub-

stituting 'the oil-saving percentage' for '100 percent' in section 4997(a)(1). For purposes of this subparagraph, the term 'qualified oil-alternative substance boiler' includes any equipment described in subparagraph (E) or (F) of paragraph (1) or plans or designs described in paragraph (1)(G) which are properly allocable to such boiler.

"(D) OIL-SAVING PERCENTAGE.—For purposes of subparagraph (C), the term 'oil-saving percentage' means whichever of the following percentages is the smaller:

"(i) the percentage derived from the fraction the numerator of which is the energy for the boiler which will be supplied by the alternative substance and the denominator of which is the energy which will be provided by all substances, or

"(ii) the percentage derived from the fraction the numerator of which is the decrease in oil and natural gas energy used as a fuel by the boiler as a result of the modification, and the denominator of which is the oil and natural gas energy which would have been used in the boiler as a fuel if there had been no modification.

For purposes of this subparagraph, energy shall be determined in terms of British thermal units on the basis of normal use over the useful life of the boiler.

"(c) NEW PROPERTY.—For purposes of this part, the term 'new property' means property—

"(1) the construction, reconstruction, or erection of which is completed by the taxpayer on or after April 20, 1977, or

"(2) acquired by the taxpayer on or after April 20, 1977, if the original use of such property commences with the taxpayer and commence on or after such date.

In applying this part in the case of property described in paragraph (1), there shall be taken into account only that portion of the basis which is properly attributable to construction, reconstruction, or erection on or after April 20, 1977.

"(d) OIL AND NATURAL GAS.—For purposes of this part—

"(1) the term 'oil' has the meaning given to such term by section 4995(a)(1), and

"(2) the term 'natural gas' has the meaning given to such term by section 4995(b)(1).

"(e) UNITED STATES.—For purposes of this part, the term 'United States' means the 50 States and the District of Columbia.

"SEC. 4999. SPECIAL RULES.

"(a) RULES RELATING TO ELECTION.—

"(1) TIME AND MANNER OF MAKING.—An election under this subsection may be made only on or before the last day prescribed by law (including extensions thereof) for filing the return of the tax imposed by chapter 1 for the first taxable year ending after December 31, 1978, for which the taxpayer has qualified energy investment. An election under this subsection shall be made in such manner as the Secretary may by regulations prescribe.

"(2) SPECIAL RULES FOR UTILITIES.—

"(A) IN GENERAL.—In the case of a regulated public utility the principal activity of which is the production of electricity, paragraph (1) shall be applied by substituting 'December 31, 1982' for 'December 31, 1978'.

"(B) RECAPTURE OF SECTION 38 CREDIT.—In the case of any taxpayer which (by reason of subparagraph (A)) makes an election under this subsection for its first taxable year ending after December 31, 1982, the tax under chapter 1 for such taxable year shall be increased by an amount equal to the decrease in the credits under section 38 for all prior years which would have resulted solely from not taking into account any qualified investment which would have not been taken into account if the election under this subsection had been made at the time required by paragraph (1). In any such case carrybacks and carryovers under section 46 (b) shall be properly adjusted.

"(3) ELECTION REVOCABLE ONLY WITH CONSENT.—An election made under this subsection, once made, may be revoked by the taxpayer only with the consent of the Secretary.

"(4) SCOPE OF ELECTION.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), an election made under this subsection shall apply to all section 4996 property of the taxpayer.

"(B) ELECTION TO TAKE REGULAR INVESTMENT CREDIT INSTEAD OF A CARRYOVER UNDER SECTION 4996.—If the sum of the amounts described in subparagraphs (A) and (B) of section 4997(b)(1) for any calendar year exceeds the tax imposed by section 4991 for such year—

"(i) then the taxpayer may elect to treat part or all of such excess as property with respect to which the election under section 4999(a) is not effective,

"(ii) the property with respect to which an election under clause (i) is made which is section 38 property shall be eligible for the regular percentage (but not the energy percentage) for purposes of the credit allowable under section 38, and

"(iii) the property referred to in clause (ii) shall not be taken into account in determining the energy investment carryover under section 4997(b)(3).

An election made under clause (i) with respect to any property, once made, may be revoked by the taxpayer only with the consent of the Secretary.

"(b) ENTITIES UNDER COMMON CONTROL.—

"(1) TREATMENT AS 1 TAXPAYER.—For purposes of applying this part—

"(A) persons who are members of the same controlled group of corporation, and

"(B) trades or businesses (whether or not incorporated) which are under common control,

shall be treated as 1 taxpayer.

"(2) DEFINITIONS.—For purposes of paragraph (1)—

"(A) the term 'controlled group of corporation' has the meaning given to such term by clause (i) of section 4992(c)(3)(C), and

"(B) the determination of whether trades or businesses are under common control shall be made as provided in clause (ii) of section 4992(c)(3)(C).

"(3) ENTITIES BECOMING RELATED AFTER ELECTION.—The Secretary shall prescribe regulations for the application of paragraph (1) where, after the making by any entity of an election under subsection (a), such entity becomes related (within the meaning of paragraph (1)) to a second entity with respect to which (but for paragraph (1)) an election would not be in effect.

"(c) CERTAIN DISPOSITIONS, ETC., OF SECTION 4996 PROPERTY.—

"(1) IN GENERAL.—If during any calendar year any property is disposed of, or otherwise ceases to be section 4996 property with respect to the taxpayer, within 7 years of the time such property was placed in service by the taxpayer, then the tax under section 4991 for the calendar year in which such disposition or cessation occurs shall be increased by an amount equal to the aggregate decrease in the credits allowed under this part for all prior calendar years which would have resulted solely from not taking such property into account.

"(2) PHASEDOWN OF RECAPTURE.—If the period described in paragraph (1) is—

"(A) 3 years or more but less than 5 years, the amount of the recapture shall be ⅔ of the amount which (but for this paragraph) would be subject to recapture, or

"(B) 5 years or more but less than 7 years, the amount of the recapture shall be ⅓ of the amount which (but for this paragraph) would be subject to recapture.

"(3) CERTAIN RULES MADE APPLICABLE.—For purposes of this subsection, under regulations prescribed by the Secretary, rules similar to paragraphs (3) (other than subparagraph (C) thereof) and (4) of subsection (a) of section 47 (relating to recapture of business investment credit) and to subsection (b) of section 47 shall apply.

"(d) UTILITY ALLOWED CREDIT FOR NEW BOILER ONLY TO EXTENT OIL OR GAS BOILER IS REPLACED OR PHASED DOWN.—

"(1) IN GENERAL.—In the case of a regulated public utility the principal activity of which is the production of electricity, a boiler (hereinafter in this subsection referred to as 'new boiler') shall be treated as section 4996 property—

"(A) only if the taxpayer establishes such facts as the Secretary may by regulations prescribe with respect to the replacement or phasing-down of a boiler (hereinafter in this subsection referred to as 'old boiler') which, as of April 20, 1977, used as its primary fuel oil or natural gas, and

"(B) only to the extent that there will be (not later than the calendar year following the credit year) a replacement or phasing-down of the old boiler.

"(2) PHASING DOWN.—For purposes of paragraph (1), the old boiler is phased down if (and only if)—

"(A) during 1976 it was used for more than 1,500 hours, and

"(B) during each calendar year after the credit year, the old boiler will be used for 1,500 hours or less.

"(3) TAX FOR USE BETWEEN 1,500 AND 2,000 HOURS.—If for any calendar year after the credit year the old boiler is used for more than 1,500 hours but not more than 2,000 hours, there is hereby imposed for such years a tax in an amount equal to the amount of the tax which would be imposed by section 4991 on the oil or natural gas used for such hours in excess of 1,500 if such use constituted a separate and additional taxable use. For purposes of the preceding sentence, taxable use shall be determined without regard to the second sentence of section 4992(a).

"(4) NO CREDIT ALLOWED AGAINST PARAGRAPH (3) AMOUNT.—No credit shall be allowed under section 4996 against any amount determined under paragraph (3).

"(5) RECAPTURE FOR USE IN EXCESS OF 2,000 HOURS.—If for any calendar year after the credit year the old boiler is used for more than 2,000 hours, for purposes of subsection (c) of this section the new boiler shall be treated as disposed of at the close of the year in which it is so used.

"(6) ADVANCE CERTIFICATION.—For purposes of this subsection, if the taxpayer—

"(A) certifies to the Secretary—

"(i) that the old boiler will be replaced or phased down beginning with the calendar year following the credit year, and

"(ii) that the new boiler will be placed in service not later than 3 years after the first calendar year for which the certification is effective; and

"(B) agrees to an extension of the period for assessing any deficiency of the tax imposed by section 4991, to the extent such deficiency is attributable to the fact that such certification proves to be erroneous,

then, for purposes of paragraph (1) (but not for purposes of paragraph (2), (3), (4), and (5)), the replacement or phasing down shall be treated as occurring on the date as of which the certification is effective.

"(7) CERTAIN BOILERS TREATED AS REPLACED.—If—

"(A) physical construction of a facility began before April 20, 1977,

"(B) as of April 20, 1977, such facility included (or it was contemplated that such facility would include) a boiler the primary fuel of which would be oil or natural gas, and

"(C) after April 20, 1977, the construction

of such boiler is modified so it will use an alternate substance.

for purposes of paragraph (1), such boiler shall be treated as a new boiler replacing an existing boiler at the time it is placed in service.

"(8) BOILER DEFINED.—For purposes of this subsection, the term 'boiler' includes equipment described in subparagraph (E) or (F) of paragraph (1) of subsection (b) (or plans or designs described in subparagraph (G) of such paragraph (1)) properly allocable to the boiler.

"(9) CREDIT YEAR.—For purposes of this subsection, the term 'credit year' means the later of—

"(A) the calendar year in which the new boiler is placed in service, or

"(B) 1983.

"(e) COORDINATION WITH CHAPTER 1.—

"(1) ONLY NET TAX DEDUCTIBLE UNDER CHAPTER 1.—The amount allowable as a deduction under chapter 1 with respect to the tax imposed by section 4991 for any calendar year shall not exceed the amount of such tax reduced by the credit allowed under section 4996 for such year.

"(2) ADJUSTMENT IN THE CASE OF CARRYOVER OF TAX LIABILITY.—If a credit is allowed under section 4996 for 1980 or 1981 by reason of the carryover under section 4997(c)(2) of tax liability for 1979 or 1980, proper adjustments shall be made in the tax imposed by chapter 1 to reflect the amount allowed as a deduction under chapter 1 for such tax liability in a prior taxable year."

AD HOC COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will designate the page and line number of the ad hoc committee amendment to part V of title II.

The Clerk read as follows:

Ad hoc committee amendment: Delete the stricken matter on page 536 on lines 7 through 12.

(The ad hoc committee amendment to part V of title II reads as follows:)

Page 536, strike lines 7 through 12, as follows:

"(d) LIMITATION IN CASE OF CERTAIN REGULATED COMPANIES.—No credit shall be allowed under section 4996 for any section 4996 property which is public utility property (within the meaning of section 46(f)(5)) unless requirements similar to those provided by section 46(f) are met.

"(e)

Mr. ASHLEY. Mr. Chairman, I move to strike the last word.

Mr. PERKINS. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the distinguished gentleman from Kentucky (Mr. PERKINS).

Mr. PERKINS. Mr. Chairman, I would like to say, about our energy situation—or our energy crisis, if you prefer, that because it is so easy to turn on the tap, or turn on the lights in one's home, or easily buy gasoline, we do not think about the absence of these conveniences—until we are left without. No one can dispute the fact that prices for these things have been going up, but we are still a Nation of "haves," rather than "have nots." Things have historically come so easy to us, it is hard to believe there is going to be an end to the abundance we are blessed with, or a need to begin conserving for our futures.

Yet some of our natural energy sources are very much in a depleting state. And we must redefine our use of energy for the sake of our future and for the sake of the strength of the Nation.

We have been gobbling up our energy sources in this country at an ever faster rate since the turn of the century—I should say, we have been depleting some of our energy sources, namely oil and natural gas; they were easier to extract into a direct form of energy, and they appeared to be plentiful. In reality, we are running out of these two forms of energy. All major U.S. energy policy studies have indicated we have about a 50-year supply of oil and gas if we continue to use them as we have been doing.

Seventy-five percent of the entire U.S. economy is at present dependent upon diminishing domestic supplies of petroleum and natural gas. In fact, since the last "energy crisis"—the Arab embargo of 1973, we have become more, not less, dependent on foreign imports.

What we have done is neglect the most plentiful form of energy here in our country—our supplies of coal.

Our industrial revolution was built upon coal. For more than a century, American industry depended on it almost exclusively as a source of energy. Coal-fired steel mills forged the tracks that coal-driven locomotives traveled on in opening up the western frontier—and ironically, our dependence on coal generated settlements in the Southwest—and the discovery of oil. At the turn of the century, coal supplied 90 percent of the country's energy consumption, and for 50 years, it supplied the raw material for the Nation's fledgling organic chemical industry.

But ever since the discovery of the major oil fields in the Southwest at the beginning of this century, coal's role has been declining. In 1920, it provided some 80 percent of the Nation's energy. By the end of World War II, its share had dropped to 50 percent. By 1970, it had dropped to less than 20 percent and in 1974 supplied only 18 percent of the U.S. total energy needs. We are not utilizing coal now because some feel it is not convenient; oil and natural gas are easier to store—once again we are taking the shortcut more convenient "yellow brick road"—but at what cost?

This Nation presently possesses one-fifth of the world's remaining coal resources—some 4 trillion tons. I am reminded of the verse from Samuel Taylor Coleridge's poem—

Water, water, everywhere,
Nor any drop to drink.

We have all these resources—trillions of tons of coal at our disposal, and we have to find a way to implement our greatest energy resource. To do anything else is to leave ourselves vulnerable to foreign countries for our lifeblood.

This is not the first time these sentiments have been stated. Several years before I first came to serve in Congress, during World War II, we learned that the Germans were synthetically manufacturing their airplane fuel and gasoline—from coal. We realized the potential, and the first congressional initiative to develop nonnuclear energy technologies of this sort was in the mid-1940's when Senator Joseph O'Mahoney of Wyoming and Senator JENNINGS RANDOLPH introduced the Synthetic Liquid Fuels Act, which was signed into law on April 5, 1944. That law authorized the first Federal programs for gasification of coal, liquification of coal and lignite, and production of synthetic crude oil from oil shale. This act also extended authority for continued preliminary investigations begun in 1916 on oil shale and begun in 1926 on synthetic oil from coal. Demonstration and research was undertaken of coal gasification and oil shale extraction.

We used much of the expertise the Germans had refined in these projects. The story of how the Germans, between wars, developed two distinct and remarkable techniques for turning coal into oil and gasoline was much better known about 30 years ago. The first German process, coal hydrogenation—concocted by Freidrich Bergius and I. G. Farben—was brought to this country in 1927 at a time when geologists were estimating that the U.S. "proved" reserve of crude oil would last for a very limited time.

By the mid-30's Germany had its second synthetic-fuel process, the Fischer-Tropsch, in commercial operation. This process worked with coal as well as natural gas. And our oil companies began to become interested in these processes.

As the United States went into World War II, we really thought we were well stocked with all the oil we would need for our war machinery. We were dead wrong. That is when the Synthetic Fuels Act was enacted, to "aid the prosecution of the war" as its chief purpose.

After the war, we used the German technical data on both hydrogenation and Fischer-Tropsch to lay out demonstration plants for each process. The Bureau of Mines laid out two highly mechanized shale mines in Rifle, Colo.; by May 1947, a 50-barrel-a-day demonstration plant was in operation. A coal research laboratory was opened up at Brauceton, Pa., a coal-hydrogenation plant as well as an oil-from-coal section was operated at Louisiana, Mo., and a gas-from-coal plant was opened up at Morgantown, W. Va. In addition, an underground gasification project was started at Gorgas, Ala.

Much new discovery and research was learned from these programs, and many experts were foreseeing the time when commercial synthetic fuels would become a reality. But with the discoveries of vast new domestic sources of oil to tap, these programs came under increasing fire.

In the meantime, our coal industry was suffering. It had lost the old markets such as ships, railroads, and homes—the industry was in a very depressed state. The synthetic liquid fuels programs seemed like the answer to insure our Nation a sound fuel base for many years to come, as well as buttressing an important industry. But in early April, 1953, the Interior Department proposed to start terminating these research and demonstration programs. Naturally, I fought these moves, as did some of my colleagues here today. Senator BYRD, then a Representative, said:

It would seem to be a sound conservation policy and in the national interest to go for-

ward with the development of this program which would shift as much demand as possible from our limited petroleum supplies to our very large coal reserves.

On April 15, 1953, a day when a great many of us think about costs in terms of taxes, I was talking about costs too—the costs to our country if we shut down these plants.

. . . These plants have been operating with encouraging results as to efficiency, cost, and the quality of diversified products from selected samples of coal.

But now, just when it appears that the processes are on the very threshold of success, and in view of increasing apprehension as to the adequacy of our future supplies of liquid fuels, a proposal is made to shut down these plants. . . . The ultimate cost of such abortive action, in terms of the Nation's future security, would exceed the nominal budget saving which is sought. . . . By 1975, our daily needs for liquid fuels may be several times greater than our domestic production from petroleum. If we were to be confronted with another all-out war, available supplies of liquid fuels would immediately present an acute problem. A growing dependence upon foreign sources of oil would increase our vulnerability and impair our security.

Unfortunately, the projects were terminated. They ran from 1944 to 1955, and the program cost about $82 million. The stoppage of this crucial knowledge and discovery has resulted, in many instances, in irreparable loss of valuable research. If only we had continued these efforts, we might now have our energy problem licked. And the sentiments I expressed over 24 years ago still have an eery ring of truth. The war I talked about then would not necessarily have to be military effort; the oil exporting countries' cartel brings these fears very close to home. They have their own interests at heart; we have to have ours straight, too. We need to secure our own technologies into feasible projects that will enhance our fuel resources.

You may wonder what happened to these nonnuclear technologies that did not become realities in the United States. Other oil deficient but coal abundant countries have pursued these same goals. South Africa has one such facility—the construction designed and supervised by an American company—which liquefies coal into oil.

And where are we? We are still without any definitive answer as to where our guaranteed energy sources are going to come from 15 years hence. And Americans have a hard time getting aroused about such issues, especially when they hear, as they did recently, of the new sources of oil that are going to be flowing via the Alaskan pipeline. Indeed, some areas may have a glut for a short time. It does not change our basic problems, however. In the face of no real inconvenience, my fellow Americans seem not to be able to move easily or have much practice in arriving at decisions.

Yet we have to think of our alternatives. Synthetic fuels, left to themselves in a peaceful world of free market economies, would not go anywhere. Most people probably believe there is still too much oil in the ground or sea, known and yet to be discovered, for synthetics to pour in on any large scale. But a peaceful world is exactly what the United States and those charged with its defense and security cannot count on, and in such a situation the creation, expansion, and refinement of these strategies would appear to be the better part of wisdom, and of long-range strategic importance.

We really have to stick to what we have, and one thing we do have is coal. It is the one fossil fuel that is likely to remain in abundant supply at relatively low cost for the remainder of this century and into the next. It is the one major fuel alternative that can bridge the gap from our current dependence on oil and gas to a future era of renewable energy resources.

Last year the U.S. coal production reached 665 million tons, up only 3 percent over 1975. Coal can be mined in much greater amounts, because as the Energy Research Development Administration had said, "Coal must play an important part in our future," and its conversion potential is still very much a part of the picture. It can be converted into gaseous and liquid fuels and chemicals—it can be made into low-Btu fuels for electrical facilities and generators. It can be made into high-Btu fuels for electrical facilities and generators. It can be made into high-Btu fuel, and freely mixed with current supplies of natural gas. It can be made into a clean burning fuel oil, to take the place of petroleum and natural gas now being fired in power boilers. It can be upgraded into gasoline, or even chemicals and other specialty products.

I would like to briefly outline some of the recent initiatives in this area. The significant role of coal and the need for research and development in coal technologies was acknowledged by Congress when it established the Office of Coal Research in 1961. But when the oil embargo occurred—I would rather say hit us—in early 1974, some emergency measures were needed. The Emergency Petroleum Allocation Act was enacted, which had the effect of raising oil prices.

Also in 1974, the passage of the Energy Supply and Environmental Coordination Act—Public Law 93-319—provided authority to order oil- and natural-gas-burning electric generators—which had originally been burning coal—to convert back to the use of coal.

The three independent energy agencies established by the 93d Congress were the Federal Energy Administration, the Energy Research and Development Administration, and the Nuclear Regulatory Commission. The passage of the Federal Non-nuclear Energy Research and Development Act of 1974 clarified a great deal of responsibility for solutions to energy shortages.

In President Ford's 1975 state of the Union message, he called for accelerated development of the Nation's energy technology and resources and proposed a set of energy supply and conservation measures to reduce the U.S. dependence on foreign oil by 1985. As part of these measures, he proposed that the Government provide financial and other incentives to stimulate investment in a number of commercial-scale, synthetic-fuel plants. In addition, he set a goal to produce the equivalent in synthetic fuels of 1 million barrels of oil a day by 1985.

In response to this goal, a synfuels interagency task force was established in February 1975, under the aegis of the Energy Resources Council, to study and make recommendation on Federal policy and programs for synthetic fuels.

ERDA also published a report in June 1975, called "National Plan for Energy Research, Development, and Demonstration" which projected that first generation—meaning, processes that were or are now in commercial use—liquefaction technology could be producing at least 2½ million barrels of oil a day by 1985, while first generation gasification technology could be producing the equivalent of between ½ and 1½ million barrels of oil a day by 1985.

At the end of the first session of the 94th Congress, the Energy Policy and Conservation Act was enacted; it extended ESECA—the Energy Supply and Environment Coordination Act.

In August of 1976, the Energy Conservation and Production Act was passed—Public Law 94-385. As a result, it is now part of our national energy policy that more coal must be used.

It all sounds so good; it sounds like we are really on the right track. Unfortunately, things are not working out that way. The General Accounting Office recently found that, "It is highly unlikely that any commercial-size coal liquefaction plant will be operating in the United States in 1985."

These programs are so important to us. Energy is power, and the lack of it immobilizes us. What is causing the delays?

For one thing, building these research and demonstration projects costs money. For another thing, there have been some problems with existing environmental regulations. ERDA has been funding several research projects but progress with commercial projects has been stymied. There are also other economic constraints. I would like to give a capsule status report on some of these holdups.

Underlying all discussions of what investments should be made is the basic question of economics. If capital is invested there must be the expectation of a reasonable return. Both project sponsors and lenders have had to assess: First, capital requirements; second, the impact of possible cost escalation and delays; third, product competitiveness; and fourth, technical risk. The major commercial projects thus far started have been in the high-Btu gasification area.

Unfortunately, over the past few years, since these projects were started, costs have escalated greatly, and both liquification and gasification plants require large capital investments.

Recent FPC ruling have further threatened coal gasification projects. The Natural Gas Act of 1938 requires FPC authorization before a company can sell or transport natural gas in interstate commerce. FPC recently interpreted the

act to mean that synthetic gas is not natural gas and is not subject to its jurisdiction unless the synthetic gas is commingled with natural gas in an interstate pipeline. In almost all cases, synthetic high-Btu gas will be commingled with natural gas.

FPC's jurisdiction covered transportation and sale of commingled synthetic gas but not the synthetic gasification plant itself. Yet FPC authorization is required to: First, build a connection assembly at the existing natural gas pipeline; second, transport and sell the synthetic gas; and third, set the rate which companies will be permitted to charge for the gas. Moreover, in order to protect ratepayers, FPC devised a stronger provision which reduced rate of return as plant output decreased below a certain annual capacity factor.

The effect of these FPC decisions on risk to an investor is considerable. In essence, it means that in cases where gas from a synthetic fuel plant is never linked to a pipeline or in cases where gas production ceases and the plant fails, the project investors have to absorb the losses. Lending institutions may well be reluctant to loan funds under these conditions.

Unfortunately, coal liquefaction projects are progressing very slowly also. In the longer term, coal liquefaction will be important in the production of many essential productions, like chemicals and liquid fuels for transportation. But the private sector does not seem too interested, because of the prohibitive costs. Direct funding by the Federal Government, with some industry participation, would seem necessary for the development of this technology before the 1990's. The direct loan guarantee provisions which I have introduced, guaranteeing 75 percent of investment, would seem essential for forward progress.

As you know, the maximum amount that can be authorized for these loans is only $50 million, which should, coupled with investor commitment, allow a commercial scale operation to be built in prototype size. If we can prove the technology is doable, we can go on from there with larger planning.

Environmental questions are important to us all. They fully realize coal's potential mandates finding satisfactory solutions to the problems associated with its mining and burning.

As you may know, coal is not a uniform substance, but a mix of fossilized materials from plants that themselves varied in both physical and chemical composition So coal is different as well. Of course, coal has impurities that will have to be dealt with to achieve processing compatible with the environment. All coal contains varying amounts of sulfur—so does oil, I might add. One of the biggest problems that the coal industry faces is that the bulk of recoverable reserves, as well as much of present capacity, does not meet today's sulfur standards. Forty-one percent of 176 million tons of the coal burned by the electric utilities in 1975 did not meet sulfur standards. In the East, 48 percent of the coal burned could not comply. Therefore, we must find a way to clean coal before we burn it, to make electricity and to make other forms of fuel. Energy production and environmental improvement need not be conflicting goals.

The Clean Air Amendments of 1977 should remove much of the doubt surrounding environmental uncertainties and will therefore provide a stable regulatory environment for those coal utilization strategies.

The impetus for the new coal technology has been growing for 4 years, and are culminating in recent authorizations. The increases in 1978 funding reflects the Carter administration's policy for increased coal utilization and emphasis on research and development technologies.

The basic problems we have with our energy resources will only intensify unless we make firm demonstrative steps now to further utilize our vast resources of coal, and cut oil imports. The OPEC oil cartel has the ability to undercut synthetic oil or gas prices, or cut back supplies. I suppose they could even cut back their own prices. But we cannot count on this. Right now, there is the feeling that synthetic fuels would be more expensive. But regardless of what actions are taken by the cartel, we must insure that our synthetic fuels will be able to compete with conventional supplies, particularly the price of imported oil. An analysis presented in the Synfuels Interagency Task Force report implied that under normal investment and risk circumstances, market forces are likely to cause the introduction of synthetic fuels between 1958 and 1990. This timetable could be appreciably moved up with the Government assistance I believe we need.

Decisions must be made now if the Nation is to rely on increased coal use for liquification and gasification before natural market forces bring this issue to a head. And coal is the only resource we have in such great quantity. It is not like this Nation to be dependent on other countries for our energy sources—which is really our life blood—it leaves us far too vulnerable. If Coleridge were a scientist in our time, he might have said,

> "Coal, coal everywhere,
> And not a way to use it."

We do have a way to use our greatest resource—and must forge the tools to make this a reality for our Nation. Our strength and our security depends on it. I have been stating these sentiments for nearly 30 years. For once, let us take our heads out of the sand and try to convince our citizens of the seriousness of this crisis. At least we can present them with an alternative—our coal resources—that will do the job, and right from the ground of our own land. Our future power will hinge upon our future energy resources. Let us "keep it in the family".

Mr. ALLEN. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from Tennessee (Mr. ALLEN).

Mr. ALLEN. Mr. Chairman, I thank the gentleman from Ohio (Mr. ASHLEY), for yielding to me.

Mr. Chairman, if this bill is enacted and signed into law, the American public, the consumers, if you please, will be paying through the nose, and the giant oil companies will be laughing all the way to the bank—with the Arabs and other OPEC nations cheering on the sides.

Have you ever wondered why the committee postponed outright deregulation under this bill until after the elections? How stupid do we think the American people are, that they will not see through this maneuver?

This whole fight over deregulation was a charade, pure and simple. Whether we voted for the Brown-Krueger amendment or against it, the bill, under the deal struck by the ad hoc committee with big oil, already provided for deregulation—full and complete deregulation—just as soon as the next Presidential election and the 1980 congressional elections are safely past.

To put in half the tax the coming year, and another half the year after that, every year that goes by the prices will go up until they are sky high. Yet, we are trying to convince the people that we are trying to control inflation. We have not yet seen any inflation at all, compared to what is going to happen if we pass this bill. It will affect and skyrocket the prices of gasoline, fuel oil, coal, electricity, natural gas, automobiles, almost everything we use.

It is not just that this may cause us to use our cars less—and that is doubtful. We are putting this country on the road to insolvency for the sake of bigger profits for the oil companies, the large utility corporations, and the multinational petroleum giants and their international cartels.

And our pledge to reduce, "ease the utility rate burden on residential users and farmers" has been completely forgotten, ignored, and omitted in this bill. Indeed, the committee chairman, Mr. ASHLEY, admitted yesterday that electric bills will be going up, not down, under the provisions of this bill. A complete betrayal. And make no mistake about it, when prices begin to pinch even the well-to-do, and credit financing is our only way of life, you will hear our leaders try to blame everything on the exorbitant prices charged by the OPEC nations. But here we are today, proposing to mortgage our future to these OPEC nations, and tying the future prices of U.S. oil to OPEC prices, however high they may go.

The American people should know—and they should know today, as we consider this unmitigated betrayal, that there is not a dime's worth of difference between the "OPEC nations," whom we would all like to cast in the role of villians, and our own native huge American oil and gas and utility empires. These giant U.S. oil companies pull the strings in the OPEC countries, and if the American people do not know it by now, they should know it. It is the greed of these companies that is forcing the lid off the prices the American people will have to pay.

And blaming it on foreign nations is just a coverup—a convenient way to get the American people mad at someone else besides our own giant electric and gas utility corporations and our major

oil companies and their international cartels.

The President's original proposal has been twisted and distorted into a bill, of the special interests, by the special interests and for the special interests—but little at all for the people and consumers except higher taxes and higher prices.

I do not mean to say there are not a few redeeming features of this bill. But they are so heavily outweighed by the injury, damage, and unbearable hardships these other provisions would visit upon the consumers of this nation and its economic well-being—and because we are denied under the rule to ask for a division of the question, that would enable us to vote for what is good and reject what is bad, we have no choice but to accept or reject the whole package.

For these and other reasons I have stated during the past 4 days, I have decided, as a matter of conscience, that I must most reluctantly vote against the bill, and I urge all others to do the same.

Mr. ECKHARDT. Mr. Chairman, I move to strike the requisite number of words.

During the deliberations of the ad hoc committee, I expressed on more than one occasion my deep concern about the operation of the oil and gas user tax/rebate mechanism contained in the bill reported by the Ways and Means Committee. Specifically, I was concerned that a utility doing all it could to convert to coal and other fuels might not receive back in rebates the full amount paid in taxes.

The act requires that all electric powerplants, with some limited exceptions such as peakload generation, be converted to coal by 1990. The tax on use of gas for generating electricity, called the coal conversion tax, was designed to assure that such conversion would proceed expeditiously during the 12-year period. Thus, a utility, under the ordinary processes of the provision, could offset its current conversion costs against the current tax and, beyond that, would have a 1-year carryover of qualifying conversion costs for 1979 and 1980 to the next tax year. Thus, it was envisaged that a utility diligently applying its financial resources to conversion would not suffer an additional tax burden, if conversion costs exceeded the amount of the tax over the 12-year period.

The root of the problem is this: Plans for conversion over a 12-year period will not always result in approximately equal increments of capital outlay. Therefore, in some periods the conversion costs will be vastly in excess of the tax and in some periods they will be less than the tax. If this latter period is long enough and the difference is great enough, the carryover provisions and the advance certification procedure are not sufficient to permit an offset of all conversion costs against all taxes.

This problem can be taken care of, however, by the exemption procedure of section 4993, which I think was designed in part to take care of this situation. However, I thought it necessary to make it absolutely certain that section 4993 was so designed.

Accordingly, I introduced an amendment specifically providing that the Secretary shall exempt a utility from the tax if the net effect of the tax would increase consumer rates without facilitating conversion from the use of oil and natural gas and would impair the utility's ability to accomplish such conversion.

The distinguished chairman of the Ways and Means Committee affirmed that the bill contained a general exemption procedure, section 4993, that in his judgment was set up in part to accomplish the purposes of my amendment. Based upon the strong assurance that this downward reclassification section was designed to cover the specific situation about which I was concerned and that report language would be inserted to clarify this intent, I withdrew my amendment.

I have carefully reviewed the ad hoc committee report language concerning reclassification of uses and wish to pose some further questions to the distinguished chairman of the Ways and Means Committee.

Is it your understanding that the purpose of the user tax on oil and gas is to encourage conservation of oil and gas and conversion to alternate fuels, not to raise revenues?

Mr. ULLMAN. Yes, it is the intent of the Ways and Means Committee that the purpose of this tax is to stimulate conversion and conservation, not to raise revenue.

Mr. ECKHARDT. Is it correct to say that if conversion costs exceed the amount of the tax, it is contemplated that the full amount of taxes paid ultimately would be rebated?

Mr. ULLMAN. This would be true only if, in every year in which the company had tax liability, its qualified investment, including that carried over from previous years, exceeded the liability. It is true, however, that investments in 1980 and 1981 may be credited against 1979 and 1980 taxes. Thus, there may be excess taxes in a particular year, but for companies which concentrated their investments in the next few years, it is likely that total taxes will be fully rebated if they are less than the total conversion costs.

Mr. ECKHARDT. Mr. Chairman, the report language concerning the downward reclassification process indicates that the Secretary shall exempt a utility from the tax if it is shown that the tax would have the net effect of increasing consumer rates without facilitating conversion and would impair the utility's ability to accomplish such conversion. Is it your understanding that the criterion "net effect of increasing consumer rates without facilitating conversion" would be satisfied if a utility is unable, because of the technical operation of the user tax/rebate mechanism, to recover over a period of years the total amount of taxes paid even though the utility's conversion costs over this same period of years exceeded the amount of the taxes paid?

Mr. ULLMAN. One of the purposes of the tax and rebate provision, as it applies to utilities, is to give them an incentive to speed up their replacement of oil- and gas-fired facilities. Suppose, however, that the utility was making investments in coal-fired facilities as rapidly as it could without encountering severe financial problems and that the utility still found that its tax liability was greater than its credits. If this were true, then the tax liability could be said to have the net effect of increasing consumer rates without facilitating conversion.

Mr. ECKHARDT. What factors does the committee intend the Secretary to consider in evaluating whether the imposition of the tax "would impair the utility's ability to accomplish conversion"?

Mr. ULLMAN. We would expect the Secretary to place great weight on any adverse impacts on the utility's ability to accumulate the capital necessary to accomplish conversion, especially if faced with a significant difference between the amount of taxes paid and the amount of rebates.

Mr. ECKHARDT. I am particularly interested in this issue because subsequent to the ad hoc committee markup, one southwestern company supplied me with the computation of its taxes and rebates under H.R. 8444 which would accrue unless the exemption procedure of section 4993 were applied.

The studies of this company, which have been reviewed by the administration, show that, unless the exemption procedure of section 4993 is applied, the company would pay between 1983 and 1990 oil and gas use taxes of $1.12 billion and of that amount would be unable to recover $426 million. It is my understanding that this result is due to the fact that the heaviest burden of taxes would fall in the early years—1983 through 1986—and it would not be feasible for the company to exactly match its qualified investment expenditures with its yearly tax obligations. It is true that there is a carryover provision and an advance certification provision but under the company's projected program—to be completed by 1990—it is estimated that they would still lose $426 million unless exempted.

After all, the objective of the plan is to encourage prompt conversion to coal which conversion must be substantially completed by 1990. Such is within the company's plan, but considering the nature of current expenditures for capital improvements and tax accruals, the $426 million unrecovered tax burden would still accrue.

Mr. ULLMAN. Our discussion here would indicate that, if that were the case, the exemption procedure of section 4993 should probably apply to that utility, at least on a temporary basis, until the utility's expenditures could match its tax liability. I am assuming that the company is making reasonable efforts to convert as rapidly as it can, in light of all the circumstances.

The attached table illustrates how $425,999,000 in unrecoverable use taxes due to the operation of the tax/rebate provisions of the act approved by the Ways and Means Committee could accrue against Houston Lighting & Power Company and thus be passed on in electric service costs to customers unless these provisions are applied in accordance with this colloquy.

OIL AND GAS CONSUMPTION TAXES AND REBATES

[Dollar amounts in thousands]

Year	Gas taxes			Oil taxes			Total taxes	Rebates [4] [5]	Unrecovered taxes [6]
	Tax rate (cents per 10^6 Btu) [1]	Consumption (10^9 Btu) [2]	Taxes	Tax rate (cents per 10^6 Btu) [3]	Consumption (10^9 Btu) [2]	Taxes			
1983	56	333,468	$186,742	28	92,644	$25,940	$212,682	$181,650	$31,032
1984	54	324,537	175,250	29	105,910	30,714	205,964	103,250	102,714
1985	91	111,690	101,638	31	284,524	87,833	189,471	39,200	150,271
1986	62	111,690	69,248	32	242,691	78,665	147,913	33,488	114,425
1987	29	111,690	32,390	34	230,032	78,289	110,679	83,122	27,557
1988	13	111,996	14,559	36	196,993	70,397	84,956	84,956	0
1989	15	111,690	16,754	38	173,586	65,134	81,888	81,888	0
1990	15	51,145	7,672	39	206,029	81,173	88,845	88,845	0
Total			604,253			518,145	1,122,398	696,399	425,999

[1] Gas tax rate calculated as difference between anticipated regional residual oil price including consumption tax and the anticipated gas price or $0.55/$10^6$ Btu in 1983, $0.65/$10^6$ Btu in 1984, $0.75/$10^6$ Btu in 1985 and thereafter, whichever is smaller. See schedule 1 for anticipated oil and gas prices.

[2] Consumption based on present electrical system with capacity expansion as shown in schedule 3.

[3] Oil tax rate assumed to be $1.50 per barrel in 1981 and inflating at 5 percent per year.

[4] Rebates calculated on estimates of costs of replacement coal fired generation considering only the costs of boiler and associated equipment, certain pollution equipment, fuel handling equipment, and engineering costs. These costs were assumed to represent approximately 55 percent of total plant investments. See schedule 2 for calculation of rebate amounts and a listing of those units either replaced or phased down to peak load operations.

[5] Rebates limited by amount of taxes paid in calendar year, rebate in 1990 based on construction of replacement capacity in early 1990's.

[6] The legislation provides for no carry forward of consumption taxes against future credits.

Note: All dollar values are expressed on a nominal basis.

The CHAIRMAN. The time of the gentleman from Texas has expired.

(At the request of Mr. PEPPER, and by unanimous consent, Mr. ECKHARDT was allowed to proceed for an additional 3 minutes.)

Mr. PEPPER. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from Florida.

Mr. PEPPER. Mr. Chairman, may I ask the distinguished chairman of the Committee on Ways and Means, the gentleman from Oregon (Mr. ULLMAN) a question, if the gentleman from Texas will yield?

Mr. ECKHARDT. I yield.

Mr. PEPPER. Mr. Chairman, I asked a question of the distinguished chairman of the Committee on Ways and Means when they were having a hearing before the Committee on Rules about this type of case. One of the utilities in Florida which covers half or more than half the State, and others similarly situated, uses only nuclear fuel or petroleum products. They tell me that they are not capable or able to convert to the use of coal without tearing down and rebuilding the whole plant structure they have at the present time that is using petroleum.

Now, I just want to know, are there criteria here, are they exempt from the user tax for not converting to the use of coal if it is not feasible to do that, it is uneconomical to do that, or unreasonable for that utility to convert to the use of coal?

Mr. ULLMAN. Mr. Chairman, as a matter of fact, the committee was aware, in response to the gentleman's question, that it could not foresee every situation in which special circumstances might dictate that reductions in or exemptions from the tax should be granted.

Thus, the committee bill provides a procedure to allow individual firms to ask the Secretary of the Treasury to reclassify all or part of their use of oil and natural gas into a Tier taxed at a lower rate or to exempt any such use from the tax entirely, regardless of the Tier into which such use is classified in the bill.

In considering such requests, the Secretary is to take into account the potential for conversion or conservation in the use of oil and natural gas and would also consider environmental, economic, as well as technological factors relevant to the individual case.

For example, if the Secretary determined that for an individual firm or plant or type of use within a plant, that there was no significant potential for reducing oil or gas use, through conservation or conversion, then this use could be exempted from the tax, or moved into a lower Tier.

Mr. PEPPER. Mr. Chairman, will the gentleman yield further?

Mr. ECKHARDT. I yield to the gentleman from Florida.

Mr. PEPPER. Mr. Chairman, in other words, it is not intended to impose a tax if nonconversion is reasonable or justified upon economic or other purposes?

Mr. ULLMAN. Well, I would stand on the specific comments that I have made, because in order to be exempted they have to make the request and pass the criteria tests that will be imposed upon them.

Mr. ARCHER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to further engage the chairman of the Ways and Means Committee in colloquy. As I understood his comments to my colleague from Texas, the rebate would occur to the extent of new investment in any one particular year, provided that that rebate is not in excess of the tax liability for that year. Is that correct?

Mr. ULLMAN. If the gentleman would yield, yes; that is essentially correct.

Mr. ARCHER. Is it not really true, though, that the new investment does not of itself determine the rebate; that it is tied to retirement of old facilities? The mere new investment in coal utilizing generating plants is not adequate to get a rebate. It is tied to the retirement of existing facilities. That is the determinating factor, is it not?

Mr. ULLMAN. If the gentleman will yield further, in the case of utilities it is tied to the phasing down.

Mr. ARCHER. So they get the rebate only to the extent that they retire existing facilities that burn oil and gas, not just to the extent that they build new facilities utilizing coal?

Mr. ULLMAN. In the utilities that would be the case.

Mr. ARCHER. That is very important to understand, because this bill is designed, as I see it, only to meet the requirements of areas that are nongrowth areas. If we put a new coal-burning facility in, we are retiring old facilities if we are not in a growth area, but if we are in a growth area such as we are in Houston, Tex., where the capital requirements of our power and light company are already strained to the limit just to put in new coal facilities to take care of the growth, they are not going to get any rebate. Yet, they have to keep the older system on line to meet the requirements and demands of the public, because they cannot turn anybody down who wants to purchase electricity from their system.

Mr. ULLMAN. It is not possible for me to accede to the full arguments of the gentleman. The whole position here is tied to conversion, and not related to growth. It is tied to conversion from oil and gas to coal, and is not related to the other factors.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. ARCHER. I yield to the gentleman from New York.

Mr. CONABLE. I think the gentleman is absolutely correct. If they are adding additional capacity, they do not qualify for the rebate. It is only when they phase out the use of oil in electrical generation that they qualify. So, any company that is simply adding new coal-burning facilities does not qualify unless, at the same time, they are taking oil-burning facilities out of their total capacity.

Mr. ARCHER. And it is my understanding—and I would like the chairman's comment on this—it is further my understanding that if the older facilities are not torn down but are kept available just for peaking purposes, they will not have been considered taken out of service, and there will be no rebate provided. Yet, by retention for peaking purposes, they could safeguard the re-

serves to prevent the type of power failure that happened in New York City.

Mr. ULLMAN. Well, it is my understanding that if it is less than 1,500 hours, there will be a rebate—less than 1,500 hours there will be a rebate.

Mr. ARCHER. But that is a very nominal level, Mr. Chairman.

Mr. ULLMAN. Yes; it is an industry standard.

Mr. CONABLE. If the gentleman will yield further, I think it is pretty obvious from the exchange between the gentleman from Texas and the Chairman, and this gentleman from Texas and the chairman, that we are getting into a real bureaucratic nightmare on this thing. But the whole bill is that way, and I hope the people who are inclined to support such a bill understand that they are winding up a time bomb and sitting on it.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. ARCHER. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. I would like to make another point, and that is with reference to natural gas, although I know we have passed that point in the bill. We had testimony in the Commerce Committee that the people who use electricity in the State of Mississippi are going to have to pay 300 percent for that electricity when the utility is forced to move from burning natural gas to coal, even at natural gas prices that would be deregulated, the intrastate price that the gentleman enjoys in Texas.

The point of it is that when we get all of these changes made, it will be the consumer who pays and pays and pays, not just for the bureaucracy, but for the additional fuel cost.

Mr. ARCHER. Mr. Chairman, if the gentleman would yield, I would also like to point out to the Members of the Committee that in the process that this bill has set up, that utility that does convert by investing in new facilities loses the investment tax credit. To me, we are placing the utilities, particularly in those areas where they have taken surplus gas and have built a usage for it over the years, in great difficulty. The people of Houston are going to be faced with paying up to 300 percent more for their utility rates in the 1980's. This bill will place an enormous burden upon them in addition to that, and it is regionally impacting in a very unfair way.

Mr. ULLMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I just want to say that there is no way in a colloquy on the floor that we can make determinations on matters that have to be decided upon the facts of the case and according to the standards that we have set up in this bill.

I want to say that most of the colloquies have related to utilities. We did not impose a utilities user tax until 1983, and we will have time to look at their problems again before the tax is effective. And, if we see some problems develop that need taking care of, I assure the Members that we will do it. But we think the standards, the formula and the procedures we have laid out here are workable. If they need some changes, we will come back for those changes.

Mr. ASHLEY. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the last ad hoc committee amendment.

Mr. Chairman, the Ways and Means Committee bill limits the extent to which the benefit of utility credits against the tax on business use of oil and natural gas may be passed through to consumers. The ad hoc committee amendment deletes this provision, thereby leaving this matter to the discretion of State regulatory bodies.

Mr. MOFFETT. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from Connecticut.

Mr. MOFFETT. I thank the gentleman for yielding.

As the chairman has noted, under the bill the utility may elect a credit, as we know, against the use tax of $1 for every dollar of qualified investment for the 100 percent of the utility's oil and natural gas use tax. The utilities would be allowed to carry forward qualified investment expenditures to offset the use liability, this liability not beginning until 1983. Utilities would be allowed a credit only to the extent that old oil and gas boilers are replaced.

We will leave the decision to the States as to whether or not we use the normalization method or the flowthrough method. So it could possibly be a combination. The debate on this matter is really on two points. On the one level, we have a discussion of relative value of using normalization versus flowthrough. When we talk about normalization, of course, we mean a particular benefit—in this case, the rebate—which goes to the utility will be normalized, it will be passed through the life of the asset, maybe 30 years. When we talk about flowthrough, we mean it will get to the consumer more quickly. It is anticipated that the tax we are discussing, when it is imposed upon a utility, will not be imposed, first of all, until 1983, but the State regulatory commission would pass through this tax to consumers so that the consumers essentially will have to pay this tax. The record shows that that is what happens in every case. The tax is paid by consumers. The question comes as to what happens to that utility, which is really at the heart, the core of this section, when they receive the rebate.

Does it go back to the consumer through normalization or through flowthrough?

My amendment leaves it up to the States. The majority of the members of the ad hoc committee felt it was too stringent to have the Committee on Ways and Means and this House and this Congress decide that across the board we were going to mandate that this rebate would absolutely under no circumstances be passed through, through the flowthrough method to the consumers.

The important part of this debate is the second part, and that is this: Should we be determining this, or should we leave it to the States?

It has been said by some opponents of this amendment that the capital needs of the utilities are so great that we should mandate normalization. I would say in answer to that that in California, for example, with San Diego Power and Light, perhaps they do have greater needs, but in the bay area of California their needs are not so great, according to the California commission. One of the reasons many States around the country support this amendment is that they feel they are in the best position to determine whether or not that particular rebate should be put into the capital fund essentially or normalized or whether it should in effect be flowed through to consumers.

It has also been said that if this rebate can be normalized, there would be no incentive to convert. I would point out that this is untrue. In fact, if this amendment is not adopted, we will be taking away some important leverage on the part of the State commissions to push the utilities in the direction of converting.

We should also be aware of the fact—and I think in many service areas we have been—that customers are already paying, through their rates, interest on bonds for the financing of construction, some of which has been underway for several years. Without this amendment, we will be telling those ratepayers there is absolutely no chance that after they have paid the user tax, they will get the benefit of the rebate.

I am not attacking normalization, and the ad hoc committee is certainly not attacking normalization. We can often conceive of instances in which normalization practices are very important, and there are times when they must raise capital in this way. What we are saying is that the States are absolutely in the best position to determine that.

The CHAIRMAN. The time of the gentleman from Connecticut (Mr. MOFFET) has expired.

(On request of Mr. MOFFETT and by unanimous consent, Mr. ASHLEY was allowed to proceed for 1 additional minute.)

Mr. MOFFETT. Mr. Chairman, will the gentleman yield further?

Mr. ASHLEY. I yield to the gentleman from Connecticut.

Mr. MOFFETT. Mr. Chairman, a State commission could say to a utility, for example, "We will let you normalize, but in exchange for that, we are not going to let you put that rebate in your capital or we are not going to let you treat it as a contribution to the capital account. We are going to ask you to treat it as a different kind of expense, and we are not going to let you take your tax out of your operating expenses."

I say to my colleagues that this provides a rate opportunity to us to support a good amendment and at the same time support consumers and States' rights. I know that my colleague, the gentleman from Wisconsin (Mr. STEIGER), appreciates that statement.

Mr. Chairman, I urge my colleagues to consider this, and I hope they see their way clear to support this amendment.

Mr. ULLMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am not going to oppose this amendment, but I think I would be less than honest if I did not say that I see some problems with it. I feel that the amendment is just not that important to fight over.

I think this is a case of misguided populism. The purpose of this tax is that it be an incentive to conversion, a conversion from oil and gas to coal.

We have laid down a tax that is rebated dollar for dollar upon a coal-conversion investment. This is a powerful incentive for conversion. It seems to me that utilities, like everyone else, should get the rebate applied dollar for dollar to offset the cost of investment in coal conversion. It seems to me that is an extremely logical conclusion.

I think that the amendment, in allowing the State regulatory commissions to let that happen or to flow it on through immediately to their customers, in some way subverts the intent of the bill, which is to lead to conversion.

It could, in some circumstances, even be a disincentive.

Mr. STEIGER. Mr. Chairman, will the gentleman yield?

Mr. ULLMAN. I am happy to yield to the gentleman from Wisconsin.

Mr. STEIGER. I thank my chairman for yielding.

The explanation of the gentleman from Oregon (Mr. ULLMAN) I happen to think is absolutely right. It does run the risk of inhibiting conversion under these circumstances, in spite of the siren song of our friend, the gentleman from Connecticut (Mr. MOFFETT) of this being proconsumer, procheese, promilk, pro-apple pie, and pro-States' rights.

Mr. Chairman, I do not think the amendment is worth fighting hard over. I think it is wrong. I hope the other body can correct it, and I would urge that we deal with it right now.

Mr. MIKVA. Mr. Chairman, will the gentleman yield?

Mr. ULLMAN. I yield to the gentleman from Illinois.

Mr. MIKVA. I thank the chairman for yielding. I think an argument could be made that an additional incentive for conversion could be created by this amendment, because giving the discretion to the State regulatory commissions to decide how and when this should occur, could be a nice kind of stick that the Commission could use on the utility to encourage conversion.

Therefore, while I understand the desire for symmetry with the investment tax credit, it seems to me that this makes a great deal of sense.

Mr. Chairman, I urge that the amendment be adopted.

Mr. MARTIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, on its face, this ad hoc amendment, authored by the gentleman from Connecticut (Mr. MOFFETT), has a certain patent appeal. It allows a State utilities commission to immediately pass any and all of the excise tax conversion credit. That is the credit to which the utility would be entitled of that excise tax which it would have earlier paid on gas or oil, if and when it converts to coal-fired boilers.

If all you do is take into account the popularity of a sudden relief in your electricity bill, you might be tempted to vote for this amendment. Consumer advocate groups are, in fact, boosting this short-term blossom so that they can take credit for this apparent advantage of the amendment. Just do not try to smell it too closely. It has a stinger.

Let me join my chairman in telling you about its more profound disadvantages. Supporters of this amendment do not, of course, acknowledge their full responsibility for the adverse impact of this amendment.

Here is the problem. If a gas-fired electric utility starts paying the excise tax, beginning in 1982, that will, in effect, build up an escrow account available as a credit to pay the cost of conversion when at a later date the utility decides to switch to coal. That will indeed require an enormous investment for conversion. The entire boiler will have to be replaced, at a cost in excess of the original installation. Very expensive redundant emission control systems must be paid for. Real estate and rail sidings and special coal hopper cars must be acquired at great cost.

Where will the money come from? A critical part of it will come from the excise tax which the utility will be eligible to recapture as a credit.

But if this Moffett amendment is adopted, and if a State utilities commission then puts on the blinders and takes this tax credit and orders the utility to pass it through immediately to the customers, where then will the money come from for the conversion? Aha! What advantage would there be for an oil burner to convert to a coal burner?

This amendment provides an opportunity for ardent consumerists to remove one of the strongest oil and gas saving incentives in the bill. If they succeed, the utility might well end up continuing to burn oil or gas instead of coal—and thus continue to pay the excise tax on oil and gas—and thus continue to have to bill the cost of that tax to the consumers. Aha! So the consumers will be the ones who stand to lose if this amendment carries, because the only way it can work is to decrease conversion to coal in areas where State commissions refuse to allow the power company to use the credit for financing the conversion.

Advocates of this amendment will, of course, decline the responsibility for what it will really do.

Mr. Chairman, the electric utilities in North and South Carolina burn coal, not oil or gas. So my district is not involved with this. But if our purpose is seriously to reduce the unnecessary consumption of oil and gas, this amendment must be defeated.

For all its apparent appeal and transparent transport of consumer concerns the real world way to protect the consumer from extending their burden of the excise tax is to vote against this amendment.

Mr. DINGELL. Mr. Chairman, I move to strike the requisite number of words, and I rise in strong support of the amendment.

Mr. Chairman, we should understand very clearly what this amendment does. We should understand very strongly what it does to the State regulatory agencies and, more importantly, why the utilities are in such violent opposition to the amendment.

The language of the bill that this amendment would strike lets the utilities have it both ways, and I repeat, lets the utilities have it both ways. The rebates that they get for converting they get to capitalize and to make profits on. And if they operate a facility which they have agreed that they would not then operate over 1,500 hours, in defiance of law, they have to pay a penalty. But, who is it that gets socked with the penalty? It is the ratepayer, not the utilities. So they get the tax benefits of conversion and then, in turn, they get to sock their ratepayers with the cost of the penalty which they must pay for operating in defiance in excess of the time fixed by law and by the agreement under which they have drawn the earlier benefit.

What does the real effect of the amendment do? It does not say they cannot do this, which I think everyone will agree is clearly outrageous, but it simply says that the State public utility commission gets to take a look at it and determine whether they have, in fact, to extort this amount from the ratepayers or whether, in fact, they should not do so. And it gives the State utility commission, under the language of the amendment, the continuing right to superintend the affairs of those utilities they are charged with the responsibility to supervise, and conform with the practices that are traditional.

The language in the bill which would be stricken by this amendment simply says that the State utility commission has got to allow this rascality whether they find it in the benefit of the health of the economy of that State or whether or not they have some other better policy or some other better use for the money. And who gets it in the neck? Very clearly that person is the electric utility's ratepayer. Because the language which the amendment would strike, does two things; one, it says the benefits that the utilities get under the bill they get to normalize but, two, if anybody is going to get it in the neck, under the language of the bill, then it is the ratepayer and not the utility.

So the consequences of the amendment is to say, "Look, States rights are going to be maintained, State utility regulatory commissions are going to be able to look to the welfare both of the utilities and the ratepayers," and, second, that the utilities "ain't" going to get it both ways.

I find that a desirable amendment. I find the language of the bill to be inconsistent with any kind of good conscience. As a result, I urge my colleagues strongly

to support the amendment offered by the gentleman from Connecticut (Mr. MOFFETT).

Mr. STARK. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from California.

Mr. STARK. Mr. Chairman, I thank my friend the gentleman from Michigan (Mr. DINGELL) for yielding.

I would like to see if I understand the gentleman correctly, that the Moffett amendment would make in order the following two assumed things: That all taxes paid will be paid by utility customers, and the question is then who proposes to get this rebate, if it is paid, and the Moffett amendment then states that they have the right to give the rebate to the stockholders or the ratepayers who paid the tax in the first place, as they decide is in the best interests of the public?

Mr. DINGELL. The gentleman from California is fully correct but there is a little more than that and that is that they can leave it in the capital account and whack the ratepayer right in the neck.

Mr. STARK. So if we do not support the Moffett amendment, we are mandating all the rebates paid by the customers, the users, go to the utilities and not to the customers who are bearing the burden, is that correct?

Mr. DINGELL. The gentleman has stated it precisely.

Mr. STARK. Mr. Chairman, I thank the gentleman again for yielding and for his response, and I intend to fully support the Moffett amendment.

Mr. TUCKER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I spent 4 years in electric utility litigation while Attorney General in Arkansas. As a result, I am somewhat familiar with the treatment given to the use of the investment credit for utilities under language similar to the language here at issue. I support the Moffett amendment. I think it is a desirable amendment. I think it is desirable for the U.S. Congress, and all of us here in Washington, to recognize that we cannot make all the judgments and decisions as to the best course of action to take on utility policies in the individual States.

This amendment will allow the individual State public service commissions to make the judgment as to the impact and proper treatment of both taxes and credits in the bill.

There has been some concern expressed that the utilities might be forced by State public service commissions to begin rebating this credit immediately as it accrues on the books of the company. That will not be possible for one very simple reason. Although it is very easy to establish the escrow account and begin building up a credit, it is impossible to know the exact amount of the credit until such time as the utility begins to pay the user tax in 1983. Until that event occurs, it is impossible to know the amount of the credit for which the utility would be eligible. Thus, there is no danger of a premature passthrough of this credit because the credit will be in an indeterminable amount until 1983.

I think it is a desirable amendment. There is nothing very radical about it, and it simply will provide for the public service commissions more flexibility to deal with their own individual problems.

Mr. MAGUIRE. Mr. Chairman, will the gentleman yield?

Mr. TUCKER. I yield to the gentleman from New Jersey.

Mr. MAGUIRE. I thank the gentleman for yielding.

I rise to identify myself with the gentleman's comments and to urge support of the Moffett amendment.

Mr. MARTIN. Mr. Chairman, will the gentleman yield?

Mr. TUCKER. I yield to the gentleman from North Carolina.

Mr. MARTIN. I thank the gentleman for yielding.

I would like to ask of the gentleman from Michigan (Mr. DINGELL) who has objected very strenuously to the fact that this tax credit would be capitalized unless this amendment is passed, whether he believes or does not believe that the conversion to coal-fired boilers, which is the intention of this section, will require capital investment.

Mr. DINGELL. Mr. Chairman, will the gentleman yield?

Mr. TUCKER. I yield to the gentleman from Michigan.

Mr. DINGELL. I thank the gentleman for yielding.

I have some problem with normalization, but I do not think really the thrust of this amendment is whether or not normalization is good or bad. It simply is that we mandate it and not only do we mandate it, but we say then that the expenses which come from failing to comply with the provisions of the bill may be again paid by the ratepayer. Under the amendment we mandate an override of the State utility commissions, but, worse, we give it to the utilities both ways, and we stick it in the neck of the ratepayers twice.

Mr. MARTIN. But I would have to say to the extent that the utility commission ultimately takes advantage of the options that would be allowed under the Moffett amendment, they would then deny the capitalization of the excise tax credit, and, therefore, the utility would not have that as an additional incentive to convert to coal. The result of that would be they would continue burning oil and gas, and the customers would continue to have to pay through the neck, as the gentleman from Michigan indicates, for the cost of that excise tax on oil and gas. So it is against the consumers' interest.

Mr. DINGELL. I think the gentleman in the well is fully capable of answering it. If he would yield to me afterward, I would be glad to comment.

Mr. TUCKER. I think it is important to recognize that the individual problems in each locality and franchise area of a utility are unique, and we should not mandate from Washington what should or should not be done on this. It is my own guess that there is very little chance any of these credits will be passed through, because I think they will be needed for conversion. But in individual circumstances where the utility has not proceeded with conversion, where they incur the tax, it would be a disservice to the ratepayer; it would be a disservice to the purposes of this entire act, which is to encourage conversion; and it would be a disservice to other utilities who are moving forward to conversion in good faith not to give State commissions flexibility.

The CHAIRMAN. The question is on the ad hoc committee amendment to part V, title II.

The ad hoc committee amendment was agreed to.

The CHAIRMAN. The Clerk will designate the heading of the part now pending.

The Clerk read as follows:

Page 551, line 14, part VI, title II.

(Part VI, title II, reads as follows:)

PART VI—CHANGES IN BUSINESS INVESTMENT CREDIT TO ENCOURAGE CONSERVATION OF, OR CONVERSION FROM, OIL AND GAS OR TO ENCOURAGE NEW ENERGY TECHNOLOGY

SEC. 2061. CHANGES IN BUSINESS INVESTMENT CREDIT.

(a) AMOUNT OF CREDIT; ALLOWANCE OF ENERGY PERCENTAGE.—

(1) IN GENERAL.—Paragraph (2) of section 46(a) (relating to amount of credit for current taxable year) is amended to read as follows:

"(2) AMOUNT OF CREDIT.—

"(A) IN GENERAL.—The amount of the credit determined under this paragraph for the taxable year shall be an amount equal to the sum of the following percentages of the qualified investment (as determined under subsections (c) and (d)):

"(i) the regular percentage,

"(ii) in the case of energy property, the energy percentage, and

"(iii) the ESOP percentage.

"(B) REGULAR PERCENTAGE.—For purposes of this paragraph, the regular percentage is—

"(i) 10 percent with respect to the period beginning on January 21, 1975, and ending on December 31, 1980, or

"(ii) 7 percent with respect to the period beginning on January 1, 1981.

"(C) ENERGY PERCENTAGE.—For purposes of this paragraph, the energy percentage is—

"(i) 10 percent with respect to the period beginning on April 20, 1977, and ending on December 31, 1982, or

"(ii) zero with respect to any other period.

"(D) SPECIAL RULE FOR CERTAIN ENERGY PROPERTY.—For purposes of this paragraph, the regular percentage shall not apply to any energy property which, but for section 48(1)(1), would not be section 38 property.

"(E) ESOP PERCENTAGE.—For purposes of this paragraph, the ESOP percentage is—

"(i) with respect to the period beginning on January 21, 1975, and ending on December 31, 1980, 1 percent, and

"(ii) with respect to the period beginning on January 1, 1977, and ending on December 31, 1980, an additional percentage (not in excess of ½ of 1 percent) which results in an amount equal to the amount determined under section 301(e) of the Tax Reduction Act of 1975.

This subparagraph shall apply to a corporation only if it meets the requirements of section 301(d) of the Tax Reduction Act of 1975 and only if it elects (at such time,

in such form, and in such manner as the Secretary prescribes) to have this paragraph apply."

(2) CONFORMING AMENDMENT.—Subparagraph (A) of section 46(c)(3) (relating to public utility property) is amended to read as follows:

"(A) For the period beginning on January 1, 1981, in the case of any property which is public utility property, the amount of the qualified investment shall be 4/7 of the amount determined under paragraph (1). The preceding sentence shall not apply for purposes of applying the energy percentage."

(b) DEFINITIONS AND TRANSITIONAL RULES.—Section 48 (relating to definitions and special rules) is amended by redesignating subsection (l) as subsection (n) and by inserting after subsection (k) the following new subsections:

"(l) ENERGY PROPERTY.—For purposes of this subpart—

"(1) TREATMENT AS SECTION 38 PROPERTY.—For the period beginning on April 20, 1977, and ending on December 31, 1982—

"(A) any energy property shall be treated as meeting the requirements of paragraph (1) of subsection (a), and

"(B) paragraph (3) of subsection (a) shall not apply to any energy property.

"(2) ENERGY PROPERTY DEFINED.—The term 'energy property' means property—

"(A) which is—

"(i) alternative energy property (within the meaning of section 4998(b)),

"(ii) cogeneration property installed in connection with an existing facility, but only to the extent that the cogeneration energy capacity of such facility is expanded,

"(iii) advanced technology property,

"(iv) specially defined energy property, or

"(v) recycling equipment,

"(B) which is an integral part of, or used in connection with, a building or other structure located in the United States,

"(C)(i) the construction, reconstruction, or erection of which is completed by the taxpayer after April 19, 1977, or

"(ii) which is acquired after April 19, 1977, if the original use of such property commences with the taxpayer and commences after such date, and

"(D) with respect to which depreciation (or amortization in lieu of depreciation) is allowable, and which has a useful life (determined as of the time such property is placed in service) of 3 years or more.

If any property is alternative energy property (within the meaning of section 4998(b)), it shall not be treated as described in clause (ii), (iii), (iv), or (v) of subparagraph (A).

"(3) COGENERATION PROPERTY.—The term 'cogeneration property' means property which—

"(A) produces steam, heat, or other forms of useful energy (other than electric energy) to be used for industrial, commercial, or space heating purposes, and

"(B) also produces electric energy.

"(4) ADVANCED TECHNOLOGY PROPERTY.—The term 'advanced technology property' means equipment which uses solar, geothermal, or wind energy to provide heat, cooling, or electricity in connection with an existing building and (where applicable) an existing industrial or commercial process.

"(5) SPECIALLY DEFINED ENERGY PROPERTY.—The term 'specially defined energy property' means—

"(A) a recuperator,

"(B) a heat wheel,

"(C) a regenerator,

"(D) a heat exchanger,

"(E) a waste heat boiler,

"(F) a heat pipe,

"(G) an automatic energy control system,

"(H) a turbulator,

"(I) a preheater,

"(J) a combustible gas recovery system,

"(K) an economizer, or

"(L) any other property of a kind specified by the Secretary by regulations,

the principal purpose of which is reducing the amount of energy consumed in any existing industrial or commercial process and which is installed in connection with an existing industrial or commercial facility.

"(6) CERTAIN ADDITIONAL EQUIPMENT TREATED AS SPECIALLY DEFINED ENERGY PROPERTY.—The term 'specially defined energy property' also means—

"(A) equipment designed to modify existing facilities which use oil or natural gas as a fuel or as feedstock so such facilities will use—

"(i) a substance other than oil and natural gas, or

"(ii) oil mixed with a substance other than oil and natural gas, where such other substance will provide not less than 25 percent of the fuel or feedstock, as the case may be,

"(B) pollution control equipment installed on or in connection with equipment described in subparagraph (A), but only if such equipment meets the requirements of paragraph (3) of section 4998(b), and

"(C) fuel handling equipment necessary for the modification described in subparagraph (A), but only if such equipment is of the kind described in subparagraph (F) of section 4998(b)(1).

"(7) RECYCLING EQUIPMENT.—The term 'recycling equipment' means any equipment which is used exclusively in the recycling of solid waste or to sort and prepare solid waste for recycling.

"(8) EQUIPMENT MUST MEET CERTAIN STANDARDS TO QUALIFY UNDER PARAGRAPH (3), (4), (5), (6), OR (7).—Equipment qualifies under paragraph (3), (4), (5), (6), or (7) only if it meets the performance and quality standards which—

"(A) have been prescribed by the Secretary by regulations (after consultation with the Secretary of Energy), and

"(B) are in effect at the time of the acquisition of the property.

"(9) EXISTING.—For purposes of this subsection, the term 'existing' means—

"(A) when used in connection with a building or facility—

"(i) except as provided in clause (ii), 50 percent or more of the basis of such building or facility is attributable to construction, reconstruction, or erection before April 20, 1977, or

"(ii) which is a nuclear powerplant, a construction permit was issued and construction began before April 20, 1977, or

"(B) when used in connection with an industrial or commercial process, such process was carried on in the building or facility as of April 20, 1977.

"(10) UTILITY ALLOWED ENERGY PERCENTAGE FOR NEW BOILER ONLY TO EXTENT OIL OR GAS BOILER IS REPLACED OR PHASED OWN.—

"(A) IN GENERAL.—In the case of a regulated public utility the principal activity of which is the production of electricity, the energy percentage shall be allowed with respect to a new boiler only to the extent that there will be a replacement or phasing down of an old boiler which, as of April 20, 1977, used as its primary fuel oil or natural gas. The energy percentage shall be allowed with respect to a new boiler only if the taxpayer establishes such facts with respect to the replacement or phasing-down as the Secretary may by regulations prescribe.

"(B) RULES OF SECTION 4999(d) MADE APPLICABLE.—For purposes of applying subparagraph (A), the rules of paragraphs (2) through (8) of section 4999(d) shall apply, except that the term 'credit year' means only the calendar year the new boiler is placed in service.

"(11) SPECIAL RULE FOR PROPERTY FINANCED BY INDUSTRIAL DEVELOPMENT BONDS.—In the case of property which is financed in whole or in part by the proceeds of an industrial development bond (within the meaning of section 103(b)(2)) the interest on which is exempt from tax under section 103, the energy percentage shall be 5 percent.

"(12) INDUSTRIAL INCLUDES AGRICULTURAL.—The term 'industrial' includes 'agricultural'.

"(m) APPLICATION OF CERTAIN TRANSITIONAL RULES.—Where the application of any provision of subsection (a)(10) or (l) of this subsection (a)(2) or (c)(3) of section 46 is expressed in terms of a period, such provision shall apply only to—

"(1) property to which section 46(d) does not apply, the construction, reconstruction, or erection of which is completed by the taxpayer on or after the first day of such period, but only to the extent of the basis thereof attributable to the construction, reconstruction, or erection during such period.

"(2) property to which section 46(d) does not apply, acquired by the taxpayer during such period and placed in service by the taxpayer during such period, and

"(3) property to which section 46(d) applies, but only to the extent of the qualified investment (as determined under subsections (c) and (d) of section 46) with respect to qualified progress expenditures made during such period."

(c) ALLOWANCE OF REGULAR PERCENTAGE FOR BUSINESS INSULATION PROPERTY.—Subsection (a) of section 48 (defining section 38 property) is amended by adding at the end thereof the following new paragraph:

"(10) BUSINESS INSULATION PROPERTY.—For the period beginning on April 20, 1977, and ending on December 31, 1982, insulation shall be treated as meeting the requirements of paragraph (1) and paragraph (3) shall not apply to insulation. For purposes of the preceding sentence, the term 'insulation' means any item—

"(A) which is specifically and primarily designed to reduce when installed in or on an existing industrial or commercial building or existing industrial or commercial facility the heat loss or gain of such building or facility,

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remain in operation for at least 3 years,

"(D) which meets the performance and quality standards which—

"(i) have been prescribed by the Secretary by regulations (after consultation with the Secretary of Energy), and

"(ii) are in effect at the time of the acquisition of the item, and

"(E) would not, but for this paragraph, be section 38 property.

For purposes of this paragraph, a building or facility will be treated as existing if it was placed in service before April 20, 1977."

(d) CREDIT FOR ALTERNATIVE ENERGY PROPERTY MAY OFFSET 100 PERCENT OF TAX LIABILITY.—Subsection (a) of section 46 is amended by adding at the end thereof the following new paragraph:

"(10) CREDIT IN CASE OF ALTERNATIVE ENERGY PROPERTY MAY OFFSET 100 PERCENT OF TAX LIABILITY.—In the case of alternative energy property—

"(A) paragraph (3)(C) shall be applied by substituting '100 percent' for '50 percent', and

"(B) the applicable percentage for purposes of paragraphs (7), (8), and (9) shall be 100 percent."

(e) DENIAL OF INVESTMENT CREDIT FOR CERTAIN ALTERNATIVE ENERGY PROPERTY.—Subsection (a) of section 48 is amended by adding at the end thereof the following new paragraph:

"(11) CERTAIN ALTERNATIVE ENERGY PROPERTY.—The term 'section 38 property' does not include any property with respect to

which an election under section 4999(a) is in effect."

(f) DENIAL OF INVESTMENT TAX CREDIT FOR CERTAIN PROPERTY.—

(1) AIR CONDITIONED, SPACE HEATERS, ETC.—Subparagraph (A) of section 48(a)(1) (defining section 38 property) is amended to read as follows:

"(A) tangible personal property (other than an air conditioning or heating unit), or".

(2) BOILERS, ETC., FUELED BY OIL OR GAS.—Paragraph (1) of section 48(a) (defining section 38 property) is amended by adding at the end thereof the folowing new sentence: "Such term does not include any boiler or other combustor fueled by petroleum or petroleum products (including natural gas) unless the use of coal is precluded by Federal air pollution regulations or existing State air pollution regulations or unless the use of such combustor will be an exempt use within the meaning of section 4992(b)."

(3) DENIAL OF RAPID DEPRECIATION FOR BOILERS, ETC., FUELED BY OIL OR GAS.—Section 167 (relating to depreciation) is amended by redesignating subsection (p) as subsection (r) and by inserting after subsection (o) the following new subsection:

"(p) STRAIGHT LINE METHOD FOR BOILERS, ETC., FUELED BY OIL OR GAS.—In the case of any boiler or other combustor fueled by petroleum or petroleum products (including natural gas)—

"(1) subsections (b), (j), and (l) shall not apply, and

"(2) the term 'reasonable allowance' as used in subsection (a) shall mean only an allowance computed under the straight line method using a useful life equal to the class life prescribed by the Secretary under subsection (m) which is applicable to such property (determined without regard to the last sentence of subsection (m)(1)).

This paragraph shall not apply if the use of coal is precluded by Federal air pollution regulations or existing State air pollution regulations or if the use of the combustor is an exempt use within the meaning of section 4992(b)."

(4) EFFECTIVE DATE.—

(A) IN GENERAL.—The amendments made by this subsection shall apply to property which is placed in service after June 20, 1977.

(B) BINDING CONTRACTS.—The amendments made by this subsection shall not apply to property which is constructed, reconstructed, erected, or acquired pursuant to a contract which, on June 20, 1977, and at all times thereafter, was binding on the taxpayer.

(g) DEPRECIATION ALLOWANCE IN CASE OF RETIREMENT OR REPLACEMENT OF CERTAIN OIL AND GAS BOILERS, ETC.—

(1) IN GENERAL.—Section 167 is amended by inserting after subsection (p) the following new subsection:

"(q) RETIREMENT OR REPLACEMENT OF CERTAIN BOILERS, ETC., FUELED BY OIL OR GAS.—

"(1) IN GENERAL.—If—

"(A) a boiler or other combustor was in use on April 20, 1977, and as of such date the principal fuel for such combustor was petroleum or petroleum products (including natural gas), and

"(B) the taxpayer establishes to the satisfaction of the Secretary that such combustor will be retired or replaced on or before the date specified by the taxpayer,

then for the period beginning with the taxable year in which subparagraph (B) is satisfied, the term 'reasonable allowance' as used in subsection (a) includes an allowance under the straight line method using a useful life equal to the period ending with the date established under subparagraph (B).

"(2) INTEREST.—If the retirement or replacement of any combustor does not occur on or before the date referred to in paragraph (1)(B)—

"(A) this subsection shall cease to apply with respect to such combustor as of such date, and

"(B) interest at the rate determined under section 6621 on the amount of the tax benefit arising from the application of this subsection with respect to such combustor shall be due and payable for the period during which such tax benefit was available to the taxpayer and ending on the date referred to in paragraph (1)(B)."

(2) EFFECTIVE DATE.—The amendment made by paragraph (1) shall apply to taxable years ending after the date of the enactment of this Act.

The CHAIRMAN. The Clerk will designate the heading of the part now pending.

The Clerk read as follows:

Page 567, line 1, part VII, title II.

(Part VII, title II, reads as follows:)

PART VII—MISCELLANEOUS PROVISIONS

SEC. 2071. TREATMENT OF INTANGIBLE DRILLING COSTS FOR PURPOSES OF THE MINIMUM TAX.

Subsection (b) of section 308 of the Tax Reduction and Simplification Act of 1977 is amended by striking out ", and before January 1, 1978".

SEC. 2072. OPTION TO DEDUCT INTANGIBLE DRILLING COSTS IN THE CASE OF GEOTHERMAL DEPOSITS.

(a) IN GENERAL.—Subsection (c) of section 263 (relating to intangible drilling and development costs in the case of oil and gas wells) is amended—

(1) by adding at the end thereof the following new sentence: "Such regulations shall also grant the option to deduct as expenses intangible drilling and development costs in the case of wells drilled for any geothermal deposit (as defined in section 613(e)(2)) to the same extent and in the same manner as such expenses are deductible in the case of oil and gas wells.", and

(2) by amending the subsection heading to read as follows:

"(c) INTANGIBLE DRILLING AND DEVELOPMENT COSTS IN THE CASE OF OIL AND GAS WELLS AND GEOTHERMAL WELLS.—

(b) MINIMUM TAX ON INTANGIBLE DRILLING COSTS IN THE CASE OF GEOTHERMAL WELLS.—

(1) Paragraph (11) of section 57(a) (relating to intangible drilling costs) is amended by striking out "oil and gas properties" each place it appears (including in the heading of subparagraph (C)) and inserting in lieu thereof "oil, gas and geothermal properties".

(2) Clause (i) of section 57(a)(11)(B) is amended by striking out "oil and gas wells" and inserting in lieu thereof "oil, gas, and geothermal wells".

(3) Paragraph (11) of section 57(a) is amended by adding at the end thereof the following new subparagraph:

"(D) PARAGRAPH APPLIED SEPARATELY WITH RESPECT TO GEOTHERMAL PROPERTIES AND OIL AND GAS PROPERTIES.—This paragraph shall be applied separately with respect to—

"(i) all oil and gas properties which are not described in clause (ii), and

"(ii) all properties which are geothermal deposits (as defined in section 613(e)(2))."

(4) Paragraph (2) of section 57(d) (defining straight line recovery of intangibles) is amended by adding at the end thereof the following new sentence: "This paragraph shall not apply to wells drilled for geothermal deposits (as defined in section 613(e)(2))."

(c) GAIN FROM DISPOSITION OF INTERESTS IN GEOTHERMAL WELLS.—

(1) Paragraphs (1) and (2) of section 1254(a) (relating to gain from disposition of interest in oil or gas property) are each amended by striking out "oil or gas property" each place it appears and inserting in lieu thereof "oil, gas, or geothermal property".

(2) Paragraph (3) of section 1254(a) (defining oil or gas property) is amended to read as follows:

"(3) OIL, GAS, OR GEOTHERMAL PROPERTY.—The term 'oil, gas, or geothermal property' means any property (within the meaning of section 614) with respect to which any expenditures described in paragraph (1)(A) are properly chargeable."

(3) The section heading of section 1254 is amended by striking out "OIL OR GAS" and inserting in lieu thereof "OIL, GAS, OR GEOTHERMAL".

(4) The table of sections for part IV of subchapter P of chapter 1 is amended by striking out "oil or gas" in the item relating to section 1254 and inserting in lieu thereof "oil, gas, or thermal".

(5) Subsection (c) of section 751 (relating to unrealized receivables) is amended by striking out "oil and gas property" and inserting in lieu thereof "oil, gas, or geothermal property".

(d) APPLICATION OF AT RISK RULES TO GEOTHERMAL DEPOSITS.—

(1) Paragraph (1) of section 465(c) (defining activities to which at risk rules apply) is amended by striking out "or" at the end of subparagraph (C), by adding ", or" at the end of subparagraph (D), and by inserting after subparagraph (D) the following new subparagraph:

"(E) exploring for, or exploiting, geothermal deposits (as defined in section 613(e)(2))."

(2) Paragraph (2) of section 465(e) is amended by striking out "or" at the end of subparagraph (C), by adding "or" at the end of subparagraph (D), and by inserting after subparagraph (D) the following new subparagraph:

"(E) geothermal property (as determined under section 614),".

(e) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall apply with respect to wells commenced on or after April 20, 1977, in taxable years ending on or after such date.

(2) ELECTION.—The taxpayer may elect to capitalize or deduct any costs to which section 263(c) of the Internal Revenue Code of 1954 applies by reason of the amendments made by this section. Any such election shall be made before the expiration of the time for filing claim for credit or refund of any overpayment of tax imposed by chapter 1 of such Code with respect to the taxpayer's first year to which the amendments made by this section apply and for which he pays or incurs costs to which such section 263(c) applies by reason of the amendments made by this section. Any election under this paragraph may be changed or revoked at any time before the expiration of the time referred to in the preceding sentence, but after the expiration of such time such election may not be changed or revoked.

SEC. 2073. 10-PERCENT DEPLETION IN THE CASE OF GEOTHERMAL DEPOSITS.

(a) GENERAL RULE.—Paragraph (4) of section 613(b) (relating to 10-percent depletion rate) is amended by striking out "and wollastonite" and inserting in lieu thereof "wollastonite, and geothermal deposits".

(b) LIMITATIONS.—Section 613 (relating to percentage depletion) is amended by adding at the end thereof the following new subsection:

"(e) SPECIAL RULES FOR GEOTHERMAL DEPOSITS.—

"(1) PERCENTAGE DEPLETION MAY NOT EXCEED ADJUSTED BASIS OF PROPERTY.—In the case of each property which is a geothermal deposit, the allowance for depletion determined

under this section for any taxable year shall not exceed the adjusted basis (for purposes of determining gain) of such property as of the end of such taxable year (determined without regard to any deduction for depletion for the taxable year).

"(2) GEOTHERMAL DEPOSIT DEFINED.—For purposes of this section, the term 'geothermal deposit' means a geothermal reservoir consisting of natural heat which is stored in rocks or in an aqueous liquid or vapor (whether or not under pressure)."

(c) TECHNICAL AMENDMENTS.—

(1) Paragraph (1) of section 613(c) (defining gross income from the property) is amended by inserting "and other than a geothermal deposit" after "oil or gas well".

(2) Subsection (d) of section 613 is amended by adding at the end thereof the following new sentence: "The preceding sentence shall not apply to any geothermal deposit."

(3) Paragraph (1) of section 613A(b) is amended—

(A) by inserting "and" at the end of subparagraph (A),

(B) by striking out "and" at the end of subparagraph (B), and

(C) by striking out subparagraph (C).

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1977.

SEC. 2074. REREFINED LUBRICATING OIL.

(a) IN GENERAL.—Section 4093 (relating to exemption of sales to producers) is amended to read as follows:

"SEC. 4093. EXEMPTIONS.

"(a) SALES TO MANUFACTURERS OR PRODUCERS FOR RESALE.—Under regulations prescribed by the Secretary, no tax shall be imposed by section 4091 on lubricating oils sold to a manufacturer or producer of lubricating oils for resale by him.

"(b) USE IN PRODUCING REREFINED OIL.—

"(1) SALES TO REREFINERS.—Under regulations prescribed by the Secretary, no tax shall be imposed by section 4091 on lubricating oil sold for use in mixing with used or waste lubricating oil which has been cleaned, renovated, or rerefined. Any person to whom lubricating oil is sold tax-free under this paragraph shall be treated as the producer of such lubricating oil.

"(2) USE IN PRODUCING REREFINED OIL.—Under regulations prescribed by the Secretary, no tax shall be imposed by section 4091 on lubricating oil used in producing rerefined oil to the extent that the amount of such lubricating oil does not exceed 55 percent of such rerefined oil.

"(3) REREFINED OIL DEFINED.—For purposes of this subsection, the term 'rerefined oil' means oil 25 percent or more of which is used or waste lubricating oil which has been cleaned, renovated, or rerefined."

(b) CONFORMING AMENDMENT.—Section 4092(a) is amended by striking out "4093" and inserting in lieu thereof "4093(a)".

(c) CLERICAL AMENDMENT.—The table of sections for subpart B of part III of subchapter A of chapter 32 is amended by striking out the item relating to section 4093 and inserting in lieu thereof the following:

"Sec. 4093. Exemptions."

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to sales on or after the first day of the first calendar month beginning more than 10 days after the date of the enactment of this Act.

SEC. 2075. ANNUAL REPORT ON ENERGY AND REVENUE EFFECTS OF THIS TITLE.

During August of each calendar year beginning after 1977, the President shall submit a report to the Congress which shall contain the following information:

(1) The amount of the increases or decreases in the revenues received in the Treasury during periods before the submission of such report resulting from each of the provisions of this title.

(2) An evaluation of the extent to which each of the provisions of this title resulted in increased energy conservation and production.

(3) Such other information as the President may determine to be relevant for an evaluation of the provisions of this title.

The CHAIRMAN. The Clerk will designate the part of the bill now pending.

The Clerk read as follows:

Page 575, line 18, part VIII, title II.

(Part VIII, title II, reads as follows:)

PART VIII—CONGRESSIONAL PROCEDURES FOR EITHER HOUSE VETO

SEC. 2081. CONGRESSIONAL PROCEDURES FOR EITHER HOUSE VETO OF CERTAIN SUSPENSIONS WITH RESPECT TO ENERGY EXCISE TAXES.

(a) SUBMISSION TO CONGRESS.—Whenever the President submits a suspension plan under section 4987(d)(1) or 4991(b) of the Internal Revenue Code of 1954 to the Congress, a copy of such plan shall—

(1) be delivered to each House of Congress on the same day and shall be delivered to the Clerk of the House of Representatives if the House is not in session and to the Secretary of the Senate if the Senate is not in session, and

(2) bear an identification number.

(b) PROCEDURES FOR DISAPPROVAL.—

(1) IN GENERAL.—The House of Representatives or the Senate may disapprove any suspension plan referred to in subsection (a) if it adopts a resolution of disapproval—

(A) by an affirmative vote of the majority of those present and voting in that House, and

(B) before the close of the 15th day after the date on which such plan was delivered to the Congress under subsection (a).

(2) RESOLUTION OF DISAPPROVAL.—For purposes of this section, the term "resolution of disapproval" means only a resolution of either House of Congress, the matter after the resolving clause of which is as follows: "That the does not favor the taking effect of the proposed suspension plan numbered , transmitted to the Congress by the President on ", the first blank space therein being filled with the name of the resolving House and the other blank spaces being appropriately filled.

(c) PROCEDURE IN EACH HOUSE.—

(1) A resolution of disapproval in the House of Representatives shall be referred to the Committee on Ways and Means. A resolution of disapproval in the Senate shall be referred to the Committee on Finance.

(2)(A) If the committee to which a resolution of disapproval with respect to any suspension plan has been referred has not reported it before the close of 7 days after its introduction, it is in order to move either to discharge the committee from further consideration of the resolution or to discharge the committee from further consideration of any other resolution of disapproval with respect to such plan which has been referred to the committee.

(B) A motion to discharage may be made only by an individual favoring the resolution, is highly privileged (except that it may not be made after the committee has reported a resolution of disapproval), and debate thereon shall be limited to not more than 1 hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(C) If the motion to discharge is agreed to or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other resolution of disapproval with respect to the same suspension plan.

(3)(A) When the committee has reported, or has been discharged from further consideration of, a resolution of disapproval, it is at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion is highly privileged and is not debatable. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(B) Debate on the resolution of disapproval shall be limited to not more than 10 hours, which shall be divided equally between those favoring and those opposing the resolution. A motion further to limit debate is not debatable. An amendment to, or motion to recommit, the resolution is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(4)(A) Motions to postpone, made with respect to the discharge from committee or the consideration of a resolution of disapproval, and motions to proceed to the consideration of other business, shall be decided without debate.

(B) Appeals from the decisions of the Chair relating to the application of the Rules of the House of Representatives or the Senate, as the case may be, to the procedure relating to any resolution of disapproval shall be decided without debate.

(5)(A) As used in subsections (b)(1)(B) and (c)(2)(A), the term "day" means any calendar day other than a day on which either House is not in session because of a sine die adjournment or an adjournment of more than 3 days to a day certain.

(B) For purposes of this section, if any suspension plan is delivered to the Congress on any day on which either House is not in session, such plan shall be treated as delivered on the first day thereafter on which both Houses are in session.

(6) This subsection is enacted by the Congress—

(A) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such it is deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of resolutions of disapproval: and they supersede other rules only to the extent that they are inconsistent therewith; and

(B) with full recognition of the constitional right of either House to change the rules (so far as relating to the procedures of that House) at any time, in the same manner, and to the same extent as in the case of any other rule of that House.

The CHAIRMAN. The Clerk will designate the table of contents.

The Clerk read as follows:

Page 1, line 6, table of contents. (The table of contents reads as follows:)

(b) TABLE OF CONTENTS.—

Sec. 1. Short title; table of contents.
Sec. 2. Findings and statement of purposes.
Sec. 3. National energy goals.
Sec. 4. References to Federal Power Commission and Federal Energy Administration.

TITLE I—PRICING, REGULATORY, AND OTHER NONTAX PROVISIONS

PART I—ENERGY CONSERVATION PROGRAMS FOR EXISTING RESIDENTIAL BUILDINGS

SUBPART A—UTILITY PROGRAM

Sec. 101. Definitions.
Sec. 102. Coverage.
Sec. 103. Residential energy conservation plans.
Sec. 104. Utility programs.
Sec. 105 Temporary programs.
Sec. 106. Federal standby authority.
Sec. 107. Relationship to other laws.

Sec. 108. Contract provisions.
Sec. 109. Rules.
Sec. 110. Product standards.
Sec. 111. Authorization of appropriations.
Sec. 112. Study respecting energy efficiency standards.
Sec. 101B. Supplemental State energy conservation plans.
Sec. 102B. Utility programs.

SUBPART B—WEATHERIZATION GRANTS FOR THE BENEFIT OF LOW-INCOME FAMILIES

Sec. 121. Federal Energy Administration weatherization grant program.
Sec. 122. Farmers Home Administration weatherization grant program.
Sec. 123. Availability of labor.

SUBPART C—SECONDARY FINANCING AND LOAN INSURANCE FOR ENERGY CONSERVING IMPROVEMENTS

Sec. 141. Purchase by Government National Mortgage Association of loans to low- and moderate-income families for energy conserving improvements.
Sec. 142. Loan insurance for energy conserving improvements under title I of the National Housing Act.
Sec. 143. Loan insurance for energy conserving improvements in multifamily projects under section 241 of National Housing Act.
Sec. 144. Standby authority of Government National Mortgage Association to purchase loans for energy conserving improvements.

SUBPART D—MISCELLANEOUS

Sec. 161. Energy conserving improvements for public housing.
Sec. 162. Energy conserving standards for newly constructed residential housing insured by Federal Housing Administration or assisted by Farmers Home Administration.
Sec. 163. Solar energy systems.
Sec. 164. Studies.
Sec. 165. Authorization for appropriations for new building preformance standards grants.
Sec. 166. Secondary financing by Federal Home Loan Mortgage Corporation of solar energy and energy conserving improvement loans.
Sec. 167. Secondary financing by Federal National Mortgage Association of solar energy and energy conserving improvement loans.
Sec. 168. Weatherization study.

PART II—ENERGY EFFICIENCY OF CERTAIN PRODUCTS; USE OF RECOVERED MATERIALS

SUBPART A—ENERGY EFFICIENCY STANDARDS FOR CONSUMER PRODUCTS OTHER THAN AUTOMOBILES

Sec. 201. Test procedures.
Sec. 202. Energy efficiency standards.
Sec. 203. Effect of standards on other law.
Sec. 204. Technical and conforming amendments.
Sec. 205. Appropriations authorization.
Sec. 206. Effects of other laws on procedures.

SUBPART B—DISCLOSURE OF AUTOMOBILE FUEL EFFICIENCY TAX

Sec. 221. Disclosure in labeling.
Sec. 222. Disclosure in advertising.

SUBPART C—USE OF RECOVERED MATERIALS

Sec. 241. Use of recovered materials.

PART III—ENERGY CONSERVATION PROGRAM FOR SCHOOLS AND HEALTH CARE FACILITIES

Sec. 301. Statement of findings and purposes.
Sec. 302. Amendment to the Energy Policy and Conservation Act.
Sec. 303. Technical amendments.

PART IV—NATURAL GAS

Sec. 401. Findings and purposes.
Sec. 402. Definitions.
Sec. 403. Calculation of the current Btu related price.
Sec. 404. Sales of new natural gas.
Sec. 405. Sales of old natural gas under existing contracts.
Sec. 406. Sales of old natural gas under new contracts.
Sec. 407. Sales of old natural gas under rollover contracts.
Sec. 408. Effective dates of rules with respect to maximum lawful prices.
Sec. 409. Special pricing provisions.
Sec. 410. Incremental pricing of natural gas.
Sec. 411. Essential agricultural uses.
Sec. 412. Natural gas storage facilities.
Sec. 413. Administrative procedure, enforcement, and judicial review.
Sec. 415. Relationship to the Emergency Natural Gas Act of 1977.
Sec. 416. Jurisdiction of the Commission under the Natural Gas Act.
Sec. 417. Conforming amendments to the Natural Gas Act.
Sec. 418. Amendments to the Emergency Natural Gas Act of 1977.

PART V—PUBLIC UTILITY REGULATORY POLICIES

Chapter 1—GENERAL PROVISIONS

Sec. 501. Purposes.
Sec. 502. Definitions.
Sec. 503. Application to Federal Power Act.
Sec. 504. Advisory Committee.

Chapter 2—IMPROVING EFFICIENCY OF ELECTRICITY

Subchapter A—General Provisions

Sec. 505. Coverage.

Subchapter B—National Minimum Standards for State Regulated Electric Utility Rate Regulation

Sec. 511. Minimum standards for rates of service.
Sec. 512. Minimum standards respecting advertising.
Sec. 513. Minimum standards respecting pollution control costs.
Sec. 514. Automatic adjustment clauses.
Sec. 515. Prohibition against special nonaggregate inclusions.
Sec. 516. Relationship to other applicable law.
Sec. 517. Solar, wind, and small electric generating systems.

Subchapter C—Other Requirements for State Regulated Electric Utilities

Sec. 521. Loal management techniques.
Sec. 522. Standards for information to consumers.
Sec. 523. Minimum procedures for termination of electric service.

Subchapter D—Nonregulated Utilities

Sec. 526. Requirements.

Subchapter E—Requirements Applicable to State Regulatory Authorities

Sec. 531. Compliance determination authority for State regulated electric utilities.
Sec. 532. Determination of costs of service.
Sec. 533. Alternative loan management techniques.
Sec. 534. Master metering.
Sec. 535. Participation in regulatory proceedings by States and by electric consumers.

Subchapter F—Enforcement and Review

Sec. 536. Prohibitions.
Sec. 537. Enforcement.
Sec. 538. Judicial review.

Chapter 3—IMPROVING EFFICIENCY OF, AND PRESERVING COMPETITION IN, GENERATION AND TRANSMISSION OF ELECTRICITY

Sec. 541. Interconnection, pooling, wheeling, and central dispatch.
Sec. 542. Continuance of service.
Sec. 543. Consideration of proposed rate increases.
Sec. 544. Automatic adjustment clauses.
Sec. 545. Electric utility reliability.
Sec. 546. Cogeneration.
Sec. 547. Interlocking directorates.
Sec. 548. Preservation of competition.
Sec. 549. Applicability of antitrust laws.

Chapter 4—CONSUMER REPRESENTATION AND ASSISTANCE TO STATE AGENCIES

Sec. 551. Financial assistance for State agencies and for consumer representation.
Sec. 552. Representation of consumer interests before Federal Power Commission.
Sec. 553. Responsibilities of Administrator.

Chapter 5—NATURAL GAS UTILITIES

Subchapter A—General Provisions

Sec. 561. Findings.
Sec. 562. Definitions.

Subchapter B—Requirements for Gas Utilities

Sec. 566. Coverage.
Sec. 567. Gas utility rate design proposals.
Sec. 568. Minimum standards respecting advertising.
Sec. 569. Minimum procedures for termination of gas service.
Sec. 570. Nonregulated utilities.

Subchapter C—Administration, Enforcement, Review

Sec. 581. Prohibitions.
Sec. 582. Enforcement.
Sec. 583. Compliance determination authority for State regulated gas utilities.
Sec. 584. Judicial review.

Chapter 6—SMALL HYDROELECTRIC POWER PROJECTS

Sec. 586. Incentive program.
Sec. 587. License charges.
Sec. 588. Transfers of authority.

PART VI—CONVERSION FROM NATURAL GAS AND PETROLEUM TO COAL AND OTHER FUEL RESOURCES

SUBPART A—GENERAL PROVISIONS

Sec. 601. Findings and statement of purposes.
Sec. 602. Definitions.
Sec. 603. Territorial application.
Sec. 604. Effect of environmental requirements.

SUBPART B—PROHIBITIONS; EXEMPTIONS

Sec. 611. New electric powerplants.
Sec. 612. New major fuel-burning installations.
Sec. 613. Existing electric powerplants and existing major fuel-burning installations.
Sec. 614. Supplemental natural gas boiler fuel conservation authority.
Sec. 615. Prohibition on use of natural gas for decorative outdoor lighting.
Sec. 616. Exemption for qualifying cogeneration facilities.
Sec. 617. Exemption for high Btu synthetic gas derived from coal.
Sec. 618. Terms and conditions of exemptions.

SUBPART C—ENFORCEMENT; ADMINISTRATION

Sec. 621. Administrative procedures.
Sec. 622. Enforcement and penalties.
Sec. 612. Citizen suits.
Sec. 624. Preservation of contractual rights.
Sec. 625. Information.

SUBPART D—MISCELLANEOUS PROVISIONS

Sec. 631. Emergency powers of the President.
Sec. 632. Federal activities.
Sec. 633. Impact on employees.
Sec. 634. Annual report.
Sec. 635. Authorization of appropriations.
Sec. 636. Studies.
Sec. 637. Effects of other laws on procedures.
Sec. 638. Conforming amendments.
Sec 639. Effective dates.

PART VII—FEDERAL ENERGY INITIATIVES
SUBPART A—FEDERAL VAN POOLING PROGRAM
Sec. 701. Federal van pooling program.
SUBPART B—AMENDMENT TO SECTION 381 OF ENERGY POLICY AND CONSERVATION ACT
Sec. 721. Conservation plan authorization.
SUBPART C—DEMONSTRATION OF SOLAR HEATING AND COOLING IN FEDERAL BUILDINGS
Sec. 741. Definitions.
Sec. 742. Federal solar program.
Sec. 743. Duties of Administrator.
Sec. 744. Transfer of appropriations.
Sec. 745. Submission of proposals.
Sec. 746. Authorization.
SUBPART D—USE OF ENERGY CONSERVATION AND SOLAR ENERGY IN FEDERAL BUILDINGS
Sec. 761. Findings.
Sec. 762. Policy.
Sec. 763. Purpose.
Sec. 764. Definitions.
Sec. 765. Establishment and use of life cycle cost methods.
Sec. 766. Energy performance targets for existing buildings.
Sec. 767. Energy audits and retrofitting of existing Federal buildings.
Sec. 768. Energy preference for leased buildings.
Sec. 769. Budget treatment of energy items by Federal agencies.
Sec. 770. Reports.
Sec. 771. Transfer of functions.
Sec. 772. Authorization of appropriations.
SUBPART E—USE OF ADVANCED PHOTOVOLTAIC ENERGY DEVICES IN FEDERAL FACILITIES
Sec. 781. Short title.
Sec. 782. Photovoltaic energy program.
Sec. 783. Purpose.
Sec. 784. Acquisition of systems.
Sec. 785. Administration.
Sec. 786. Systems evaluation and purchase program.
Sec. 787. Advisory committee.
Sec. 788. Definition.
Sec. 789. Authorization.
TITLE II—TAX PROVISIONS
Sec. 2001. Short title.
Sec. 2002. Amendment of 1954 Code.
PART I—RESIDENTIAL ENERGY CREDIT
Sec. 2011. Residential energy credit.
PART II—TRANSPORTATION
SUBPART A—GAS GUZZLER TAX
Sec. 2021. Gas guzzler tax.
Sec. 2022. Trust Fund for purpose of reducing public debt.
SUBPART B—MOTOR FUELS
Sec. 2023. Repeal of deduction for State and local taxes on gasoline and other moto rfuels.
Sec. 2024. Extension to 1985 of existing rate of tax on gasoline and other motor fuels.
Sec. 2025. Amendment of motorboat fuel provisions.
SUBPART C—PROVISIONS RELATED TO BUSES
Sec. 2026. Removal of excise tax on buses.
Sec. 2027. Removal of excise tax on bus parts.
Sec. 2028. Removal of excise tax on certain items used in connection with intercity, local, and school buses.
SUBPART D—CREDIT FOR ELECTRIC MOTOR VEHICLES
Sec. 2029. Credit for qualified electric motor vehicles.
PART III—CRUDE OIL EQUALIZATION TAXES
SUBPART A—IMPOSITION OF TAXES
Sec. 2031. Crude oil equalization taxes.
Sec. 2032. Miscellaneous provisions.
SUBPART B—RETURN OF CRUDE OIL EQUALIZATION TAXES
Sec. 2033. Establishment of Trust Fund for the return of crude oil equalization taxes.
Sec. 2034. Per taxpayer credit of crude oil equalization tax receipts.
Sec. 2035. Special payment to recipients of benefits under social security, railroad retirement, and supplemental security income programs.
Sec. 2036. Special payment to recipients of aid to families with dependent children under approved State plans.
Sec. 2037. Other special payments.
Sec. 2038. Provisions applicable to special payments generally.
Sec. 2039. Refunds of crude oil equalization taxes for residential, etc., use.
Sec. 2040. Payments to Puerto Rico and the possessions of the United States.
PART IV—EXCISE TAX ON BUSINESS USE OF OIL AND NATURAL GAS
Sec. 2041. Excise tax on business use of oil and gas.
PART V—CREDIT AGAINST TAX ON BUSINESS USE OF OIL AND GAS
Sec. 2051. Credit against tax on business use of oil and gas.
PART VI—CHANGES IN BUSINESS INVESTMENT CREDIT TO ENCOURAGE CONSERVATION OF, OR CONVERSION FROM, OIL AND GAS OR TO ENCOURAGE NEW ENERGY TECHNOLOGY
Sec. 2061. Changes in business investment credit.
PART VII—MISCELLANEOUS PROVISIONS
Sec. 2071. Treatment of intangible drilling cost for purposes of the minimum tax.
Sec. 2072. Option to deduct intangible drilling costs in the case of geothermal deposits.
Sec. 2073. 10-percent depletion in the case of geothermal deposits.
Sec. 2074. Rerefined lubricating oil.
Sec. 2075. Annual report on energy and revenue effects of this title.
PART VIII—CONGRESSIONAL PROCEDURES FOR EITHER HOUSE VETO
Sec. 2081. Congressional procedures for either House veto of certain suspensions with respect to energy excise taxes.

The CHAIRMAN. Without objection, the ad hoc committee amendments to the table of contents except on page 8 are agreed to.

There was no objection.

The CHAIRMAN. Without objection, the ad hoc committee amendments to the table of contents on page 8 are rejected.

There was no objection.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. ANDERSON OF ILLINOIS

Mr. ANDERSON of Illinois. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk proceeded to read the amendment in the nature of a substitute.

Mr. ANDERSON of Illinois (during the reading). Mr. Chairman, I ask unanimous consent that further reading of the substitute be dispensed with and, Mr. Chairman, further due to the size and the fact that H.R. 8555 is printed and has been available in bill form. I ask unanimous consent that printing of the bill in the RECORD at this point be dispensed with because of the cost that would be involved.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

Mr. DINGELL. Mr. Chairman, reserving the right to object, and I do not think I will object, Mr. Chairman, I would like to direct a question to the gentleman from Illinois.

Mr. Chairman, I believe the gentleman from Illinois has stated to us that the amendment here is H.R. 8555 as printed on July 27, 1977.

Mr. ANDERSON of Illinois. That is correct. That is the bill to which I refer.

Mr. DINGELL. I direct a further question to my friend: There are no changes in the text of H.R. 8555 as printed on July 27 in the amendment which is offered by my friend?

Mr. ANDERSON of Illinois. No changes.

Mr. DINGELL. Mr. Chairman, I do not object, but I still reserve a point of order against the amendment.

The CHAIRMAN. The gentleman from Michigan reserves a point of order against the amendment.

Without objection, the unanimous-consent request of the gentleman from Illinois is agreed to.

There was no objection.

Mr. ANDERSON of Illinois. Mr. Chairman; we are now at the most crucial point in consideration of this bill. The House has tried to perfect the bill H.R. 8444 and has failed. The bill is still defective. The close votes on all substantive amendments is ample evidence.

The substitute energy plan which I am offering to the House today is the only energy policy which is truly an energy policy and not a tax or welfare reform measure in disguise. The substitute is a far superior plan for several reasons. It is the only program that sets goals which can be reached. It is the only program which provides modest but effective means for stimulating the production of oil, gas, and coal. It is the only program which gives consumers a break on our cleanest fuel, natural gas. It is the only program that does not penalize industry for complying with clean air laws. It is the only plan which does not try to force our dirtiest fuel into areas where it is not economically advantageous to do so.

Mr. Chairman, our energy problem is an economic and national security problem of extraordinary proportions. It is a disgrace for this body to be caught in the very serious position it is now. We are getting a bad energy policy shoved down our throats, on purely partisan political grounds, with no technical or economic justification of the plan, and with widespread dissatisfaction with individual elements of the plan. It will not reduce our imports problem. Our national security will be further degraded as imports climb by 1985 to 10 million barrels per day, and a dollar outflow to $90 billion per year. We are caught in the middle of a political hurricane and the leadership and the administration are refusing to treat the problem seriously.

Mr. Chairman, our substitute is an energy policy which Members on both sides of the aisle can support. We support the effort of the administration to put coal high on the list of domestic energy resources that must be used and rein-

force the use of coal by providing strong financial support for developing technologies to use clean fuels from coal. We adopt a very strong environmental point of view by emphasizing that production of our cleanest fuel, natural gas, must be expanded in order to keep industries in our cities running on clean fuel rather than dirty fuel, coal. We are not interested in moving back to the age of soot. We are surprised the President and the environmental movement are so inclined.

Our plan is a sensible balance between production and conservation. The administration plan is only half a loaf—conservation. And in my view, our security as a Nation demands more than half a loaf. We need the whole loaf.

Mr. Chairman, the substitute which I am presenting here today, H.R. 8555 is the only plan which specifically provides for increasing production of energy and for a systematic reduction in imports. Our plan will not result in a steady decline in crude oil and natural gas production. It will result in 2 million barrels of new production of crude oil per day by 1985 and 1.5 trillion cubic feet of natural gas. We accomplish this by removing price controls on new onshore natural gas, by removing price controls on upper-tier oil over a 5-year period, by removing all price controls on enhanced recovery and all new oil, and by providing a 50-percent plowback credit against taxes paid in our crude oil tax program which tacks lower-tier crude to the world price.

Ours is a consumer bill because it will result in lower prices for natural gas consumers, it will result in lower prices for gas at the pump, it will result in lower prices for products coming out of the industrial sector and it will result in a much cleaner environment for those areas in which conversion to coal would be forced to take place.

We emphasize that oil and natural gas can be obtained at costs which are below the alternatives and which can continue to be burned in compliance with all clean air laws.

Our bill takes a realistic position on coal conversion. We choose to avoid a situation where the regulators at FEA will be required to provide exemptions for 80 percent of the boilers in this country when only 9 percent of the total energy consumed by all boilers is consumed in three small boilers.

We do not want the massive numbers of industries using these boilers trooping to Washington to plead their case against an arbitrary and insane law. We want to give them a long overdue bit of good news from Washington. If the Government wants them to convert, then it is up to the Government to prove that they can.

We support the President on essentially all of his insulation and conservation programs. Our bill will not compromise the conservation goal at all. In fact, our insulation program will probably result in lower insulation costs to consumers because our plan—without Government generated lists—is much more conducive to small businessmen and aggressive competition, both of which will result in lower costs.

Finally, Mr. Chairman, we provide rebates of home heating oil to consumers, not the distributors. In our plan, each customer will receive the credit and not have to hope that your friendly distributor will play square with his customers and rebate the tax totally.

In conclusion, Mr. Chairman, I plead for a reconsideration by Members on the other side of the aisle. It is not too late to cast a sensible vote for a rational energy policy. The substitute plan will work in the best interests of the entire Nation and it deserves the support of every Member of this body. Support the substitute.

With that, Mr. Chairman, for a further explanation and justification of the substitute I yield now to the gentleman from Ohio (Mr. BROWN).

Mr. BROWN of Ohio. Mr. Chairman, I rise as one of the sponsors of the Anderson Republican substitute, H.R. 8555, and urge my colleagues to support this program as a rational energy policy.

The choices before the House which are offered by this substitute should be clear to all Members. They are certainly going to be clear to all of our constituents. First, the choice is between higher and higher taxes and greater and greater Government regulation as proposed by the administration or less taxes and less Government regulation as proposed by the Republican substitute.

Second, the choice is between paying for energy produced at home or paying for energy produced abroad; between a contribution to our domestic U.S. economy or a contribution to the coffers of the Arab oil sheiks.

The Republican alternative is the only one of the two energy programs that provides for increased production of our domestic energy resources. Unlike the Carter program, which tries to address only the demand side of the energy problem, our bill combines several of the better conservation programs in the President's bill with important incentives to increase domestic production of natural gas and oil. The Republicans on the ad hoc committee were disturbed by the lack of sufficient incentives in the President's plan to stimulate domestic production of all forms of energy and so introduced this bill to provide the House with an opportunity to vote on a more effective energy policy.

The inadequacies of the current crude oil pricing scheme are ignored by the Carter bill, in spite of the rise in imports from 29 to 42 percent of our total oil consumption with the cost of those imports increasing by 650 percent, from $4.6 billion to over $40 billion since 1972, the year before the OPEC embargo.

In the natural gas area, the administration and the House have agreed to tie the price of natural gas (on a Btu basis) to the cost of crude oil produced in the United States. This administration philosophy clearly fails to recognize several flaws:

First. The price of new natural gas is tied to the price of old oil.

Second. The premium qualities of gas (for environmental cleanness and technical process and feedstock uses) are not recognized in tying prices directly to the Btu equivalency price of domestically produced oil, and

Third. That pricing mechanism for crude oil has failed miserably to achieve what Congress intended in the production of domestic crude oil.

Why, then, do we couple the viability of a truly domestic energy resource, natural gas, to a policy which has discouraged production of domestic oil and nearly doubled our oil import problem in 4 short years?

Finally, with respect to coal, the administration has vague and general ambitions for using coal. The goal of using 400 million tons of new coal in 1985 cannot be met under the Clean Air Act until coal can be converted cleanly into low- and medium-Btu gas that can be burned in an environmentally acceptable manner. The problems associated with developing these synthetic fuels technologies are not at all addressed in the administration's energy plan.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. BROWN) has expired

Mr. ANDERSON of Illinois. Mr. Chairman, I ask unanimous consent that the gentleman from Ohio (Mr. BROWN) may proceed for an additional 5 minutes.

The CHAIRMAN. Before the extension is granted, the Chair would like to direct a question to the gentleman from Michigan (Mr. DINGELL).

Does the gentleman from Michigan press his reservation of a point of order?

Mr. DINGELL. Mr. Chairman, I observe that the bill, or rather the amendment here, appears to be subject to attack on germaneness grounds. I note that the rule does not waive points of order against the substitute based on nongermaneness.

Further reserving a point of order, Mr. Chairman, I believe the gentleman from Ohio (Mr. BROWN) will concede that this substitute contains oil pricing amendments. These provisions are certainly not germane to the bill before us, which does not deal with oil pricing.

Mr. Chairman, these crude oil decontrol proposals are combined with natural gas deregulation proposals previously rejected by the House but included in this substitute. The combination of these proposals will spell economic disaster for the Nation; for this reason alone, I think the substitute must be rejected.

Mr. Chairman, while I believe that a valid point of order may be raised against this substitute for violation of the germaneness rule, I believe it is most important that this substitute be recognized for what it is and rejected for that reason and that the vote be upon the substance of the matter, rather upon the procedural question upon which I believe the proposal is defective.

Therefore, Mr. Chairman, I withdraw my reservation and I urge my colleagues to reject this dangerous, ill-conceived and poorly executed substitute, which would undercut the objective of establishing a comprehensive national energy policy.

The CHAIRMAN. The gentleman from Michigan (Mr. DINGELL) withdraws the point of order.

The time of the gentleman from Ohio (Mr. BROWN) has expired.

Mr. ANDERSON of Illinois. Mr. Speaker, I ask unanimous consent that the gentleman from Ohio (Mr. BROWN) be permitted to proceed for an additional 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. BROWN of Ohio. Mr. Chairman, the Anderson-Republican substitute on the other hand would do the following:

First. Contains no gasoline tax.

Second. Retains all insulation programs but with no Governors' "slush funds" lists.

Third. Provides a 1-year tax cut instead of a general tax rebate. (Our tax cut to lighten the load on low and middle income customers of cost increases in their energy supplies.)

Fourth. Rebates heating oil payments to consumers, not distributors.

Fifth. Retains all insulation tax credits and the grant program for public buildings.

Sixth. Retains the gas guzzler tax.

Seventh. Replace Ways and Means tax on industrial use of oil and gas with a tax on boiler use of oil and gas.

Eighth. Adopts new crude oil pricing policy which would do the following—Mr. STEIGER and Mr. MOORE will explain:

Retain price controls on lower tier oil.

Provides for the taxing of lower tier oil to the world price and permits up to 50 percent plowback of this tax for exploration and development of new domestic oil.

Returns upper tier oil prices to the competitive market over a 5-year phaseout period.

Brings on 2 million barrels per day of new oil supply.

Has the same effect on crude oil price as the Carter plan.

Ninth. Gradually removes price controls on natural gas through the provisions of the Brown-Krueger-Wirth amendment.

Tenth. Puts the burden of proof on FEA rather than the private sector for conversion from gas and oil to coal-fired boilers and raises the threshhold for boiler conversion to 300 Btu's per hour rather than the 100 Btu per hour level. (Mr. STOCKMAN will explain.)

Eleventh. Establishes trust funds from the crude oil equalization tax on old oil to States harmless on highway maintenance, to build mass transit systems, and to encourage the development of synthetic gas and oil from coal.

Twelfth. Finally, it leaves the language of the Ways and Means—ad hoc committee unamended by the Corman amendment just adopted so that utility or industrial plants which cannot convert from oil and gas to coal are not penalized by taxes on the oil and gas those plants must burn.

Mr. BURGENER. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from California.

Mr. BURGENER. Mr. Chairman, I rise in opposition to H.R. 8444, the Carter administration's so-called national energy plan. No matter how well motivated, this is not a national energy plan. It is a massive tax bill. In the next 4 years alone it will ask American taxpayers to pay an additional $40 billion in new or increased taxes, over and above what they are now paying. This does not even count the hidden and indirect taxes and cost increases that will also be incurred as a result of passage of this bill.

My figures are not drawn from thin air, nor are they imaginary or overblown. They are not merely political rhetoric. They are taken from the committee bill of the House Committee on the Budget, a committee on which I serve, and are part and parcel of the final resolution for the fiscal year 1978 budget. This resolution will be acted upon in this House when we return in September. The Federal revenues for fiscal year 1978 and the projected revenues for years to come are contained in this budget resolution.

This "energy" package is replete with the "tax the people more syndrome." Why I ask, when our Nation faces a serious problem such as in the case of energy supplies, not war, do we respond by another massive attack on the earnings of the American worker?

I maintain this measure is a monumental program to redistribute the wealth of this country. We already have many laws, rules and regulations which redistribute wealth. This is good—up to a point. It is good when it properly provides for the ill, the elderly, the handicapped and the disadvantaged. This is a social and moral responsibility every Member of this House wants to meet. But, when we go beyond that and penalize producers and production, the effects on our society are damaging. And that, my colleagues, is the danger in this bill. We may well lose our ability to help those who desperately need help. Not our willingness to help, but our ability.

The bill really produces no more energy. It hopes for conservation by imposing high taxes for use of energy and it displays a nearly complete lack of faith in the free market system—a system I submit which has made this Nation great.

When gasoline reaches more than $1 a gallon, as surely it will if this measure becomes law, I hope that automobile commuting Americans who have no choice but to drive many miles to and from work, remember well who made it happen.

Mr. Chairman, I urge rejection of this unwise and ill-conceived measure.

Mr. ANDERSON of Illinois. Mr. Chairman, I thank the gentleman from Ohio for his very lucid explanation of the various parts of the amendment in the nature of a substitute. I would certainly urge support of all Members of the House.

Mr. Chairman, if Mr. DINGELL were to press a point of order as he earlier announced he would do, I would argue the amendment in the nature of a substitute, H.R. 8555, is clearly germane to the text of H.R. 8444 when viewed as a whole. And I would submit that this is the test of germaneness on an amendment in the nature of a substitute, and not whether a particular portion of that substitute might be considered nongermane if offered separately.

To support this contention, Mr. Chairman, I cite section 795 of the House Rules and Manual of the 95th Congress, and I quote:

> When an amendment in the nature of a substitute is offered at the end of the first section of a bill, the test of germaneness is the relationship between the amendment and the entire bill, and the germaneness of an amendment in the nature of a substitute for a bill is not necessarily determined by an incidental portion of the amendment which if offered separately might not be germane to the portion of the bill to which offered. (July 8, 1975)

Mr. Chairman, that ruling of the Chair occurred on an amendment in the nature of a substitute offered by the gentleman from Montana (Mr. MELCHER) to the so-called Elk Hills naval petroleum reserve bill (H.R. 49) in the 94th Congress. The gentleman from Michigan (Mr. DINGELL) raised a point of order against the substitute on the grounds that it called for a study of matters not mentioned in the original bill. In overruling that point of order the Chair stated, and I quote:

> Had this proviso been presented separately, the germaneness would have been measured against the portion of the Interior Committee amendment to which offered. However, having been presented as a part of an overall substitute, the Chair would rule that the provision objected to is merely incidental to the fundamental purpose of the amendment, and that under the precedent cited by the gentleman from Montana (Mr. Melcher), in section 798(b) of the Manual the amendment is germane to the text when viewed as a whole.

Quoting now from section 798(b) of the manual on which Mr. MELCHER relied in opposing that point of order:

> The fundamental purpose of an amendment must be germane to the fundamental purpose of the bill (VIII, 2911). Thus for a bill proposing to accomplish a result by methods comprehensive in scope, a committee amendment in the nature of a substitute seeking to achieve the same result was held germane where it was shown that additional provisions not contained in the original bill were merely incidental conditions or exceptions which were related to the fundamental purpose of the bill (Aug. 2, 1973).

The precedent cited under that section of the manual involved an Interior Committee amendment in the nature of a substitute to the Trans-Alaska Pipeline Authorization (H.R. 9130) on August 2, 1973. Again, it was the gentleman from Michigan (Mr. DINGELL) who raised a point of order against the substitute on the grounds that it contained certain matters not found in the original bill and which fell under the jurisdiction of another committee. In overruling the point of order, the Chair stated, and I quote:

> . . . the Chair is of the opinion that the provision in the committee amendment relating to the expediting of litigation involving the pipeline permits is merely incidental to the purpose of the original bill and is indeed directly related to the concept of judicial review contained in the bill. With respect to the other provisions of the committee amendment to which the gentleman from Michigan

has made reference, the Chair is of the opinion that they, too, are incidental to the overall purpose of the bill. The Chair holds that the committee amendment is germane and overrules the point of order.

I would also call the attention of the Chair to section 795 of the manual, and I quote:

In passing on the germaneness of an amendment, the Chair considers the relationship between the amendment and the bill as modified by the Committee of the Whole (April 23, 1975).

In the precedent cited under that section, an amendment was offered to the Vietnam Humanitarian Assistance and Evacuation Act (H.R. 6096) on April 23, 1975, by the gentleman from California (Mr. JOHN L. BURTON).

A point of order was raised against the amendment on the grounds that it was not germane. The Chair overruled the point of order on the grounds that the second part of the pending amendment was very similar to two other amendments which had been adopted earlier, and the adoption of those amendments, in the words of the Chair, "did adequately broaden the scope of this bill so that the amendment of the gentleman from California (Mr. JOHN L. BURTON) would be in order."

Mr. Chairman, I cite this latter precedent because earlier this week we did adopt an amendment to the statement of purposes of H.R. 8444—an amendment which added the following new purpose, and I quote:

to provide incentives to increase the amount of domestically produced energy in the United States for the benefit of present and future generations.

The disputed section of our substitute, section 801 which deals with "crude oil pricing," is aimed directly at that purpose of providing incentives for increasing the amount of domestically produced petroleum.

But beyond this one purpose of the bill, I think it can be amply demonstrated that the fundamental purpose of the substitute is germane to the fundamental purpose of the bill, and that is, in the words of H.R. 8444, "to establish a comprehensive national energy policy." While section 801 of our substitute may have been considered nongermane to the bill if offered separately, the precedents of the House indicate that when such an otherwise nongermane provision is incorporated into a substitute, the germaneness test comes on the relationship of the entire substitute to the bill viewed as a whole. According to the numerous precedents which I have already cited, when a bill is under consideration which proposes to accomplish a result by methods comprehensive in scope, as this National Energy Act certainly does, an amendment in the nature of a substitute is held germane if it seeks to achieve the same result even though it contains additional provisions not contained in the original bill, provided that those additional provisions are merely incidental to the fundamental purpose of the amendment. This certainly is the case with respect to my amendment in the nature of a substitute, H.R. 8555, the preponderance of which is identical to the bill which it seeks to amend, H.R. 8444. There can be no question that the disputed section, section 801, is an incidental portion of the overall amendment, comprising as it does only 4 of the 420 pages of the amendment. Thus, the amendment is germane to the text of the bill when viewed as a whole, and a point of order does not lie against the substitute when viewed in that context. I therefore urge the Chair to overrule this point of order.

Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, when the President announced that he was going to submit a national energy plan to Congress, I was pleased and optimistic. However, while I applaud him for his boldness, and for outlining for the American people the scope and degree of the emergency, I am disappointed in his program.

The legislation before us today, H.R. 8444, while lacking some of the objectionable provisions of the original program, still contains many provisions that I feel not only fall short of solving the problem we face, as has been stated in a GAO report, but contains the ingredients for record levels of inflation, and for unemployment.

Opposition to this legislation is broad, resulting largely from the punitive nature of the program's approach to solving our energy problem. With few minor exceptions, there is little recognition of the value of the Federal Government joining forces with the private sector of the economy in an effort to solve our energy problem. Penalties and taxes, instead of incentives and tax reductions, appear to be the philosophy by which the proponents of H.R. 8444 hope to reach their goals.

Our economy has been staggering under these policies for many years. The approach to solving our energy problem, as contained in this legislation, is yet another step in the wrong direction. For these reasons, I support the Republican substitute.

While H.R. 8444 and the substitute have identical goals, the difference lies in the lack of incentives in H.R. 8444. There is an apparent lack of understanding that if we are to take the first step toward solving our energy problem, increased production of all forms of domestic energy sources must go forward with conservation. Without stimulating the private sector of the economy by offering incentives, increased production is not going to be realized.

H.R. 8444 appears to be written under the assumption that additional energy sources cannot be found and that Government must therefore manage a coming energy shortage. The Republican substitute was drafted under the assumption that there may well be large energy reserves, which it is commonly agreed can only be tapped and utilized at costs above current levels. While H.R. 8444 seeks to increase these prices artificially, the substitute would allow new oil and gas to be decontrolled reaching world markets in a way that would provide an incentive to the private sector to explore for new resources.

The substitute retains all of the insulation programs contained in H.R. 8444, but without limiting the eligible technologies. It provides for a 1-year tax cut instead of rebates, since administration of the rebates would, in effect, take approximately 40 percent of the collected funds and return only 60 cents on the dollar. It provides for heating oil rebates to the affected consumers, not to the distributors. It retains all solar tax credits. It retains the gas guzzler tax. It provides a more reasonable provision for pricing schemes that returns upper tier oil to the competitive market, bringing on 2 million barrels per day of new supply. It puts the burden of proof of conversion from oil and gas to coal on the FEA rather than industry. It establishes trust funds from the crude oil tax to hold States harmless on maintenance, builds mass transit, and encourages synthetic fuel development. Finally the substitute does not contain a gasoline tax.

While no legislative program is going to solve all of our energy problems, I feel the substitute we have the opportunity to vote on today is clearly superior not only in its philosophical approach to our problem, but in the specific programs it contains.

I urge its adoption.

Mr. MOORE. Mr. Chairman, I rise in support of the substitute amendment.

Mr. Chairman, there is one very noticeable ingredient missing in this bill that makes this substitute necessary. That is the fact that nothing is said about oil pricing.

There is a very real problem and just as big a problem as with deregulation of natural gas. Nothing is done in the bill to encourage production of either.

The substitute amendment addresses both of these issues. But it is especially important to understand why it is necessary to address the oil pricing issue. There is a good reason why the bill did not talk about oil pricing. That is the fact that under the two laws we are operating under regarding the price of oil, we have not had a very good record. As a matter of fact, it is a very embarrassing record.

When we passed the Emergency Petroleum Allocation Act in 1973 and the Energy Policy and Conservation Act of 1975, the intent of those acts, which legislated Government regulation of prices of crude oil for the first time, was to allow for a steady increase in the oil price. If we look at what happened, just the opposite transpired.

Under EPAA, in 1975 the price of new domestic oil was $12.60. In February, 1976 it fell to $11.28. In March 1977, it fell to $10.90.

It is going just the other way. It is doing that because the Government formula for regulating the price of oil has been incorrect, and it had to order rollbacks. Those rollbacks are discouraging production in this country, and we have

never achieved the price levels for domestic oil that we were supposed to achieve when this Congress passed those two laws. They are failures.

In 1970, we reached an all-time high for domestic production of oil in this country, 9.6 million barrels per day. Shortly thereafter it begun to taper off very slowly. Then we put on Federal price controls, in August 1973, and from that point to today, the decrease in the amount of oil we are producing in this country has accelerated. It is accelerating to the point that the decline in production since the passage of these laws is at least 35 percent faster than before the passage of these laws.

It is also interesting to note that just as we would expect, our dependence on Arab oil from the OPEC countries has increased during that period.

In 1972, before we put on Federal price controls, we were bringing in 29 percent of our oil from outside the country. From January through March, 1977, it is now 47 percent, a tremendous increase.

We have also created a new Federal agency to administer the price controls of oil. First it was the Federal Energy Office, and then the Federal Energy Administration. They started out with a budget of $130 million in 1975. It has grown to the fiscal year 1978 figure of $344 million. The number of employees in 1975 was 2,462. Today there are 3,776.

It is interesting to note that things must not be working well down at the lower levels where this law is being administered, because the number of appeals and stay requests coming to FEA in Washington from the local level in 1975 was only 30, but in the first 7 months of this year it has increased to 170.

Therefore, if we look at what we have received in return for imposing Federal price controls on oil, this is what we see:

First, we have had a reduction in the price of domestic crude oil instead of an intended increase. We are willing to pay the Arabs the world price, but not the independent American producer.

Second, we have seen an acceleration in the decline of production in this country.

Third, we have seen a much greater dependence on OPEC oil.

Fourth, we have seen a big bureaucracy grow out of it.

It is interesting to note that the Department of Energy which absorbs FEA, that we just created has a budget of $10.6 billion, while the total amount of money which is going to be spent in the United States this year for domestic exploration for oil and gas will be $10.2 billion.

Therefore, the substitute amendment offered by the gentleman from Illinois (Mr. ANDERSON) is most important because it does rectify this problem which we have glossed over and overlooked in this bill, the problems we are having with Government regulated domestic oil prices. Therefore, I urge passage of the Anderson substitute.

Mr. ARCHER. Mr. Chairman, will the gentleman yield?

Mr. MOORE. I yield to the gentleman from Texas.

Mr. ARCHER. Mr. Chairman, the Houston and Southwest area will be among the hardest hit in the Nation by the National Energy Act.

Unless it is changed radically by the Senate, the totally unrealistic timetable for conversion from natural gas fired powerplants to those fired by coal will place a burden on our utilities and manufacturing industry that will have serious economic repercussions. It simply is not possible for this conversion to take place by 1990 without accompanying massive, expensive capital investment—and that cost will have its toll on the pocketbooks of consumers and on economic expansion which is the cornerstone of a solid job market for our people.

When you combine that with the increased cost of gasoline brought about by the oil equalization tax provisions, and the elimination of the State gasoline tax as a Federal income tax deduction, it becomes obvious that the Southwest and Houston are major victims of the regional bias which pervaded consideration of the bill. Why else would we be paying so much more, while the Northeast would have immediate access to electricity generated in Houston on demand, and while residents of areas which consume home heating oil actually receive rebates to help pay their fuel bills?

This measure, which is basically the President's plan with a few alterations, is an abomination. It calls on Houstonians and Southwesterners to bear a totally inordinate amount of the financial suffering, and it most certainly does not provide any workable solution to our national energy dilemma.

Nowhere in the bill are there sufficient incentives to expand domestic exploration and development of oil and natural gas that we must have to help bridge the gap before other fuel sources can truly take over much of the energy burden. The provisions placing all natural gas under Federal regulation are just the opposite of what we need to stimulate development of that still precious fuel.

Those who support this plan I believe do this Nation a grave injustice. We have a chance to take meaningful action to solve our energy shortage but advocates of this bill choose instead to try to sell the people of this country on a program which glitters of gold but is totally lacking in substance.

Mr. COLLINS of Texas. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment in the nature of a substitute.

Mr. Chairman, the Republican substitute for the energy bill provides the logical answer that America needs to meet the energy crisis.

President Carter's plan is a tax plan that taxes, taxes and taxes. The only conservation suggestion that was fought on the floor provides a million dollars to make a study of bicycles. Bicycles are not the answer.

We improved the bill by eliminating the added 5-percent direct gasoline tax but the House continued to leave in the bill a tax on crude oil that will cost 7 cents a gallon. This 7-cent tax is going to be felt by every person burning their fuel oil, by every industry, and it will be felt the quickest by the trucks. When the truckers' costs go up today, the housewife picks up this passed-on additional expense tomorrow.

President Carter has placed taxes and more taxes in this bill. H.R. 8444 has $53 billion in taxes in this bill. Industry starts out paying more taxes in 1979 on its oil and gas that it uses in business. In 1981 industry will be taxed $1 a barrel on oil and by 1983 it will be $2 more taxes on a barrel of oil. In 1983 the utilities start having the taxes levied heavy on them, which will mean higher electric rates. All of the industrial taxes will be a tremendous burden on business which is already under a heavy pressure load from inflation.

The taxpayer gets hurt another way as this Democrat bill eliminates the tax deduction he has had for his gasoline taxes. With the provision that national interconnections will control all electricity, it means that it discourages any local area in future construction of electric plants. Who would want to build an electric plant for their hometown if the Federal Government was going to take all of the electrical power and siphon it off to be used all over the country.

The present bill does nothing to alleviate the huge oil imports which have caused such an overbearing negative balance of payments on America. In 1972 America was importing $5 billion of oil. This year we are paying out $45 billion for imported oil. Taking the 8 years of Carter's plan this totals $360 billion that we will send abroad. We know that a permanent job can be created in industry with a capital investment of $51,000. What this export of capital means is that we are going to eliminate 7 million American jobs.

Now we hear rumblings that President Carter plans to use his energy plan taxes to pay out more for welfare. Yesterday morning on television I watched a good lady say she could not afford to work because she lived better on welfare. Although she will be delighted to learn, that President Carter is supplementing welfare payments, Congress is going to push the poor taxpayer to the brink.

The average American knows that inflation is caused by excessive Government spending and he knows that this present liberal Government is a tax, tax Government. He knows that oil and gas are the only commodities in the United States under price control, and price control has never worked in peacetime history.

Think of your people back home. Vote for this Republican alternative. This plan takes the commonsense approach toward restoring domestic production of energy within America. It makes our country more self-sufficient. It builds more jobs for America. It means less taxes. Instead of what is good for President Carter, let us vote for what is good for America.

Mr. EVANS of Delaware. Mr. Chairman, I move to strike the requisite num-

ber of words, and I rise in support of the amendment in the nature of a substitute.

Mr. Chairman, the time is late, and I will be as brief as possible.

I certainly share the goals and objectives of the bill before us, H.R. 8444, such as:

Reducing our dependence on foreign energy supplies; encouraging conservation and the use of our limited resources in the most efficient and effective manner possible; and developing alternative sources of energy. All of these goals are very noble ones.

However, the means which we are employing to achieve those goals are somewhat inconsistent with the purposes and with the objectives themselves. Plans must be consistent with goals.

The plans set forth in this bill may cause significant problems for our economy here at home and affect adversely the quality of life of every single citizen of the United States.

This bill would add to inflation and to consumer costs. In addition, there are a number of hidden taxes that will add another burden to an already overburdened American taxpayer, who, I think already has about as much as he can chew and certainly as much as he can possibly digest.

If we add cargo preference to what is already in this bill, we will really have done a number on the American consumer.

As far as unemployment is concerned, it will add substantially. Just in the petrochemical industry alone, 11 million jobs are directly or indirectly affected, because this industry is totally dependent on oil and gas as a feedstock.

Mr. Chairman, petrochemical products are used throughout society in a great variety of ways. The tires on virtually all U.S. passenger cars are made with synthetic rubber, as are almost 80 percent of total rubber products. Over 50 percent of our Nation's fibers are synthetic, as is 92 percent of our carpeting and 85 percent of our blankets. There are no substitutes for the high performance plastics used to insulate wiring for telephones, radios and electronic systems. Plastic films and packaging protects the freshness and nutrition of food supplies from the farm to the table with a 50 percent reduction in food spoilage, while plastic films and rubber permit economic agricultural irrigation systems. Petrochemicals provide almost all nitrogen fertilizers, plus many pesticides and herbicides for control of insects, weeds and fungi, plus thousands of other products; paints and coatings for home and industry, aspirin for pain and fever, detergents, resins and glues for insulation and plywood—an almost endless list.

To further illustrate the wide use of products derived from petrochemicals, a typical auto contains about 400 pounds of petrochemical products: The rubber in tires, hoses and gaskets, the hydraulic fluid and antifreeze, the foams and films in seats and panels, the paint, headliner, dash, trim, stoplights, grills, windshield safety interlayer, and the steering wheel. The need to produce lighter autos so as to achieve better gasoline mileage will call for an increased use of plastics to reduce body weight.

In the kitchen, petrochemicals may provide the flooring, countertops, water and drain pipes, pot handles, appliances, dishware, refrigerant fluids and insulation. In the bedroom, petrochemicals may have provided the carpeting and drapes, the paint on the walls, the cushion in mattresses and pillows, the furniture itself, the phone, much of the clothing and shoes in the closets, and a portion of the supplies in the medicine cabinet. The need to conserve energy will call for more and better insulations—bonded with and produced from petrochemicals.

Petrochemicals are made in 1,000 plants located in almost every State in the Union. The gross annual sales of the industry in 1976 is estimated at $47 billion. The directly-dependent downstream consumers in the manufacturing, construction and crop-producing industries, plus those in wholesale, retail, and service operations, employ almost 11 million persons with a payroll of nearly $77 billion per year.

Downstream dependence on petrochemicals can be illustrated by the following example. A basic petrochemical produced in Texas might be converted to fibers in Florida and textiles in South Carolina and then used for the upholstery in an automobile produced in Michigan. Thus, industries in Michigan and other States depend on primary petrochemicals produced in Texas, while Texas depends on these downstream States to be its customers. Although 70 percent of primary petrochemical production is located in Texas and Louisiana, the bulk of the downstream processing is in the other States.

Petrochemicals and manmade materials have regularly contributed to a positive U.S. balance of trade. In 1976, exports were slightly over $6 billion with imports of $1.9 billion, for a positive balance of $4.1 billion. Over each of the past 10 years this positive balance has always exceeded $1 billion.

Still another measure of the significance of the petrochemical industry is to note the value added to the economy by the production of petrochemicals—that is, the sales of petrochemicals less the cost of raw materials and supplies. In 1976, this is estimated at slightly over $20 billion. To illustrate in simple fashion, consider one $10 barrel of oil. It becomes worth $16 when refined to gasoline, jet and other fuels. But if upgraded to petrochemicals, that barrel of oil takes on $50 of value as basic petrochemicals, which if further upgraded to consumer products, such as synthetic fibers, has a value even much greater.

The importance of the petrochemical industry to the overall economy should not be discounted. Literally hundreds of thousands of jobs and a myriad of consumer products are dependent upon petrochemicals. No one will escape the consequences of significantly higher petrochemical prices that this bill would acquire.

Mr. Chairman, the Republican alternative may not be perfect, but it is substantially better than the bill and recognizes more fully some of the complexities involved in developing a comprehensive and a fair energy program. Let us take, for instance, coal conversion.

Mr. Chairman, replacement of oil- and gas-fired boilers with coal-fired boilers is not a simple matter of removing existing apparatus and substituting, in its place, coal-burning equipment. In fact, there are some instances where it would be physically impossible to replace existing oil or gas boilers with coal-burning facilities. The overlay on my left illustrates why.

The exhibit shows the silhouette of a coal-fired boiler recently installed at a plant in New Camden, S.C. Depicted is the outline of the coal bunker, boiler, baghouses installed to meet particulate emission controls, and the interconnecing ductwork. The overlay illustrates the outline of an oil-fired boiler. Both units have exactly the same capacity—approximately 190 million Btu's per hour. Obviously, the oil-fired package unit is not "convertible" to coal. Substitution of coal for oil would require complete replacement of this unit, a capital intensive and time consuming procedure. In this size range, depending upon site limitations, coal-fired units will average anywhere from 1½ to 3 times the cost of an equivalent gas- or oil-fired boiler.

For instance, the oil-fired boiler pictured in our diagram which has a capacity of approximately 190 million Btu's per hour costs about $3 million. However, a coal-fired boiler unit with the same capacity would cost about $9 million. In fact, the capital costs are so high for conversion that the proposed use tax included in the committee bill will have absolutely no effect on forcing industrial firms to convert from oil and gas-fired boilers to coal boilers.

I might also add that it would take approximately 3 years to convert from oil-fired boilers to coal boilers.

Further, most industrial firms place their boilers in the middle of their operations so that transmission and insulation costs are minimized. In many cases, there is simply not enough room to build the massive structures required for coal boilers.

The coal conversion portions of this bill simply will not work and I urge my colleagues to accept the Republican substitute as the only way to achieve a workable answer to our Nation's energy problems.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I move to strike the requisite number of words.

I think it would be inappropriate not to make a comment publicly that I have made privately to the chairman of the ad hoc committee, the gentleman from Ohio (Mr. ASHLEY).

Mr. Chairman, as a member of the ad hoc committee I have been tremendously impressed by the fairness and consideration of the gentleman from Ohio (Mr. ASHLEY). I was very impressed by the

chairman and I wanted to say so publicly.

Mr. Chairman, we are coming to the end of a long trial, and I fear it may be the beginning of a trial for the people we represent because of the nature of the bill we are producing.

A comment occurred to me, being familiar with some of the campaign rhetoric we have been exposed to over the years. We need to produce energy: we live in a society of automobiles and airplanes and controlled environments and so forth, and it just occurred to me that the shoe is on the other foot and it is those on the Republican side of the aisle who are trying to drag the people on the Democratic side of the aisle kicking and screaming into the 20th century. We hope to eventually get them there.

Mr. COUGHLIN. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the amendment.

Mr. Chairman, I have taken this time so that I might commend the minority members of the committee for the strong efforts that they have put forth. It may not be totally what I would want, but I do not think anyone will get totally what they want in this bill, but it is certainly a darned sight better than the present bill before us. It does something for energy and it does something for mass transit.

Mr. FREY. Mr. Chairman, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentleman from Florida.

Mr. FREY. Mr. Chairman, I also rise in support of the substitute and the motion to recommit. Without these passing I oppose the bill. I might say that this legislation truly concerns me more than any bill we have discussed in the 9 years that I have been in the House. I am concerned over the direction it is taking us, cutting off U.S. supply and technology and know-how. I happen to believe that this country can produce more of our energy than it is producing. This bill will insure we do not develop our own gas and oil reserves; instead we will import more oil and gas. It will increase taxes an average of $600 on each American family per year. It will not put any money into energy research. The need for solar energy, for OTEC, for liquefaction and gasification of coal is basically ignored—conservation cannot do it all. More taxes are not the solution.

I might say that in the State of Florida we face a tremendous problem in the conversion to coal. It would cost us $10 to $14 billion to convert immediately to coal from oil and natural gas. Transportation is another problem. There are not enough trucks and cars to bring the coal in and to take the sludge out. The increased environmental problem would, I might point out, damage our air and water. Coal is only a partial answer to our problem. Total forced conversion to coal just does not make sense.

I would like to add, Mr. Chairman, that the chairman of this ad hoc committee, the gentleman from Ohio (Mr. ASHLEY), and all the people on the committee, have really worked long and hard on the bill. I fully appreciate the courtesies that have been extended.

Mr. Chairman, this substitute and the motion to recommit which elevates the $39 billion crude oil equalization tax are steps in the right direction. The only winner as the bill presently stands are the Arabs. Our imports of oil, now up to 51 percent, costing over $40 billion will go up. Our taxes will go up. Gasoline will cost 7 cents more; diesel fuel 7 cents more per gallon; residential fuel oil 7 cents more per gallon; home heating oil up 7 cents per gallon; and jet fuel will also go up 7 cents per gallon. Conservation will not be achieved by these taxes. Over 52 percent of the $39 billion in new taxes will not be returned to the people.

As I said when I began, this bill has more negative implications on our economy and future than any other measure in the last 9 years. You and I, along with all other Americans will be paying for this mistake for years to come. Unless we realize that there is a relationship between cost and supply; that we can develop gas and oil in this country; that we must develop alternate sources of energy—we will not solve our energy crisis. Indeed this bill will make our serious problem even worse.

Mr. HORTON. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the substitute.

Mr. Chairman, I have had a fair amount of experience in dealing with energy policy subject matter in the past 4 years. I was a prime sponsor, minority floor manager, and conferee on bills creating the Energy Research and Development Administration and the Federal Energy Administration. Only this week, I finished a week-long process of hammering out House and Senate differences in the bill creating a new Department of Energy. The DOE is expected to carry out the lion's share of the energy policies contained in the energy bill.

What disturbs me greatly, and surprises me most about the President's energy policy proposals is the tremendous increases he calls for in the level of Federal Government intervention in the lives of the American people. After all, less than a year ago, Presidential candidate Carter was running for office as the "outsider," as the opponent of big government, not as the advocate of bigger and bigger bureaucracy and of fewer and fewer choices for individual citizens.

The energy problem is one of mind-boggling complexity. As President Carter has said, "We cannot solve it with half measures." The economic, engineering, environmental, financial, and social details of the solution are formidably complex. However, stated in its most basic terms, the solution to the energy crisis is simply to use less energy and find new sources of energy.

The Carter energy plan, in effect, offers only one solution to our national energy crisis. And it offers that solution over and over again: Government intervention. Mandate this, prohibit that, and tax this, that and the other thing. The plan contains so many new tax provisions, penalties and exemptions that counting them, let alone evaluating their cumulative impact on the American people, is nearly an impossible task.

The Carter plan, as reported by the ad hoc committee, fails to strike the proper balance between an emphasis on new sources of energy conservation and the development of new sources of energy. Conservation will not reduce our energy needs; it will only reduce their rate of increase.

It will take massive investment to meet our ever-increasing energy needs, yet the committee bill would continue price controls and deprive the producers of the revenues needed to finance the replacement of diminishing energy supplies.

To stimulate, as the committee bill does, replacement cost pricing to the consumer by means of a tax while denying the producer any of the increased revenue to reinvest in the replacement of the energy resources, does not solve the problem. Taxes are not any solution unless the resultant revenues are used as an incentive to develop new sources of energy. If we have a tax, it should be put to a logical use.

It would be far better to achieve replacement cost pricing by removing wellhead controls and letting the market operate. The free market mechanism has always been more efficient than any government action in allocating scarce commodities. Price and cost best distribute what we have and also encourage the development of new supplies.

Taxes should be used only to raise revenues to provide needed government services and government's most productive role in the energy crisis could well be the funding of research and development—a matter which has been largely neglected in the committee bill.

Instead, the committee bill proposes the most onerous and blatant intervention possible. A few examples will suffice.

The Government is to provide approved lists of insulation contractors; the Government is to approve energy-efficiency labels for every appliance from hair dryers to generators; the Government is to receive the proceeds of a huge tax on domestic crude oil; the Government is to decide how, when, and to whom the proceeds of this tax are to be returned. The list is endless and the impact of all of this on energy conservation, energy production, economic growth, inflation and on the freedoms of the American people are virtually unknown. As Chairman of the Commission on Federal Paperwork, I shudder to think of the blizzard of paperwork that will be required by the bill.

The Carter administration has sent to us in Congress a questionnaire asking which Federal programs are causing the most dissatisfaction, frustration, and confusion among our constituents and, among other things, which programs result in complaints about excessive paperwork.

I shall respond in due course to this well-intentioned and useful exercise, but, in the meantime, I would make a few observations not limited to retrospection, that is, to commenting on programs already in place. Prospective programs need to be evaluated before they become established and resistant to change.

I say this out of solicitude for my constituents because I see looming on the horizon like a gathering storm certain emerging elements of the administration's energy program which portend further restrictions on the individual's freedom of choice.

If the voters are content with their involvement with SEC, FTC, ICC, CAB, EPA, FEA, and the three score or more other Federal agencies having a regulatory impact on the economy and which have filled tens of thousands of pages of the Code of Federal Regulations with fine print, they would not mind more of the same. If they liked OSHA with its obsession with trivia and nitpicking regulations they will love the administration energy program with its emphasis on increased regulation and control.

But, if the American people are concerned about the strangulating effect of Government regulations, they will be alarmed about the legislation we are now considering.

The burden of Government regulations and paperwork oppressing businessmen, State and local governments, and the man in the street will substantially increase as a result of the administration's energy policy with its undue reliance on Federal mandates, regulations, and taxes to remedy the energy shortage.

The full extent to which citizens will be subject to harassment by the regulators as a result of this legislation is only dimly discernible now and may not even be clearly revealed when the law is enacted.

As with all legislation that Congress passes that calls for the promulgation of rules and regulations, some of the lawmaking power passes to the regulatory agencies.

Thus, the language in the legislation drafted by Congress does not provide the last word in Government harassment. The full extent of Government intrusion into the lives of its citizens will not be revealed until the bureaucrats who draft the regulations implementing the provisions of the law have finished their work—the same bureaucrats, incidentally, whose concept of the plan is described in a booklet entitled "The National Energy Plan" and issued by the Energy Policy and Planning Staff in the Executive Office of the President. From perusal of this document it is clear that harsher mandates are in prospect if goals are not met by voluntary conservation. These include a tax on commuter parking, minimum automobile mileage standards, auto inspection and maintenance programs, "new development patterns" based on public transportation, a requirement that homes be insulated before they are sold, and a tax or other measures directed at industry and utilities not making productive use of waste heat.

The action of the legislative committees to date has not altered the administration position with respect to these matters. Just last Saturday the President said that he expected to build in years to come on the energy legislation enacted by Congress this year and hinted at the possibility of even stronger measures. Thus, whatever is deleted from the administration energy program by this Congress can be restored and even strengthened bit by bit in the future. Once underway, the program will have a momentum of its own.

Be that as it may, the bill in its present form as reported from the Ad Hoc Committee on Energy offers some interesting, if disconcerting, possibilities.

For example, the provisions of the bill intended to induce industry and utilities to convert to coal conflict with current and pending air quality requirements. It does not take much imagination to visualize the frustration of the company trying to conform to both national energy policy and the national environmental policy, or that of the utility required to install expensive stack-gas scrubbers even if they are not needed to meet clean air standards.

Or consider the case of the small independent businessman who, inadvertently or otherwise, is left off the list of suppliers and installers of residential energy conservation measures. The damage to his business could be irremediable.

Or think about the utility wrongfully assessed $25,000 a day for alleged noncompliance with an FEA order, who, to prove its innocence, must take its case to the appropriate U.S. court of appeals.

Or contemplate the resentment of the consumer exposed to the devastating effects of winter natural gas shortages again when price controls are extended to producers currently selling in the intrastate market.

How about those who have taken the steps necessary to weatherize their homes, increase the efficiency of their factories and otherwise reduce their energy consumption levels while their neighbors and competitors will be entitled to tax credits to encourage them to do what they should have done anyway.

The Federal energy program will require an expensive and expansive bureaucracy to administer the complicated systems of new taxes, tax credits, rebates, price controls, and penalties of which it is comprised.

The American citizen sinking in a quagmire of Federal regulations while being smothered by an avalanche of paperwork is not apt to view with equanimity the decrease in the gross national product, the increase in unemployment, the rising oil and gas prices resulting from this program if it does not significantly increase domestic energy supplies. But, while the program properly emphasizes conservation, it ignores the need for new oil and natural gas supplies and alternative fuels and continues the price controls that have inhibited the development of new resources.

H.R. 8500, the Republican substitute which I have cosponsored, embodies what I believe is a perspective on our energy problems which is better for this Nation.

Let me enunciate some of the principles which I find in this substitute proposal, but not in the Energy Committee's package.

The Republican substitute is an improved version of H.R. 8444, the majority's bill.

A plowback provision has been added to the sections relating to crude oil equalization taxes. This mechanism would grant oil producers and royalty owners tax credits for qualified energy-related investments. Price control on new oil would be phased out entirely in 5 years.

In this connection, H.R. 8500 contains a proposal for a trust fund which would dedicate the proceeds of the wellhead tax to mass transit, synthetic fuel development, and highway maintenance.

With respect to weatherization provisions of the committee bill, we would prefer the Banking Committee version to that of the Commerce Committee embodied in the ad hoc committee bill. This provision of the energy bill was referred to two standing House committees—House Banking and House Commerce. These two committees reported out different versions of the bill. Under the Commerce Committee version, utilities would distribute lists of insulation material suppliers and financing institutions to homeowners. This objectionable feature could limit the opportunity for small and minority businesses to get work insulating homes. This feature is eliminated in the Banking Committee version which has the program administered by the States under the Governors while the Commerce Committee version is the same as the administration proposal leaving administration in the hands of the utilities.

Finally, and most importantly, we would phase out regulation of new natural gas. Gas regulation has been proven a failure for almost a quarter of a century. Taxes and other restrictions cannot induce additional production. We believe that much natural gas, and oil too, for that matter, remains to be discovered and produced. Given positive encouragements for more exploration and drilling, industry can do the job.

While neither the Republican substitute nor the majority's bill addresses the significant potential of nuclear energy, I think this is one source of energy which demands greater research and development.

The President's decision to delete funds for the breeder reactor and recent House and Senate action in accordance with the President's decision is greatly disturbing.

The breeder reactor program should be a high priority energy development effort in this country. An advanced type of nuclear reactor, the breeder has the characteristics of generating electric en-

ergy and at the same time producing enough nuclear fuel to keep itself going, and enough extra fuel for additional powerplants which will be required to meet future energy needs. Delaying research and development at this time will severely hamper our efforts to meet energy demands and the objectives of energy independence.

The committee's failure to consider nuclear energy as a real source of future energy supply also means that the energy plan has failed to address the very serious problems posed by nuclear waste disposal. While there is existing technology to cope with existing waste storage, the absence of a definitive plan for utilizing this technology has undermined not only the public's acceptance of nuclear power, but also the Congress.

The eventual and inevitable use of nuclear energy should be tied in with a unified national energy plan. Our failure to do this thus far will only result in our inability to meet the goals spelled out in H.R. 8444 or alternatives to it.

Considering the time that was given to members of the ad hoc committee to think about and to weigh the meaning of the provisions of the Carter bill, essentially no time at all, I feel that the minority side of the ad hoc committee has arrived at a responsible alternative to the Carter plan.

Mr. STEIGER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, perhaps this is as good a time as any to talk a little bit about exactly where we go. I suspect the debate is just about concluded on the substitute and we can come to a vote on this matter. But I would, if I could, Mr. Chairman, like to take just a moment to discuss the motion to recommit, and what my own judgment is, having spent all of this time both on the Committee on Ways and Means and on the Ad Hoc Energy Committee, as to the end result of our work product.

First let me say that I concur with my friend, the gentleman from Oklahoma (Mr. EDWARDS), that "LUD" ASHLEY has done a brilliant job. I commend him for that and for the effort he has made. I thank him for his graciousness and for his humor. I regret only that he was capable of assuming, along with the chief engineer, the Speaker of the House, such incredible power in fashioning the program that we are about to pass.

All of the Members of the House, I hope, have had the opportunity to read the GAO's study of the national energy plan as presented to this Congress. There are some things that strike me as being particularly appropriate to discuss at this point. The GAO agrees with the basic concepts of the administration's plan, an effort long overdue, and that the Nation's energy problems are long term in nature, and that finding solutions acceptable to all areas of society is difficult and will require political consensus and compromise among competing areas of national concern.

This bill falls on that first point of the GAO. This bill does not find a political consensus or compromise among competing areas of national concern. The GAO report then goes on to state that they believe that it is incongruous to ask the Congress to establish a set of national energy goals and then propose a plan that is not expected to achieve them. It was the original administration plan that had those laudable goals outlined by the President of the United States in his speech on the 20th of April, modified a little bit on the Wednesday of that week, modified a little bit more on Friday of that week. As we get this bill now, I think it is clear that those goals remain untouched except for one minor amendment by the gentleman from Oklahoma. And the bill will not achieve that which is sought.

The GAO goes on to say that they believe that the plan will fall short of meeting some of the goals to even a greater extent than the administration estimates, including that of reducing oil imports to 6 million barrels a day by 1985. I do not think there is any objective observer who I have heard yet who disagrees, any objective observer, be it GAO, the Congressional Budget Office, the Office of Technology Assessment, Stanford, Harvard, anybody else—except the administration which has its own obvious beliefs—who believes that we will meet the oil import goals of this plan by 1985. We will not. We will embark upon a program today that not only increases the bureaucracy, not only increases regulation, not only increases taxes, but will in the end result in higher imports, not lower imports.

With respect to coal, the GAO concludes that there are serious problems in and obstacles to achieving a production level of 1 billion tons by 1985, and while the administration has stated that it will use nuclear energy as a last resort, it, nevertheless, expects that in 1985 nuclear energy will produce four times its current level of supply. GAO believes that achieving such an increase in 8 years is very doubtful. I do not think there is any question it is doubtful.

When we get to oil and gas, the fundamental part of this whole program, the GAO report says:

> While the oil pricing initiatives would provide greater production incentives than are now available, GAO found they are no greater than would exist in 1985 with a continuation of current policy. Moreover, the plan will reduce revenues to producers and thereby may reduce capital availability for further exploration and production. By not increasing the financial incentives for additional exploration, the plan fails to come to grips with the problem of increasing domestic crude oil production.

Thus, we not only have all I have stated, it seems to me, in terms of where this plan goes, but in the end we also will not only rely more upon our OPEC neighbors, but we will penalize our own domestic producers. That is the fundamental flaw of the bill. That is where it falls. That is why this bill ought not to pass.

The substitute, yes; is a good-faith effort on our part to present to the Congress a balanced program, balanced between conservation, production and alternate sources. It does touch, as the gentleman from Michigan pointed out in his reservation, crude oil pricing. It does say that we cannot have a national energy policy unless and until we deal with crude oil prices, and that is what is done under this program. What is done in this bill, in spite of all of the work of the chairman of the ad hoc committee, in spite of all of the creativity of all of our colleagues who serve, is to deal with a crude oil equalization tax, a tax designed to bring up the price of lower-tier oil and upper-tier oil to the world price, and then combine it with an additional industrial use tax that shoves that oil price above the world price for American producers.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. STEIGER was allowed to proceed for 2 additional minutes.)

Mr. STEIGER. The motion to recommit that will be offered this afternoon will be one that will be simply a modest little motion. It does very little damage in what it excises from the bill.

It simply guts the crude oil equalization tax. It takes it out. Every one of the problems that we have discussed flows from the crude oil equalization tax. The crude oil equalization tax clearly is something far more than has been represented. It raises the cost of gasoline by 7 cents a gallon. It raises the price of diesel fuel by 7 cents a gallon. It raises the price of residual fuel oil by 7 cents a gallon. It raises the price of home heating oil by 7 cents a gallon. It raises the price of jet fuel by 7 cents a gallon.

It does not reduce a single barrel of imported petroleum. For each barrel saved under crude oil equalization, it costs $39.28.

Thus the crude oil equalization tax is nothing more and nothing less than a cleverly disguised scheme to raise taxes for the American people, to not reduce our reliance upon imported petroleum, to not produce more petroleum domestically, and to create more efforts to solve the problems by intervention of Government.

The substitute will give this body one chance to take on, head on, the administration program, and I hope this feature will be killed so we can face up to our responsibility as legislators.

Mr. DINGELL. Mr. Chairman, I rise in opposition to the Republican substitute.

Mr. Chairman, my good friend, the gentleman from Wisconsin (Mr. STEIGER), just told the Members what the Republican motion to recommit was. Many of us who have been around here for a few years remember an old fellow from Florida by the name of Billy Matthews. Billy used to get up here in the well and talk about an amendment and say: "Now this is not a bad amendment. This is like the fellow that caught the catfish, and he had the knife in one hand and the catfish in the other, and he said: 'Now hold still, little catfish; I am not going to hurt you; I am just going to gut you.' "

That is what the motion to recommit is going to do to the bill. The gentleman from Wisconsin (Mr. STEIGER) said it, and I agree. They are going to gut it.

But let us not talk about the motion to recommit because we will have an op-

portunity to discuss it in just a little while.

Let us talk about what the substitute (H.R. 8555) does.

First of all it decontrols crude; it deregulates natural gas. It contains a plowback of the crude oil equalization tax.

There is only one person that is going to get stung by this substitute—that is the American consumer. It will divert billions—not millions, but billions—of dollars to oil and gas producers and it will drain billions—not millions, but billions—from the American consumers.

This substitute will reduce consumer purchasing power. It will increase inflation. It will reduce consumer spending. It will increase recessionary pressures enormously. It will reduce real gross national product. It will reduce real growth. And it will increase unemployment.

Mr. Chairman, there are other aspects of this substitute which are highly unsatisfactory to me. However, my objections to those other provisions are secondary to my primary concern about the economic consequences of the substitute now pending before the House.

This bill combines the evil effects of crude oil decontrol and natural gas deregulation.

Adoption of the substitute would spell economic disaster to the Nation. We had studies made a few years ago about the economic consequences of deregulation of crude oil. Those economic consequences were awful. And that is one of the reasons that President Ford signed legislation implementing a program of slowly increasing oil prices under continuing controls.

H.R. 8555, which is the substitute now pending before us, does away with those delicately balanced programs for fairness to producers and fairness to the consuming public.

On the other hand, H.R. 8444, the bill on which we have labored long and hard, represents a careful balancing of energy and economic policy. The Republican substitute, H.R. 8555, lacks that balance.

The bill that is before us, the administration proposal, is a balance of carrot and stick approaches to energy production and energy conservation. The substitute proposal is long on the carrot, and certainly the oil industry will love it for that, because under this substitute they get carrots in abundance; but I challenge anybody to find a stick in it either to encourage conservation or to restrain excesses by the oil industry, known for its propensity for monopolistic practices, consumer gouging, and all manner of outrageous economic behavior.

The program of my Republican colleagues emphasizes production incentives, but ignores conservation as an alternative.

I urge my colleagues to reject the substitute as dangerous to the economic health and well-being of the Nation and extremely dangerous to the establishment of a coordinated national energy policy which will move us forward in the dangerous times which lie before us.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

(At the request of Mr. HUGHES, and by unanimous consent, Mr. DINGELL was allowed to proceed for 1 additional minute.)

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from New Jersey.

Mr. HUGHES. Mr. Chairman, I have tried to understand the Anderson substitute. I understood from the literature that was put out by some of my Republican colleagues that there would be an excess profits tax in their substitute.

I have examined the substitute and I cannot find a section creating an excess profits. Can the gentleman from Michigan comment whether there is such a section?

Mr. DINGELL. Mr. Chairman, I told one of my colleagues earlier that there was no plowback in the substitute. There is a plowback, and it is a plowback designed to benefit only one person; that is the producer.

Mr. HUGHES. Mr. Chairman, if the gentleman will yield further. I am talking about an excess profits tax—not plowback.

Mr. DINGELL. There is a delay before the natural gas deregulation goes into place in the dismal hope that the Congress would enact an excess profits tax. That section would much benefit the airline industry, because lobbyists would hop on the plane in the morning, come to Washington and say, "Don't pass windfall profits tax legislation," rush back home and say that Congress is not doing what they should. Otherwise there is no specific excess profits tax contained in the substitute despite the fact that if it were adopted it would almost certainly create massive windfall profits for oil and natural gas producers.

Mr. MOFFETT. Mr. Chairman, I rise in opposition to the amendment.

Mr. TSONGAS. Mr. Chairman, will the gentleman yield?

Mr. MOFFETT. I yield to the gentleman from Massachusetts.

Mr. TSONGAS. Mr. Chairman, I would like to insert into the record at this point legislative history relative to chapter 6 of the National Energy Act, H.R. 8444.

I have discussed this legislative history with Mr. OTTINGER, author of the section, Mr. DINGELL, chairman of the Energy and Power Subcommittee, and Mr. ASHLEY, chairman of the ad hoc Energy Committee. They have concurred in the remarks that follow.

Chapter 6 refers to small hydroelectric power projects.

Eligible under section 586 for grants and loans are, among others, "nonprofit organizations" and "any person other than a utility."

A private museum which falls within the definition of a nonprofit organization stated in this chapter could be considered for assistance under this chapter.

A private manufacturing company capable of generating electricity would qualify as "any person other than a utility," so long as it also met the criteria of section 30(C)(1)(a), (b), (c), (d), and (e).

Further, a partnership of a "nonprofit organization" and "a person other than a utility" may apply for a grant or loan under the provisions of the chapter.

Mr. MOFFETT. Mr. Chairman, I will not take the 5 minutes, but I want to say that the debate on the Republican substitute reminds me of when I was a very young boy. My father was not overly partisan. We were not involved in politics at all. But he used to tell me that the Democrats were for the people and the Republicans were for big business.

Then when I got older and got involved myself a little bit, I realized that things were not always as simple as they seem, that you could not just categorize people and parties that simply.

In fact, I have been among those that have wondered in our own party whether our party in the big tent under which we sit and in which so many take pride is adequate to really represent what a party should stand for. Can a party satisfy everyone from George Wallace to Jerry Ruben, for example, and still stand for something? This is something many Democrats have asked; so we have wondered whether we have got away from the principle that parties really stand for something.

Ronald Reagan, the great Republican leader, said that parties should have an ideological base and they really should stand for something and that neither party stands so clearly for what each party used to.

But, this debate today reminds me again and takes me back again to what my father used to say: "The Democrats are for the people and the Republicans are for big business." Things are becoming much more clear in my mind in that respect with regard to energy. We have been through a very tough 2 or 3 months of debate, and every time there has been an amendment for the major oil companies or the big utility companies or the powerful economic interests in this country, it has been the democratic leadership and the democratic Members—the vast majority of them—who have opposed those, and it has been the core of the Republican Party that has offered them and attempted to guide them through. It is as simple as that.

This is not a perfect bill that we have here, but it is very interesting to me, after hearing Republicans for the last 7 or 8 years criticize the leadership of this House and say that we have had ineffective Speakers and we have not had leadership, now to be criticizing the Speaker who has finally provided some leadership to this issue; who has coordinated the effort; who has brought some sense to the debate and some direction to the entire formula of an energy policy. It is very interesting now to see criticism of that Speaker; to see criticism, for example, of the ad hoc committee for being too well organized under Democratic leadership; criticism of the chairman for having too many Democratic caucuses to have us organized.

It seems to me that we cannot have it both ways. We cannot criticize the Speaker for coordinating and the chairman for leading and the President for

having lofty goals—that is a terrible thing, is it not, having lofty goals—and then turn around and say that we want something totally different that is merely a big business alternative, with all due respect to my friends.

I would urge my colleagues on the Democratic side to reject the substitute and to support this bill, imperfect as it is, because it is much more oriented toward the average person in this country and toward long range goals of conservation and fairness than the Republican substitute comes even close to being.

Mr. MARTIN. Mr. Chairman, I move to strike the necessary number of words, and to observe to my nonpartisan friend from Connecticut, who has just given us a marvelous nonpartisan statement, that I see from his statement that he is proposing to support a bill which is essentially a tax on American consumers, and to oppose our measure, which tries to reduce those taxes. He told us what his daddy had to say about the party of the people versus the party of business. I must observe that his position on adopting these $39 billion worth of taxes is just going to stick the business to the people.

Mr. DON H. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. MARTIN. I yield to the gentleman from California.

Mr. DON H. CLAUSEN. Mr. Chairman, I rise in support of the Anderson substitute.

Mr. Chairman, the Congress and each Member has devoted a great deal of time and effort toward the development of a national energy plan. The debate over the past week has helped to focus national attention on the strengths and weaknesses we have in meeting a coming "energy crisis." I believe if there is one theme that has run through this discussion it is that the severity of our domestic fuel shortages demands the commitment of each American to reach the national goals of energy conservation and self-sufficiency.

It is more important today than ever before that we take a farsighted approach to meeting the needs of the United States for a sensible energy supply and pricing policy. I think all of us here are trying to arrive at such a comprehensive energy policy. Under the best circumstances, philosophical differences on the best and most appropriate way to achieve mutually agreed upon goals will differ among different people. The constructive debate of the past week has pointed this up.

But, I am convinced that in comparing the two alternatives before us, the minority substitute will go further in insuring that future energy supplies are on line when we need them, that the cost to the American taxpayer will be less and that our factories and schools would not have to shut down every winter because of energy curtailments. For these reasons I urge my colleagues to support this version and I would like to take a moment to discuss a few important provisions.

NATURAL GAS

It has been said over the past few days that an effective energy plan will have three cornerstones: conservation, conversion, and production incentives. For the immediate future, conservation must be given top priority in the minds of every American. However, for our long range goals the last cornerstone is the most important since it will allow us to tap our vast potential for providing future generations with secure domestic energy supplies. Every conceivable energy alternative must be considered, encouraged, and developed.

Today future supplies exist only as a potential because, without realistic incentives, there will be a continued decline in the rate of development for new domestic fossil fuel reserves. I am particularly concerned with our natural gas policy since my State and, more directly, my district is heavily dependent on this energy source.

On the north coast of California natural gas is a major feedstock for the manufacture of ammonia, which is a key ingredient in fertilizers; it is used in drying crops; in preventing freezing of our fruits in the cooler months; it leads to the containers in which our dairy products, our canned fruits, and our wines are packaged; and it produces the bonding agents used in plywood production.

If natural gas is not a secure energy source for my district and for all California it will be disastrous for our regional economies and it will also affect all American consumers who are dependent on our food to eat and our lumber to build their homes.

With this in mind, I supported the so-called Brown-Krueger amendment—which, regrettably, was not approved—and I support the minority substitute. Both call for gradual or phased deregulation of the price of new natural gas.

Reports last winter of people freezing to death, massive factory layoffs and severe economic hardships demand a reasonable and responsible approach today. Gradual deregulation will provide our constituents with a stable and secure energy supply so that they may be assured of a productive economy in the years ahead—an economy which is not vulnerable to international embargoes and one which will not experience massive job layoffs every winter.

Continued regulation will maintain artificially low prices of natural gas; it will encourage demand for this cheap energy; and it will discourage the discovery of new sources and supplies. Continued regulation is an antijobs approach, which will further depress our economy and may cause us to deplete the existing supply of fossil fuel resources needlessly.

It goes without saying that the consumer's interest must be of paramount importance in this gradual deregulation. In that interest we must insure adequate supplies of natural gas and we must insure that it is reasonably and realistically priced. An artifically low price is meaningless if it results in a complete interruption of service.

Actually no one really knows what the impact of deregulation will really be in the marketplace. However, we do know that a phased deregulation is uniquely spared from wild inflationary spirals by the simple fact that contracts for supply are usually long term so that prices which would be paid for new gas under phased deregulation will only amount to approximately 10 percent of the total gas supply each year through 1985. The cost increases of the new gas will be rolled in with the lower cost of the old gas and will result in an acceptably gradual cost incerase.

With regard to adequate supplies for future use, gradual deregulation will provide incentives for the discovery and development of new gas reserves—since it is only new gas prices which will be deregulated. Furthermore, with these new supplies it will be more efficient and less expensive to transport the gas. Eighty or more percent of the cost of natural gas to the consumer is the price of transportation and distribution. Right now the consumer is paying more for less service since pipelines are only half full and the cost per unit of gas delivered must be raised to cover the inefficient transportation costs. Furthermore, without an adequate supply of natural gas, distribution companies are being forced to substitute much more expensive alternate fuels such as foreign oil and synthetic gas. Who pays the bill? Our constituents.

And finally, without a continuing source of gas in the future we will continue to see curtailments to nonpriority users—those who are able to use alternate sources of energy to meet their needs. Our industrial consumers already know the consequences of gas curtailments. The past few years have taught them that these curtailments can be translated into job lay-offs, higher costs for consumer goods, and market shortages of agricultural products.

Worse still, we will also see curtailments to priority users—residential consumers. Homes now heated by gas will experience brownouts and possible rationing and new homes will not even be able to obtain gas hookups. In short, the costs will be monumental.

In summary, I firmly believe that we must enact a policy which will promote conservation of our diminishing natural gas supply through a more realistic price structure and at the same time will encourage the exploration, development, and production of untapped gas reserves. The only realistic policy is that of phased decontrol, as outlined in the substitute bill.

SOLAR ENERGY

The use of solar energy for space heating and cooling is now a recognized—and in the future will be an increasingly important—alternative to our dwindling supplies of fossil fuels. Our substitute and my voting pattern in our Public Works Committee encourages the use of this viable energy source in two ways.

First of all it authorizes the installation of solar heating and cooling units in Federal buildings—where feasible—and accelerates the procurement and installation of photovoltaic solar electric

systems—devices which convert sunlight directly into electricity.

Our Committee on Public Works and Transportation considered and strongly supported this project and I personally believe that this program will provide a large enough market for solar cells to encourage mass production and, hence, reduce their price. This translates into cheaper prices for individual home owners who want to equip their own homes with this alternative energy source.

As an important corollary, we have provided tax credits in this bill for individual homeowners who install either solar heating and cooling equipment or conventional insulation materials. This provision parallels legislation I introduced earlier in the year, and I believe that this tax incentive will go a long in bringing us closer to our stated goals of conversion and conservation for energy self-sufficiency. Solar energy is a secure available energy which is pollution-free, not subject to international embargo and is unlimited in supply. Our challenge is to develop a broad-based program to effectively harness this energy and these provisions can be an integral part of this program.

SUMMARY

I am hopeful that through the discussions we have had this week we will make consumers, and ourselves, think about tomorrow. If past generations found this impossible our present generation must make it imperative. Tomorrow can bring energy shortages or it can bring a stable economy. It is our choice.

But, when all is said and done, after we finish our debate and send this measure on to the other body, the challenge of meeting our energy needs both now and in the future will begin and end with the American people. "Power to the People" is no longer a hip phrase of the sixties—it is what the future holds for us, because the future energy needs of our Nation are literally in the hands of our citizens—hands that rest on ignition keys, electric switches, purses and wallets.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. MARTIN. I yield to the gentleman from Illinois.

Mr. HYDE. Mr. Chairman, during this week before the August recess, we are debating a 580-page legislative measure, voting only on such amendments as the Democratic-dominated Rules Committee has allowed, and in the end, must vote for or against a bill that will, to quote the Wall Street Journal, "inflict a half trillion dollars in unnecessary costs and taxes on Americans over the next 8 years. It is not an energy bill, it is a gigantic tax increase bill.

The final version of this legislation did not reach our offices until last Friday afternoon, accompanied by the 924-page Ad Hoc Committee on Energy report on H.R. 8444. This provided almost no time for the thorough painstaking study such a complex bill requires.

After studying these proposals and listening to the debate, I have concluded that the administration's proposals are a one-way ticket to economic disaster.

This bill fails to address the vital question of energy production, while the Federal tax code as the primary element of a national energy strategy.

We were being asked to vote on another tax revenue bill—a bill that will cost taxpayers $200 billion more in new taxes between 1978 and 1985, amounting to $2,000 for every American family.

We are being asked to pass a bill which assumes that domestic energy reserves cannot be found, mandates Federal regulation and perpetuates permanent energy shortages.

We are being asked to support a bill containing major flaws which have been identified by the Congressional Budget Office, the Joint Economic Committee, the Office of Technology Assessment, the General Accounting Office, and the Brookings Institute.

We are being asked to support a bill that creates at least two new taxes, removing billions from the economy at a time when there is a critical need for more capital formation.

I urge my colleagues to avoid passing this bill and thus placing this added burden upon the American people.

The authors of this bill do not understand that the free enterprise system has provided Americans with the highest standard of living in the world. It can still do the job if we let it.

We cannot conserve ourselves out of our dilemma—our problems are not exclusively those of demand, but also of supply. We must encourage production by providing realistic incentives for exploration of domestic resources. Federal tax policy should help, not hinder this effort.

We must proceed to research and develop the so-called exotic energy sources, geothermal, solar, synthetic fuel, et cetera, but meanwhile, understand that coal and nuclear energy present the best short-term answers to our problems. This requires accommodation between our energy needs and our environmental goals.

Now that we have failed to deregulate natural gas, we have reinforced the cause of natural gas shortages, and I sincerely hope that we have a mild winter. If not, the prospect of more shortages and millions of unemployed due to plant closings looms as a dire probability. The closing of hundreds of schools is a loss that cannot be measured in dollars. That all of this could be avoided if we would exercise the wisdom and courage to deregulate is an opportunity missed that those who oppose deregulation will live to regret.

All of this has an impact on our international trade deficit. Since petroleum imports are the major culprit, we ought to see that this imbalance cannot be corrected by conservation alone. Our dependence on overseas suplies cannot significantly diminish under the administration's program.

The sensible course for us to follow—as set forth in the now-rejected Brown-Krueger amendment—would be an orderly deregulation of domestic oil and natural gas prices, with a plowback provision to stimulate production.

I had thought until now that only the Republican party had a death wish but the program put forth by the Democrats in this crucial area of energy convinces me that this is indeed a bipartisan malady.

Lastly, we still need an economy of growth with a strong emphasis on national security. The Democratic proposals only strengthen the OPEC cartel, and thus increase our economic and political vulnerability.

The Republican alternative, H.R. 8555, is a comprehensive energy bill designed to promote energy conservation, using balanced incentives to encourage a public commitment to increase domestic production of energy and decrease our dependence on foreign sources.

The Republican alternative will remove price controls on newly found oil and natural gas, and provides for the use of trust funds for coal conversion, synthetic fuel development, mass transit and highway maintenance. It provides tax incentives to increase domestic production through a tax plowback concept and emphasizes energy conservation by a tax on some industrial uses of oil and gas.

I urge my colleagues to think carefully before voting for H.R. 8444.

What we do today will have a far-reaching impact on all facets of our country's social and economic structure.

The Republican proposal, H.R. 8555, is a viable alternative that will spur domestic production, dampen the rising U.S. consumption curve, and cut back on increasing oil imports. I urge its adoption.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. MARTIN. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Chairman, the long-awaited national energy bill is now before us. I do not think there is any question that this is the most important legislation that has come before this body in several years. What we do here will substantially affect the lives of Americans for many years to come. If we are successful it will improve our way of life, provide the essential energy base for sustained economic growth and strengthen our national security and independence. But, if we are careless and hasty, this legislation could very well be disastrous. We must, therefore, move with caution, carefully analyzing every provision. We must thoroughly consider the impacts of this legislation on our economy, on our way of life, and on our national security.

Mr. Chairman, any effective national energy policy must seek to accomplish three goals: First, through conservation, it should promote efficient utilization of our existing fossil fuel reserves; second, it should encourage the development of alternate energy sources, in order to end our reliance on imported fuels; and third, it should encourage continued exploration and increased production of existing fossil fuel sources in order to avoid serious economic disruptions and bridge

the gap between our present reliance on fossil fuels and our future changeover to alternative energy sources.

In order to be effective, these objectives must be achieved in a balanced and coordinated way. The Nation's energy problems cannot be solved by conservation alone, nor can our future energy needs be met solely through increased production and continued squandering of finite resources. And while synthetic and renewable fuel sources may offer long-term solutions, they promise little immediate relief. It is only through a coordinated and broad based attack that the problem can be effectively met and eventually solved.

Yet the bill before us today, does not, in my opinion, provide for a balanced three pronged attack. Instead it overemphasizes coerced conservation through taxation, while at the same time discouraging increased production and exploration by the energy industry; that is because the increased energy costs to the consumer will not be passed along to the producer to be reinvested in the business of producing energy, but instead will go into the bureaucracy to be endlessly rerouted, rebated, and eaten away by administrative costs. The real question is not whether we are going to let energy prices rise, because this step is essential for conservation, but rather whether we are going to do it artificially through counterproductive taxation policies, or productively by largely deregulating the prices of new energy and passing the increased revenues along to be reinvested to produce more oil and natural gas.

It seems to me that this is really the crux of the matter now before us. Obviously, the stated goals of the legislation are to increase domestic production to meet short-term supply problems, lessen our dependence on foreign oil to ease our balance of payments deficits and insure continued uninterrupted energy supplies, and to develop alternative energy sources to change over from a fossil fuel based economy to a synthetic and renewable based fuel economy. Yet it is very difficult indeed for me to see how the bill before us is to accomplish these very ambitious goals with the current energy pricing policies.

The minority substitute offers a responsible and workable compromise to the administration bill in these critical areas of pricing policies for oil and natural gas. The minority substitute allows the price of new oil to rise to a world level over a phased in 5-year period. Lower tier—(old)—oil, however, would be taxed to the world price with 50 percent of these revenues being plowed back into the energy industry to stimulate increased exploration and development. The remaining 50 percent of the tax revenues would go into an energy trust fund to be used primarily for energy research and development of synthetic and renewable fuel sources. Therefore, the minority substitute would achieve that measure of conservation that increased prices would achieve but the higher cost of energy to the consumer would not then be wasted, but would instead be put to work to secure more energy.

The substitute natural gas pricing provisions are patterned with the same objectives in mind, namely encouraging conservation through increased prices and at the same time encouraging increased production through raising prices.

Certainly these matters must be carefully considered and decision based on what is best for the Nation over the long term and not what will be politically expedient in the short term. I urge my colleagues to give the minority substitute careful and sober consideration. I urge its adoption.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. MARTIN. I yield to the gentleman from New York.

Mr. CONABLE. Mr. Chairman, I rise in support of the Republican substitute; in support of the motion to recommit, if necessary; and in opposition to the bill if we come to that.

Mr. Chairman, using the tax system, this bill requires the American people to pay more for American oil than we are willing to let Americans get to discover, develop, and produce American oil. Is that the way to get more American oil?

Using price controls, this bill does not let the price of American natural gas command its real value in the marketplace, although careful studies show that a higher price will greatly increase our exploitable reserves and protect those dependent upon American natural gas from a repetition of last winter's disastrous shortages. Is that sensible?

Using taxes, this bill insures that industrial use of oil in America will cost American companies more than the world price. Is this the way to improve competitiveness and create American jobs?

Instead of the laws of economics and the self-regulation of the marketplace, this bill foists massive bureaucratic decisions on an American people already restless and saddened by too much government.

Mr. Chairman, this is a bad bill. I hope my colleagues will vote accordingly.

Mr. MARTIN. Mr. Chairman, it is important to clarify the record regarding another aspect of the excise tax. In presenting to the Ways and Means Committee my amendment to exempt process uses that could not be converted because the process involved could not be performed harmlessly and economically with the use of some other fuel, I carefully spelled out what I meant by economical feasibility. My test involved solely a computation of all the costs of converting to and operating with a substitute fuel, including capital costs, downtime costs, and so forth—less rebates and tax credits for conversion, of course—and then comparing that with costs of continued operation under an assumed industrial use tax.

Basically it was a "before and after" cost comparison. If the projected net cost after conversion were to exceed the cost using oil or gas, the process use would be exempt from this tax. I think the committee report may be confusing, in that it seemingly does not reflect the concept I just described but presents what is in essence a "profitability test," a test that to my knowledge was not discussed in the committee. For example, on page 101 of the committee report there is reference to a "severe adverse impact on profitability." This seems to me to say that the conversion test is somehow related to profitability of the whole enterprise, as opposed to the appropriate narrower question of the costs of converting a particular process.

Essentially the same concept is introduced by referring to "an adequate rate of return in this activity." This concept also was not discussed in the committee. The problem is that in many, if not almost all, instances of the given process uses, the concept described would be next to impossible to apply. I think that if we did it that way we would be giving more discretion to the Secretary of the Treasury than the committee had in mind. The Secretary would in essence be granted authority to "compute" the rate of return on an "activity" and also then to judge whether it was "adequate." That was not part of the concept I presented to the Committee on Ways and Means. It was just a "before and after" comparison of cost.

Mr. ASHLEY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I fully understand that the membership wants to vote, and I will be sensitive to that wish. I simply want to make one or two points, if I might.

First of all, with respect to the Republican substitute that is before us, I will say that the proposals contained in the substitute, H.R. 8555, are no more compelling when considered together, than they were when we considered them separately yesterday and earlier this week.

Mr. Chairman, we are now concluding—we in the House of Representatives—the first real effort on the part of the Congress to formulate an evolving national energy policy. The legislation that we will adopt today contains the basic structure on which, in the years to come, this strategy will evolve.

The legislation contains a set of residential and commercial conservation programs.

The homeowner and the apartment dweller will receive tax credits for the energy conservation expenditures they make, including on insulation, weatherstripping, caulking and storm windows, among others.

Lower-income families will be eligible for subsidized loan programs for energy conservation.

Poverty level families will be eligible for a modest grant program.

Schools, hospitals and municipal buildings will be eligible for partial grants.

Industries and commercial establishments will receive special investment tax credits.

The bill provides for conservation in the transportation sector through a tax on gas-guzzling automobiles which will

help us save 175,000 barrels a day of oil imports by 1985.

The bill provides for a crude oil equalization tax that over a 2-year period will bring the price of oil produced in this country up to the world price. This will create substantial incentives for conservation. At the same time, however, the revenues of this tax will all be rebated to the public so as not to deflate the economy. Further, special refunds of the tax will be given to those who use heating oil in homes, schools, hospitals and churches.

The bill provides for an incentive price for new natural gas supplies, while protecting the public from the runaway prices that would occur under deregulation. The bill contains a program to increase the use of coal and conserve the oil and gas used in the industrial sector.

It provides for a method to move the Nation's electric utilities toward pricing policies which price electricity at the true cost of providing service to each class of electric consumers.

Finally, Mr Chairman, the bill provides for a set of tax incentive programs for geothermal and oil and gas drilling ventures.

Mr. Chairman, the bill which we will complete action on today will help the United States to reduce oil imports by somewhere between 2.5 million and 2.8 million barrels per day from what would have been our usage in 1985 without this measure. Clearly, the bill provides a solid start toward meeting our energy goals.

In conclusion, Mr. Chairman, I would like to say that I have great pride in the way that the House of Representatives, the majority and minority alike, have addressed this difficult subject area. I particularly would like to comment on the cooperation of the minority. Yes, they take different views than we in the majority. That is to be expected. But it seems to me that it might be well, Mr. Chairman, for those of us on the majority to understand the kind of frustration that must beset the minority, who are outnumbered by some 2 to 1 in this body. I think it is well for all of us to understand that there has not been any effort at dilatory tactics. There has not been any effort to delay proceedings. It can well be said, Mr. Chairman, that if the minority had wanted it, we would not be completing action on this massive bill before us today.

Mr. ANDERSON of Illinois. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from Illinois (Mr. ANDERSON).

Mr. ANDERSON of Illinois. I thank the gentleman for yielding.

Mr. Chairman, I am not sure that the gracious remarks of the gentleman will make the pill go down any easier, but I have not heretofore commented on the performance of the chairman, as others have done, and I would not want the record of this debate to close without adding for myself, as ranking minority member, that, despite all of the fundamental and frequent disagreement on substantial issues, I have appreciated at all times the demeanor and the conduct and the fairness and the dignity with which the chairman has presided over the ad hoc committee. I want to thank the gentleman.

Mr. ASHLEY. I thank the gentleman for his remarks.

So, Mr. Chairman, I would simply say in conclusion that we in this body, on this committee, and in this House, to which we will soon be returning, can, I think, take a considerable measure of pride in the fact that we have addressed, as best we can, a matter of vital national importance, and that we have acted collectively in the best interests of the people of the United States as we see them.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Illinois (Mr. ANDERSON).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. ANDERSON of Illinois. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 147, noes 273, not voting 13, as follows:

[Roll No. 510]

NOT VOTING—13

Burke, Mass.	Koch	Santini
Dent	McKinney	Teague
Flippo	Michel	Young, Alaska
Holt	Price	
Holtzman	Rhodes	

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Burke of Massachusetts against.

Mr. Rhodes for, with Mr. Price against.

Mr. Michel for, with Ms. Holtzman against.

Mrs. Holt for, with Mr. Koch against.

Messrs. FLYNT, DICKS, AND TAYLOR changed their vote from "aye" to "no."

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

Mr. PREYER. Mr. Chairman, there is general agreement that the country needs a new natural gas pricing policy. The old policy of overregulation has created most of the problems we face today with natural gas. An unnaturally low price, set by regulation, distorted the normal market situation and caused both overutilization of natural gas—because it was so cheap—and decreased production—because of lack of economic incentives to drill for it.

Most economists—and I agree with them—feel that the answer to a new natural gas pricing policy should be to move toward deregulation as rapidly as possible. But we have not only economic responsibilities in Congress, we also have political responsibilities toward people generally. This is a way of saying that there are strong political pressures in favor of a regulated lower price for natural gas, especially from the large number of residential users in the Northeast. There have been deep divisions between those in favor of deregulation and those against it. The result has been a stalemate, allowing the situation to deteriorate.

The Energy Committee has broken this stalemate through the time-honored political custom of compromise, in which neither side gets all it hoped for or wanted but which breaks the stalemate and allows the country to move forward with a national energy policy.

There is general agreement on the objectives of that policy: To move toward restoring free market pricing for all gas, to protect consumers against too sudden and unwarranted price increases, to stimulate development of more gas, to promote conservation in the use of gas, and to promote the substitution of coal and other materials. Some of these goals are mutually contradictory. We cannot maximize each of them at once. So we must compromise.

I think the Energy Committee's compromise is a good one. It does a number of things, though none 100 percent.

It gives some definite movement toward freer pricing. It increases the price substantially, and grants considerable latitude to the regulatory body under the Department of Energy to set higher prices where necessary to extract types of natural gas which is more expensive to produce.

It avoids the danger of inflation from total deregulation. The entire energy package will be inflationary to a small extent, of course, but deregulation, according to Dr. Schlesinger, will be seven times more inflationary than all of the other elements of the energy package.

There will be a 26-percent shortage of natural gas this year. To completely deregulate in this imbalance of supply and demand would be like lighting a torch—the torch of inflation.

If the choice were between regulation and deregulation I would take deregulation. But there is an alternative. The Energy Committee's proposal offers us a good "resting place," as the majority leader put it, as we enter the transition period from regulated to deregulated prices. The proposal advances toward freer prices, toward stimulating new supplies, and gives the country a resting place from which we can later move on toward further deregulation when the danger of a sudden and inflationary explosion of natural gas prices is reduced.

For North Carolina, it has been of critical importance that the two-tiered pricing system be eliminated—that is, the system of regulated prices for interstate gas and unregulated prices for intrastate gas. North Carolina would be better off if there were regulation of both interstate and intrastate gas, or deregulation of both. The important point is that both markets be treated the same. This bill does that by applying the same degree of regulation to both markets. It will not solve all our problems next year. There is little that can be done in the energy field that brings about quick results. But there will be a fairer share of existing natural gas available to us right away—and especially as the use of natural gas for boiler fuel is restricted by the energy program—and we can look forward to a larger supply of natural gas after a few years.

As supply and demand are more nearly balanced, we will be in a position to deregulate without the fear of dramatic inflationary increases as a result of relinquishing Government controls all at once.

Mr. PICKLE. Mr. Chairman, I would like to address a few questions to the distinguished chairman of the Ways and Means Committee. My questions are directed to the section of the bill relating to user tax credits for public utilities.

Beginning on page 227 of volume II of the committee report under other rules, there is a section entitled "Special Rules for Utilities."

In the first paragraph of this section it is explained that a utility will get credit on the user tax if it retires or phases down an oil or gas boiler. Then this paragraph defines "phase down" as using an oil or gas boiler less than 1,500 hours when the boiler was used more than 1,500 hours in 1976.

Toward the bottom of page 227, the section goes on to explain what happens when a utility has taken a credit for using a boiler less than 1,500 hours, but then uses it for more than 1,500 hours. The report says that in measuring whether the boiler use has exceeded 1,500 hours, the measurement should be based on 1,500 hours of full capacity use.

My question is this: Since we measure 1,500 hours at full capacity on the bottom of the page, should not full capacity apply to the 1,500 hour measurement on the top of the page?

Let me state several reasons why full capacity, or full power, measurement is important. One, oil and gas boilers, sometimes have to burn idle, that is, of very low capacity. Idle time should not be counted. Second, a utility could get credit for retiring a peaking unit that has been used at less than full capacity for 1,500 hours. This would not be the intent of the committee's legislation.

So in sum, does the full capacity definition apply to the 1,500-hour measurement on top of page 227 as well as at the bottom?

Mr. ULLMAN. The gentleman is correct; the reference to 1,500 hours in the first paragraph under special rules for utilities relates to hours on the basis of use at full capacity. Thus, a boiler shall be treated as phased down only if in 1976 it was used more than 1,500 hours, measured on the basis of use at full capacity, and will not be used more than 1,500 hours, measured on the same basis, in any year following the year in which the new boiler is placed in service—or after 1983 where the new boiler was placed in service before 1983.

Mr. MOORHEAD of Pennsylvania. Mr. Chairman, a word of appraisal is in order about the work of the House on the national energy plan.

It is evident from the debates that have taken place since the day of the presentation of the plan by President Carter last April—debates that intensified as the House took up the bill this past week—that there is not a Member of this House who is fully satisfied with the product we have wrought. I am not fully satisfied. In particular, I share the widespread concern that the plan, from its outset, has placed less emphasis on expansion of domestic energy supplies than would have been feasible and desirable.

Further, on the critical side, there is no dispute that this bill will not "solve" the energy problem, if the problem is defined as excessive dependence on imported oil. While I applaud most of the changes wrought in the legislation as it worked its way through the various House committees, some of them tend to reduce the potential savings in oil and gas, and hence, to maintain the need for imports. Even if everything works as planned—which is doubtful—we will still be importing huge amounts of oil by the target date of 1985. All of the assessments from such institutions as the General Accounting Office and the Congressional Budget Office reached that conclusion even before the House began to amend the plan; that is, they concluded that the President's goals and estimates were too optimistic.

But there is a better and fairer way to appraise the accomplishment to date. In brief, the Nation will be in significantly better shape on the energy front with this bill than before. And I do not believe the simplistic argument that the entire problem would go away if we just abolished price controls on domestic oil and gas. We might be better off now if there had never been controls in the first place, but given history and our current condition, a simple "dash for freedom" would cause very significant economic pain with only a slow and uncertain payoff in new supplies.

Let us look at where we stand in light of the energy plan as amended by the House.

BUILDINGS

We have launched the first serious effort to insulate and weatherize our homes, our commercial establishments, our schools, our hospitals and our public buildings. There are carrots in the form

of tax credits, grants and low-interest loans to add to the most important carrot of all—the savings on high and rising heating and cooling bills from an investment in insulation. In the closet there remains a stick—a mandatory insulation program that can be enacted later if the response to what we have done is insufficient.

AUTOMOBILES

By far the most important change here is not in this bill but was enacted several years ago—the mandatory standards for gasoline efficiency. The industry has already begun a massive change in the size and weight of the American automobile.

In this bill we are pushing the process along. There is the new "gas-guzzler" tax. There is a built-in further increase in gasoline prices as a result of the new oil wellhead tax and the crude oil price increases permitted under the previous, and unchanged, system of price controls. We are keeping the gasoline price increase gradual, but cumulatively it will be very large, as compared with pre-1974 prices.

All in all, there is every likelihood that our gasoline consumption will stop rising and, at least, will begin to decline.

APPLIANCES

The new system of mandatory standards of energy efficiency will squeeze significant savings from this source, though possibly at somewhat higher initial costs for some appliances.

COAL CONVERSION

This, of course, is not a conservation measure but a fuel-switching measure aimed at reducing dependence on imported oil. I believe that the exemptions from the new industrial and utility oil and gas users tax adopted by the Ways and Means Committee were entirely sensible, because the original administration program seems to demand coal conversion where it was impossible or made no sense. We still have unsolved environmental problems with coal, and possible labor and transportation problems. The net result—again according to various reputable studies—is that we almost certainly will not reach the original Presidential goal of a rise of almost 600 million tons a year in coal consumption to 1.2 billion tons.

But once again, the carrots and sticks in this bill—including carefully drawn provisions for mandatory use of coal or other fuel instead of oil or gas, chiefly in boiler use in new installations, along with various tax credits and rebates—will greatly hasten the coal conversion process. It is not of major importance to me whether in 1985 we achieve the last 50,000 tons of coal use that is projected in the plan; what is important is that the process has begun.

NATURAL GAS

One crucial point was largely overlooked in the intense and emotional debate over natural gas and deregulation. This is that the plan proposed by the President and largely adopted in the House bill is a huge improvement over the system of price controls we have had up to now. This is no place to go into detail, but I think there can be no dispute that if we are to continue some form of price regulation to avoid major disruption, this bill provides a far better form of regulation than we have had. It also permits a substantial increase in price, and hence, in incentives for gas discovery, though obviously not quite as much incentive as complete deregulation.

OIL

Our present system of price control is complicated and is certainly not perfect, and the bill would not significantly change it. But the system, including its provision for annual increases in the controlled price and the much higher permitted price for new oil, provides very real incentives for oil drilling and discovery. The amount of drilling being done in this conutry has reversed a long decline and is sharply higher than 3 or 4 years ago. That is the clearest and most convincing evidence that it still pays to find oil. The administration has argued persuasively that, even with controls, there is a bigger profit payoff in finding oil in the United States now than anywhere else in the world because of the huge payments to governments that are required almost everywhere else.

The new wellhead tax will have the proper function of raising oil prices further to induce conservation and efficiency in use. I do not believe it was necessary or desirable to have this price increase go entirely to the oil producers. I would have preferred to see the proceeds of the tax used to bolster the social security system, but the system of rebates to taxpayers generally will afford some cushion for the loss of real income caused by the higher prices for oil and its products. The conservation effect will be achieved without significant economic shock.

For the future, I would like to see much more emphasis placed on the newer sources of energy, such as coal gasification. There may be a good future in solar energy, which is given some boost in this bill through a tax credit. Other promising avenues must be explored, and later legislation almost certainly will be necessary.

But for now, I think the House, and the people, can take considerable satisfaction in what has been accomplished. We have not treated the energy problem as "the moral equivalent of war" and the sacrifices we have demanded are not huge. But this Nation will have a significantly better energy future as a result of the plan and the bill we have passed.

Mr. LUNDINE. Mr. Chairman, as the House of Representatives concludes its consideration of the National Energy Act and moves toward the final vote on this legislation, I want to express my strong support for H.R. 8444.

Since April 20 when the President sent his energy proposals to the Congress, we have labored long and hard to insure that the necessary legislative steps are taken so that we are not caught one more winter without a comprehensive national energy policy.

The legislation before us today addresses some of our most important energy problems in an effective and fair way. It will stimulate a massive conservation effort in the United States by establishing a homeowner insulation program, in which our utilities will pay a major role, and by providing expanded financial aid, and low interest loans and grant programs to provide funds for insulating. In addition, a maximum tax credit of $400, 20 percent of the first $2,000 spent after April 20, will be available to those who insulate. These measures will enable us to conserve a great deal of our wasted residential energy, while at the same time, trimming our fuel bills.

Moreover, H.R. 8444 will make available grants of up to $900 million over 3 years to schools and hospitals, and other health-care facilities for energy conservation measures. This provision is extremely important to local school districts and health-care facilities which are already having difficulty coping with a heavy financial burden.

State and local governments are also in dire need of ways to cut their administrative costs. The provision in H.R. 8444 of technical assistance to State and local governments to determine the conservation measures needed to cut energy consumption in town halls, local libraries, and other government buildings will both save energy and cut the administrative cost of our State and local governments.

The coal conversion program in H.R. 8444 will include both new and existing power and industrial plants to switch from oil and gas to coal and other fuels. H.R. 8444 provides positive incentives for industrial conservation and for the installation of cogeneration equipment. Fundamentally, it rewards those who support our national energy goals, and punishes only those who do not.

The era of cheap energy prices is gone. H.R. 8444 will, however, provide for a fair and stable pricing system for oil and natural gas without causing huge economic disruptions in our economy. In addition, this pricing system will provide adequate incentive for the development of much of the remaining domestic oil and natural gas supply. By abolishing the distinction between interstate and intrastate natural gas pricing and tieing the price of newly discovered natural gas to the Btu heat equivalency of oil, we will begin to equate our domestic natural gas supply with our demand. Giving special consideration to the production costs of enhanced recovery methods of oil and gas should provide further incentive for development of marginal gas and oil wells.

To help cushion the consumer from the impact of increased energy prices, the bill provides a tax rebate of the revenues collected from the oil equalization tax. In addition, there are included in the bill electric utility rate reform measures that will reflect a more reasonable cost-usage ratio for the consumer, and offer the availability of off-peak and lifeline rates for those on limited incomes.

H.R. 8444 is designed to help us make the transition from the end of the oil and gas era to the beginning of an era filled with exciting renewable energy sources. It is absolutely essential that while we conserve energy, we also devote a great deal of time and attention to the needed research and development of alternative energy sources like solar, nuclear, wind, and geothermal. This bill will advance

the cause of alternative energy sources by providing residential tax credits for the installation of solar and wind technologies, and by providing a solar heating and cooling demonstration program in Federal facilities.

Finally, this legislation will insure that the American people will have leadership in the energy area. H.R. 8444, together with the creation this week of a single Department of Energy in the executive branch, will enhance the ability for responsible decisionmaking in the energy area. To nations around the world, H.R. 8444 is a signal that the United States is taking steps to avoid serious economic dislocation from a disruption in our foreign oil supplies and manipulation by OPEC nations.

I urge you to support the final passage of H.R. 8444.

Mr. LEGGETT. Mr. Chairman, in recent years it has become increasingly apparent that low cost, abundant, and secure supplies of energy—which have historically fueled our factories and lifestyles—are no longer so readily available. The urgency of this problem was first brought to the forefront of our collective psyche with the advent of the Arab oil embargo in 1973, and subsequent dramatic increases in overall energy prices. More recently, natural gas shortages, exacerbated by one of the coldest winters in memory, have received much attention.

After struggling with energy-related matters for the past three Congresses, we still find ourselves between "a rock and a hard place." A quick look at our past action suggests that we are in favor of the following broad energy goals or objectives:

Continued availability of low-cost energy to consumers;

Protection of the natural environment;

Protection from foreign supply interruption;

Desire to preserve selected domestic energy resources for future generations and to promote efficient economic use of dwindling nonrenewable fuels;

More rapid development of inexhaustible energy sources and technologies;

Minimization of the budgetary impacts of our energy proposals;

Assurance of adequate energy growth so as to maintain or improve upon existing lifestyles; and

Equitable burden sharing of our energy problems by all users.

Yet the conflicts among many of these goals are readily apparent. For example, low-cost energy encourages greater use which in turn can generate greater pollution. On the other hand, strong environmental regulations on air quality, strip mining, and disposal of nuclear wastes can raise the overall cost of energy to the Nation. Similarly, protecting the United States from foreign supply interruptions means more rapid development of domestic nonrenewable energy supplies. Not only does this lead to eventual price increases, but it also leads to inefficient economic uses as a result of lost opportunity costs. Additionally, such a policy flies in the face of our desire to preserve some domestic energy resources for future generations—especially in areas where alternative fuel sources appear unlikely for the foreseeable future. Countless other conflicts are inherent in these goals and objectives.

As I see it, our task here in the Congress is to be the final arbiter—the court of last resort so to speak—for diminishing these inherent contradictions between interdependent and oftentimes conflicting energy policy goals. Only the Congress can make these ultimate tradeoffs and decisions.

Before we can design an optimal energy strategy—one which hopefully will minimize the contradictions between as many of these goals as possible—we must first agree on a set of preferences which most closely match those of the great majority of our fellow Americans. It is my contention that this collective preference function is most concerned about holding the line on energy prices, and insuring that any burdens involved in solving our energy-related problems are shared as equitably as possible. This would require sacrifices from both individuals and industry alike.

Regarding maintenance of low energy prices to consumers as an explicit policy goal, a Harris poll taken the day after President Carter unveiled his energy message revealed that Americans were opposed 54 to 39 to a standby 5-cent-per-gallon gasoline tax. Moreover, in response to a question proposing the use of gasoline taxes to develop rapid transit systems, a recent California poll revealed that 16.3 percent favored a 1-cent-per-gallon increase, 8.9 percent favored a 2-cent-per-gallon increase, while fully 74.9 percent favored no increase at all, but believed that present gasoline taxes should be utilized for rapid transit, streets, roads and highways.

Based upon such results, I am convinced more than ever that we must listen to our constituents on this important matter and not be swayed by pressure from large, multinational corporate interests. It is my firm conviction that in our deliberations to formulate a national energy plan, we should generally choose policy instruments which:

Encourage conservation without relying upon price increases as a major incentive—except for taxes on extremely inefficient energy users;

Devise innovative nonpricing approaches to induce greater exploration and development of energy supplies;

Experiment with novel institutional arrangements to combat the common front of the OPEC cartel;

And expand Federal energy R. & D. programs especially in the area of inexhaustible energy sources.

Before us this week we have the appearance of a national energy strategy. This act had its roots in an energy plan proposed by President Carter promising to reduce oil imports by 4.5 million barrels a day by 1985 and increase domestic coal production to more than 1 billion tons annually. To achieve such optimistic goals, the administration's proposal relied heavily on energy conservation through the use of taxes on energy consumption. In addition, this plan sought to increase the conversion from oil and natural gas to other fuels especially for power plants and large industrial users, and to rely on more rapid development of unconventional and renewable energy sources. In turn, this omnibus energy package was referred to the five key standing committes in the House which traditionally deal with energy-related matters for their careful consideration. Finally, the ad hoc Select Committee on Energy reviewed the proposals of these five committees and reported out the overall bill we have before us this week.

The question is then: Do we in fact have a rational energy plan before us, or is this just the only one in town which, due to political expediency, we have no alternative but to accept? I would like to take a few minutes to explore this question with you today. The reason I feel this is a most important question is because, as the final arbiter, only we will be held accountable for the national energy strategy that finally emerges from our deliberations.

To begin with, this proposed act does, in fact, contain many provisions which support the framework for a rational energy plan which I have previously outlined. For instance, the numerous weatherization proposals, conservation tax credit and loan programs, mandatory efficiency standards, and fuel conversion requirements all encourage energy conservation without relying on major price increases to consumers. These are long overdue measures, and I strongly endorse them. Moreover, I am heartened by efforts contained in this bill which would dramatically expand projects which demonstrate solar heating and cooling technology and accelerate procurement and installation of photovoltaic systems in Federal buildings. Similarly, I support those provisions which permit certain tax advantages for geothermal steam wells and tax credits for the purchase of solar heating, cooling, and space heating equipment for existing homes.

And although I am not entirely convinced that the current version of the gas-guzzler tax in title II, part IIA, is the most optimal tax we could have designed, I also strongly support the intent of this provision. However, a gnawing concern is that without the administration-backed measure to return the revenues collected in the form of rebates to purchasers of fuel efficient cars, we have missed a golden opportunity to encourage even greater conservation efforts. In addition, this proposed tax will in all likelihood prove to be more inflationary than a similar tax coupled with a rebate.

On the other hand, this act possesses many glaring deficiencies. Totally lacking are new prescriptions which provide nonpricing remedies on the supply side. In particular, I am thinking about Federal involvement in exploration and development of new gas and oil supplies. Moreover, I am concerned about the lack of experimentation with new institutional arrangements to combat OPEC-like cartels. If the Federal Government were to act as common purchasing agent for all energy imports, supplier nations would meet a solid front acting in the best interests of all American citizens

rather than the diffused, and therefore competitively weaker, corporate points of contact we currently operate through. Last, I do not feel that we are pursuing Federal energy R. & D. programs in emerging energy technology areas as rigorously as we might. Absorptive capacities in R. & D. communities are far from being saturated. Long-established nuclear programs still receive the lion's share of the Federal energy R. & D. budget, oftentimes at the expense of such inexhaustible energy source programs as solar, geothermal, and fusion.

Of more important cause for concern however, are a number of provisions and proposed amendments to this act which, if found acceptable, would have the effect of dramatically raising the cost of energy to consumers to socially unconscionable levels and quite possibly jeopardizing sustained economic growth and recovery. In particular, I am referring to the crude oil equalization tax provision, the gasoline tax amendments, and the amendment to deregulate the price of new onshore natural gas.

The proponents of these measures seem to have forgotten one fact of which I am painfully reminded every time I return to California: The price of gasoline has already doubled in the last 4 years. In addition, home utility bills are making paupers of once self-sufficient senior citizens. In short, the country is already paying what its citizens deem to be an excessive amount for energy. And now we are asked to favorably endorse these measures—the cumulative effect of which will be to take additional billions annually out of the pockets of wage earners and return to them no more energy than they now use. Mr. Chairman, I submit that this is totally irresponsible, especially given that numerous alternative conservation-oriented measures are available. Be that as it may, let me address each one of these onerous proposals separately.

First of all, the crude oil equalization tax, which will be imposed in three stages to bring the price of domestic oil up to the world price, theoretically has the potential for acting like a two-edged sword. It is supposed to stimulate greater domestic exploration and production while at the same time discourage overall demand for liquid fuels as costs are ultimately passed through to consumers in the form of higher gasoline prices and utility rates. However, the increase in oil and gas prices since 1973 has been several times larger than the increase proposed by the provision in the act, yet increases in production have been modest. In its recent assessment of the President's energy plan, our own Congressional Budget Office predicts that the amount of oil produced in response to the price increases currently envisioned will be very limited. Moreover, CBO feels that it is questionable whether price increases above those originally proposed in the President's plan would stimulate substantial additional investments in exploration and development. Regarding probable demand behavior to this proposal, the CBO implies that industrial consumption of oil will continue to grow at least through 1985; and that since most of the oil price increases in the residential sector will be rebated in the form of a tax credit of a flat amount for each taxpayer, the measure will not substantially affect residential consumption of oil. I ask, then, why is this measure still a crucial part of our act? Why should we support this 20-cent tax on a gallon of gasoline?

Turning to the other proposed gas tax amendments, such measures clearly were designed to reduce the demand for gasoline by discouraging wasteful driving. However, the anticipated decline in toal mileage driven as a result of the relatively modest tax increases contained in either the Ad Hoc Energy Committee amendment or the Howard substitute amendment may prove illusory. This small a price increase is highly unlikely to encourage anyone to conserve on their use of gasoline. Most motorists will simply factor in these minor, incremental price increases and continue driving as much as before. Furthermore, since neither amendment contains a rebate mechanism, the proposed tax would be highly regressive in its distributional impact. Low-income groups would bear the brunt of this tax. In addition, such a tax measure would impact most unfairly on rural families with autos who already spend a larger portion of their income on gasoline than do similar urban families. This is particularly true in the West. Thus, I can only conclude that such measures are sheer idiocy due to their incremental natural and inherent unfairness.

With respect to the amendment to remove new onshore natural gas from Federal price controls, such a proposal, if passed, would add literally billions of dollars to already swollen consumer energy bills without appreciably increasing output. The Commerce Committee report states emphatically that deregulation of natural gas would only add approximately 1.7 trillion cubic feet of conventional natural gas supplies over and above that which will be produced under the committee's recommended program between 1978 and 1985. The estimated cumulative cost to the consumer of the Brown amendment ranges from $53 to $79 billion, which conservatively translates into an annual $150 increase in the natural gas bill for the average residential user. In addition, just as in the case of the proposed gasoline tax amendments, this measure will proportionally place the heaviest financial burden on those income groups who can least afford to absorb such anticipated price increases. Furthermore, the sheer magnitude of the estimated cumulative cost will most certainly add to current inflationary pressures and almost surely rekindle inflationary expectations. And to what end? After all, there is no reason to expect that such anticipated price increases will result in substantial increased production of natural gas. This is inescapably true, since reserves are dwindling and since the price of alternative fuels is set by the OPEC cartel. Also, the sensitivity of supply to changing prices is quite low due to the structure of the industry itself, the fixed nature of its assets and delivery systems, and the length of time it takes for gas producers to respond to price incentives with expended drilling activity. Moreover, deregulation will result in a lack of control over a highly monopolistic industry. Last I feel an obligation to the American consuming public which we long ago urged to switch from competing fuels to natural gas because of the alleged reliability of supply, clean nature of that fuel, and inexpensive cost. Therefore, I cannot find it in my heart to endorse such an outrageous measure.

It would be easy for us to sit back here in Washington and say, "Well, there is nothing we can do but to raise the price of energy, and let the marketplace solve the problem." That is exactly what the OPEC cartel did to us, and there is not a Member in this Chamber who failed to condemn that act. Besides, free markets do not exist in the world around us, and we would only be kidding ourselves if we thought we could resurrect a bygone era ruled by the "invisible hand" of Adam Smith. No, rapidly rising prices to the consumer is not the cure-all answer to our energy-related problems.

Let us return now to my earlier question concerning whether or not we have a rational energy plan before us for consideration. Admittedly, this plan has many necessary and important provisions. However, in the final analysis, it is an imperfect compromise, an unfinished portrait. I am fearful that we may not have labored long enough to insure the continued availability of relatively low-cost energy to consumers, and that the burden of a solution to our energy-related difficulties has not been shared as equitably as it might have been and I therefore must in good conscience oppose the legislation.

Thank you.

Mr. HORTON. Mr. Chairman, the Commission on Federal Paperwork which I have the honor to chair, issued a report the other day entitled "The Role of Congress in Limiting and Creating Paperwork." In the report we took note of the fact that—

> Lawmaking is a paperwork process in and of itself, and the laws that are written generate vast amounts of paperwork in the Federal agencies and are translated into burdens on the American public.

Thus, the paperwork indulged in by the House of Representatives in processing the National Energy Act gives rise to apprehensions of an avalanche soon to come from the expanding energy bureaucracy of the executive branch.

The act itself appeared in six different versions ranging in size from H.R. 6831 as introduced consisting of 240 pages to H.R. 8444 as reported consisting of 580 pages. Seven volumes of reports on the bill and its component parts totalling over 5,000 pages have been issued by the committees involved. The bills and committee reports accompanying them make a stack 7 inches thick. Another inch will be added to this pile when another print of H.R. 8444 emerges as passed by the House. Assuming the normal printing order, the total number of copies of the seven ver-

sions of the bill and accompanying reports would make a stack over three times as high as the Washington Monument. And if the total number of sheets, that is, half the number of pages, were laid end to end they would reach from here to Galveston, Tex., and beyond.

However, this is, so to speak, only the tip of the iceberg. This paperwork is in addition to voluminous records of hearings yet to be printed and other materials reproduced in who knows how many copies, which were made available to committee members and staff. These include:

Daily summaries of Committee actions provided by the FEA.

Thirteen pamphlets analyzing tax aspects of the bill as prepared by the Joint Committee on Taxation staff for the Ways and Means Committee.

Twelve committee prints of individual briefings held for Members and staff of the Ad Hoc Committee.

Daily news releases (15) by the Ways and Means Committee covering action taken on various sections of the bill.

Summaries and digests of several studies of the energy problem. Members have also received full copies of the report from the Office of Technology Assessment (OTA).

A summary of editorial opinion prepared by the Library of Congress for the Ways and Means Committee.

Numerous miscellaneous documents and pamphlets relating to energy.

Moreover, before the bill becomes law additional vast amounts of paperwork will be produced in the passage of the bill through the Senate.

While all of this is a commendable effort to give Congress the information it needs to legislate, it may also indicate a need for Congress to put its own house in order. To that end I commend to the attention of the Members the report of the Paperwork Commission.

Mr. BAUCUS. Mr. Chairman, the National Energy Act we passed this afternoon is a step forward toward meeting the crisis in energy that this Nation faces. I believe that much more can and should be done, particularly for the development of plentiful and renewable sources of energy such as solar, wind, and agricultural products.

However, the bill as passed today provides the first comprehensive approach to energy policy. It was a disappointment to me that amendments to the bill presented to the whole House for its consideration were so limited. Many parts of this bill were passed without specific discussion and the opportunity for improvement. But I do understand the need to limit the time spent on the bill in order to get a policy in place. A piece of legislation this complicated could have easily produced months of debate and shackled the President's ability to deal with immediate problems.

I was particularly pleased to see the defeat of the attempt to impose an additional 4 cents Federal tax on general aviation fuel. General aviation is vital to all aspects of Montana life from carrying blood from the Billings blood bank to air taxi and commuter airline services. This proposed tax would have increased the total Federal tax on general aviation fuel to 11 cents. Even the ad hoc committee which proposed it admitted that the energy savings resulting from the tax would be negligible.

We were also successful in defeating any increased Federal tax on gasoline. While I found merit in the Howard Amendment which would have returned the money to the States for bridge and highway repair and for rural mass transit projects such as a bus system for Missoula, I decided that these projects should be funded in other ways. A 4- or 5-cent tax on gasoline on top of the existing taxes and the expected increase in the price due to the change in the wellhead price of oil, would have been a hardship without necessarily providing a disincentive for gasoline consumption.

I feel that the natural gas pricing policy in the bill goes a long way toward improving the incentive of natural gas producers to attempt new production and to bring low-producing wells on line. The estimates for the price of natural gas in the first quarter of 1978 is $1.75 per million Btu's. Since the price thereafter is tied to the price of oil, it is expected to rise at least 10 percent per year. This should provide a gradual increase that can be absorbed by increased conservation methods or avoided by conversion to other fuel sources.

Although I voted against an amendment to deregulate the price of natural gas, I agreed with the House decision to widen the definition of new gas to include that which comes from reservoirs determined to be new by the appropriate State agency even though the distance and depth requirements set for new reservoirs were not met. This means that small neighboring reservoirs, such as are frequently found in Montana, would be correctly considered as new when separate wells were drilled. I felt that this fair definition—and the price increases already in the bill—would provide a sufficient incentive at this time. The lifting of all controls on new natural gas envisioned by the deregulation amendment would have subjected both producers and consumers to the vagaries of a frequently volatile market.

The bill also provides for required conversion by powerplants using oil or gas to coal with some exemptions for environmental or cost reasons. An oil and gas business user tax would be levied against other industrial users of oil and gas to encourage conversion or, at least, conservation.

The home weatherization program portion of the bill would require utilities to inform residential customers of suggested energy saving measures for homes and the savings likely to be realized by such measures. States are also required to provide the lists of suppliers of weatherization materials, contractors for weatherization work and lenders. These lists would be given to the utility companies to pass along to their customers.

A 20-percent income tax credit would be available until December of 1984 for weatherization costs up to $2,000. The maximum amount of credit would be $400. The maximum amount available for solar or wind energy equipment would be $2,150. Tax incentives similar to those allowed to oil and gas production would be extended to geothermal steam wells.

The gas guzzler tax will dissuade automobile manufacturers from producing energy inefficient automobiles starting with 1979 models. Many people have misunderstood this tax to mean that cars currently owned would be subject to it. This is not true. It will only affect newly manufactured automobiles. This tax might never have to be collected if manufacturers do their best to improve the fuel efficiency of their cars quickly.

The bill provides for a tax to bring domestic oil prices up to the world price in three stages. I felt that a small amount of this tax money should go to the producers of oil to provide an incentive to find and produce more oil. This would help to reduce America's reliance of foreign oil and to improve to balance of payments. I voted for an amendment that would have returned up to 6 percent of the tax to those producers—independents who are the major "finders" of oil—when they can show that more than a quarter of their gross production income was used for exploration costs. This return would have lasted only 1 year and would not have affected the price of oil since it would have come from the tax already levied. This amendment was defeated by 25 votes.

The passage of this bill is only the beginning of our national attempt to cope with our growing energy needs in the face of a limited amount of oil, gas and even coal. Our most imaginative and creative minds must be put to work developing ways to convert our energy usage to renewable sources without disrupting our economy. Stronger measures may have to be taken to encourage conservation of energy. Interim incentives must be provided for the orderly development of the remaining oil, gas and coal. There is still much work ahead.

Mr. EMORY. Mr. Chairman, today final consideration of the National Energy Act and the GOP substitute bill are before the House. A comprehensive energy bill should address the following two general areas; first, conservation and more efficient use of available resources, and second, incentives for increased production through further exploration for fossil fuels and development of alternatives.

Neither the Democrat nor Republican version has comprehensively addressed both those areas. Therefore, I am not fully satisfied with either version, and this has made my votes on amendments and final passage extremely difficult. At this time, I would like to comment on positive and negative aspects of both bills.

The Republican alternative, H.R. 8555, bases itself on a free market philosophy, which I believe provides the fairest and most rational incentives for accomplishing a specific goal. Market pricing of both oil and gas would encourage maximum conservation, development, and use of alternative fuel sources where they are economically desirable, and a reduction in our demand for higher-priced, unstable foreign energy sources.

I strongly supported the provisions for deregulation of natural gas contained in

the Republican substitute. In the bill, coal conversion is encouraged through the establishment of an energy trust fund from crude oil pricing and tax policies to encourage coal conversion. Deregulation of fossil fuels would probably result in substantial voluntary coal conversion.

I am opposed to the crude oil equalization tax, especially the form it takes in H.R. 8444. Raising the price of the lowest tier oil to consumers through a tax and then rebating the entire tax to all consumers is an exercise in increasing Federal bureaucracy at its best. There is no doubt that the taxpayers would all like a $22 tax rebate at the end of the year, but such a rebate will do absolutely nothing to encourage increased production or the development of the alternatives we must have to replace our present consumption of nonrenewable fuel sources. If the crude oil equalization tax—$1.5 billion in 1978—must be imposed, a substantial portion of that money should be devoted to developing alternatives. The Republican substitute, H.R. 8555, proposed that 65 percent of the net revenues be earmarked for synthetic fuels. To offset the detrimental effect this tax will have on real personal income, the GOP substitute will implement an across-the-board income tax reduction for 1978 and a rebate restricted to home heating oil users.

The two glaring weaknesses of the Republican substitute are, first, the total lack of tax incentives for weatherization, conservation equipment, and installation of solar equipment and second, the 50-percent plowback provision. Conservation incentives are very important to both business and the residential consumer. The Maine people have invested substantial money and interest in wood, solar, small-site hydro, and conservation measures, and I would like to encourage its continuation through tax incentives. I also strongly object to the 50-percent plowback that is allowed as an incentive for oil producers to increase exploration and production. A 50-percent tax credit is excessive, expensive, and unnecessary.

H.R. 8444 provides tangible tax incentives for residential and business conservation measures. Federal grants and loans will help schools, health care facilities, State and local governments to begin energy audit and technical assistance programs. Tax credits for solar and wind energy, with the continuation of a strong demonstration program by ERDA, will help us meet the goal of solar energy use in 1.3 million homes by 1985. Overall, the conservation measures contained in this bill are very important. The coal conversion provisions granting an additional 10-percent tax credit to those who convert to coal or any other nonfossil fuel alternative including wood and garbage should be a strong incentive.

In summary, an energy bill must address both conservation and production sides of the energy issue. Unfortunately, each bill addressed itself to only one issue. H.R. 8444 concerned itself totally with conservation incentives and neglected the production side of the picture. Such a narrow view will only help save a dwindling resource, but it provides no hope for the future. H.R. 8555 addressed the production side of the energy picture with deregulation of natural gas and an energy trust fund for synthetic fuels, but contained no specific conservation measures.

To provide a balanced energy program, many aspects of both bills should be combined. I voted for H.R. 8555 because of its strong production incentives, and I also voted for final passage of H.R. 8444 because of is strong conservation measures. I would hope that passage of this bill will be the beginning of our concern with energy legislation, and that future efforts will be specifically devoted to increasing production incentives. This will be our only hope in the long run.

Mr. DODD. Mr. Chairman, today we continue consideration of perhaps the most far-reaching and complex piece of legislation that has come before the House in most of our lifetimes, the National Energy Act of 1977.

In reality this is not one bill, but instead more than 100 different legislative proposals almost all of which represent a substantial departure from existing policy. When the combined effect of these measures is considered, the changes that will result in our economy and almost every aspect of our way of life are truly enormous.

These changes are, however, long overdue. In recent years it has become more and more evident that the era of low-cost energy resources has come to an end. No longer can our Nation pursue economic policies which are based on the availability of an unlimited supply of cheap oil and natural gas. Instead, we must confront the realities of our energy situation—domestic supplies of oil and gas are not sufficient to meet our needs if we continue to consume energy at current rates, and our dependence on expensive sources of foreign oil and gas has increased steadily over the past few years. In the first 4 months of 1976, we imported 12 percent more fossil fuels than in the comparable period of 1975, and in the first 4 months of 1977 we imported 31 percent more than in the same period in 1976.

Unless we can reduce the annual growth rate in our consumption from its current level of 4 to 2 percent in of 1985, we are going to find ourselves facing either a critical shortage of domestic supplies, or a crippling deficit in our balance of trade coupled by the uncertainty of dealing with the OPEC cartel.

Therefore, in this legislation we are pursuing the goal of energy conservation but also the equally important goal of alternative energy development. Without the development of alternative forms of energy resources which can be substituted for our rapidly dwindling supplies of oil and gas, the ability of our Nation's economy to grow is severely restricted, and the quality of life that our people will have to enjoy in the future is further threatened.

It is a difficult goal that we have set for ourselves, but one which we dare not fail to achieve. The effect of this past winter's record cold weather on our Nation's balance of payments has demonstrated how greatly the economy has been restrained by our failure to solve the problem of our dependence on foreign energy supplies. Largely due to our purchase of foreign energy resources, our Nation has experienced 13 consecutive months of trade deficits, with the possibility that the overall trade deficit may reach $25 billion in 1977, the previous high for any single year being $6.4 billion in 1972. Were it not for oil, the United States would run a substantial trade surplus, but our oil purchases are expected to climb to $40 billion this year.

Mr. Chairman, we in New England and my State of Connecticut have felt the effects of high-cost energy probably more than any other area. At the moment, our region pays between 20 and 30 percent higher fuel prices than the national average due to the fact that we use relatively little inexpensive natural gas and a great deal of high-priced foreign oil. The higher cost of energy in New England represents a significant burden for business and industry that has found it increasingly difficult in recent years to compete with business located in other areas where the cost of energy is lower.

While experience will undoubtedly reveal those areas in which the bill before us fails to solve these problems, I do believe that it contains those elements which are needed to reduce our consumption of oil and gas and to encourage alternative energy development.

Chief among these are the provisions of the bill which are designed to encourage conservation by raising the price of domestically produced crude oil and new natural gas. The Crude Oil Equalization Tax would be phased in over a 3-year period and would eventually increase the price of domestically produced crude oil to the world price level.

To avoid the inequities which would otherwise arise from such a rapid price rise, the provision contains an exemption for individuals, churches, schools, and hospitals that must use oil for heating purposes. The revenues received from the tax would be returned in the form of a tax rebate to all heads of household.

Mr. Chairman, I believe that the Crude Oil Equalization Tax represents a fair way of forcing consumers to make a choice between the essential and nonessential uses of oil, while at the same time preventing the oil companies from realizing huge profit increases at the taxpayers' expense.

In addition, this provision will mean that the rest of the country will now have to pay the same high price for oil that we in New England have had to pay for a long time. The Northeastern economy will finally be relieved of the competitive disadvantage that has plagued it for so many years as a result of its disproportionately high energy costs.

In order to encourage conservation of natural gas, the bill provides for a similar increase in the price of new natural gas. Gas in the intrastate market, which is not controlled, is presently selling for about $2 per mcf, and it was necessary during last winter's natural gas shortage in parts of the East and the Midwest to pass special legislation

allowing distressed interstate suppliers of natural gas to purchase the gas they needed from intrastate suppliers at the uncontrolled price.

Few would argue that the federally controlled price of interstate gas is artificially low and in the past actually has encouraged people to use natural gas in a wasteful way. In more recent years, price controls have caused gas suppliers to divert their supplies from the interstate market to the intrastate market where they sell their product at a higher price.

This practice has resulted in the irrational use of natural gas given its limited supply. Last winter while high priority users—as well as most large industries in Ohio, Illinois, and Indiana—were closed due to the unavailability of natural gas, natural gas was being used in the State of Texas, where most of our supply of this resource is produced, for the low priority use of generating electricity.

Under the provisions of this bill, the interstate and intrastate price of gas would be equalized, low priority usage of natural gas will be prohibited, and therefore such inconsistencies in our natural gas policy will no longer be allowed to occur.

Mr. Chairman, while I believe the bill's provisions for increases in the price of crude oil and natural gas are equitable and necessary in order to discourage consumption I would like to express my strong opposition to the Ad Hoc Energy Committee amendment which seeks to impose an additional 4 cents-a-gallon tax on gasoline. Such a tax is designed to reduce this country's overall consumption of gasoline, but it is already a foregone conclusion that it is both ineffective and unfair. It has been well established that the consumption of gasoline is highly inelastic—in other words, even a large increase in the cost per gallon will not result in a significant decrease in the quantity consumed. Treasury Secretary Blumenthal actually admitted that the gas tax would not contribute to the reduction of gasoline consumption in his testimony before the House Ways and Means Committee.

Thus, while the imposition of such tax will do very little to further the goal of reduced consumption, it will indeed go a long way to penalize in a most unjust fashion a large number of Americans. It is undeniable that the vastness of the distances in this country has a great deal to do with our dependence on the automobile—and many individuals must travel these distances not for purposes of pleasure, but simply in order to reach their place of work each day. To tax those who must use their cars out of necessity rather than choice, either because they live in rural areas where no public transportation is available, or because their livelihood depends on it, is an unconscionable act. Not only would this additional 4 cent tax strike blindly against all motorists, but it would also strike hardest against those who can afford it the least—the lower and middle income families of this country.

In my congressional district which includes all of eastern Connecticut, studies have shown that 2,000 people travel 100 or more miles a day going to and from their jobs. There are 60 small cities and towns in my district with literally no means of transportation other than the private automobile. Therefore, for my constituents, a tax on gasoline would not represent an incentive to develop a mass transit system, but instead would only be a burden which I sincerely believe they should not be asked to bear.

I urge all of my colleagues to reject this amendment offered by the Ad Hoc Committee on Energy: the Energy Act is a progressive piece of legislation; let us not mar it by imposing a tax which cannot be targeted to achieve the desired results but can only punish millions of Americans regardless of why, or where, they are driving their automobiles.

Mr. Chairman, I would also like to state my opposition to the home weatherization income tax credit presently included in H.R. 8444, as well as to the Ad Hoc Energy Committee's proposed amendment extending even further the time period during which the taxpayer will be able to claim this generous credit. If I may so, Mr. Chairman, this credit which would allow individuals to claim a 20 percent income tax credit for energy conserving modifications to their principal residence, makes, in my opinion, precious little sense.

Federal encouragement of all possible conservation measures is indeed crucial to the success of our overall energy program, but giving people credit for taking steps to reduce their utility bills seems to take the Federal role one step too far in the wrong direction.

The income tax credit provision is tantamount to giving a double benefit to those individuals and families who can afford to insulate their homes in the first place, and who will be doing so to their own advantage anyway since weatherization equipment will result in substantial long-term savings.

The credit will result in a decrease in Federal revenues received from those taxpayers who need no compensation for doing what is clearly in their best interest, and for this reason, Mr. Chairman, I must oppose it.

I supported an amendment by my colleagues, Representatives STARK, JACOBS, and KEYS, to delete this tax credit, and I regret that the Rules Committee, during its consideration of the rule on H.R. 8444, did not support my motion to allow this amendment to be debated on the floor, and voted on by all Members of this House.

I do want to make clear, Mr. Chairman, that while I oppose what I see as an unnecessary break for the affluent of this country, I strongly endorse the provisions allowing for the extension of Federal grants and loans to low-income families who wish to install weatherization equipment in their homes. Any expenditure of capital represents for many of these families a sacrifice of other essential goods and services, and I believe that we should provide them with the assistance that they need in order to take part in our nationwide conservation effort. Our country as a whole, not just a small number of upper-income families, stands to gain from such a grant and loan program, and therefore its inclusion in H.R. 8444 is both a justified and welcome provision.

Mr. Chairman, at this time I would like to express my strong support for two sections of the bill which have not received a great deal of public attention, yet which I believe will significantly help restore fairness to the prices which utilities charge their customers. Part 5 of title I of the bill pertaining to public utility regulatory policies strictly limits the ability of utilities to charge their customers rates that have not been approved by the Federal Power Commission and establishes a new program for the construction of small hydroelectric projects on existing dams.

Mr. Chairman, at the beginning of my statement I said that the era of low-cost energy was over. Well, largely due to cumbersome and time-consuming Federal regulations, there never has really been a period of low-cost, or even fairly-priced, electricity available from FPC regulated utilities. It is one thing when scarce resources and the high cost of production push the cost of energy higher. However, when higher prices result from bureaucratic delays in deciding important rate questions, such as presently occurs at the FPC, the public's confidence in the Government's ability to act fairly and effectively in solving our energy problems is seriously threatened. Additionally, from an economic standpoint, we should seek to reduce such cost pressures, especially if they are not justified, because of their potentially inflationary impact.

Last year, in testimony before the Subcommittee on Energy and Power of the Committee on Interstate and Foreign Commerce, I recommended reform of the FPC's electric utility rate regulations which I believe would effectively deal with these bureaucratic problems.

The problems in electric ratemaking first came to my attention a little over a year ago when I became involved—ultimately as an intervenor—in an electric rate increase case which is pending before the Federal Power Commission. I was appalled by the delays and inequities fostered by current FPC regulations.

Mr. Chairman, at present there are 118 electric rate increase cases representing $640 million annually pending before the FPC. These are electric rates which are in effect, which customers are already paying, but for which a final decision on lawfulness has not been rendered.

Current provisions of the Federal Power Act allow up to a 5-month suspension of new rates, if the Commission so orders, and give the Commission authority to order rebates if and when the decision comes after the rate has gone into effect and the rate is determined to be excessive. I understand that congressional intent underlying this portion of the Federal Power Act, some 41 years ago, was that the 5-month suspension period would allow the Commission to conduct and to complete proceedings on a new rate filing and determine its lawfulness before permitting it to be charged to customers.

At present, however, an average rate

proceeding before the Commission consumes well over a year from the date of filing to the date of final decision by the presiding administrative law judge. Many rate schedule filings require 2, 3, or more years to complete, and during most of that time, even if the full 5-month suspension has been ordered—which is atypical—the rate is in effect and customers are required to pay the questionable charge.

The process through which rebates may be ordered is a problem as well. Although a public utility may find it quite easy to keep records on their wholesale buyers and issue refunds on an excessive rate if the Commission so orders, it is often very difficult for the electric company to pass these refunds along to their retail customers—the ultimate consumers—since, because of the lengthy proceedings on the case, many may be deceased, unable to be located, or otherwise unable to be recompensated.

The present ratemaking procedure, by allowing any rate filed to go into effect 5 months or less after filing, also acts as an incentive for the petitioning utility to intentionally file one or more inflated rate proposals, knowing they can collect these excessive rates for years even if it is unlawful. This procedure also provides incentives for the petitioning utility to attempt to delay Commission proceedings on their rate filing if there is any question as to what the final holding will be, in order to keep the high rate in effect for as long as possible. Clearly, it is in the public utility's interest to delay a possible negative decision on one of their rate proposals—they are already collecting the rate—but it is very contrary to the interests of the purchasers.

I am an intervenor in an electric rate increase proposal which was filed by Connecticut Light & Power Co. on December 2, 1975, and which is in its preliminary stages of hearing. This is the most recent of three rate increase proposals by Connecticut Light & Power, all of which are still pending final decision. The first of these was filed on June 16, 1972, and has been charged to customers since January 16, 1973. Despite the more than 4 years of elapsed time—an unconscionable delay for the customers to bear, to my way of thinking—there has been no final decision on the lawfulness of the rate. In addition, commission regulations have permitted Connecticut Light & Power Co. to file and begin collecting on the two more recent rate increase proposals. The result has been an average price increase of 40 percent over the last year.

The bill before us would resolve this problem by eliminating incentive for public utilities to file inflated rate proposals by requiring suspension of new rate proposals until such time as a final decision is rendered, and this decision holds the proposed schedule as being lawful.

Since these revisions might serve to encourage intervenors to employ delaying tactics in order to prevent a proposed rate from going into effect, the bill also authorizes the Commission to order interim rate increases or decreases after 5 months have elapsed since the filing date, if records on file with the Commission demonstrate the need for such a change in the rate schedule.

Mr. Chairman, the reform of electric rate regulation is long overdue. The provisions of this bill will be very effective, I think, in assuring conservation of energy, reasonable and appropriate regulation of rates, and the provision of electric power to all customers at the lowest possible cost.

And finally, Mr. Chairman, I would like to offer some comments in support of section 586 of H.R. 8444. This section would establish a Federal grant program to allow municipalities, electric cooperatives, industrial development agencies, and nonprofit organizations to undertake the development of small hydroelectric projects throughout the Nation.

Hydroelectric power as an alternative source of energy can help provide both rural and urban areas with a clean and inexpensive source of electric power. It is a renewable source of energy, more easily converted for conventional use on a large scale than solar energy, and less controversial than nuclear power. The U.S. commitment to developing a viable alternative to our increasing reliance on fuel oil compels us to develop such sources as hydropower whenever feasible.

There are an estimated 40,000 existing dams of moderate size throughout the United States which could be utilized in the production of hydropower. Because of the existence of these structures, and the fact that in many cases preliminary studies on the feasibility of development of hydropower at these sites have already been done, cost and environmental impact would be minimal. Turbine technology has made hydropower a much more efficient source of energy than it was years ago, and smaller dams can be utilized to derive power from our waterways and rivers. We cannot afford to allow this resource to remain undeveloped. Hydropower is one of the few remaining indigenous sources of renewable, inexpensive fuels which the United States can easily tap.

While virtually every region of the country stands to benefit from the development of hydropower, this fuel source will prove especially valuable to those areas of the country where energy costs are especially high. The Northeast, for example, has the highest energy costs in the Nation, and at the same time has one of the country's greatest potential for the development of small hydroplants. We in New England must import all of our energy with the exception of 7 percent generated by hydropower plants already in existence and a minimal amount derived from nuclear power sources. While 21 percent of the area's petroleum is imported from other parts of the Nation, 79 percent must come from foreign sources. This of course puts New England—and the rest of the Nation—in the uncomfortable position of being dependent upon outside sources for its prosperity and well-being. New England's sagging economy is sad testimony of the effect of the lack of inexpensive, readily available fuel on every aspect of our country's economic and social existence. The development of hydropower in the area would serve as a boon to the regional economy and would reduce our reliance on imported fuels.

Because of the region's disproportionately high energy costs, alternative sources of energy have been sought in recent years, and many hydroelectric feasibility studies have already been initiated or completed. Hydropower was found to be more than cost-effective in many instances, but not within the range of affordability for small municipalities. With the Federal funding provided for under section 586, development of this long-dormant resource would be relatively easy. Such development would enable New England to be at least partially self-sustaining in energy. The conversion of many small dams along the Connecticut and Thames Rivers, for example, and the utilization of canal systems in a number of older industrial cities should have a revitalizing effect on many municipalities. It is generally accepted that the unavailability of cheap fuel has been responsible for the departure of many businesses and industry from the area over the last several years, and the development of an indigenous source of renewable fuel in the area could go a long way towards reversing this trend.

Mr. Chairman, hydroelectric power is a valuable source of fuel which until now has been largely overlooked as an alternative io petroleum or natural gas. This supplement to our other sources of energy must be developed as quickly as possible if we are to meet our commitment as a nation to utilize every form of efficient and safe energy available to us in order to reduce our dependence on imported fuel and to stretch the world's supply of finite resources such as fossil fuels. The concept of locally produced power, the generation of which is clean and inexpensive, should set the tone for our energy production in years to come. Hydropower will help to alleviate many regional energy problems, will supplement existing supplies, and will reduce our dependence on the OPEC countries.

Mr. Chairman, I appreciate having the opportunity to express my views on these important matters before us. It is a monumental task which we in the Congress have before us—the job of developing a comprehensive and cohesive energy policy which will ensure adequate supplies of inexpensive and efficient fuel for our Nation, and which will guarantee our independence from the whims of foreign energy cartels, will prove to be a difficult one. The legislation which the Congress is presently considering goes a long way towards achieving these goals, and I feel that those provisions on which I have spoken today are essential to meeting the ends which we as legislators have put forth. I thank you again for your time, and that of the committee.

Mr. McDADE. Mr. Chairman, I rise in strong support of the motion to recommit H.R. 8444, the National Energy Act, and object most strenuously to the roughly $40 billion in new taxes being imposed on the American people.

The National Energy Act that currently stands before us is a tax measure designed to raise revenues rather than to solve our energy problem and perpetrates a fraud on the American public.

Just today in the Washington Post an article carrying the byline of Myra McPherson quotes the Carter administration as looking at this new $40 billion tax package as a way of reallocating money toward the President's yet to be announced welfare program. The Members of this body just a few short hours ago rejected a 4-cent tax on gasoline at the pump as well as a 5-cent tax on gasoline not designed to encourage conservation but alternately for the purposes of generating revenues that would be more appropriately addressed as the Congress normally does—in bills involved in highway trust funds, mass transit and other items. As deceiving as they are, these proposals do not really represent the magnitude of the new tax burden the administration proposes to put on the American public.

A great deal of the petroleum sold in this country is sold at $5.25 per barrel. Out of that barrel of petroleum and through the refining process is derived: gasoline, diesel oil, jet fuel, home heating oil, feedstocks for fertilizers, synthetics for clothes, feedstocks for petrochemicals, and a variety of other products. All of them affect deeply the cost of basic necessities: food, shelter, heating, electricity, transportation, in short, a web of costs that runs through the fabric of American life.

Through the tax proposals, this administration is going to increase by approximately 300 percent the cost of that $5.25 barrel of oil. Through these taxes the Carter administration is going to raise the price of all petroleum produced in the country at the price set by the OPEC nations in a cartel which, if attempted in this Nation, would be subject to criminal action. If this motion to recommit fails I should be forced to vote against the entire administration's proposal much as I favor items like the tax credit for home insulation as a legitimate effort at conservation which I have supported many times in the past. This part of the program is sound, has my support, the administration my commendation for it. The Congressional Budget Office estimates that each barrel saved under this residential insulation tax credit program costs but $2.40 and as we all know, every barrel saved is equivalent to a barrel produced.

Mr. Chairman, my constituency has suffered the ravages of inflation as has the rest of our Nation. The trebling of the price of these products by the OPEC nations is the major contributor to inflation. The artificially imposed price of petroleum and petroleum derivatives has produced a ripple effect throughout our economy. Now the administration proposes to follow that same course by tripling the price of petroleum and petroleum by-products through taxes.

The major inflationary forces that have racked our Nation have occurred because of increases in the past in the price of energy, food, health care, housing, utility bills, and the cost of transportation. We should recognize, of course, that the cost of energy dramatically affects all of the above which are not luxuries but necessities of life. They will fall most heavily upon the elderly, upon the poor, and upon the middle income. To quote a distinguished enocomist:

> The narrowness of the average household's ability to adjust to higher energy prices combines with the very high frequencies of energy purchases to make the impact of energy inflation even greater than the numbers suggest.

Until the Carter administration recognizes that programs must be directed at controlling rampant inflation among necessities this Nation will have continuing economic problems. So far in the energy field the Carter administration has given us a tax on coal, proposed a 50-cent tax per gallon on gasoline, proposed $40 billion in taxes on most of the petroleum produced in the United States.

And, I repeat, increased taxes on these necessities exert dreadful inflationary pressures on the fabric of the American economy whether it be on the farm, at the market, at the gasoline pump, the cost of heating a home, cost of electricity, cost of food, cost of transportation, and so many other items that the average American must attempt to cope with.

All of these taxes produce nothing new in the form of energy but higher costs and I cannot support them.

Mr. BROWN of Ohio. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I take this 5 minutes first to repeat what was said before the last vote, remarks which many of the Members missed, and that was on behalf of the gentleman from Illinois (Mr. ANDERSON), who is the ranking Republican on the ad hoc committee and who has laryngitis and can barely speak, and myself, and the gentleman from Wisconsin (Mr. STEIGER) and the gentleman from New York (Mr. CONABLE), and others on our side who handled the legislation in the absence of the gentleman from Illinois, to express our appreciation to the gentleman from Ohio (Mr. ASHLEY) for the way he has conducted not only the consideration we have had on the floor but also the consideration that was given the minority in the ad hoc committee.

Mr. Chairman, I take this time also to advise what the motion to recommit will be that will be offered shortly by the gentleman from Wisconsin (Mr. STEIGER), a member of the Ways and Means Committee. It will be a very simple motion to recommit. It strikes the crude oil equalization tax from the bill. That is a tax of $39 billion, a new tax drawn to raise the price of old oil from $5.15 per barrel to $14.50 per barrel for the consumer, and the price of new oil from $11.03 per barrel to $14.50 per barrel in the next 3 years, by taxes. All of it will go to the Federal Government in taxes.

Lest the Members pass this off lightly, let me observe to the Members that it is a $600 a year tax for the average American family. For the average taxpayer who pays $1,800 a year in Federal taxes, that is a 30-plus-percent increase in his taxes in this crude oil equalization tax. It is 7 cents a mile on gasoline, extra costs on the suit that is made out of synthetics, extra costs on the products that one buys at the grocery store that are wrapped in plastics made out of synthetics.

When we mix economics and politics we frequently get into the business of who is hurt, who is to blame, and who is the beneficiary.

Let me speak on a little recent history. Between 1972 and 1974 the price of imported oil in the United States, that which we needed, the 29 percent of our oil, jumped from $3 billion to $24 billion. That was an increase of $21 billion because the OPEC nations raised the price on us during that period of time.

This increase is an increase of $39 billion over a 3-year period. The impact of that is essentially the same. The money does not go to produce new domestic production. It goes to taxes. It is taken out of our economy, from the taxpayer, from the individual and the family, and it will hurt him and it will have an impact on our economy.

The last $21 billion increase in a 2-year period brought on the worst recession we have had since 1933. This $39 billion increase over the next 3 years will also have an impact on our economy.

Where is the money to go? This morning the Washington Post said that the reason the Chairman advised Mr. Carter not to talk about his new welfare plan until after we left town was because it might have some impact on the energy bill. There is a copy of that little clipping floating around the floor I think, but the point of it is that the $39 billion at this point is not spoken for.

What will it be used for? I do not know. But I can tell the Members I do not want my constituents saying to me:

> We understand why the Arabs took the money and raised the prices. Please explain to us why the Congress took the money and raised the prices and had an impact on our economy over the next couple of years.

Mr. Chairman, I do not want to have to explain that. I am going to vote for the motion to recommit.

Mr. MILFORD. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the bill.

Mr. Chairman, we are about to vote on the so-called energy bill, that every American has heard so much about during the past several months. The President is for it; the Speaker is for it; and, the House leadership is for it. According to what I read in the papers, the Democrats are for it.

And here stands DALE MILFORD, a Democrat, from Bug Tussle, Tex., who is going to vote against it.

Since most of my constituents believe in our President, most of them love our House leadership—I am proud to share and serve Tarrant County with Majority Leader Jim Wright—and most of my constituents are Democrats. They may therefore wonder why I am "bucking the traces" and voting against my friends.

I would respond that I am not going to

vote "against" my friends; I will simply disagree with them. I am fortunate to be a resident of the great Southwest where most of us know and understand the problems involved in producing oil and gas. Our Democratic friends, in other parts of the Nation, have not been blessed with knowledge that we take for granted in our part of the country.

The energy bill is a failure, not because the President or the Democrats were "for it," but because it ignores the facts of life about the production of gas and oil.

Both the President and my Democratic colleagues in the House of Representatives are good solid citizens of this Nation. They voted as they believed best. Unfortunately, they literally "know not what they did." They were motivated by wanting to protect the poor and to help the working man. Certainly I share that goal. I simply do not feel that the present energy bill is going to accomplish it.

Mr. Chairman, I would like my constituents to know why I voted against this bill.

The most controversial section dealt with deregulation of natural gas. Like many of my colleagues, I am concerned with the fact that some parts of the country suffered severe gas shortages last winter and probably face the same fate this winter. Consequently, every effort should be made to insure that there is an adequate supply of natural gas to meet this demand. I feel strongly that the Brown-Krueger-Wirth gas deregulation amendment would have achieved that goal. However, this amendment, which I supported, was defeated. The bill therefore provides no incentive for gas producers to invest the necessary capital to go after new natural gas sources.

An amendment that would have permitted oil and gas producers to recover a portion of the "crude equalization tax" for qualified investments in exploration was also defeated. Again the message was sent to the oil industry to, "do and spend what it takes to increase domestic production, but not to expect anything in return."

It can be said that this bill is basically a tax bill. Prices on oil and gas will be taxed upward allegedly to induce conservation. This does not produce additional energy supplies to assure that industry will be able to operate without interruption during the cold months. This does not help the poor and workingman who suddenly finds his energy needs cannot be fulfilled. However, this does levy an additional 7-cent-per-gallon tax on each person that must use his automobile.

In general, I do not feel this bill will accomplish the goals it set out to achieve. Conservation of energy is necessary, but that alone will not remedy our need for additional energy. Furthermore, the bill does not really foster conservation. By not properly addressing the issue of domestic production, we will continue to rely heavily on imported oil and will have to live with the consequences that that entails.

We are not only increasing our use of very expensive Arab oil, this bill also makes the cost of domestic crude equal to the cost of the Arab oil.

Texans should also be aware of a very unfair feature that was a part of this bill. In our part of the Nation, we are dependent upon the automobile to make a living. We have no mass transit facilities that will get us to and from work. In the Northeast and the Midwest, those folks must use oil to heat their homes during winter. Our usage of oil to drive our automobiles is about equal to the usage of heating oil in the Northeast and Midwest. Therefore if a crude oil tax was necessary, the same tax should be applied to all citizens of this Nation.

The energy bill did not levy the tax fairly. All automobile drivers had to pay the full cost of the crude equalization tax at the rate of 7 cents per gallon. People using heating oil were exempt from paying the tax. Therefore, people living across the South, who do not use heating oil in winter, had to bear the brunt of the crude equalization tax.

Mr. Chairman, in summary, the so-called energy bill was, in fact, a tax bill. It was a vicious tax bill. Over the next 3 years, it will tax Americans—mostly in the South—over $39 billion. That amounts to a 7 cent tax on each gallon of gasoline that my constituents will purchase. Or putting it another way, it will cost every American man, woman, and child $600. Or, putting it in another form, this amounts to an increase of 30 percent in the average American's income taxes.

I shall vote against this bill.

Mr. BAUMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, during the long procession of speakers yesterday on the issue of the gasoline tax, a broad spectrum of opinion in this House, ranging from the gentleman from California (Mr. DELLUMS) to the gentleman from Maryland now speaking, spoke out against the gasoline tax as regressive and cruel to the American people.

Now, if any of us meant what we said in our opposition to taxes yesterday and if we were truly concerned about the hardships we detailed in our individual districts and collectively in the Nation, there is no way in which we can justify a vote in favor of the crude oil equalization tax now before us.

The gentleman from Ohio (Mr. BROWN) has just pointed out the considerable impact on each and every one of our constituents.

We were told a few moments ago by the gentleman from Michigan (Mr. DINGELL) that the gentleman's concern was for the suffering imposed upon the American consumer. The gentleman talked about billions of dollars, not millions, being laid on the backs of these same taxpayers.

This motion to recommit is a motion that addresses itself to whether we have some concern for those consumers.

The gentleman also referred to the fact that there was no stick in the Republican substitute to whip people into line for energy conservation. This motion to recommit will remove the most nervous stick from the hands of Government bureaucrats that otherwise will be laid on the back of every one of our constituents, raising the price of a gallon of gasoline by 7 cents, diesel fuel by 7 cents; home heating oil by 7 cents, all to be raised for no purpose.

I would hope that everyone who stood so firmly for no unnecessary taxation yesterday will vote against taxation today. The principle is exactly the same. If you do not, you must accept the blame for one of the greatest single tax increases in American history—the Carter tax increase.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I would like to ask my colleague, the gentleman from Ohio (Mr. BROWN) a question.

My understanding is that this bill before us (H.R. 8444) does absolutely nothing to stop the heavy importation of oil from foreign countries. On the other hand the motion to recommit does far more to lessen our dependence on foreign crude oil and improve the climate in our own country for the production on new supplies. Could the gentleman explain to the House why that is?

Mr. BROWN of Ohio. Mr. Chairman, if the gentleman will yield, the crude oil equalization tax at $39 billion merely raises the price to the world price of oil and the price of domestic oil and natural gas liquids, whether that is old or new oil just to get the price up so that consumers will be discouraged from using the product. It does nothing to encourage producing additional energy.

Mr. ROUSSELOT. So those who have been concerned about the heavy importation of oil from foreign countries should clearly vote for the motion to recommit.

Mr. BROWN of Ohio. To the Arab prices, it tracks Arab prices; it just gets domestic prices up to the OPEC price.

Mr. ROUSSELOT. So the better alternative is the motion to recommit, because H.R. 8444, the ad hoc committee bill, does nothing to stop the heavy importation of high priced foreign oil, is that correct?

Mr. BROWN of Ohio. There is nothing in the bill that I see that will stop this, as a matter of fact, because that money goes to the Government. It does not encourage any exploration or production. The result will be that production and exploration will continue to go down, as it has.

Mr. ROUSSELOT. So all the arguments that have been made that this is going to help domestic production by placing great restraints on consumer demand and slowing our reliance on foreign supplies are not true?

Mr. BROWN of Ohio. I do not know that those arguments have been made.

Mr. ROUSSELOT. We have heard those ideas advanced during the debate on H.R. 8444, the President's energy program, by the advocates who suppose that the so-called conservation programs contained in the bill will slow down our dependence on foreign oil supplies. The

crude oil equalization tax in H.R. 8444 will not decrease foreign imports by a single barrel. Therefore, the supposed restraints on our reliance on high-priced foreign oil will not occur.

Additionally as has already been pointed out the crude oil equalization tax is far more than a gasoline tax in diguise; it will raise the price of gasoline by 7 cents a gallon—it will raise the price of diesel fuel by 7 cents a gallon—it will raise the price of residential fuel oil by 7 cents a gallon—it will raise the price of home heating oil by 7 cents a gallon—it will raise the price of jet and aviation fuel by 7 cents a gallon, and who will these prices hit the hardest? The wage-earners of our country, the small farmers, the small businesses, and the individual homeowners who utilize home heating oil. In other words, the affected people will be the middle- and low-income groups in our country. So this is not a conservation measure, it is a tax-raising measure that will encourage the foreign oil importers to flood this country with their products because they can more easily compete with the price of local producers. The people who will catch it in the neck are the consumers.

Mr. BROWN of Ohio. The argument was that we should conserve, should do without.

The CHAIRMAN. There being no further amendments, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair (Mr. BOLAND) Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 8444) to establish a comprehensive national energy policy, pursuant to House Resolution 727, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment?

Mr. EDGAR. Mr. Speaker, I demand a vote on the so-called Horton amendment.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The Clerk will report the amendment on which a separate vote has been demanded.

The Clerk read as follows:

Amendment: Strike line 5 on page 377 and all that follows, up to and including line 25 on page 386; reletter succeeding subparts accordingly.

The SPEAKER. The question is on the amendment.

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. HORTON. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 239, nays 180, not voting 14, as follows:

[Roll No. 511]

NOT VOTING—14

Burke, Mass.	Holt	Santini
Dent	Koch	Teague
Flippo	McKinney	Udall
Gibbons	Michel	Young, Alaska
Gonzalez	Rhodes	

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Burke of Massachusetts against.

Until further notice:

Mrs. Holt with Mr. Dent.
Mr. Rhodes with Mr. Flippo.
Mr. Michel with Mr. Gibbons.
Mr. McKinney with Mr. Gonzalez.
Mr. Udall with Mr. Koch.
Mr. Santini with Mr. Young of Alaska.

Messrs. ANDREWS of North Carolina, GUDGER, and ALEXANDER changed their vote from "nay" to "yea."

Mr. BURLISON of Missouri changed his vote from "yea" to "nay."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. STEIGER

Mr. STEIGER. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. STEIGER. After thorough consideration, Mr. Speaker, I am opposed to the bill.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. STEIGER moves to recommit the bill H.R. 8444 to the Ad Hoc Committee on Energy with instructions to report back the same to the House forthwith with the following amendment. Strike out line 12 on page 469 and all that follows through page 512, and renumber subsequent parts accordingly.

The SPEAKER. The gentleman from Wisconsin (Mr. STEIGER) is recognized for 5 minutes.

Mr. STEIGER. Mr. Speaker, it is somewhat easier to explain this since there have been others who have given the speech for me. Therefore, Mr. Speaker, I can be relatively brief although I must say to the distinguished chairman of the ad hoc committee that I have been cautioned by my senior colleagues that the use of a word during the debate, which gives me the name "CATFISH" STEIGER, might be indicative of an unwillingness on the part of the minority to be for a rational energy policy. I trust that is not the case, because the key issue is how, not whether there ought to be one.

Mr. Speaker, the motion to recommit that is before us now offers this body the only real opportunity for a sensible beginning to an energy policy in Congress. We are asking the House to recommit the bill to the ad hoc committee with instructions to strike the crude oil equalization tax and report the bill back forthwith.

The motion is offered, Mr. Speaker, for two reasons. First, because, frankly, there is a great fear as to how the revenues from the tax are to be used. Will they, for example, be used to finance welfare reform? The administration in an article in this morning's Washington Post indicated an intention to move in that direction.

Second, the crude oil equalization tax is an ill conceived proposal which lacks the logical and economic underpinnings which would ordinarily be necessary to justify a tax of this importance.

We feel that the provision is not the heart of the program but rather an unnecessary appendage which, if not removed, could kill the patient, because the crude oil equalization tax is more than a gasoline tax in disguise. The crude oil equalization tax will result in the raising of the price of gasoline by 7 cents per gallon. What nobody has yet dared to say, but which I think desperately needs to be put on the public record, is that the crude oil equalization tax costs for diesel fuel 7 cents, for home heating oil 7 cents, for each gallon of residual fuel oil 7 cents will increase by 7 cents, and every gallon of jet fuel will increase by 7 cents.

These are taxes on fuels which reach deeply into our society, and those who oppose the motion to recommit had better be prepared to justify them.

The crude oil equalization tax, Mr. Speaker, is not conservation effective. We have supported an extension, for example, of tax credits on insulation, because each barrel of oil requires only $2.43 tax credits, but for each barrel of oil conserved as a result of the crude oil equalization tax, the cost is $39.28. There is absolutely no way to justify the crude oil equalization tax as a cost effective conservation measure.

The crude oil equalization tax does not reduce imports by a single barrel of oil. Imports will increase under this plan, and the crude oil equalization tax does nothing to stimulate our Nation's efforts to reduce those imports.

Finally, the crude oil equalization tax is not an energy measure but principally a revenue-raising measure. The rebates are more an illusion than the reality promised in the President's address to this Chamber.

Only 6.5 percent of the crude oil equalization taxes is rebated directly; only 6.3 percent is rebated through home heating oil.

Thus, in 1985, according to the committee report, $20.33 billion will remain in the Federal Treasury, and what it will be used for, we must at this point not be told. We apparently will only follow someone who tells us, "Trust me."

Mr. Speaker, I must say to all of the Members that the debate on the bill has been a fascinating experience for all of us, but I trust the motion to recommit can, in fact, be adopted so that this House not only has a chance to deal more equitably and fairly with energy policy, but then can get to the way we handle it. The President has the opportunity to do that without this tax, for which we get no reduction in imports, for which we get no additional production. If he can do it through the mechanism that exists on the statutes, that can be done with the Congress, and that can get us to a more rational energy policy.

For those who voted yesterday against the gasoline tax, they will have a chance today to vote on another gasoline tax. I urge the Members to vote for the motion to recommit.

Mr. LATTA. Mr. Speaker, will the gentleman yield?

Mr. STEIGER. I yield to the gentleman from Ohio.

Mr. LATTA. I thank the gentleman for yielding.

What the gentleman has just said is if one votes against this motion to recommit, he is voting for a 7 cent additional tax on gasoline; is that correct?

Mr. STEIGER. That is correct.

Mr. LATTA. Secondly, the way this provision now stands, there is no exception for agricultural purposes; is that correct?

Mr. STEIGER. That is also correct.

Mr. ULLMAN. Mr. Speaker, I rise in opposition to the motion to recommit.

Mr. Speaker, I am not going to take my full time, but let me start by expressing my appreciation—and I think for all of us—to the Speaker for putting together this package, and to the gentleman from Ohio (Mr. ASHLEY), the chairman of the ad hoc committee, who did a magnificent job, to the gentleman from Missouri (Mr. BOLLING), and all of the others who participated, as well as to the responsible minority.

I think what we have demonstrated here is that we can work out procedures that do solve complex problems that involve several committee jurisdictions. I think we can be proud of the package that we have put together. We have an energy program. We have a new energy direction in this country.

Let me say now, do not spoil it all by voting for this recommittal motion. This motion effectively guts the bill. This is the centerpiece of the program. The equalization tax is the centerpiece of our energy policy. If we do not have the pricing mechanism, we destroy all of the incentives to move toward energy conservation and conversion, and without energy conservation and conversion, we have totally failed in creating an energy policy.

Do not be deceived by this 7-cent business. The best experts that we have available have said that over a 3-year period we may increase the price of gasoline by up to 4 cents per gallon, but that comes to 1½ cents or less per year. Do not be deceived that this will have a devastating impact on the economy. The revenues from the crude oil tax are rebated back into the economy.

We devised the best possible ways that we could think of in order to keep the crude oil tax from having an adverse economic impact. The tax raises the price of energy, which has to be done. It rebates it effectively back into the economy. Let me say this is the centerpiece of the energy program. Vote against the recommittal motion. The Members can be proud, very proud, if they hold it together, of an energy package that will lead this Nation in a new energy direction.

Mr. CHARLES H. WILSON of California. Mr. Speaker, will the gentleman yield?

Mr. ULLMAN. I yield to the gentleman from California.

Mr. CHARLES H. WILSON of California. I thank the gentleman for yielding.

I have a report which admittedly was distributed by the Republicans, but it indicates a 7-cent raise in the price of the gasoline tax by 7 cents per gallon on diesel fuel and residential fuel. Is there anything inaccurate about this?

Mr. ULLMAN. I do not know where the information comes from on that handout, but it is false and it is wrong. The best experts that we have, who have done the whole basic research on the energy projection, indicate that 3 cents to 4½ cents per gallon will be the impact on oil prices up to 1980. So this is wrong.

Mr. CHARLES H. WILSON of California. This is a false statement then?

Mr. ULLMAN. That statement is absolutely without foundation.

Let me urge the Members of this body to complete what we have started now, to hold this package together, to vote against the recommittal motion, and then be proud to join in voting for a fine new energy policy for this country.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. STEIGER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken by electronic device, and there were—yeas 203, nays 219, not voting 11, as follows:

[Roll No. 512]

NOT VOTING—11

Burke, Mass.	Koch	Santini
Dent	McKinney	Teague
Flippo	Michel	Young, Alaska
Holt	Rhodes	

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Burke of Massachusetts against.

Mr. Rhodes for, with Mr. Santini against.

Mr. Michel for, with Mr. Koch against.

Until further notice:

Mr. Dent with Mrs. Holt.

Mr. Flippo with Mr. McKinney.

Mr. STEERS changed his vote from "nay" to "yea."

So the motion to recommit was rejected.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the passage of the bill.

Mr. STEIGER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 244, nays 177, not voting 12, as follows:

[Roll No. 513]

NOT VOTING—12

Burke, Mass.	Holt	Rhodes
Dent	Koch	Santini
Evans, Ga.	McKinney	Teague
Flippo	Michel	Young, Alaska

The Clerk announced the following pairs:

On this vote:

Mr. Burke of Massachusetts for, with Mr. Teague against.

Mr. Koch for, with Mr. Santini against.

Until further notice:

Mr. Flippo with Mr. Rhodes.

Mr. Dent with Mr. Michel.

Mr. McKinney with Mrs. Holt.

Mr. Evans of Georgia with Mr. Young of Alaska.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AUTHORIZING CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF H.R 8444

Mr. ASHLEY. Mr. Speaker, I ask unanimous consent that in the engrossment of the bill H.R. 8444 the Clerk be authorized to correct punctuation, spelling, cross references—including cross references to deleted provisions—and designation of titles, sections and other provisions.

Further, Mr. Speaker, I ask unanimous consent that the table of contents be corrected to reflect the text of the bill as passed by the House.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

GENERAL LEAVE

Mr. ASHLEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on the bill H.R. 8444 just passed by the House.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4991) entitled "An act to authorize appropriations for activities of the National Science Foundation, and for other purposes."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6370) entitled "An act to authorize appropriations to the International Trade Commission for fiscal year 1978, to provide for the Presidential appointment of the chairman and vice chairman of the Commission, to provide for greater efficiency in the administration of the Commission, and for other purposes."

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3 TO STRENGTHEN THE CAPABILITY OF THE GOVERNMENT TO DETECT, PROSECUTE, AND PUNISH FRAUDULENT ACTIVITIES UNDER THE MEDICARE AND MEDICAID PROGRAMS

Mr. BOLLING, from the Committee on Rules, submitted a privilege report (Rept. No. 95–577), on the resolution (H. Res. 743) providing for the consideration of the bill (H.R. 3) to strengthen the capability of the Government to detect, prosecute, and punish fraudulent activities under the medicare and medicaid programs, and for other purposes, which was referred to the House Calendar and ordered to be printed.

PERMISSION FOR COMMITTEE ON VETERANS' AFFAIRS TO FILE REPORTS ON H.R. 4341, H.R. 8175, H.R. 8698, AND H.R. 8701

Mr. ROBERTS. Mr. Speaker, I ask unanimous consent that the Committee on Veterans' Affairs may have until midnight tonight to file reports on H.R. 4341, H.R. 8175, H.R. 8698, and H.R. 8701.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION FOR COMMITTEE ON INTERIOR AND INSULAR AFFAIRS TO FILE A REPORT ON H.R. 3813, REDWOODS NATIONAL PARK

Mr. UDALL. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs may have until midnight tonight to file a report on the bill H.R. 3813, the Redwoods National Park.

The SPEAKER. Is there objection to the request of the gentleman from Arizona?

There was no objection.

PERMISSION FOR AD HOC SELECT COMMITTEE ON OUTER CONTINENTAL SHELF TO HAVE UNTIL SEPTEMBER 1, 1977, TO FILE ITS REPORT

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that the Ad Hoc Select Committee on Outer Continental Shelf be allowed to file its report no later than September 1, 1977.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

PERMISSION FOR COMMITTEE ON MERCHANT MARINE AND FISHERIES TO HAVE UNTIL 6 P.M. TUESDAY, AUGUST 30, 1977, TO FILE A REPORT ON H.R. 1037, ENERGY TRANSPORTATION AND SECURITY ACT OF 1977

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that the Committee on Merchant Marine and Fisheries may have until 6 p.m. Tuesday, August 30, 1977, to file its report on H.R. 1037, the Energy Transportation and Security Act of 1977.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

PERMISSION FOR COMMITTEE ON MERCHANT MARINE AND FISHERIES TO HAVE UNTIL 6 P.M. ON TUESDAY, AUGUST 9, 1977, TO FILE ITS REPORT ON H.R. 3350, THE DEEP SEABED MINING BILL

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that the Committee on Merchant Marine and Fisheries may have until 6 p.m. on Tuesday, August 9, 1977, to file its report on H.R. 3350, the deep seabed mining bill.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

CONFERENCE REPORT ON H.R. 7589, MILITARY CONSTRUCTION APPROPRIATION ACT, 1978

Mr. McKAY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the conference report on the bill (H.R. 7589) making appropriations for military construction for the Department

of Defense for the fiscal year ending September 30, 1978, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Utah?

There was no objection.

Mr. McKAY. Mr. Speaker, I ask unanimous consent that the statement of the managers be read in lieu of the report.

The SPEAKER. Is there objection to the request of the gentleman from Utah?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of August 3, 1977.)

Mr. McKAY (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Utah?

There was no objection.

The SPEAKER. The gentleman from Utah (Mr. McKAY) is recognized for 30 minutes, and the gentleman from New York is recognized for 30 minutes.

The Chair recognizes the gentleman from Utah (Mr. McKAY).

Mr. McKAY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the military construction appropriations bill for fiscal year 1978 as agreed to by the conferees is $2,977,720,000. This is $37,880,000 below the budget request for fiscal year 1978 and $483,677,000 below the total amount approved for military construction in fiscal year 1977.

The fiscal year 1978 request was in any case a deviation below recent budget levels and budget levels I would anticipate in the future. This was the result of a budget decision to defer many projects pending a review of Department of Defense installation in the United States.

At the initiative of my subcommittee, $117,126,000 was included in a fiscal year 1977 supplemental bill to finance job intensive projects which could be accomplished quickly. This include $57,126,000 for military construction projects for energy conservation and pollution control.

The final conference bill when combined with the supplemental bill would make nearly $200 million available for energy conservation and pollution abatement projects. This is more than four times the program provided for by the budget in these areas.

Nevertheless, by carefully examining the timeliness and need for all projects, we were able to end up with a final bill nearly $40 million below the budget request and to take care of the most urgent requirements for military facilities.

I would like to take this opportunity to expand on the committee's purpose in requiring further testing of one-station unit training for infantry.

The committee's concern and intent are clear from the hearings which we have held on this subject, the committee reports in the past few years, and the GAO report on this subject. A test was conducted by the Army but, in the words of the GAO report:

> We believe the adequacy of the test design and implementation has a direct bearing on the ability of the Army to attribute test results to the OSUT concept. Lacking data on whether OSUT is the most effective and economical method for training recruits, neither the Army nor the Congress can determine whether OSUT is a better method than other alternatives.

The trainee barracks complex which we have agreed to fund would be needed in any case if the Army's training workload projections are valid. Furthermore, if OSUT is implemented at Fort Benning, the Army has projected the requirement for several more trainee barracks complexes at Fort Benning, possibly as many as five, and each of these will likely cost in the range of $15 million to $20 million. So, there could be substantial amounts spent at Fort Benning in the future for this purpose.

When the Army has completed its test and its evaluation of that test, the committee must reserve the right to determine whether the test is, indeed, adequate. We must look at the economic consequences at that time. And, of course, we must analyze each military construction project as it is submitted. But if the Army test is shown to be valid and OSUT is shown to be an economic proposition, it is not my intention nor is it, I believe, the committee's intention to interpose obstacles to its implementation.

The committee's insistence on an adequate test of OSUT has nothing to do with the assignment of recruits to the Southeast or the Northeast for training. The committee's sole concern is that the Army proceed with the most economical and combat-effective method of initial entry training. The training barracks are not being held hostage, and the reception station will follow in due course if the results of the test are favorable.

Mr. Speaker, upon conclusion of our consideration of the conference action, I will ask permission to include a comparative tabulation of the conference action at this point in the RECORD.

The tabulation referred to follows:

COMPARATIVE STATEMENT OF NEW BUDGET AUTHORITY

	New budget authority					Conference compared with—			
	Enacted fiscal year 1977	Estimates fiscal year 1978	House fiscal year 1978	Senate fiscal year 1978	Conference fiscal year 1978	Fiscal year 1977 enacted	Fiscal year 1978 estimate	House bill	Senate bill
Military construction:									
Army	597,664,000	601,800,000	483,659,000	583,059,000	527,769,000	−69,895,000	−74,031,000	+44,110,000	−55,290,000

Grand total, new budget (obligational) authority	3,461,397,000	3,015,600,000	2,819,501,000	3,130,630,000	2,977,720,000	−483,677,000	−37,880,000	+158,219,000	−152,910,000

Mr. McEWEN. Mr. Speaker, I yield myself such time as I may consume. Mr. Speaker, the minority concurs in the conference report.

Mr. McKAY. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

AMENDMENT IN DISAGREEMENT

The SPEAKER. The Clerk will report the amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 5: Page 5, line 11, strike out: $1,435,538,000 and insert: $1,451,640,000,

MOTION OFFERED BY MR. MCKAY

Mr. McKAY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. McKAY moves that the House recede from its disagreement to the amendment of the Senate numbered 5 and concur therein with an amendment, as follows: In lieu of the sum proposed in said amendment, insert the following: "$1,460,140,000".

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and on the motion was laid on the table.

GENERAL LEAVE

Mr. McKAY. Mr. Speaker, I ask unanimous consent that all Members may have

5 legislative days in which to revise and extend their remarks on the conference report on H.R. 7589, the Military Construction Appropriation Act of 1978, and I may include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Utah?

There was no objection.

APPOINTMENT AS MEMBER OF NATIONAL HISTORICAL PUBLICATIONS AND RECORDS COMMISSION

The SPEAKER. Pursuant to the provisions of 44 United States Code 2501, as amended, the Chair appoints as a member of the National Historical Publications and Records Commission the gentleman from North Carolina, Mr. PREYER.

APPOINTMENT AS MEMBER OF COMMISSION ON ADMINISTRATIVE REVIEW

The SPEAKER. Pursuant to the provisions of Public Law 94–440, the Chair appoints as a member from private life to the Commission on Administrative Review Ms. Victoria Schuck, from South Hadley Mass., to fulfill the existing vacancy thereon.

APPOINTMENT AS MEMBERS OF U.S. GROUP OF NORTH ATLANTIC ASSEMBLY, PARIS, SEPTEMBER 18–24, 1977.

The SPEAKER. Pursuant to the provisions of 22 United States code 1928a, as amended, the Chair appoints as members of the U.S. group of the North Atlantic assembly to be held in Paris, France, September 18 to September 24, 1977, the following members on the part of the House:

Mr. PHILLIP BURTON, California, chairman, Mr. HAMILTON, Indiana, vice chairman, Mr. RODINO, New Jersey, Mr. BROOKS, Texas, Mr. ANNUNZIO, Illinois, Mr. ROSE, North Carolina, Mr. IRELAND, Florida, Miss OAKAR, Ohio, Mr. BOB WILSON, California, Mr. BROOMFIELD, Michgan, Mr. FINDLEY, Illinois, and Mr. EDWARDS, Alabama.

TRIBUTE TO KENT MARKUS, PAGE

The SPEAKER. The Chair would like to make an announcement. I think it is out of order and somewhat unusual, but in the 7 months I have been Speaker I have had a young fellow working as my page. His name is Kent Markus.

I have never met a kinder, more lovable, and more diligent individual.

This is his last day here, as he leaves to go to Northwestern University in the fall.

If he is a criterion of the youth in America, we have a great country and something to look forward to.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. To all, I wish a happy month, and enjoy it whatever you may be doing.

LEGISLATIVE PROGRAM

(Mr. BAUMAN asked and was given permission to address the House for 1-minute and to revise and extend his remarks.)

Mr. BAUMAN. Mr. Speaker, I ask for this opportunity to proceed for 1 minute for the purpose of inquiring of the distinguished acting majority leader, what the program will be following the August district work period, for the week beginning September 7, 1977.

Mr. ROSTENKOWSKI. Mr. Speaker, will the gentleman from Maryland yield?

Mr. BAUMAN. I yield to the distinguished acting majority leader.

Mr. ROSTENKOWSKI. Mr. Speaker, it is my pleasure to announce the program for the House of Representatives for the week of September 5, 1977, as follows:

Monday and Tuesday will be a continuation of the August adjournment period.

On Wednesday, the House meets at noon on the House concurrent resolution, second budget resolution for fiscal year 1978, general debate only.

On Thursday, the House will meet at 10 a.m. on the second budget resolution for fiscal year 1978, to complete consideration.

We will then take up H.R. 6683, the Earthquake Hazards Reduction Act of 1977, under an open rule, with 1½ hours debate.

We will then consider House Resolution 70, to establish a Select Committee on Population.

On Friday, the House meets at 10 a.m. to consider the following bills:

H.R. 7073, Federal Insecticide, Fungicide, and Rodenticide Act Extension, under an open rule, with 1 hour of debate.

H.R. 4740, Marine Mammal Protection Act, fiscal year 1978 authorizations, under an open rule, with 1 hour of debate.

H.R. 5798, Office of Rail Public Counsel authorization, under an open rule, with 1 hour of debate.

The House will adjourn by 3 p.m. on Fridays and by 5:30 p.m. on all other days, except Wednesdays.

Conference reports may be brought up at any time and any further program will be announced later.

Mr. BAUMAN. Mr. Speaker, I thank the gentleman.

ADJOURNMENT OF SENATE PURSUANT TO PROVISIONS OF HOUSE CONCURRENT RESOLUTION 317

Mr. ROSTENKOWSKI. Mr. Speaker, I offer a privileged concurrent resolution (H. Con. Res. 330) and ask for its immediate consideration.

The SPEAKER pro tempore (Mr. MINETA). The Clerk will report the concurrent resolution.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 330

Resolved by the House of Representatives (the Senate concurring), That when the Senate adjourns on Friday, August 5, 1977, or on Saturday, August 6, 1977, it stand adjourned pursuant to the provisions of House Concurrent Resolution 317.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING MEMBERS OF THE HOUSE TO REVISE AND EXTEND THEIR REMARKS IN THE CONGRESSIONAL RECORD

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that notwithstanding the adjournment of the House until Wednesday, September 7, 1977, all Members of the House shall have the privilege to extend and revise their own remarks in the CONGRESSIONAL RECORD on more than one subject, if they so desire, and may also include therein such short quotations as may be necessary to explain or complete such extensions of remarks; but this order shall not apply to any subject matter which may have occurred or to any speech delivered subsequent to the said adjournment.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

AUTHORIZING SPEAKER TO ACCEPT RESIGNATIONS AND TO APPOINT COMMISSIONS, BOARDS, AND COMMITTEES AUTHORIZED BY LAW OR BY THE HOUSE, NOTWITHSTANDING ADJOURNMENT

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that notwithstanding any adjournment of the House until Wednesday, September 7, 1977, the Speaker be authorized to accept resignations, and to appoint commissions, boards, and committees authorized by law or by the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

AUTHORIZING CLERK TO RECEIVE MESSAGES FROM SENATE AND THE SPEAKER TO SIGN ENROLLED BILLS AND JOINT RESOLUTIONS, NOTWITHSTANDING ADJOURNMENT

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that notwithstanding any adjournment of the House until Wednesday, September 7, 1977, the Clerk be authorized to receive messages from the Senate and that the Speaker be authorized to sign any enrolled bills and joint resolutions duly passed by the two Houses and found truly enrolled.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY, SEPTEMBER 7, 1977

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule on Wednesday, September 7, 1977, may be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

COMMUNICATION FROM CHAIRMAN OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

The SPEAKER pro tempore laid before the House the following communication from the chairman of the Committee on Public Works and Transportation, which was read and, without objection, referred to the Committee on Appropriations:

COMMITTEE ON PUBLIC WORKS
AND TRANSPORTATION,
Washington, D.C. August 3, 1977.

Hon. THOMAS P. O'NEILL,
Speaker of the House, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the Public Buildings Act of 1959, as amended, the House Committee on Public Works and Transportation approved for construction, lease, alteration or repair the following projects on July 30, 1977:

ALTERATIONS

Ketchikan, Alaska—Federal Building.
Phoenix, Arizona—Federal Building and Courthouse.
Menlo Park, California—U.S. Geological Survey Center.
Providence, Rhode Island—Federal Building and Courthouse.
Wheeling, West Virginia—Federal Building and Courthouse.
Washington, D.C.—Old Post Office.
Independence, Missouri—Harry S. Truman Library.
Sacramento, California—Federal Building and Courthouse.
San Bruno, California—Federal Archives Records Center.
San Francisco, California—U.S. Court of Appeals and Post Office.
San Francisco, California—Customhouse.
New York, New York—Federal Building, 201 Varick Street.
Kansas City, Missouri—Federal Office Building, 911 Walnut Street.
Kansas City, Missouri—Federal Office Building, 2306 E. Bannister Road.
Trenton, New Jersey—Post Office and Courthouse.
New York, New York—Courthouse in Foley Square.
Portland, Oregon—Courthouse.
Philadelphia, Pennsylvania—Federal Building.
Franconia, Virginia—G.S.A. Depot.
St. Louis, Missouri—Federal Building No. 103.

NEW CONSTRUCTION

West Los Angeles, California—F.B.I. Parking Maintenance Facility.
Fort Kent, Maine—Border Station.
Haines, Alaska—Border Station.
Detroit, Michigan— Border Station, Ambassador Bridge.

LEASES

Atlanta, Georgia—730 Peachtree Street.
Atlanta, Georgia—HEW Regional Office.
Washington, D.C.—Imperial Building, 1441 L Street, N.W.
Anchorage, Alaska—Hill Building.

An original and copy of the authorizing resolution are enclosed.

Sincerely,
HAROLD T. (BIZZ) JOHNSON,
Chairman.

FEMALE, POOR, AND PREGNANT

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, I cannot believe that an administration which prizes global human rights and touts them to be a prime objective of its foreign policy, would administer a discriminatory Federal health program at home.

I wonder if President Carter and Secretary Califano go to bed at night thankful that they are not female, poor, and pregnant.

If not, they should.

RUDENKO, TYKHY, MOROZ, SHUKHEVYCH: UKRAINIAN PRISONERS OF CONSCIENCE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KOCH) is recognized for 30 minutes.

Mr. KOCH. Mr. Speaker, today I submitted three resolutions which express congressional concern for the plight of four Ukrainians who are currently imprisoned by the Soviet Government in violation of their fundamental human rights and which request the President to communicate to the Soviet Union the support of the United States for these individuals.

The prisoners of conscience cited in the three House Concurrent Resolutions are Mykola Rudenko, and Oleksa Tykhy, two of the founders of the Ukrainian group to monitor Soviet compliance with the Helsinki accords, who were recently sentenced to lengthy prison terms for their activities; Valentyn Moroz, the famous Ukrainian historian who continues to languish in prison camp; and Yurij Shukhevych, who has spent 25 years in prison since the age of 15 simply because his father was commander-in-chief of the Ukrainian resistance forces in World War II. The Rudenko-Tykhy resolution is cosponsored by 44 Members, the Moroz resolution is also cosponsored by 44 Members, and the Shukhevych resolution, though circulated for only a short time before the August recess, is cosponsored by 31 Members. The Moroz resolution is a reintroduction of a Koch-Fenwick-Dodd resolution which had strong support in the last Congress.

Last week I met with a delegation representing the United Ukrainian American Organizations which presented to me two petitions each signed by over 1,500 of my constituents requesting the Congress to speak out on behalf of Rudenko, Tykhy, Moroz, and Shukhevych. Today I delivered those petitions to the Secretary of State, Cyrus Vance, asking him to respond to this plea for United States support of these martyrs. I am appending copies of the two petitions as well as the texts of the three resolutions I introduced today.

Mykola Rudenko and Oleksa Tykhy were sentenced to 7 and 10 years in prison, respectively, plus 5 subsequent years internal exile each for monitoring Soviet compliance with the Helsinki accord in the Ukraine; Valentyn Moroz is currently imprisoned because of his valiant attempts to preserve the culture of the Ukrainian people and to defend their basic human rights; and Yurij Shukhevych has been incarcerated for over 25 years, not because he ever committed illegal actions against the Soviet state, but simply because he has again and again refused to sign a statement denouncing his father, who headed the Ukrainian resistance forces in World War II, and the ideals for which these fought.

None of these men has done anything except exercise rights guaranteed them by the paper constitution of the Soviet Union and by the Helsinki agreement, which the Soviet Union signed. The purpose of the three resolutions is to request the President to urge the Soviet Government to release Rudenko, Tykhy, Moroz, and Shukhevych and to respect the human-rights principles it agreed to when it signed the Helsinki Final Act. We must not rest until the Kremlin genuinely and fully carries out the provisions of that act.

The petitions and the resolutions follow:

APRIL 13, 1977.

The Honorable EDWARD I. KOCH,
U.S. House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN: I am sure that you, particularly, can appreciate the significance of President Carter's intransigence with regard to the human rights issue. This position has been more than adequately displayed through his statements and writings, whether be it at the United Nations in New York or in a letter addressed to the Soviet dissident Dr. Andrei Sakharov.

However, with regard to the Soviet Union, the President has limited his efforts to championing the causes of Jewish and Russian dissidents, more specifically, the cases of Aleksandr Ginzburg and Yuri Orlov. These arrests in Moscow were hardly isolated events. They were merely a small portion of a whole network of atrocities perpetrated by the Soviet Russian regime which included as well the recent arrests of Mykola Rudenko, the Head of the Kiev Public Group to Monitor the Implementation of the Helsinki Accords, and Oleksa Tykhy, a member of said group.

Dr. Andrei Sakharov, replying to President Carter's letter of February 5th, specifically requested that the President and his Administration intercede on behalf of these two Ukrainian dissidents. Furthermore, in his open letter, published in The New York Times on March 29, 1977, he repeated his appeal.

Consequently, Congressmen, I am appealing to you to initiate and sponsor a resolution in the United States House of Representatives on behalf of the two aforementioned Ukrainian dissidents. Said resolution should call on the President to express the request of the United States Government that the Government of the USSR release the two aforementioned individuals and permit them to leave the territory of the USSR in accordance with the spirit of detente and the principles eunciated in the Helsinki Accords.

Thus, Congressman, you will not only carry out the wishes of your constituents, but in addition, you will reaffirm President Carter's statement that human rights is a central concern of his Administration and that the American people and our government will continue to promote respect for human rights not only in our country but also abroad.

MAY 15, 1977.

The Honorable EDWARD I. KOCH,
U.S. House of Revresentatives,
Washington, D.C.

DEAR CONGRESSMAN: The United States House of Representatives' Committees on

the Judiciary and International Relations will soon deliberate upon H.J. Resolution 202 introduced by Representative Robert A. Roe. Said resolution calls on the President of the United States to declare Valentyn Moroz an honorary citizen of the United States. In addition, Rep. Roe's resolution urges all signatory nations to observe the Final Act of the Conference on Security and Cooperation in Europe and exhorts the Soviet government to enable Valentyn Moroz to accept the invitation extended to him by Harvard University in accordance with the spirit of the Final Act.

Valentyn Moroz, an internationally recognized Ukrainian historian, writer and defender of human rights continues to languish in Soviet prisons. He has undergone insufferable tortures and grossly inhuman persecutions for refusing to cease his efforts on behalf of internationally recognized human rights and fundamental freedoms. It is eminently important, Congressman, that you express your complete support for Rep. Roe's resolution and urge your colleagues to do likewise.

Furthermore, the case of Valentyn Moroz is hardly an anomaly within the Soviet Union. Persecutions, tortures and violations of human rights are inherent to the Soviet system. I am sure, Congressman, that you are familiar with the case of Yurij Shukhevych who was first arrested at the innocent age of 15 simply for being the son of his father, General Roman Shukhevych, commander-in-chief of Ukrainian partisan forces battling Nazi Germany and Soviet Russia during and after World War II. Yurij's father was killed by Soviet MVD forces and his mother was deported to Siberia. Yurij, himself, now 44 years old, has already spent 25 years in Soviet prisons and concentration camps. Presently incarcerated in Vladimir Prison near Moscow, Yurij suffers from an intestinal ulcer, but is denied all medical care. Congressman, I urge you to sponsor a resolution, calling upon President Carter to apprise the Soviet government of our government's concern for the fate of Yurij Shukhevych.

By supporting H.J. Resolution 202 and by sponsoring a resolution in defense of Yurij Shukhevych, Congressman, you will express the wishes of many of your constituents, and, more importantly, you will demonstrate the resolute dedication of our government in championing the cause of human rights and fundamental freedom throughout the world.

HOUSE CONCURRENT RESOLUTION (RUDENKO AND TYKHY)

Whereas Mykola Rudenko and Oleksa Tykhy of the Kiev Public Group to Monitor the Implementation of the Helsinki Accords have been convicted by the Soviet Government of "Anti-Soviet Agitation and Propaganda" for their participation in an informal group established in November 1976 to monitor Soviet compliance with the human-rights provisions of the Helsinki Accord; and

Whereas both men were given the maximum sentence provided for this charge, Mr. Rudenko being sentenced to 7 years in a corrective labor camp plus 5 subsequent years internal exile and Mr. Tykhy, because of an earlier conviction and imprisonment from 1957 to 1964 for counterrevolutionary activities and national sentiments, being sentenced to 10 years in a corrective labor camp and a subsequent 5 years internal exile; and

Whereas Messrs. Rudenko and Tykhy did nothing more than exercise rights guaranteed to them by the Soviet Constitution and by the Helsinki Agreement, which the Soviet Union has signed; and

Whereas Mykola Natusevych, Myroslav Marynovich, and seven other members of the Helsinki monitoring groups have been arrested for the same activities; and

Whereas the arrests of Rudenko, Tykhy, and the others of the monitoring groups occurred after President Carter expressed his intention to make support for human rights an integral part of American foreign policy, and they appear to be part of a toughened Soviet stand on internal dissent designed to communicate Soviet displeasure with the President's position: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the President should (1) urge the Government of the Union of Soviet Socialist Republics to reverse the convictions of Rudenko and Tykhy, to release them from prison, and to allow them to leave the Soviet Union, and to release and drop all charges against the other members of the groups monitoring Soviet compliance with the Helsinki Agreement; and (2) make it known that the United States expects the Soviet Union and all the other signatories of the Helsinki Accord to fulfill all the provisions of the agreement, including those involving human rights.

HOUSE CONCURRENT RESOLUTION (MOROZ)

Whereas Valentyn Moroz, historian, writer, and defender of human rights in the Ukrainian Soviet Socialist Republic, is currently imprisoned in the Soviet Union on charges of anti-Soviet agitation and propaganda; and

Whereas in his valiant attempts to preserve and defend the rights of the Ukrainian people and the culture of the Ukraine and to defend the principle of basic human rights in the Soviet Union, Valentyn Moroz has done no more than exercise rights granted to him by the Constitution of the Union of Soviet Socialist Republics; and

Whereas Harvard University has extended to Valentyn Moroz an invitation to join the Harvard Ukrainian Research Institute for the 1977–78 academic year; and

Whereas the Governments of the Union of Soviet Socialist Republics, the United States of America, and thirty-three other nations signed the Final Act of the Conference on Security and Cooperation in Europe at Helsinki, Finland, in August 1975; and

Whereas the Final Act pledges the signatories to facilitate "wider travel by their citizens for personal or professional reasons": Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the President express the request of the United States Government that the Government of the Union of Soviet Socialist Republics provide Valentyn Moroz with the opportunity to accept the invitation of Harvard University for the 1977–78 academic year, in accordance with the spirit of détente.

CONCURRENT RESOLUTION (SHUKHEVYCH)

Whereas Yudij Shukhevych was first arrested at the innocent age of 15 simply for being the son of his father, General Roman Shukhevych, commander-in-chief of Ukrainian partisan forces fighting for Ukrainian independence, during and after World War II.

Whereas Yurij Shukhevych was imprisoned for 10 years for refusing to sign a statement denouncing his father and the Ukrainian liberation struggle; and

Whereas he was sentenced to an additional 10 years on the day of his scheduled release for again refusing to denounce his father and the Ukrainian liberation struggle;

Whereas after 3 years out of prison Mr. Shukhevych was arrested and sentenced to a third 10-year prison term, which he is now serving, for signing several petitions in support of Soviet political prisoners; and

Whereas he is currently incarcerated in Vladimir prison on a so-called "strict regime," he is suffering from a severe intestinal ulcer, and he is denied all medical care; and

Whereas Mr. Shukhevych has spent 25 years of his life in jail for doing nothing except refusing to cooperate with the Soviet Secret Police and signing several petitions on behalf of political prisoners: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the President should express to the Government of the Soviet Union the concern of the United States Government for the serious physical condition of Yurij Shukhevych, and should urge the Soviet Government to provide him with the medical attention he needs and to release him from prison on humanitarian grounds.

THE ADMINISTRATION'S TAX PROGRAM: NEW HIGHER TAXES ON ENERGY, ON WORKERS, CONSUMERS, HOMEOWNERS, THE UNEMPLOYED, SHAREHOLDERS, INVESTORS, INSURANCE POLICY HOLDERS, CAR OWNERS, SMALL BUSINESS, THE ELDERLY, ET CETERA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 20 minutes.

Mr. KEMP. Mr. Speaker, I have figured out the Carter tax plan. It is to tax everything that moves—and everything that sits still.

It is new taxes on energy, consumers, on homeowners, on the unemployed, on shareholders, on other types of investors, on insurance policyholders, on workers, on car owners, on small businessmen. It is new taxes on the elderly, the sick, and, when a taxpayer cannot take the weight of the tax burden anymore, the deceased.

This administration is committed to balancing the budget by shifting every penny it can from the people to the treasury coffers in Washington. In so doing, they are going to so drain the private resources of this country as to virtually insure a headlong march into a recession the likes of which we may have not seen since the Great Depression.

In my study of the American tax system, I have found no period in our history in which the Government was more intent on taking from the people what they have rightly earned. Such a tax plan can make a Great Britain out of America—Great Britain, a country bankrupted in its quest to satisfy the hunger of the tax collector for the financing of programs which the bureaucrats and special interests want far more than the people as a whole.

This is not partisan speculation or hyperbole. There is no exaggeration in them. The package the President intends to send Congress after Labor Day may constitute the greatest assault on personal income, savings, investment—what we need to get through today, tomorrow, and pass to our children—in the Nation's history. And I make the similar protests against previous administrations' tax increases.

WHY THE ECONOMY IS NOT RECOVERING

It is bad enough that this should happen at all, but it is particularly bad when it comes from an administration elected on the basis it was going to hold the line against the growth of Government and Government spending.

Instead of representing the people's interest, this administration has opted to represent Government's interest. And,

it is really the people versus Government in a case like this, because in a stagnant economy it is whether Government has x dollars or the people have them.

And there can be little doubt but that this economy remains stagnate and inflationary. I know this morning's newspapers carried stories about one of the many economic indicators looking better last month. But those monthly indicators—wholesale and retail sales, unemployment, earnings—go up and down each month. The most accurate test is the stock market, because that is the one which reflects the existence, or lack of, confidence about the future. And the Dow Jones average on the stock market is down a staggering 78 points since President Carter was elected last November, that is a 7.4-percent decline, and it is also the lowest point in 19 months.

It is not hard to figure out why the stock market is behaving this way. The American people, from the consumer—which is all of us—to big business, needs signals that the economic picture will get better. They need signals with respect to the economy in general, but more importantly, signals with respect to themselves.

THE WRONG SIGNALS

What kind of signals are they getting?

They are being told Government intends to bring us out of the economic doldrums by more of the same policies which got us into the recession.

They are being told Government spending will continue unabated, and tax revenues and deficits will be increased to meet that spending. This drains billions out of the private sector, billions needed for the capital investment and spending essential to revitalizing the economy.

They are being told that taxes will be higher on the productive sector, taking more of what people earn by working hard in order to subsidize the nonproductive sector—those on welfare and other forms of Government largess.

They are being told that the oppressive burdens of Government regulation and redtape—all the rhetoric of the last campaign notwithstanding—will be increased. All a person has to do to believe it is look at the new Department of Energy—which starts out with 20,000 employees and control over every facet of energy—and all the deregulation and reorganization proposals, on the other hand, that are not seeing and will never see, the light of day.

How are we ever going to have a recovery with those kinds of signals?

Does this administration not know why it was elected?

Does not it recall what it said in order to be elected?

Cannot it see the connection between its policies and public statements and the reaction of the American consumer and producer, from the "mom-and-pop" grocery store to Wall Street, from the stockboy in that store to the assembly lines of General Motors?

And in no place could this be more true or obvious than the administration plan taxes now being readied.

Let me give my colleagues the details of that plan.

The plan consists of at least the following measures:

TAXING FRINGE BENEFITS

First. Taxing fringe benefits.

The administration's plan to tax fringe benefits is the real sleeper in this package. It has consequences which could raise some taxable income by 25 percent or more—all without any additional dollar income with which to pay the added tax.

I fear jobs may be lost as a result of it, because it will totally disrupt all existing contracts between management and labor. It will increase employer costs while at the same time reducing employee benefits. The results could be disastrous for labor relations and the economy in general.

It is a long-standing practice that such things as parking spaces, store discounts for retail employees, discounts for transportation, travel in company owned vehicles, and subsidized meals in company owned facilities are exempt from taxation and anything else they can get their hands on.

The reason for this is really quite simple. If you are receiving in-kind compensation, how can you be expected to pay on it except in-kind? Would the IRS expect that the U.S. Government should receive use of your parking space 1 day a week as an adequate tax payment? Of course not. The IRS will expect you to pay cash based on its judgment of the fringe benefit's value. This is totally unfair.

Together with Senator ORRIN HATCH of Utah, I held a press conference on this question yesterday. We announced the introduction of House Resolution 740, expressing a clear congressional policy that the administration and the Internal Revenue Service adopt no changes in rules to tax fringe benefits without first coming to Congress.

AN END TO PRESENT CAPITAL GAINS TREATMENT

Second. An end to present capital gains treatment, repealing provisions which allow capital gains to be taxed at half the rate of ordinary income.

Capital-starved business, mostly the small and medium sized ones, will be seriously threatened by this. The "prudent man" rule of ERISA has already dried up much of the capital market for these job-producing businesses. The Carter tax plan would make it worse.

Then what happens? One or both of two things.

First, these businesses have to raise their prices as the only means of obtaining the capital they must have.

Second, they get out altogether by selling to the larger companies with available capital, thus economic concentration at the top is the result.

Can these effects—higher prices for the consumers and economic concentration in the marketplace—be what this administration really wants?

JEOPARDIZING CAPITAL GAINS FOR HOMEOWNERS

Third. A partial elimination of capital gains treatment for homeowners.

For almost every American family, their largest capital asset is their home—from a mobile trailer to a mansion house. Under present law, the homeowner gets capital gains treatment. This too is now in question.

When the administration's spokesmen first hinted at eliminating capital gains, they said it would be altogether. That drew a tremendous and understandable reaction from the real estate firms and home contractors who serve as the individual homeowner's best lobbying voice in Washington.

So, this week the administration inferred the elimination of capital gains would probably not include homeowners' principal residences. That is an obvious move to reduce voter opposition to the Carter tax plan. But it is not all of the story.

What is really being considered is allowing capital gains treatment for principal residences only up to a dollar amount. That dollar amount is thought to be set at the level of the typical middle middle-class home. Every Member of Congress and every taxpayer knows what is wrong with that.

One, it places class stresses on our social fabric.

Two, in an era where the value of homes has increased dramatically—solely because of inflation—every year that passes more and more homeowners will cross the dividing line and have all or great portions of their home values subject to ordinary tax rates—higher than capital gains rates.

Three, if government knows it will be able to collect more tax revenue through the sales of homes—because more homeowners have crossed that line—then it creates an incentive for government to foster more inflation.

Is this what the administration intends—greater stress among our people, more homeowners subject to higher taxes—especially as they are entering their retirement years, and more inflation?

LIMITING HOME MORTGAGE INTEREST DEDUCTIONS

Fourth. A dollar limit on the amount of homeowner mortgage interest that can be deducted.

I think every American family calculates the true cost of buying a home and making monthly payments on it by knowing it can deduct interest on the mortgage—which is usually much greater than payment of the principal—and real estate taxes paid. Now the Carter administration is going to set a dollar limit on mortgage interest deductions, probably at that middle middle-class level again, which raises problems I mentioned in my second point.

Some people very close to the Treasury Department tax staff believe elimination or restrictions on the real estate tax deduction have been or are being considered too.

NEW RESTRICTIONS ON MEDICAL DEDUCTIONS

Fifth. New restrictions on deductions for health care.

Under present law, medical deductions are allowable in excess of 3 percent of income. The Carter administration wants to almost double the percentage, moving it to 5 percent.

This means to have the deduction, you would have to have either an almost

catastrophic illness or much higher health insurance premiums.

The real effect of this change might be to take the pressure off of holding down hospital costs—at a time when another arm of the Carter administration is seeking means of holding them down—and simultaneously driving up health insurance rates.

Is this what the administration intends?

OTHER PLANNED ADMINISTRATION CHANGES

Sixth. Repeal of the deduction for State or local sales taxes. This might also be the repeal of the deduction for State and—not just or—local sales taxes.

Seventh. Repeal of the rule that allows holders of life insurance policies to avoid tax on interest earned by their premium payments while held by the insurance companies.

Presently, the payment of tax is deferred until the cash surrender value of the policy is withdrawn or the named party dies and payment is made to the beenficiary.

The Carter administration wants the Federal Government's "cut" now.

Eighth. Taking any capital gains treatment which does remain after the rest of the changes are made—on stocks, real estate, and other assets—when they are passed at death.

This, of course, means all that the average family builds up in hopes of passing it along to their children—so they and their children can have a better life—will be subject to the bigger bite of the taxman.

Ninth. Requiring banks and corporations to withhold tax on interest and dividends they pay.

This means that instead of the taxpayer having the use of his own interest and dividend earnings for the year, so those earnings can accrue, the Government will get them immediately through withholding. That means less interest and dividends over a year's period.

That means less attraction to putting one's money into banks, corporations, presumably savings and loans, building and loans, and other thrift institutions.

That, in turn, will mean less money from which those institutions can make home mortgage loans, business loans, et cetera.

This, in turn, will slow the economy even more.

Is this what the President wants?

TAXES ON SOCIAL SECURITY AND UNEMPLOYMENT BENEFITS

Tenth. Requiring individuals to pay tax on social security benefits.

Believe it or not, this has been under consideration.

Can you imagine taxing the elderly this way?

Eleventh. So too has requiring individuals to pay tax on unemployment benefits, which means to receive the same level of benefits, the gross amount paid would have to be increased and taxes raised to cover those increased benefits.

Is this what the administration intends?

Mr. Speaker, this list is not meant to be all inclusive. These are just those items which have come to my attention. Heaven only knows what else may be under consideration.

ADMINISTRATION'S EXPLANATION IS MISLEADING

The administration will respond to my remarks by saying these new and higher taxes will be offset by an across-the-board cut in individual income tax rates. That is very misleading.

The draft tax rate tables now being prepared by the President's interagency tax-writing team, while including rate changes, shifts a greater tax burden onto the backs of the middle class. More people are going to pay less at the bottom of the scale and those people at the top whose income is unearned income are going to pay less. The middle incomes pay more.

I challenge this administration to reduce the tax rates on the American people—the real rates, the nominal rates, the marginal rates, the effective rates, any kind of rate and any way of looking at tax burdens and tax incidences.

A BETTER ALTERNATIVE IS ALREADY AVAILABLE

If this administration wants to revitalize this economy—if it wants to increase revenue for the Government—there is a way to do it without increasing taxes. The way to do it is to reduce taxes, not increase them.

Reducing taxes will return confidence to our economic climate overnight. It is the clearest signal imagineable to the consumer and producer. It will result in increases in the gross national product, employment, and tax revenues.

There is no tricky economics or fancy politics behind such a proposal, behind such a tax plan. It is logic, pure and simple.

There are two ways to increase tax revenues—the objective of the administration.

Commonsense tells us that the more tax one pays on each dollar one earns the less incentive one has to produce additional income. Thus, one may decide that a particular investment looks good at a 49-percent marginal tax rate but not at a 51-percent one. Likewise, a worker may decide to pass up overtime pay because it will push him into a higher tax bracket, or he may decide not to work at all. A reduction in tax rates, therefore, will stimulate work, production, and investment.

A corollary to this theory states that across-the-board tax rate reductions do not cause higher deficits, because expansion of the tax base itself will cause more revenues to be collected. By contrast, when tax rates are too high they reduce tax revenues—that is the case we have right now. In the case of a 100-percent tax rate, for example, no revenue would be collected voluntarily. Alternatively, a zero percent tax rate would produce no revenue. Thus there is a tax rate between zero and 100 percent which raises maximum revenue. Beyond this rate, taxes significantly reduce the incentive to work and produce, and revenues fall.

At present, we are faced with a situation in which tax rates are rising steadily and secretly through inflation. This pushes up individual and business incomes into higher tax brackets even though real incomes may be unchanged or even reduced. This has built a tremendous disincentive effect into our economic system which is the greatest barrier to full employment that exists today.

In summary, you have the kind of high tax rates which stagnate the economy and level off or reduce revenues. Or you can have the kind of tax rates which by stimulating the economy produce a larger tax base, the same or greater revenue, but assure economic growth. I opt for the second.

THE TAX REDUCTION ACT OF 1977

My suggestions are not offered in a vacuum. I have introduced legislation to set this alternative policy into motion through tax rate reductions on individuals and the businesses for which those individuals work and in which others invest.

Just as President Kennedy's tax reduction was enormously successful in the early 1960's, we believe that a tax rate reduction of similar magnitude will have similar results today. This is why I am introducing a bill today, together with my colleague, Senator WILLIAM ROTH of Delaware, to make the following tax rate reductions:

Reduce all individual income tax rates by an average of 30 percent over 3 years. This will reduce the highest individual tax rate from 70 percent to 50 percent, the lowest rate from 14 to 8 percent, and all other rates in between by a comparable amount;

Reduce the corporate tax rate from 48 to 45 percent over 3 years; and

Immediately reduce the corporate surtax exemption for small business from $50,000 to $100,000.

Almost two-thirds of the tax reduction will go to families with adjusted gross incomes below $30,000, 40 percent will go to families with incomes below $20,000. As inflation has pushed more and more families into higher tax brackets in recent years, more incomes have been affected by the progressive nature of our marginal tax structure. For instance, in the early 1960's about 5 percent of all tax returns were subject to the marginal tax rate of over 30 percent. Today, nearly one-third of all tax returns are in 30 percent tax brackets or above and it is increasing daily.

This increase in after-tax income can be expected to have a highly expansive effect on the economy, as the incentive to work, produce, and invest is encouraged. The estimated effect on employment and gross national product is the following:

	GNP (Billions)	*Employment*
1978	+$43.4	+1,218,000
1979	+95.5	+2,547,000
1980	+157.4	+4,000,000

Source: Norman B. True, Inc.

Because of this increase in employment and GNP, Government tax revenues will increase also. Indeed, within a short time the Government will be collecting more tax revenues than it would have in the absence of a tax cut, because

the tax base itself will be expanded. This is exactly what happened following the Kennedy tax rate reduction, as this table demonstrates:

Treasury estimated revenue losses:	
1963	−2.4
1964	−5.2
1965	−13.3
1966	−20.0
1967	−23.7
1968	−24.4
Total	−89.0
Actual revenue gains:	
1963	+7.0
1964	+6.0
1965	+4.0
1966	+14.0
1967	+19.0
1968	+4.0
Total	+54.0

Lower tax rates will not only provide incentives that encourage work effort and production, but to the extent that these tax reductions reduce the cost of labor to employers they will encourage additional job creation and employment opportunities. Lower tax rates will increase the supply of jobs, generate more taxable income, more tax revenues and lower Government deficits. Further, the reduction of tax rates will diminish the incentive of people to escape taxation and thus have the effect of raising additional taxes from the wealthy.

Our proposed legislation maintains the tax rates in proportion to ability to pay. But experience shows that excessively high rates do not produce large revenues. Experience is all in the other direction because when the tax rates on large incomes become too high, revenues disappear, and capital is diverted into unproductive channels, production and investment are discouraged and the small taxpayers and workers are left to bear the entire tax burden of Government spending and borrowing. The only way to relieve the small taxpayer is by getting the largest possible taxes from people with large incomes.

But we do not need a tax rate reduction just for wealthy people, nor do we need it just for low and middle income people—we need to reduce tax rates for all the people to encourage employment, production and economic growth.

REMARKS OF AMBASSADOR ROBERT C. HILL IN OBSERVANCE OF BOLIVAR DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Hampshire (Mr. CLEVELAND) is recognized for 5 minutes.

Mr. CLEVELAND. Mr. Speaker, on July 25 the Pan American Society met in New York City in observance of the birthday of Simon Bolivar, the great South American liberator. The society was most fortunate to have as its speaker our former Ambassador to Argentina, Robert C. Hill of Littleton, N.H., a constituent and good friend of mine.

Ambassador Hill's distinguished career as a diplomat in Latin America and elsewhere makes him a foremost authority in this field. and his excellent remarks before the Pan American Society certainly merit the attention of my colleagues.

Mr. Hill has served as ambassador to Costa Rica, 1953–54; to El Salvador, 1954–55; to Mexico, 1957–61; to Spain, 1969–72; and from 1974 until this year he represented the United States in Argentina, during a time of great internal turmoil and danger. Ambassador Hill also has been Assistant Secretary of State for Congressional Relations, and Assistant Secretary of Defense for International Security Affairs. He is the recipient of numerous awards and honors from Latin American countries.

His speech follows:

SPEECH BY AMBASSADOR ROBERT C. HILL

As one with some experience in Latin American affairs, I am honored to offer some brief comments in commemoration of Bolivar Day. It is indeed a pleasant duty, and I welcome the opportunity.

Even the briefest recitation of Simon Bolivar's legendary life and accomplishments makes clear why we gather to honor him today. His efforts on behalf of South American independence dramatically and decisively touched the lives of an entire continent. Born to wealth and comfort, he might have escaped the dangers and sacrifices of the Independence Wars. He might have emerged a wealthy and influential figure as the result of battles fought by others. This, of course, was not his choice. From the moment on Aventine Hill in Rome when he vowed to free South America of Spain's domination, Bolivar dedicated himself to the career of service and self-sacrifice.

His independence exploits that began in Caracas in 1810 and culminated in Peru at the Battle of Aya Cu Cho in December 1824 were truly heroic. In those fourteen years he was often tested by reverses and defeats, only to emerge each time more resolute and strengthened. By any reasonable standard, Bolivar's accomplishments in those years justify history's judgment of him as one of the age's "Great Men"; one whose life and works became the standard against which his successors have been and will be judged.

One of the most fitting memorials to the Independence Period stands in the Port of Guayaquill, a statue with side-by-side figures of Bolivar and his Argentine counterpart, General San Martin. Constructed to commemorate their epic and somewhat controversial meeting on July 25, 1822, it symbolizes the spirit of sacrifice and cooperation that ennobled both Bolivar and San Martin and enabled them to lead a continent to freedom.

Several facets of Bolivar's life might be discussed as having contemporary relevance, but I would like to cite just one—his role as a man of thought as well as a man of action. If he had been simply a superlative soldier, he would have been remembered but not revered as he is today. Much of his enduring greatness lies in the fact that he was truly a soldier-statesman. He was exposed to Enlightenment thought at an early age and familiar with the latest European intellectual currents. Thus, his actions on the battlefield were infused with a vision of the future he sought for a liberated South America. His valiant struggle to construct his beloved Gran Colombia; his unfortunately premature efforts to stimulate inter-American cooperation; and his many attempts to articulate and implement a republican and representative political philosophy for the new Spanish-American nations all demonstrated an active and gifted intelligence. Clearly, in our much more complicated and dynamic world, Bolivar's example of leadership based upon thought as well as action is something worth emulating.

Bolivar, of course, died a bitter and disillusioned man in 1830. After his many sacrifices on behalf of independence, including the loss of his personal fortune, he saw his Gran Colombia dissolving into separate states and Latin American sliding into "a chaos of passions, difficulties, and disorders." These developments prompted him to write disparagingly in 1829 that "Those who have worked for the cause of Latin American freedom have ploughed the sea."

It is tragic that an heroic figure should have died so embittered. However, had he been able to witness the subsequent development of the South American nations that were in many ways his legacy, Bolivar might have been encouraged. They have come far since the chaotic days immediately after independence. Guided in part by the ideals and inspiration of Bolivar, they are in the process of assuming an ever more important role on the world stage. It has been a slow and uneven process, but it is ongoing.

Bolivar's disillusionment was born partially of the high hopes he entertained for his liberated fatherland and his impatience to see those hopes fulfilled. By 1829, he had apparently forgotten a statement he made ten years earlier at the Congress of Angostura: "Social perfection and perfect systems of government are noble ideals, but legislators deal with men, not angels."

The men who have followed Bolivar have not been angels, but they have benefited greatly from the fact that "The Liberator" went before them.

As with all historic figures who come to us lionized in poetry and song and memorialized in marble statuary, we sometimes fail to reflect sufficiently on Bolivar's contemporary relevance. We look to history for a deeper understanding of the present. We search for comprehension of the complex men and events that have shaped our own time. In this sense, what has Bolivar to say to us today? His advice might be—

"Be patient with your Latin American neighbors. The United States, at times, has shown enlightened interest in Latin America in the 20th Century—begun under President Hoover, strengthened by the good neighbor policy of Franklin Roosevelt, and additional efforts of understanding by the Alliance for Progress by President Kennedy."

A new Administration is in power today. As Americans we want to see the Carter Administration a success. Yet in their desire to change the world, old relationships should not be trampled on. Human rights is a worthy objective, but its orchestration and application have to be accomplished quietly to be effective.

You cannot in the United States legislate reform in Latin America or any other country—yes you can apply economic sanctions—deny military aid—influence normal banking channels. Will this produce results? No!! It will produce enmity that the United States will spend years recovering from.

In the meantime American business interests in Latin America will suffer. Our markets will dry up—business will move to Japan, to Europe and in some instances the Soviet Union.

Yet Latin America, I hope, will be patient and wait until experience takes over in the Administration. Then hopefully traditional friendships will return. The ingenuity of the United States technicians will return hopefully to help fulfill my dream of a strong and powerful Latin America surging forward as equal partners in the common cause of a better world for all mankind.

CONGRESSIONAL DEMOCRATS NEED TO HAVE A SAY IN NATIONAL PARTY DECISIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentle-

man from Illinois (Mr. DERWINSKI) is recognized for 5 minutes.

Mr. DERWINSKI. Mr. Speaker, before the August recess begins, I want to advise my good friends on the other side of the aisle they can count on my carte blanche support in seeing they receive the proper adulation and respect at national Democratic Party conclaves. I cannot envision a national Democratic Party gathering operating effectively and efficiently if it ignores the brilliance and incisiveness of the Democratic congressional delegation.

With the new administration concentrating almost exclusively on enhancing its own image, I can understand why congressional Democrats want to make sure they are not reduced to bit players or handed walk-on parts when important national party decisions are being made.

In a "Dear Democratic Colleague" letter which I recently received, I was advised the executive committee of the Democratic National Committee now is in the midst of planning the party's midterm convention. The letter emphasized the importance of granting congressional Democrats access to the floor and voting privileges. They had those rights at the party's 1974 midterm convention, and after petitioning the arrangements committee, they were given the same privileges for the 1976 Democratic National Convention.

By the time the next midterm convention is called to order, the Democratic national party is going to need all the help it can get in trying to defend and explain the administration's policies and programs to a bewildered constituency.

So I say to my good friends, yes, you may use my name when you make your plea to the Democratic National Committee for floor and voting privileges at your midterm convention.

LEGISLATION TO AMEND FARM LABOR CONTRACTOR REGISTRATION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. SARASIN) is recognized for 5 minutes.

Mr. SARASIN. Mr. Speaker, today I am introducing a bill to amend the Farm Labor Contractor Registration Act, as amended in 1974. The bill I am introducing is similar to, but not identical with, a bill I introduced in the 2d session of the 94th Congress. During the 93d and 94th Congresses, the Subcommittee on Agricultural Labor held hearings and engaged in extensive oversight of the Farm Labor Contractor Registration Act resulting in the 1974 amendments, and then oversight of the 1974 amendments. We found that there were ambiguous interpretations and inadequate intepretations of the law and the 1974 amendments, as well as enforcement that drew criticism from contractors, producers, processors, growers, foremen, and employees of operators engaged in agricultural pursuits. The bill I am introducing today again attempts to provide some clarification for those who operate within the terms of its coverage as well as for those who must attempt to enforce the act in the manner Congress intended. I hope these amendments will be addressed at the scheduled hearings on the Farm Labor Contractor Registration Act to be held in Raleigh, N.C., on August 24, 1977.

Let me repeat for this Congress some of the history of the problems with this act as I saw it in 1976 and as it continues today:

The Farm Labor Contractor Registration Act was signed into law on September 7, 1964, and became effective January 1, 1965. From the beginning of January 1965 until late in 1974, the Farm Labor Contractor Registration Act—FLCRA—received little, if any, attention from growers, or contractors, or even from Government. When violations of the FLCRA were discovered, they were usually uncovered when the Department of Labor was investigating compliance with other laws, such as minimum wage or age discrimination. Although the FLCRA was designed to eliminate the exploitation of producers, migrant agricultural laborers, and the public, generally by irresponsible labor contractors, the Subcommittee on Agricultural Labor discovered in 1974 that abuses were still prevalent and that labor contractors failed to even know the existence of the law which required them to register.

As a result of oversight and hearings during the 93rd Congress, the FLCRA was amended in a number of ways to make it more effective—the Department of Labor was directed to monitor, investigate, and enforce the law; penalties were increased; coverage was extended; civil relief became available; a nondiscrimination clause was added; and persons doing business with labor contractors were obliged to deal only with a registered crew leader. After the 1974 amendments, the FLCRA began to receive some attention. Indeed, the Department of Labor began to enforce the law in a manner that has drawn some criticism from contractors, producers, processors, growers, foremen, and employees of operators engaged in agricultural pursuits. Most of the complaints arise from those portions of the 1974 amendments which extended coverage to intrastate operations and to the removal of the requirement that only crew leaders who hired or transported "ten or more migrant workers" were required to register.

The complaints raised relative to the enforcement of FLCRA since the 1974 amendments are the reason for the introduction of my bill. Whether the criticisms are valid or not, they deserve some attention. I do not know if this bill provides the answers to the complaints, but it does provide a beginning for an investigation into whether the act is being properly administered and enforced.

I want to emphasize that the proposed amendments are not intended to exempt from coverage the crew leader or "body broker" that the original Congressional Findings and Declarations of Policy so well illustrate.

Section 2 of my bill will exempt from the requirements of the FLCRA the nonprofit agricultural cooperatives of farmers and farmers' cooperatives engaging in recruitment solely for its membership on a cooperative basis. In the last Congress, I did not include such a provision since I felt we should investigate such cooperatives. The staff of the subcommittee visited nonprofit agricultural cooperatives of both types in California and Arizona, and found no reason to think that they would or ever did engage in the abuses the FLCRA was enacted to eliminate. Since the legislative history of the FLCRA gives no indication that it was directed at long-established farmer cooperatives which render services to their members on a nonprofit basis, which are subject to a limited geographical location and are easily found for purposes of complaint, and which, as a result of our investigations, have not been demonstrated to have abused workers' rights, I believe they should be exempted from the law which attempts to regulate historically know "crew leaders."

Section 3 of my bill removes the word "personally" in section 3(b)(2) of the act. A farmer or processor is exempt if he personally engages in recruitment of workers for his own operation. It has come to my attention that "personally" is being construed by the Department of Labor to mean "in person." Since this could be a narrow and restrictive interpretation which would exclude any corporate farmer, processor, canner, ginner, packing shed operator, or nurseryman from the exemption, I have removed the word "personally" so that corporate operators can benefit in this exemption as long as they meet the other relevant requirements. Furthermore, I believe the word "personally" is an inadvertent carryover from the House bill prior to the 1974 amendments.

In addition, the Department of Labor is attaching a very narrow construction to the language, "solely for his own operation." Many processors, canners, and packinghouse operators engage in harvesting for the purpose of bringing agricultural products into their establishments for processing, canning, or packing. In actual practice the harvesting is an integral part of the operation of the processor, canner, or packer. In some instances a part of the produce may be diverted either before or after entering the packinghouse, as in the case of a packer who has harvested more of the produce than he can pack, can, or process. The Department's narrow interpretation of "solely for his own operation" in fact nullifies the exclusion which Congress intended, and my additional language in section 3 is intended to restore Congress original intention.

Section 4 of my bill attempts to clear up the fact that full-time and regular employees of an entity referred to in (1) and (2) of section 3(b) of the act are not crew leaders. While in general conversation, the terms "full-time employee" and "regular employee" are easily understood, I feel that the addition of the words "bona fide" before those terms will establish the fact that such employees are not, and in fact cannot be crew leaders or body brokers.

Section 4, further, strikes the words "on no more than an incidental basis" from section 3(b)(3) of the act. Section 3(b)(3) exempts full-time foremen, or other employees, who engage in recruiting activities for his own employer on no more than an incidental basis. It is claimed that the striken language has been construed too narrowly, and that

the exemption for full-time foremen has been practically nullified. Both the House report and the Senate report contained similar language explaining the intent of Congress regarding this exemption. They read:

> While employment relationships vary, it is the Committee's intent that foremen and similar bona-fide employees will not have to register as Farm Labor Contractors if it can be shown, for example, that they are full-time and permanent employees of an employer, who utilizes a limited portion of their time for activities described in section 3(b) of the Act.

The potential loophole that Congress intended to close has been completely eliminated by the addition of the language "solely for his employer." A farm labor contractor who might otherwise have attempted to come within this exclusion by becoming an employee and causing each member of his crew to become an employee of each employer by whom he is engaged as he and his crew move from job to job will not have engaged in such activity solely for any single one of those employers. It is not my intention to exempt full-time employees who engage in recruitment activities regularly, but it would seem that the above-cited language leaves little doubt that Congress did not intend that the act be construed to require full-time foremen or others to register when only a portion of his duties includes going to town to pick up workers.

Section 5 exempts from coverage a fully qualified charter or contract carrier which meets insurance requirements. There are in this country, owners of school buses who, by contract, carry school children during the school year. They are not common carriers, but they are able, on a charter basis, to transport farm workers. The same may be said of other charter carriers.

Section 6 is an attempt to limit the interpretation that has been placed on the word "fee." For instance, the Department of Labor has been interpreting the word "fee" in the following manner: When farmer A suggests that farmer B use his workers for 1 or 2 days when farmer A has no work for them, A is judged to have earned a "fee" by so doing—farmer B has paid a "fee" by "holding" farmer A's workers until he needs them. There is obviously need for clarification.

Section 7 attempts to more clearly define "migrant worker." As the act is presently drafted, a "migrant worker" is an agricultural employee who works on a seasonal or other temporary basis. Before the 1974 amendments, the Act applied only to crew leaders engaged in interstate commerce, and migrant workers were those engaged in interstate agricultural employment. With the deletion of the interstate requirement, the definition of a migrant, as that term is generally understood, has become confused. I believe the definition needs some clarification.

The intent of Congress in enacting and amending the Farm Labor Contractor Registration Act was to provide protection for those agricultural workers who are induced to travel, by day haul or other distances, to places of employment and are dependent upon their crew leaders. A worker who lives permanently in the general area of his employment and is able to travel on his own is most likely not a migrant. However, it should be clear that although a worker may not be a migrant in the traditional sense, where the worker is dependent on employment to a crew leader whose contracts with agricultural employers preclude the worker from securing employment without the crew leaders intercession, there is no attempt and no intention of exempting that crew leader from coverage. The words "on a seasonal or other temporary basis" added to the first part of 3(g) are to make it explicit that the term does not apply to persons employed full time, the year around in agriculture by the same permanently located employer.

Section 8 adds three new definitions to the Farm Labor Contractor Registration Act. The first is to define the word "transport." The enforcement policies of the Department of Labor and conflicting interpretations of the law within the Department would seem to point up the necessity for a precise definition of "transport." Before a person is held to be engaged in transporting migrant workers, he should either be the owner of the vehicle or conveyance, or he should control the operation of that vehicle, directly or indirectly, through employees or agents in such a manner as to incur any legal liability for the operation of the vehicle or conveyance in which the migrant worker is transported, and hence he could not obtain any insurance which would protect him against that liability.

The other definitions relate to "bona fide" full-time and "bona fide" regular employees of an agricultural employer. As already stated, it should be clear that such employees are not crew leaders within the meaning of the word.

In summary, the Farm Labor Contractor Registration Act was designed to control crew leaders—persons who do not have local situs, who are almost constantly on the move, and who take with them workers who are dependent upon their crew leader for their transportation, livelihood, and safety. The above proposed amendments would continue such coverage, but would make it clear that the act is not intended to cover farmers and other agricultural employers who have a local situs, perform work in agricultural pursuits at the same place 12 months out of the year, and whose books and other records are readily available for inspection at any time.

In offering these amendments, I want to assure my colleagues that I do not wish in any way to weaken enforcement of the Farm Labor Contractor Registration Act. However, as I have previously stated, I believe that agricultural labor practices of the past are rapidly changing and that certain present agricultural practices should be more fully examined so that the enforcement activities are in conformity with the intent of Congress to eliminate the abuses which workers suffer at the hand of unscrupulous crew leaders who meet the definition of "farm labor contractor" in the law.

SECRET DOCUMENTS PROLIFERATE: CLASSIFICATION SYSTEM DEMANDS SERIOUS ATTENTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 5 minutes.

Mr. WHALEN. Mr. Speaker, last year in a New York Times editorial concerning the "Daniel Schorr Incident," I urged that our national security classification procedures be reviewed and that a more realistic system be devised. Although very little has been accomplished in this field, there are some ongoing studies being conducted. In particular, an interagency task force in the executive branch is now reevaluating the system and building a data base to construct a new Executive order on the subject.

No doubt by the time we return from our August recess, the National Security Classification System again will be in the limelight. The information presented by the Interagency Classification Review Committee (ICRC) in its 1976 report, released last month, is bound to capture public attention.

The committee, established in 1972 to help the National Security Council oversee the entire classification system, notes that as of December 1976, there were 13,976 classifiers in the United States. This is a decrease of less than 7,000 since 1972. By far the greatest portion of these reductions came from among those working at the lowest levels, handling "confidential" material. Since these individuals only can classify at their authorized level or below, the actual decrease in authority is not as pronounced as the committee's statistics imply.

Moreover, the actual number of rubberstampers is inconsequential. The real problem is the quantity of documents bearing their stamps.

The committee points out that during 1976 there was a 19-percent drop in the "top secret" category. While this figure seemingly shows great success in reducing the number of high-level secrets, the fact remains that the number of "top secret" documents in proportion to all classified materials is the same now as it was in 1972. The decline in 1976 seems to be the result of an extraordinary 37-percent increase of "top secret" documents in 1975.

Although the "top secret" category experienced a decline, the "secret" and "confidential" categories advanced. The number of "secret" documents, 1,298,440, rose by 85,244 actions, or 7 percent, in 1976. The number of "confidential" status documents jumped 25 percent—a dramatic 645,815 actions—in the same period. As a result, the entire number of classified documents increased by 723,459 actions, or 19 percent. Last year's total was 4,517,914. This is the largest full-year aggregate since the present classification system originated.

With regard to declassification procedures, the Interagency Classification Review Committee cheerily observes that 75 percent of all relevant documents are being placed under automatic provisions of the General Declassification Schedule. However, the report fails to mention that the percentage of those documents under the automatic schedule has declined every year since 1973, from its high of 81 percent.

I am pleased to note that the quantity of documents requested by the public for declassification review increased 90 percent over 1975, with 86 percent of those requests granted in full or in part. But, the total number of requests is still very small in comparison to the number of classified documents.

The report also points out that there was a 65 percent decrease in the number of unauthorized disclosures. However, after weeding through pages of extraneous information, one finds that the number of unauthorized disclosures since 1975 decreased only from 17 to 6. Most of these disclosures appeared in the press and only one of six sources was located.

Increases in total documents classified and decreases in the percentage of automatically declassified documents have caused a sharp increase in the amount of information being kept from the public. Using the ICRC's percentage and total number figures, I have calculated that in 1974 approximately 683,900 documents were excluded from the General Declassification Schedule. In 1976, the number increased to approximately 1,080,300.

Does all this material pertain to national security? Would normal declassification of this information jeopardize our safety? These are some of the questions that must be dealt with in the fall.

The ICRC's report briefly discusses several problems inherent in the present system. Many of these were addresed 4 years ago in a subcommittee report issued by the House Committee on Government Operations.

Three of the major issues were delineated by both reports. First, most documents can be excluded from the automatic declassification schedule with little difficulty. Second, there are inadequate procedures to accelerate declassification in the event a document no longer needs to be withheld from the public. Third, the complexity of the system is expanding due to the lack of limitations on the use of miscellaneous classifications categories.

These are only a few of the most serious problems that burden the classification system. I cite them for my colleagues to show that the system needs our serious attention. I am hopeful that the promised new Executive order and the scheduled hearings in the House Committee on Government Operations later in the fall will provide the improvements this system needs.

HEARINGS ON CREDIT CARD-EFTS LEGISLATION SCHEDULED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. (ANNUNZIO) is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, beginning on Tuesday, September 20 hearings will be held by the Subcommittee on Consumer Affairs of the Committee on Banking, Finance and Urban Affairs on H.R. 8753 at 10 a.m. in room 2222 Rayburn House Office Building.

This is the legislation that deals with credit cards and the Electronic Funds Transfer System. The hearings will be held on September 20, 22, 23, 26, 27, 29, and possibly September 30 if an additional day is needed.

Persons wishing to testify should contact Mr. Curtis Prins, staff director of the Consumer Affairs Subcommittee at 225–9181.

INCENTIVES FOR THE BLIND

The SPEAKER pro tempore. Under a previous order of the House the gentleman from Texas (Mr. GONZALEZ) is recognized for 5 minutes.

Mr. GONZALEZ. Mr. Speaker, blind persons are eligible to receive disability benefit payments through the social security system, and that is a good, reasonable and fair thing. But if a blind person is able to work, he loses those disability payments, and that is not reasonable or fair. This kind of penalty frustrates hopes, and keeps many people from working, who could otherwise do so.

The penalty is especially unfair when you consider that blind persons who receive benefits under the veterans program can work without losing their benefits.

I have introduced a bill that would enable the blind to receive social security disability payments, if they become employed—exactly in the same manner that blind veterans may work and have benefits. I had the privilege of discussing this bill with the Subcommittee on Social Security, and include in the RECORD my prepared remarks:

STATEMENT BY CONGRESSMAN HENRY B. GONZALEZ

I want to thank the Subcommittee for its consideration of my bill to liberalize the conditions under which blind persons can receive disability benefits under the Social Security Act.

My bill is simple: it would allow a blind person to qualify for disability insurance payments under Social Security after working for six quarters in covered employment, and further, allows the blind to receive payments regardless of any additional earnings they may have. Present law does not allow a blind person to continue receiving disability payments, if that person returns to work.

The concept of disability insurance is that such insurance should be available only to a person who is wholly unable to work. However, such a narrow concept is in many ways unfair, and not in the best interest of either the government or the disabled person.

All of us are trained in the belief that work is good, and all of us admire the courage and determination that a handicapped person shows, when that person is able to overcome all adversity and remain a productive citizen. Our social programs stress rehabilitation. Our benefit payment systems ought to reward rehabilitation, and that is what my bill intends to do.

As matters now stand, a blind person who finds work may actually suffer financial penalties if he does work. The income from that person's job may well turn out to be less than the disability payments he is entitled to. In such circumstances, handicapped individuals may find that unemployment, if unhappy, is at least financially more rewarding than most available jobs. We should not continue a system that penalizes those who want to work, as the existing one does.

It can be argued that a person who can work is not disabled, and should not receive disability payments. Our law, however, has for many years recognized that a person can be disabled and productive at the same time, and that such persons can receive disability payments, whether they are working or not. Our veterans statutes have for decades provided a system of payments based on degree of disability, and it is a wise, compassionate system. These payments are made regardless of any earnings the veteran may have.

A blind veteran is classed as having a one hundred percent disability, and receives a benefit payment of close to a thousand dollars a month, in addition to other benefits. Note this: a veteran receives that benefit payment whether or not he is working, and regardless of any additional income he might have.

A blind person under the Social Security system is, on the other hand, penalized if he is able to work. There is no difference in degree of blindness or degree of handicap—only in treatment. The veteran has every incentive to rehabilitate himself, and is rewarded if he is able to work. The Social Security recipient is penalized for working, and suffers every possible disincentive. There is no reason for having this kind of differential between citizens who are identical in every respect except for the program that they happen to fall under.

In addition to the fact that we should not let this double standard, this inequity, continue to stand, we should understand that a blind person who is working will be less of a burden to the government than one who is not. That person will be capable of paying taxes, capable of supporting any dependents he may have, and capable of contributing to society in a positive way. Anything that encourages this kind of full and productive life ought to be provided; anything that discourages it ought to be rejected.

Blind people do not want to be on welfare, any more than anyone else who is capable of living in any other way. Enactment of my bill will remove a great injustice to blind people under the Social Security program, will encourage rehabilitation, and will, most importantly of all, enable a great many people to live in the kind of dignity and security that we all want for ourselves.

I urge enactment of this bill.

THIS YEAR'S CAPTIVE NATIONS WEEK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. FLOOD) is recognized for 5 minutes.

Mr. FLOOD. Mr. Speaker, this year's Captive Nations Week was an outstanding success in a variety of ways. In all sections of the country the 19th observance was conducted in diverse ways of Governors and mayors proclamations, radio interviews, newspaper reports, church services, assemblies and marches

The most important event was the reversal of the President's decision not to issue a proclamation. The forces that assembled to overcome this temporary inaction were truly remarkable. For the cause of human rights has far greater meaning and application to the imperio-totalitarian Communist world of the captive nations than any parts in total aggregation beyond the area of captive nations.

As another selected report on the week, Mr. Speaker, I submit the following items: First, the proclamation of Mayor Moon Landrum of New Orleans; second, the proclamation of Governor Jerry Apodaca of New Mexico; third, an article by Lee Edwards, executive director of the National Captive Nations Committee, on "A Carter Retreat on Human Rights"; and fourth, the report on "President Yen Warns Free World to Boost Defenses," an editorial on the "Significance of Captive Nations Week Rally," the addresses of President Yen and Dr. Ku, and the declaration at the Captive Nations Week rally of the Republic of China as given in the July 23 issue of the China Post:

STATE OF NEW MEXICO,
Santa Fe, N. Mex.

PROCLAMATION

Whereas, the imperialistic policies of Russian Communists have led, through direct and indirect aggression, to the subjugation and enslavement of the peoples of Poland, Hungary, Lithuania, Ukraine, Czechoslovakia, Estonia, Latvia, Byelorussia, Rumania, East Germany, Bulgaria, Mainland China, Armenia, Azerbaijan, Georgia, North Korea, Albania, Idel-Ural, Croatia, Slovenia Cossackia, North Vietnam, Cuba, Cambodia, South Vietnam, Laos, and others; and

Whereas, the desire for liberty and independence by the overwhelming majority of peoples in these conquered nations constitutes a powerful deterrent to any ambitions of Communist leaders to initiate a major war; and

Whereas, the freedom-loving peoples in the captive natives look to the United States as the citadel of human freedom and to the people of the United States as the leaders in bringing about their freedom and independence; and

Whereas, the Congress of the United States by unanimous vote passed Public Law 86-90 establishing the third week in July each year as Captive Nations Week and inviting the people of the United States to observe such week with appropriate prayer, ceremonies, and activities; expressing their sympathy with and support for the just aspirations of captive peoples;

Now, therefore, I, Jerry Apodaca, Governor of the State of New Mexico, do hereby proclaim the week of July 17 through 23 1977, as: "Captive Nations Week" in New Mexico.

NEW ORLEANS.

PROCLAMATION

By virtue of the authority vested in me as Mayor of the City of New Orleans, I hereby proclaim July 17-23, 1977 to be "Captive Nations Week" in New Orleans.

A CARTER RETREAT ON HUMAN RIGHTS

(By Lee Edwards)

Dwight D. Eisenhower started it way back in 1959. John F. Kennedy continued it. So did Lyndon B. Johnson. And Richard M. Nixon. And Gerald R. Ford.

But Jimmy Carter wasn't going to do it, until he came under so much political and public pressure that he *had* to do it.

I'm talking about Captive Nations Week and the annual proclamation which the President of the United States, under Public Law 86-90, is "authorized and requested" by the Congress to issue.

Captive Nations Week, of course, marks the annual observance by the United States of the tragic lot of those hundreds of millions of men, women and children who live, not by their choice, under communism. It is our way of saying to them that we will never be content until they too enjoy the freedom, liberty and national independence we do.

In May of this year, Dr. Lev E. Dobriansky, chairman of the National Captive Nations Committee, wrote to the White House as he does every year reminding the President of Captive Nations Week in July and stressing its fundamental compatibility with human rights—Mr. Carter's favorite foreign policy theme.

For the next two months, Dr. Dobriansky was in contact with various representatives of the Carter administration and at no time received any inkling that there would not be a presidential proclamation.

On Friday afternoon, July 15, two days before Captive Nations Week was to begin, Dr. Dobriansky had to leave Washington, D.C. to fly to Cleveland to participate in a panel on—of all things—detente. He asked his Committee's executive director to follow through on what Dr. Dobriansky still believed to be a pro forma assignment. The White House was invariably late with the proclamation and he saw no reason for alarm.

At approximately 4:30 p.m. Friday, the Committee's executive director got through to Greg Treverton, a staff member of the National Security Council, who calmly revealed that there would be no presidential proclamation in 1977 because Mr. Carter's stand on human rights and national independence was so "public" and well-known. Therefore, there was "no requirement" for a proclamation.

The Captive Nations Committee director protested. He predicted there would be widespread disappointment over the President's inaction. Treverton responded that the non-proclamation should not be interpreted as a retreat by the President on human rights or national self-determination. The Captive Nations representative assured Treverton that failure to issue a proclamation would be seen as just that.

He might have added that after 19 years and five presidents, Mr. Carter not issuing a Captive Nations Week Proclamation would be like the Pope not calling for peace on Easter Sunday.

The next four days were filled with telegrams, telephone calls, Congressional speeches, entreaties, threats, and profound disbelief on the part of almost everyone—particularly liberal Democrats in the Congress and most of our major cities who have made Captive Nations Week a special symbol of their concerns about the captive peoples behind the Iron and Bamboo Curtains—and the votes of their relatives in this country.

Finally, at 11:30 a.m., Wednesday, July 20, about one hour before the U.S. House of Representatives was scheduled to begin a special discussion of Captive Nations Week, and four days into the Week itself, President Carter issued a Proclamation, designating July 17-23 as Captive Nations Week.

It was innocuous, bland, political boilerplate. The President recognized America's belief in "national self-determination" and called on the people of the United States to demonstrate their support "for those who seek national independence, liberty and human rights."

He made no metion of communism or the Soviet Union or Communist China or Communist Cuba or any of the 27 nations now under communism. He did not even use the word "totalitarian" which we all know means the Soviet Union.

At a time when 1.5 billion people are starving for freedom under the yoke of communism, President Carter offered them a crumb of consolation.

It is ironic but true that if the President had issued this bit of rhetorical fluff Friday evening or Saturday morning no one would have protested and he would have avoided the ensuing flap.

The Proclamation satisfied really no one. Not those in the State Department and the White House who counseled him against issuing it in the first place. Not the Soviet Union which correctly preceives the captive nations as a most serious threat to their continued imperialist domination. Not the hard-line Democratic and Republican Congressmen, Senators, mayors, governors and other elected officials. Not the various ethnic blocs in America whose attitude was summed up by Dr. Dobriansky, who asked Mr. Carter:

"Which is more important to this administration—human rights or relations with Soviet Union?"

The President's near disastrous inaction on Captive Nations Week shows that his commitment to human rights is not what it was only five short months ago when he wrote an historic letter of support to Soviet dissident Andrei Sakharov and met with Vladimir Bukovsky in the White House.

I can't help thinking: If Mr. Carter is so nervous about offending the Soviets that he almost cancels a ritualistic proclamation, how firm will he be on such vital national security issues as SALT?

PRESIDENT YEN WARNS FREE WORLD TO BOOST DEFENSES

Over 3,000 people, including distinguished guests and high-ranking government officials, attended the 1977 Captive Nations Week rally presided over by Dr. Ku Cheng-kang, World Anti-Communist League Honorary Chairman, at the Sun Yat-sen Memorial Hall yesterday morning in Taipei.

President Yen Chia-kan said in his address to the rally that "We must call on the free world to recognize the true nature of the Chinese Communists, strengthen our defenses against them, insist on morality and safeguard human rights by ensuring unity, persevering in our struggle, repudiating abject and phony peace, and demanding just and true peace."

President Yen also pointed out that "to struggle for freedom is in the nature of man and a part of the mainstream of history, whereas those who enslave the people are the common enemy of the people."

Dr. Ku said in his address that "if the United States were to continue treating relations with the Chinese Communists as a central part of her foreign policy, America would be negating her own traditional national stand for justice and freedom."

Dr. Ku pointed out that normalization with the Communists will seriously threaten world peace and global equilibrium will be irreparably destroyed.

Also speaking at the rally were William L. Dickinson, member of the U.S. House of Representatives, Orlando Montenegro, Senator from Nicaragua, Tran Van Do, leader of Free Vietnam, Jeno Platthy, president of the Third World Congress of Poets, and Felipe Sin Garciga, secretary of foreign relations, Cubanos Unidos en la Batalla Anticomunista (C.U.B.A.).

A declaration and a cable to President Carter urged the President of the United States to realize that the "tyrannical Communist regimes have not changed their goal of world Communization and human enslavement."

The cable to Jimmy Carter also stated that "all lovers of freedom should jointly oppose Communist enslavement and win and promote freedom and human rights."

The declaration noted that: "We have resolved to further unite the world's freedom forces, step up assistance to the enslaved 800 million Chinese mainland people's struggle to win freedom and human rights.

SIGNIFICANCE OF CAPTIVE NATIONS WEEK RALLY

Thousands of people of the Republic of China attended a mass rally at the Sun Yat-sen Memorial Hall yesterday to give their staunch support to the Captive Nations Week movement which was initiated by the 86th Congress of the United States in 1959.

But the significance of this gathering goes beyond the borders of the Republic of China and penetrates deeply into the Chinese mainland and other iron curtain countries where the suffering people are yearning for freedom and early deliverance from inhuman oppression.

It is fitting to note that the theme of this Captive Nations Week's observance is "Resist Communist for Freedom and Resist Communism for Human Rights". As President Yen Chia-kan has pointed out in his address at the Rally that "this theme is intended to give new impetus to our national policy of resisting Communism by pitting humanity against inhumanity, human rights against enslavement and morality against immorality".

While we are sure that "benevolent government will prosper and tyrannical rule will perish", many democratic nations have unfortunately been intoxicated by phony promises of the Communist nations in their united front tactics to confuse and bewilder the free nations.

The Chinese Communists are especially vicious in spreading phony professions of peaceful intentions and cooperation in the future. But when they were urged by the United States to settle the so-called "Taiwan question" peacefully, they immediately retorted by a threat of force against the Republic of China. As Dr. Ku Cheng-kang pointed out that actually there is only "the China issue" but "not a Taiwan question." For the Republic of China is China which is the rightful ruler of the Chinese mainland while the Chinese Communists are imposters and usurpers. "The United States", Dr. Ku noted in his opening speech at the Rally, "must understand that the only solution to the China issue lies in the return of the 800 million Chinese mainland people to freedom and human rights, and in the rebuilding of the mainland under freedom and democracy so that China as a whole can contribute importantly to the security, peace and equilibrium of Asia and the world".

There is general agreement that U.S. Secretary Cyrus Vance's trip to the Chinese mainland is a dangerous undertaking because "if Washington were really to have a full relationship with Peiping, the action would be tantamount to condoning that regime's infringement upon the freedom and human rights of the 800 million Chinese mainland people". It is hoped that Mr. Vance will refrain from taking any step that will harm America's glory and prestige.

U.S. Congressman Willam Dickinson of Alabama, pointed out the fact that despite nearly 19 years of observance of the Captive Nations Week movement, "well over a billion human beings live under dreadful conditions". His description of the life behind the bamboo curtain on the Chinese mainland which he visited last year is worthy of noting. He was saddened by what he saw on the mainland. "They are a colorless, drab society, mirthless—without joy—regimented from birth". He paid tribute in his speech to the brave and tenacious people of the Republic of China by saying that "You are a bright, happy, creative people—ever improveing the quality of life".

The rally paid tribute to anti-Communist defector Fan Yuan-yet who escaped to freedom with the Chinese Communist MIG19 fighter. His successful escape proves the impending doom of the Chinese Communist regime because Chinese Communist cadres and officers are deserting the sinking boat and no amount of appeasement by the short-sighted politicians in the free world can avert its collapse. However, there is still time for the United States to wake up from its mistaken conception of treating the Chinese Communists as a friend thereby disappointing and alarming its real friends and allies. It must remember the constant and unchangeable slogan of the Chinese Communists of burying American imperialism as well as their unalterable objective of communizing the world.

PRESIDENT YEN: OVERTHROW OF COMMUNISM STARTS IN CHINA

The freedom movement on behalf of the people of captive nations was initiated by the U.S. Congress. The Republic of China was the first to respond. Other member states of the World Anti-Communist League followed the Republic of China to give their enthusiastic support one after another. This movement has fortified the faith of people shut behind the Iron Curtain in their struggle against slavery and Communism and for freedom and human rights. It also has enabled the peace-loving people of the world to respond to one another in fulfilling their aspirations and engendered a powerful summons to overcome international Communist influence and suppress dictatorial rule.

STRUGGLE FOR FREEDOM

To struggle for freedom is in the nature of man and a part of the mainstream of history, wheras those who enslave the people are the common enemy of the people. The history of human civilization may be summed up as a record of advancing human nature, assuring freedom, opposing brute force and throwing off the yoke of slavery. Without exceptioin, the enslaved have paid a heavy price. They have shed their blood and given their lives to resist the bloodthirsty oppression and tyranny of the forces of brutality in order to carry out their high ideals of freedom and equality.

The success of freedom and the failure of slavery is an iron-clad rule of history. Although man will encounter countless difficulties in his struggle for freedom, he is sure to overcome them all and reach his goal of final victory. This is to say that all enslaving and despotic regimes have been overthrown by those they enslaved and that every totalitarian regime depriving the people of freedom has been destroyed by the people. Although evil forces are prevailing today, the force of freedom will eventually triumph by maintaining sincere unity and struggling forward with perserverance. History is our witness and the human conscience is our guarantor.

We must never forget that countless people behind the Iron Curtain are suffering under the persecution of totalitarian rulers and the enslavement of brutal forces. These people are on the brink of starvation and groaning as they walk the road to death. Yet how strong is their aspiration for freedom! And how moving is their pressing call for the means of survival! The task of our times is to expedite the deliverance of the enslaved and protect those who still enjoy freedom from enslavement.

CURRENT TRAGEDY

We know that the current tragedy of humankind is caused by Communist aggression and that the Chinese Communist regime is the root of the threat to Asia and of world turmoil. To overthrow Communist tyranny the world over, we must begin by destroying the Communist regime on the Chinese mainland. To free all people from slavery, we must regard the 800 million people of the Chinese mainland as the first priority for liberation. This is not only our supreme task in supporting Captive Nations Week but also the sacred assignment of all who love freedom and stand by justice.

HELL OF SLAVERY

The Chinese Communist regime is based on brute force and seeks to obliterate human nature and suppress human rights. Under the dominations of Communist rule, the Chinese mainland has been turned into a hell of slavery lacking even a breath of freedom. The Chinese Communists tyrannize the masses of the people to give benefits and private gain to a handful of Communist chieftains. The Chinese Communist Party of today faces ever more complex divergence, ever more critical chaos and ever more violent struggle. As the criticism and struggle mount in intensity, the suppression and persecution of the people become steadily harsher. Such a bloodthirsty society has no human dignity and no human rights; security does not exist and suffering is endemic. Everyone on the mainland is in danger. No one is compatible with the Communists. Each person regards the resisting of Communism and violence as his duty.

FAN YUAN-YEN

On July 7, the day marking the 40th anniversary of the outbreak of the War of Resistance Against Japan, a Chinese Communist air force pilot, Fan Yuan-yen, brought his MIG19 to freedom. His heroic deed has greatly encouraged our people and electrified the world. His courageous defection was not intended wholly as a pursuit of personal freedom. He wanted to indict the iniquitous Communists on the basis of his personal ordeal and make known the suffering of the groaning people on the mainland. This occurrence testified to the fact that Communist brainwashing and the stern and rigid control and supervision of the people has not been able to wipe out the conscience of humankind or destroy the people's determination to seek benevolence and justice. This also bespeaks the common wish of the 800 million people on the Chinese mainland. The strongest resistance to Communist slavery and totalitarianism is being mounted by Communist cadres and soldiers who can no longer endure Communist persecution and suppression.

The Chinese Communists consistently pretend friendship for the world community. They are good at peddling false propaganda and setting traps of detente. They have used tactics of deception, division and persecution to further their conspiracies of overseas Chinese "identification" and "return to the motherland." The arrival of freedom-seeker Fan Yuan-yen has clearly shown the world which way the overseas Chinese should turn and whether they should identify with free China or the Communist regime. Which is bad? Which is progressive? Which is backward? Which safeguards human rights? Which cares nothing for them? His courageous choice and action has provided cogent answers to these questions.

ASPIRATIONS

The arrival of freedom-seeker Fan also reveals the righteous aspirations of the 800 million people on the mainland, including Communist cadres and soldiers, and points out the direction of their action. Mainland anti-Communist flames are burning high. All Chinese sons and daughters in the crucible of Communist tyranny are waiting for their

opportunity to rise up or to escape to freedom. So the Chinese Communist regime cannot desist from internal struggle, nor have a moment of peace. This is the critical moment in which the people can save themselves and their country. This is the moment of Communist collapse.

DEMOCRATIC

The Republic of China has always remained in the democratic camp and is determined to resist Communism. Under no circumstances will the Republic of China ever compromise with the Chinese Communists. Between the Chinese Communists and the Republic of China, there is no possibility of detente and no means of coexistence. The various groups in the Republic of China which are sponsoring this rally to support Captive Nations Week and oppose the Chinese Communist crimes of suppressing human rights and enslaving the people have enunciated the theme of "Anti-Communism for Freedom and Human Rights." This theme is intended to give new impetus to our national policy of resisting Communism by pitting humanity against inhumanity, human rights against enslavement and morality against immorality. We are convinced that benevolent government will prosper, that tyrannical rule will perish, that justice will prevail and that evil will be vanquished. We also believe Asia will have freedom and peace and that the world will find the road to true peace only when China is reunified under Dr. Sun Yat-sen's Three Principles of the People.

The enemy we are confronting is the wicked Chinese Communist regime which seeks to conquer the free world by cheating it. This regime will never abandon its hostility toward the democratic nations. History proves that there can be no genuine cooperation and no coexistence between two entities with basic concepts, political systems and ways of life which are diametrically opposed. The democratic camp. Instead, this unity should be reinforced. The democracies should hurry to free the enslaved people from their agony and not exacerbate their sufferings. Should the democratic nations harbor the illusion that the Chinese Communists might some day become moderate, enlightened and rational, and should they then go on to normalize relations with the Chinese Communists for the sake of monetary peace, they would be (as the Chinese saying has it) foolishly drinking poison to quench their thirst. The ensuing tragedy could last for a hundred generations.

TRUE NATURE

We must call on the free world to recognize the true nature of the Chinese Communists, strengthen our defenses against them, insist on morality and safeguard human rights by ensuring unity, persevering in our struggle, repudiating abject and phony peace, and demanding just and true peace. We have no slightest doubt that the thoroughgoing implementation of the anti-Communist policy of the Republic of China and the strengthening of free world forces opposing Communism and slavery will lead to lasting peace in the world and bring boundless blessing to humankind.

RALLY RAISES HIGH TORCH OF ANTI-COMMUNISM

(Declaration at the Captive Nations Week Rally of the Republic of China, Taipei, Friday, July 22, 1977)

As the world is now boiling with a human rights campaign and flames against enslavement and for freedom are being spread by people everywhere behind the Iron Curtain, representatives of various circles of the Republic of China have gathered in Taipei today for a Captive Nations Week Rally to issue calls for the winning and promotion of freedom and human rights.

Together with freedom-fighter guests from throughout the world, including those representing subjugated peoples, we the rally participants have hoisted high the torch of "Anti-Communism for Freedom and Human Rights" and raised our voices to condemn all the Communist regimes for their totalitarian tyranny and enslavement of people in total disregard of human rights. We have resolved to further unite the world's freedom forces, step up assistance to the enslaved 800 million Chinese mainland people's struggle to win freedom and human rights, and strive on for the elimination of the ignoble phenomenon of the world being half slave and only half free.

WORLD SITUATION

The world situation remains changeable and threats of Communist expansion are serious, but we are absolutely confident that our anti-Communist national recovery mission will succeed. We are certain that the sustained endeavor of all the people of this nation, united under the Three Principles of the People, will ultimately bring attainment of the goal of national survival and independence with freedom for all.

We are very much concerned about our 800 million compatriots who are chained and suffering under Communist tyranny on the Chinese mainland. We will punish the Chinese Communists for their oppression and enslavement of the mainland working masses, for the harm they have done to the bodies and minds of mainland intellectuals and youths through rustication and reform through labor, and for their crimes of massacre, terrorism and armed suppression as part of their power seizure struggle. We swear that we will thoroughly settle this blood debt with the group of fanatic rebels that are occupying the mainland.

HUMAN SENTIMENTS

We also are deeply concerned about all the other enslaved masses of people behind the Iron Curtain. Human sentiments are just as closely interrelated as flesh and blood. When a group of people in an area are subjected to Communist persecution, all the free world people similarly feel the pain and burn with anger.

We respect President Carter for his human rights campaign, but we also are disappointed by the regrettable fact that the United States is not promoting thorough human rights diplomacy and has been using different yardsticks in interpreting human rights.

OPPOSITION

We are confident that the ceaseless Communist oppression and slavery rule will ignite wide-spread opposition and fight to overthrow Red tyranny.

We are confident that even though the world still is confused, clarity and calmness will return, and that although Communist forces are now rampant, they will ultimately fall apart. We therefore must pool all the freedom forces and make the rule that "tyranny cannot last" ascertain itself before long.

The Rally therefore solemnly declares the following points to all the free nations and the subjugated peoples behind the Iron Curtain:

—The Rally urges President Carter to see clearly that the Communist goal of world communization and human enslavement will never change, that the Chinese Communist regime is the source of most troubles in Asia, that America must abandon attempts to use Peiping as a checkmate against Moscow, that Washington should halt all moves toward so-called normalization of relations with Peiping, and that the U.S. ought to firmly abide by her treaty obligations and defense commitments for her allies and positively act at the head of free nations to assure free world security.

TRUTH

—The Rally urges all the free nations to grasp the truth that peace is not possible in the absence of security, freedom and justice, and understand unequivocally that attempts to have "peaceful coexistence" with the Communists will only lead to the deplorable result of infiltration and subversion by the Communists. Free nations, therefore must cast aside any hope to have peace through declaration of neutrality because such peace can only be prevarious. Instead, unity must be enhanced for self-help through mutual assistance and for the safeguard of freedom and human rights through application of strength.

—The Rally urges all the captive masses of people behind the Iron Curtain to perceive the fact that all the Communist regimes are receiving blows from human rights promoters and that Communist rule is now shaky from its very foundation as a result of opposition by the people. Our hopes are earnest that the enslaved Iron Curtain people will pool their strength and will power for the overthrow of evil Communist rule so as to end slavery and win freedom.

HEARTY WELCOME

All the rally participants extend their hearty welcome and sincere respect to Mr. Fan Yuan-yen who recently defected to freedom by flying a jet plane in response to Chairman Chiang Chiang-kuo's call for "spiritual alliance and active return" (to the Republic of China's fighting units). The gallant step taken by Freedom-Fighter Fan demonstrates that the mainland people view this island as a beacon of hope. The step furthermore has generated great encouragement for the free world and sharp impacts against the Chinese Communists. We the rally participants earnestly hope that all the disgruntled cadres and military personnel on the Chinese mainland will stop serving as tools of Peiping's power struggle, that the working masses will cast off the yokes, that the intellectuals will reject ideological persecution, and that the rusticated youths will take no more humiliation by the Communists. Through all-out emulation of Mr. Fan Yuan-yen's heroic move, our compatriots can launch a mainland-wide anti-Communist revolution to destroy the tyrannical Peiping regime.

Anti-Communism for freedom and human rights is now a mighty driving force for the march of man's history. The "Captive Nations Week" Movement is now a powerful call for the winning and promotion of freedom and human rights. All the freedom-loving people of the world must now unite ever more strongly and, taking advantage of opportune moments, move ahead decisively for the restoration of the captive masses to freedom and for the hewing of a bright future for man's society.

CORPORATE PATTERNS REPORT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. Moss) is recognized for 5 minutes.

Mr. MOSS. Mr. Speaker, I would like to call the attention of the House to a recent significant decision of the U.S. District Court enforcing orders which the Federal Trade Commission sent to many of the largest manufacturing companies in this country, directing them to file line of business and/or corporate patterns reports.

The line of business report requires some 450 large corporations to provide detailed financial information, including information on assets, advertising, research, and other expenses, sales and profits for the reporting companies' major product lines. The corporate patterns report requires approximately 1,000 corporations to supply information on sales or intracompany transfers by product line and information on company ownership. The commission will eventually publish reports based on this data.

These two surveys will provide the Commission with information on the extent of concentration, diversification and competition among American industries. Much of this data on specific product lines had become unavailable as a result of the increasing number of mergers in this country.

As conglomerates acquired more specialized companies, the product line information the smaller companies used to provide in their financial statements was lost because the acquiring companies published financial data only for the conglomerate as a whole.

The line of business and corporate patterns reports are designed to cure this lack of specific information on industries that are dominated by conglomerates. This information will be extremely valuable to the Commission, the Congress, and the public in determining what industries merit antitrust investigation in setting economic policy, and in making investment decisions.

Not surprisingly, many companies fought the Commission's efforts to obtain this information. When the Commission proposed its line of business survey in 1970, they used the Office of Management and Budget's review process to delay the Commission's survey. After Congress took that review authority away from OMB, they used the courts, twice suing the Commission to prevent it from seeking judicial enforcement of its orders.

I might add that at one time the House considered a proposal to deny appropriations for the Commission's line of business survey. Those of us who successfully opposed that proposal feel vindicated by the court's opinion enforcing the Commission's orders. The court held that the companies' claims that complying with the forms would be too costly were unsupported or greatly exaggerated. I fully endorse the court's affirmation of the Commission's authority under the powers Congress granted it in the Federal Trade Commission Act to obtain information relevant to its important purposes, unhampered by the technical claims the companies raised as defenses. Although the companies may appeal the court's decision, it is my hope that the Commission will be able to finally obtain these reports as quickly as possible so that the public may soon benefit from this information.

OUTSTANDING COMMUNITY SERVANT, TSUNEYOSHI KOBAYASHI, HONORED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. CHARLES H. WILSON), is recognized for 5 minutes.

Mr. CHARLES H. WILSON of California. Mr. Speaker, it is my pleasure today to honor an outstanding resident of Gardena, Calif.—Mr. Tsuneyoshi Kobayashi. As the congressional Representative for Gardena, I am well acquainted with the service Mr. Kobayashi has rendered to his community and to the entire southern California area.

Born in Fukuoka Ken, Japan, he came to this country in 1917 and moved to California where he operated several grocery stores in southern California. Due to the unfortunate situation in the United States during World War II, he was interned at the Amachi, Colorado camp, but after the war, returned to our area to open up a nursery in Redondo Beach.

Tsuneyoshi, however, was not content just to operate a business, but rather got involved in a variety of community organizations including serving as President of the Southern California Gardener's Friendship Society, as president of the Gardena Valley Gardener's Association, and as a cabinet member of the Southern California Gardner's Association. He also served, in 1968, on the City of Gardena Beautification Committee. The evidence of his concern for the beautification, and consequently the improvement of his city can be seen throughout Gardena.

He has certainly demonstrated himself to be a man of many interests and talents. He has served in the Gardena City government, the Los Angeles County government, and in the early 1970's in the California State Assembly and Senate.

As a Japanese American, he has been very active in Japanese cultural affairs in southern California. He has been a member of the Southern California Japanese Chamber of Commerce, an adviser for the City of Gardena Japanese Cultural Class, general manager for the city's Japanese cultural show, and also a president of the Gardena Valley Japanese Culture Institute.

This institute, which has done so much to increase community awareness of the many achievements and contributions of Japanese Americans, has chosen to honor Mr. Kobayashi on August 10 at a testimonial dinner. Through his work, his concern for the welfare of his community, and more importantly, his outstanding contributions to international amity and goodwill, the Japanese Government awarded him the highest honor given to those people living outside Japan. In April of this year, he received the Sixth Class of the Order of the Rising Sun for his efforts in fostering better relations between the United States and Japan through community service and Japanese-American cultural exchange.

It is my sincere pleasure to bring the many achievements and outstanding man to the attention of my colleagues in the Congress. He has done a great deal for my congressional district and I think it only fitting to recognize his many achievements and outstanding contributions.

"CHURCHILL AND US"

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. ASPIN) is recognized for 5 minutes.

Mr. ASPIN. Mr. Speaker, one interesting perspective on the current defense debate has been provided in an article appearing in the June 1977 issue of Commentary. Written by Johns Hopkins foreign policy specialist Edward Luttwak, "Churchill and Us" analyzes in some detail Churchill's role in the debate over German rearmament before World War II and suggests some parallels to today. The extent to which the analogy applies is of course open to question but this article is without a doubt an important and valuable contribution to the current debate.

(Unfortunately, due to certain limitations on the length of articles submitted to the RECORD, the article has been edited slightly to reduce its length.)

CHURCHILL AND US

(By Edward N. Luttwak)

On December 5, 1938, in the fifth year of his preachings for an accelerated British rearmament, Winston Churchill rose yet again in the House of Commons to berate the government, this time for laxity in preparing London's anti-aircraft defenses. Harold Nicolson was present as Churchill argued with Neville Chamberlain's talented Secretary of State for War, Leslie Hore-Belisha:

Winston starts brilliantly and we are all expecting a great speech. He accuses Hore-Belisha of being too complacent. The latter gets up and says, "When and where?" Winston replies, "I have not come unprepared," and begins to fumble among his notes where there are some press-cuttings. He takes time. He finds them. But they are not the best cuttings, and the ones he reads out excuse rather than implicate Hore-Belisha. Winston becomes confused. He tries to rally his speech, but the wind has gone out of his sails, which flop wretchedly. "He is becoming an old man," says Bill Mabane beside me.[1]

A sad case, that of Winston Churchill at sixty-four, already edging toward senility with grand, empty phrases and the fumblings of old age. Once universally regarded as the most promising young politician in British public life, Churchill declined relentlessly after World War I. Now he was trying to redeem a broken career by appealing to the most primitive of instincts, ethnic hatred. He was forever speaking of "German bloodlust" and of the "German threat" at a time when others were working to build a new Anglo-German understanding based on mutual respect and reciprocity. While successive Prime Ministers, first Baldwin and then Chamberlain, were skillfully nursing the delicate recovery of the economy from the slump, Churchill wanted to sacrifice all they had achieved by launching a ruinous rearmament program, to match his own inflated estimate of German strength. Again and again he challenged the sober official estimates by producing back-of-the-envelope calculations of the balance of military power, which became more and more alarmist. In a flood of private memoranda to senior officials

[1] The quotation, like most others in this article, comes from Martin Gilbert's excellent Winston S. Churchill: The Prophet of Truth 1922–1939 (Houghton Mifflin, 1167 pp., $30.00), to which I am heavily indebted throughout. I also wish to thank Peter Velis for his helpful suggestions in connection with this article.

and members of the government, and, more guardedly, in public speeches, he played a "numbers game" with information that was leaked to him by self-interested sources in the aircraft industry, by hawkish bureaucrats, and by disloyal members of the armed forces, who shared his paranoid fears of Germany.

For example, on September 19, 1935, the Air Ministry circulated a confidential estimate which clearly proved that "air parity" was being maintained: the Germans had 850 fighter aircraft in squadron service while the British had 800. The difference was of course insignificant. There was an "essential parity." In reply, Churchill first tried to confuse the issue by introducing a misleading comparison of the expenditures of the two sides: "The Germans are spending four times as much this year upon air as we are. . . How then can it be pretended that we are overtaking? . . . On the contrary, we are falling ever more behind and this will continue. . . ." Churchill then proceeded to criticize the official estimate of German air strength carefully calculated by the Air Ministry. The Ministry had pointed out that Germany only possessed a "first-line air strength of 594" machines, but with the niggling pedantry that was typical of his obsession with the nuts and bolts of military power, Churchill declared:

"The figure 594 may correspond to some conventional classification of first-line air strength in vogue at the Air Ministry. . . . It has no relation to the true military air power of Germany at the present time. It would be misleading to use the figure 594 without at the same time stating that in the formations which have not yet been included in that total there are admittedly 1,275 trained pilots and 1,556 military machines in a different phase of organization."

The air staff answered the memorandum in convincing detail, tactfully reminding Churchill that they had the evidence; in gentle irony, they wrote that their own assumptions "may not find ready acceptance by those to whom the mass of intelligence data is not accessible." Rising above the narrow military argument, the air staff also pointed out that if it were made clear to Germany that France had no intention of building as many as 2,000 first-line aircraft, "there is no reason why Germany, on her declared policy and intentions, should herself go higher than 1,500. . . ."

One marvels at the patience of the officials and of the Crown's Ministers who continued to reply, year after year, in public and in private, to Churchill's relentlessly detailed objections. Churchill would not accept their judgment that air parity was being effectively maintained; Churchill would not cease complaining that the fleet's readiness was inadequate again citing facts and figures leaked by hard-line antiGerman elements); Churchill nagged that the pace of tank deliveries to the army was too slow; and indeed he found fault with everything. Again and again it was explained to him that his figures on German strength were inflated, and that in any case all the evidence showed that the Germans were only intent on achieving "parity."

The whole thing, of course, brings to mind Senator Jackson's wrong-headed insistence today that missile "throw-weight" should be counted in evaluating the strategic balance, Paul Nitze's obsession with the vulnerability of the Minuteman ICBM's to Soviet counterforce attacks, and General Keegan's claim that Soviet reload missiles should be counted over and above the customary SALT count of missiles in silos. There is the same narrow concentration on numbers, and the same refusal to accept the opinion of the best people in the fields of foreign and military policy.

Churchill's endless harping on the minutiae of the Anglo-German military balance ultimately derived from his inability to understand that the new Germany, while no doubt determined to attain a full measure of equality as a European power, was essentially as interested in keeping the peace as Britain itself. Hitler, like Brezhnev in our own day, had himself fought in the front lines, had seen countless men die in useless combat, and knew as well as anyone that a war could only be futile and catastrophic. But Churchill would never allow Hitler the benefit of the doubt; his closed mind ignored all the evidence of an essential moderation that convinced the *Times* and all the best academic authorities. Instead, Churchill always tried to evoke atavistic images of conflict, calculated to impede the accommodation that the imperative of peace made inevitable. In March 1933, with the Germans having done absolutely nothing to warrant such accusations, Churchill said in the House of Commons:

"When we read about Germany, when we watch with surprise and distress the tumultuous insurgence of ferocity and war spirit, the pitiless ill-treatment of minorities, one cannot help feeling glad that the fierce passions that are raging in Germany have not found, as yet, any other outlet but upon Germans."

Even those most friendly to him found it difficult to tolerate Churchill's persistent misrepresentations of the new Germany. More in sorrow than in anger, on May 2, 1935, Colonel Thomas Moore, MP, was moved to remark in the House, after yet another of Churchill's anti-German outbursts: "Although one hates to criticize anyone in the evening of his days, nothing can excuse the Right Honorable Member for Epping [Mr. Churchill] for having permeated his entire speech with the atmosphere that Germany is arming for war."

In commenting on a draft speech that Churchill had sent him, in which he again used the Jewish question and the issue of human rights in an attempt to whip up anti-German hysteria, R. M. Barrington-Ward of the *Times* wrote to Churchill on September 23, 1936:

"However alien to our way of thinking may be the governing philosophies of other countries, we feel that the only safe and impartial test to apply to them is whether or not they are ready for practical collaboration, political and economic. We should, for example, certainly be against premature abandonment of the hope, supported by many authoritative pronouncements on the German side, that Germany is prepared to reach a general understanding and settlement."

It seems that some fundamental lessons of statecraft must be learned over and over again. For nowadays also the spokesmen of the Council on Foreign Relations and other voices of the foreign-policy elite find themselves forced to repeat this simple truth in regard to our own dealings with the Soviet Union. Surely it should be obvious that we cannot impose our own notion of human rights on the Soviet Union; what counts is "practical collaboration, political and economic." As for Churchill, ignoring Barrington-Ward's appeal for moderation, he gave his speech as originally drafted. In it, he did not hesitate to criticize most intrusively the internal policy of Germany, at a time when such controversy could only harm the quiet but effective diplomacy of the government.

On November 6, 1938, Hitler himself was moved to respond to Churchill's fantasy that the Nazi regime did not enjoy the universal support of the German people: "If Mr. Churchill had less to do with traitors and more with Germans, he would see how mad his talk is, for I can assure this man, who seems to live on the moon, that there are no forces in Germany opposed to the regime." Nowadays Brezhnev is forced to say much the same thing in response to much the same provocation:

"Our opponents would like to find the forces to oppose socialism from within our countries. Since there are no such forces, however, as there are no oppressed, exploited classes within socialist society, and no repressed nationalities, false publicity is being used to create the appearance of "internal opposition." It is exactly for this reason that a clamour is being raised about the so-called "dissidents" and about "the violation of human rights" in socialist countries."

Barrington-Ward's letter had also delicately alluded to another of Churchill's tactics, the selective quotation of Hitler's statements. Churchill would cite the ritual, nationalistic rhetoric that understandably occurred in Hitler's speeches as if it accurately reflected his intentions. When Barrington-Ward spoke of "many authoritative pronouncements on the German side," he was of course referring to the sort of thing that Putzi Hanfstaengl would say at London dinner parties, and not to the purely formal language of a Hitler speech at a massive Nuremberg rally. Surely the true articulation of national intentions was more likely to be heard behind closed doors from visiting English-speaking German spokesmen like Hanfstaengl—who was known to be close to Hitler—than in extracts selected from public speeches given before vast crowds.

This too is a lesson that has been forgotten. For surely what Mr. Arbatov of the U.S.A. Institute of Moscow tells his Harvard friends at Cambridge dinner parties is a better guide to Soviet intentions than the pronouncements of Brezhnev addressing 260 million Russians. After all, one can hardly expect national leaders to admit publicly that they have abandoned their ideology and their declared national goals. The obvious fact that Churchill tried to obscure was that war had simply become obsolete as an instrument of state policy. And with war having become impossible, it followed that the bellicose German declarations had to be purely ritualistic. Nevertheless, Churchill would quote German statements on the feasibility of war, just as Leon Gouré and his colleagues at Miami University do today with Russian pronouncements. Thus the April 15, 1977 issue of their *Soviet World Outlook* (whose lurid red print is itself no doubt meant to evoke sinister images) is filled with such distortions. An article by Soviet Minister of Defense Ustinov—a man whose appointment was greeted by all right-thinking experts as proof positive of a new moderation in Moscow—is excerpted as follows:

"Aggressive forces, opponents of détente and disarmament who do not want to renounce the policy of military adventures . . . are still active in a number of capitalist countries. . . . The danger of a new world war has not been eliminated either. For this reason it . . . continues to be an objective necessity constantly to strengthen our country's defenses and to raise the combat readiness of Soviet armed forces."

Ustinov is quoted again from *Pravda* (February 23, 1977): "Our party and the entire Soviet people, following the behest of our great leader, regard the strengthening of the country's defense and of its armed forces as a sacred duty. . . ." More of the same follows, with quotations from Deputy Defense Minister V. F. Tolubko ("We need constantly to strengthen the country's defense capability and the combat might of the Soviet armed forces"), and Chief of Staff Marshall Ogarkov ("The Communist party and Soviet government are adopting all necessary measures to strengthen the country's defense capability and to increase the Soviet armed forces' combat might"), and yet more.

Fortunately, as in Churchill's day, we too have trained professional experts in the better universities and research institutes who teach us to ignore such empty declarations; thanks to their reassurance, we may rest as easy as Churchill's opponents, knowing that the intent is peaceful even if the language is bellicose. Unlike Gouré et al., these enlightened observers recognize that accommodation is the only possible policy in an age when war has become unthinkable. The important thing, as Mr. Arbatov points out, is to make sure that Moscow's modernization is met by a similar moderation in Washington. But here the chief obstacle is the meddling of ambitious politicians into the internal affairs of the Soviet Union. Just as Churchill pandered to the support of the Jews by making much of the sufferings of their coreligionists in Germany, preferring the sound and fury of his own voice to the quiet diplomacy that was bound to be more effective in dealing with the problem, so do cynical politicians of our own day, like Senators Jackson and Moynihan, pander to the Jews, and with the same counterproductive and dangerous results.

There is an even more direct parallel with our own day in the fate of Czechoslovakia. In 1938, the editorial voices of the best papers, with the *Times* in the lead, agreed with all sober opinion on the one essential fact: Czechoslovakia would inevitably belong to the German sphere of influence; it was a fact imposed by geography and the realities of power. No sane man could possibly want war, and it was only war that could challenge the natural course of events. In the same constructive spirit in which the United States government refused to allow the 1968 invasion of Czechoslovakia to interfere with the opening of arms-limitation talks with the Soviet Union the year after, Chamberlain stated the matter in his own calm and clear-sighted way:

The path which leads to [an accommodation with Germany] . . . is long and bristles with obstacles. The question of Czechoslovakia is the latest and perhaps the most dangerous. Now that we have got past it, I feel that it may be possible to make further progress along the road to sanity.

And indeed, it was only a matter of sanity and essential realism. But realism need not be void of vision and hope. Chamberlain continued:

"I am a realist—nevertheless . . . I do see fresh opportunities of approaching this subject of disarmament opening up before us, and I believe that they are at least as hopeful today as they have been at any previous time. It is to such tasks—the winning back of confidence, the gradual removal of hostility between nations until they feel that they can safely discard their weapons, one by one, that I would wish to devote what energy and time may be left to me."

In the debate in the House, speaker after speaker rose to congratulate the Prime Minister on his achievement at Munich. Churchill was one of the few who carped at the achievement:

Churchill: I will, therefore, begin by saying what everybody would like to ignore or forget but which must nevertheless be stated, namely, that we have sustained a total and unmitigated defeat. . . .

Viscountess Astor: Nonsense!

And nonsense it was. Churchill, as usual, spoke at great length, and in stark contrast to the simple realism of Chamberlain, his declamations were brutal:

"There can never be friendship between British democracy and the Nazi power, that power . . . which cheers its onward course by a barbarous paganism, which vaunts the spirit of aggression and conquest, which derives strength and perverted pleasure from persecution, and uses as we have seen with pitiless brutality the threat of murderous force."

In the wake of Churchill's outburst in the Munich debate even the normally patient Chamberlain was exasperated. On October 15, 1938, he wrote to his sister: ". . . unhappily there are a great many people who have no faith that we can ever [settle down to make the world a better place . . .] and do all they can to make their own gloomy prophecies come true."

An inflamed rhetoric reminiscent of Churchill's was but recently to be heard in Daniel P. Moynihan's speeches at the UN, which were inviting us to renew the ideological struggle of the worst days of the cold war. Just as informed opinion here was prompt to condemn Moynihan's excesses, Churchill too got what he deserved. The Times wrote: "Churchill treated a crowded House to prophecies which made Jeremiah appear to be an optimist. . . ." The *Daily Express* described his speech as "an alarmist oration." Naturally the vast majority of the House was with Chamberlain, who won a resounding vote of confidence, while only a small band of thirty hawkish Conservative MP's followed Churchill in abstention.

Given his compulsive militarism, Churchill could scarcely understand the ineluctable necessity of arms limitation. Throughout the years in which disarmament was a chief aim of successive British governments, Churchill was forever pressing for more arms. Addressing the Conservative Association at Oxford University on February 23, 1934, Churchill spoke of Britain's need for rearmament "in order for us to be safe in our Island Home." Oxford, like our own Harvard, was an elite institution. Perhaps Churchill's war cry might have gone down well with the uneducated, but not with the sophisticated student body of Oxford. When he reached the words "Island Home," they laughed and laughed.

Churchill's wholly negative view of arms limitation was exemplified by a speech he gave in the House of Commons on November 23, 1932, at a time when German rearmament was scarcely visible: "Do not delude yourselves . . . that all that Germany is asking for is equal status. I believe the refined term now is equal qualitative status. . . . That is not what Germany is seeking. . . . [They] are not looking for status. They are looking for weapons." Here again we have a direct parallel, for the common denominator of our own hawks is their refusal to acknowledge that the Soviet Union aims at nothing more than "essential equivalence," which is the more refined term for parity. "Before each disarmament conference," Churchill intoned:

". . . the poor good people of the League of Nations had clapped for joy; yet as each conference progressed they had been deceived. The process is apparently endless . . . and so is the pathetic belief with which it is inevitably greeted. . . . I cannot recall any time . . . when the gap between the kind of words which statesmen used and what was actually happening in many countries was so great as it is now. The habit of saying smooth things and uttering pious platitudes and sentiments to gain applause, without relation to the underlying facts, is more pronounced now than it has ever been in my experience.

Note the similarity between Churchill's argument and that of the spokesmen of the military-industrial complex in our own day. First, he argues that the adversary is not seeking what we call parity but rather superiority, as if military superiority were still a meaningful concept. Next, he argues against all reason that this military power is meant to serve goals of aggrandizement. And finally, he mocks the noble sentiments of hope that provide the most powerful impulse toward disarmament.

We can be thankful that in our own time, as in Churchill's day, such hysteria is drowned out by the common sense of organizations like SANE, the Coalition Against the B-1, the Federation of American Scientists, the Center for Defense Information, and countless other groups working for peace, not to speak of the many sound research programs supported by bodies such as the United Nations Association. All these groups, animated by some of the finest minds of the nation, agree that the main obstacle to arms limitation and eventually disarmament is the entrenched power of our own defense contractors, as well as the narrow bureaucratic interests of the Pentagon and the paranoid fears of unreconstructed cold warriors.

Churchill then—like our own hawks today in connection with the Soviet Union—was driven into his misconception of the armaments question, and of the true intentions of the new Germany, by one fundamental error which pervaded all his thinking. He utterly failed to comprehend the irreversible change that had drastically altered the nature of international politics since those times. In a period when the stark simplicities of armed conflict had become simply irrelevant, Churchill's thought was still colored by his youthful experiences in colonial warfare and by his memory of World War I.

Lord Linlithgow was one of many who tried out of disinterested friendship to persuade Churchill of the error of his ways. On May 19, 1933, he wrote to Churchill: 'You envisage . . . an approaching period of red tooth and claw, a struggle for the means to live. I doubt it, Winston!" Linlithgow pointed out that the world was governed by an increased "interdependence of trade and distribution," with economic negotiations, replacing military adventures, and economic integration replacing racial and imperial conflict. Such integration would result in "enhanced good will between nations and races." Linlithgow disagreed profoundly with Churchill but was obviously writing in good will. "I hope my dear Winston, that I am never impertinent to anyone. Forgive me, then, If I say that . . . you are hanging, hairy, from a branch, while you sputter the atavistic shibboleths of an age destined very soon to retreat into the forgotten past. . . ."

But all to no avail. Churchill simply could not understand that "interdependence" had become the critical fact of international life. He continued to see specters of war, and he continued to oppose the patient diplomacy of his own party leaders that was wholly dedicated to the cause of peace. His reward was a deepening political isolation and a total alienation from the centers of enlightened opinion in his own society. By 1938, his articles were no longer printed by the best newspapers. After all, those in charge had a sense of responsibility. The *Times* then, like *Foreign Affairs* nowadays, would not print articles calculated to incite the worst nationalistic passions, and which might sabotage the policy of accommodation pursued by the government. For it is important to realize that such policies require more than leadership from the top. They also require the tacit cooperation of the enlightened, guided by their firm sense of international realities, in pursuit of the goal of peace.

And aside from the establishment, the left wing too played a most useful and constructive role, helping the government to resist the dangerous pressures for rearmament. In fact, the Left could be counted upon to oppose all defense expenditures. To be sure, they could not refrain from snipping at the new Germany over the issue of political rights and over the trade-union question (on which the British unions of the 30's were no

better than the cold warriors of the AFL–CIO are today), and on the Jewish question. But since the left wing firmly maintained its principled opposition to rearmament, everyone understood that it too was in favor of an accommodation.

Thus, at sixty-four, Churchill was a backbench MP without office—a failure, as his equally ambitious father had been. However, he still made a good living by writing low-brow articles in the popular press, by mass-producing popular histories, and by broadcasting light feature pieces for the American commercial radio networks, then as now less discriminating than the BBC which did its bit for peace by keeping his warmongering off the air. On August 8, 1939, Churchill spoke to his American listeners: Holiday time, ladies and gentlemen! Holiday time, my friends across the Atlantic! . . . Let me look back—let me see. How did we spend our summer holidays twenty-five years ago? Why, those were the very days when the German advance guards were breaking into Belgium and trampling down its people on their march toward Paris!

Churchill continued. He spoke of a "hush all over Europe." What sort of hush was it? he asked:

"Alas! it is the hush of suspense, and in many lands it is the hush of fear. Listen! No, listen carefully; I think I hear something—yes, there it was quite clear. Don't you hear it? It is the tramp of armies crunching the gravel of the parade-grounds, splashing through rain-soaked fields, the tramp of two million German soldiers and more than a million Italians—"going on maneuvers"—yes, only on maneuvers! Of course it's only maneuvers—just like last year. After all, the Dictators must train their soldiers. They could scarcely do less in common prudence, when the Danes, the Dutch, the Swiss, the Albanians—and of course the Jews—may leap out upon them at any moment. . . . Besides these German and Italian armies may have another work of liberation to perform. It was only last year they liberated Austria from the horrors of self-government. It was only in March they freed the Czechoslovak republic from the misery of independent existence. It was only two years ago that Signor Mussolini gave the ancient kingdom of Abyssinia its Magna Carta. It is only two months ago that little Albania got its writ of Habeas Corpus. . . . No wonder that armies are tramping when there is so much liberation to be done. . . ."

FED REFORM BILL WILL IMPROVE ACCOUNTABILITY TO THE PUBLIC

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 20 minutes.

Mr. REUSS. Mr. Speaker, the Federal Reserve Reform Act of 1977, approved by the House Banking Committee July 29 by a vote of 40 to 0 and ready for House action in September, represents an important advance in making the Federal Reserve more accountable to Congress and the public.

The bill, H.R. 8094, sets forth clear guidelines for monetary policy and establishes regular oversight hearings. In these hearings the Board of Governors of the Federal Reserve will be asked not only to disclose their targets for growth of the money supply for the upcoming 12 months, as they have been doing for the past 2½ years with highly beneficial results, but to provide some assessment as to the impact of these targets on the economy.

The bill also provides that the Chairman and Vice Chairman of the Federal Reserve shall be appointed 1 year after the President takes office and shall be confirmed by the Senate; broadens public representation on the boards of directors of the 12 Reserve Banks; and applies to officers, directors and employees of the Fed the same conflict-of-interest restrictions that govern most other Federal agencies.

These provisions taken together will improve the conduct of monetary policy, increase coordination with fiscal policy, and improve public understanding of Federal Reserve System and its management of the money supply.

Here specifically is what the bill would do:

First. Establish clear guidelines for the conduct of monetary policy and make permanent and expand the congressional-Federal Reserve quarterly dialogs on monetary policy.

Under the terms of House Concurrent Resolution 133 in the 94th Congress, which expired December 31, 1976, Fed Chairman Arthur Burns has come before the Senate and House Banking Committees every 3 months to discuss "objectives and plans with respect to ranges of growth or diminution of the monetary and credit aggregates in the upcoming 12 months." Most recently, for example, on July 29 he testified that the Fed intends to let the basic money supply (M1) grow at a rate of 4 to 6½ percent.

Dr. Burns himself has spoken of the value of these hearings. On July 29 he told the committee:

We in the Federal Reserve, because of that resolution, are perhaps a little more systematic in our monetary discussion than we previously were, or might otherwise have been. And I learned from members of the Committee, and I would like to think that now and then, one or another member of the Committee may learn something from me or from my colleagues. So, I think it has been useful, yes.

Building on this base, the new bill expands on what the Fed will be asked to discuss in these hearings. In giving its targets for growth of the money supply, the Fed will be asked to "take into account past and prospective developments in production, employment and prices."

The expanded dialogue will give Congress and the public the benefit of the Fed's thinking as to what results it believes its monetary policies will produce in terms of economic impact. This is what the President does each year for fiscal policy, in submitting his economic message to Congress.

The bill does not require the Fed to make explicit, precise forcasts of all the results it expects its monetary policies to achieve. But it is implicit that taking account of the ultimate goals of economic policy—jobs and prices—requires some discussion of such matters as fiscal policy, monetary velocity—which is a key component of growth—and interest rates.

In the hearings, Dr. Burns said that while he would object to being required to "quantify" velocity in specific numbers, he has no objection to testifying on expectations for velocity "in general terms," as he has in past hearings. And when "moderate long-term interest rates" are stated as an objective of monetary policy, as they were in the resolution of the 94th Congress and are in this bill, consideration of interest rates is certainly an essential part of the discussion.

The airing of these issues will assure a better understanding of what monetary policies are needed to achieve agreed-upon national economic goals.

Second, broaden representation on the boards of directors of reserve banks.

A Banking Committee staff study in August 1976 showed that the boards of directors unduly represent banker interests at the expense of other groups. Of the nine members of each board, three are bankers chosen by member banks. This will not change in this bill. Three are representatives of "commerce, agriculture, or some other industrial pursuit" elected by bankers, and another three are "public" representatives chosen by the Board of Governors in Washington. The bill provides that members other than the bankers shall be chosen with "due but not exclusive" consideration to the interests of consumers, labor, and services as well as the existing categories of commerce, industry, and agriculture. These broader groups have just as much at stake in monetary policy as business and banking, and are entitled to seats on the boards.

The boards have also shown a remarkable absence of women or minority persons over the years. The bill provides that all directors shall be chosen without discrimination as to race, creed, color, sex or national origin.

Third, require Senate confirmation of the Chairman of the Board of Governors, and provide for coordinating the chairmanship with the term of the President.

Under existing law, members of the Board of Governors undergo Senate confirmation when they are appointed to the Board. But there is no provision for Senate confirmation of a person as Chairman, which requires much more public scrutiny than an appointment as simply one of seven members of the Board. A Board member with a 14-year term could be confirmed by the Senate and then years later, with no further ado, be named Chairman—a job sometimes described as the second most powerful position in the United States.

The bill also coordinates the terms of the Fed Chairman and Vice Chairman with that of the President. As it is, a chairman is named to a 4-year term whenever the office becomes vacant. The appointment could take place even in the midst of a Presidential campaign. The question of whether a President has an opportunity to serve with a Fed Chairman with whom he is compatible should not be left entirely to chance. This bill provides for appointment of the Fed Chairman and Vice Chairman 1 year after the President assumes office.

That provision, as well as Senate confirmation, takes effect in 1982 so that the incumbent is not affected.

The Board of Governors has no objection to Senate confirmation, and many Fed officials past and present have argued for coordinating the chairman's term with that of the President.

Fourth. Prohibit Federal Reserve officers, employees, and directors from acting where they have a conflict of interest.

Under existing law, employees and officers of the U.S. Government may not participate in any matter before the Government in which they or a member of their family or business have an interest, unless there is first a full disclosure of this interest and an official written determination by an official that this interest is not substantial. The Federal Reserve is not covered under existing law. H.R. 8094 extends this prohibition to Federal Reserve bank officers, employees, and directors.

Such reforms have been under discussion for many fears, going back to the Hoover Commission of 1949. This bill should have the full support of the House of Representatives.

LIBRARY OF CONGRESS STUDY ON IMPORTS AND CONSUMER PRICES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 5 minutes.

Mr. VANIK. Mr. Speaker, earlier this year, I wrote to the Library of Congress requesting information on whether—

First, the markup on imported products differs from that on competing domestic products; and

Second, the presumed lower cost of imported products results in an overall lower cost to the American consumer?

I asked the Library to concentrate its study on three commodities which have been of particular concern in recent years: women's apparel, shoes, and mushrooms.

The Library report to the Trade Subcommittee concluded:

With clear understanding that fast facts on the question of markups on imports are lacking and that whatever pertinent information there may exist is often one-sided and selective, the following generalization suggest themselves at least insofar as the three commodities named in your inquiry are concerned:

(1) Markup ratios on imports (assuming that these are lower priced than equivalent domestic products) appear to be higher than those on domestic products since the aim of the retailer is usually to sell identical or equivalent products at the same or approximately the same price. The higher markup may, in part, be justified by sound commercial reasons (higher risk, less reliable delivery, more red tape, and et sim.).

(2) Higher markup ratios do not preclude, in certain instances, some benefit from the lower-cost import from being passed on to the consumer in the form of a lower original retail price of either the imported commodity itself (if sold separately from the domestic product) or the domestic-imported product mix (if the two types of products are identical and sold by the same retailer), or of a higher markdown from the originally set retail price. On the other hand, the available facts also suggest that in other instances the lower cost of imports does not result in any price benefit to the consumer and merely allows the seller a higher profit.

Without any deeper study of this question, it appears that the markup and pricing practices as applied to domestic vs. imported products may vary among the various products on the basis of the type of product, its market structure, and similar factors.

The importance of the issue of markup differentials between domestic and imported products for the U.S. foreign trade policy as well as cost of living and the obvious absence of satisfactory data to provide a reliable and comprehensive answer may suggest the need for an inquiry into this subject either by a Committee of Congress or, at the request of the latter, by the U.S. International Trade Commission under the provisions of sec. 332 of the Tariff Act of 1930.

Therefore, the Subcommittee on Trade is inviting public comment on the library study and is seeking information on the issue of markup differential between domestic and imported products and the effect of imports on consumer prices. It is my hope that the Library study will result in a number of informed and scholarly comments on the role of imports on our economy.

THE PLIGHT OF SOVIET DISSIDENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. DRINAN) is recognized for 5 minutes.

Mr. DRINAN. Mr. Speaker, I am speaking today in conjunction with a resolution introduced by the Honorable EDWARD I. KOCH, to express congressional concern for the plight of two Soviet dissidents who are leaders in the Kiev group to monitor the implementation of the Helsinki accords.

Messrs. Mikola Rudenko and Oleksa Tykhy are victims of the Soviet Union's blatant violations of the human rights provisions of the Helsinki Final Act. These men, along with their compatriots Mykola Nansevych and Myroslav Masynovich who have yet to be tried, were accused of anti-Soviet agitation and propaganda and have been given the maximum sentence of 7 to 10 years in a corrective labor camp plus 5 subsequent years in internal exile.

These men are not alone in their struggles or their suffering. Many Soviet Jews now suffer from the denial of human liberties and the right to emigrate caused by the Soviet violation of the Helsinki Final Act. Thousands of Soviet Jewish families have been separated and hundreds of Soviet men and women have been thrown into prison for no reason other than the fact that they have asked for exit visas to emigrate to Israel.

One of the saddest of these cases is that of Anatoly Scharansky, a leader of the Moscow refusenik communitv, a liaison to the Western press for Soviet Jews who wish to emigrate, and a founding member of the Soviet group to monitor the Helsinki agreement. On March 15, 1977, he was arrested and accused of treason and espionage, the first Soviet Jew since the Stalin era to be charged with this capital offense.

While these dissidents have done nothing more than exercise rights guaranteed to them by the Soviet Constitution and the Helsinki agreement, they have been constantly harassed and been given unjustified punishments. These outrages must stop. If we do not voice our vigorous opposition to this repression then we are guilty of shamefully neglecting the human rights of Soviet Jews. Contrary to Soviet assertions, the issue of human rights is not simply an internal affair. It is the duty of every country to demand that the basic human liberties described by the Helsinki agreement be strictly followed by its signatories.

I am therefore cosponsoring Representative KOCH's resolution to urge the President to put pressure on the Soviet Government to reverse the convictions of Rudenko, Tykhy, and Scharansky, to release them from prison, and to allow them to leave the Soviet Union.

For the sake of these three men, and for all others like them who have been denied the rights granted them by the Helsinki agreement, I urge that the President make it known that the United States expects the Soviet Union to fulfill all provisions of the agreement, and to stand by its pledge of faith to human rights and human freedoms.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. LE FANTE) is recognized for 5 minutes.

Mr. LE FANTE. Mr. Speaker, this morning I had the privilege of attending the signing of the youth employment bill at the White House. I was therefore unable to vote on House Resolution 729 providing funding for the Select Committee on Intelligence. Had I been present, I would have voted in favor of the resolution.

NORTH CAROLINA INSURANCE COMMISSIONER LAUDS THE PRODUCT LIABILITY INSURANCE TAX EQUITY ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. PREYER) is recognized for 5 minutes.

Mr. PREYER. Mr. Speaker, product liability insurance is a growing problem throughout the Nation. With increasing frequency we are hearing from companies that either cannot find an insurance carrier willing to sell them insurance or cannot afford the few policies that are available to them. Personally, I am aware of several such cases in my home State of North Carolina.

Consequently, I was pleased to join with CHARLES WHALEN and others to cosponsor the Product Liability Insurance Tax Equity Act (H.R. 7711). That legislation revises the Federal tax code to

make it easier for manufacturers to establish self-insurance reserve funds to cover all or part of their product liability risk. Similarly, the bill would allow doctors, lawyers, engineers, and others to establish self-insurance trusts for professional liability, such as medical malpractice. In essence, the bill simply removes the Federal tax code discrimination against those who choose to self-insure for product or professional liability.

In order to get an objective assessment of how well the Product Liability Insurance Tax Equity Act would work, if enacted, copies were sent to a variety of informed persons around the country. Their opinions were solicited and responses compiled. Already the CONGRESSIONAL RECORD has carried reprints of endorsements of the bill by half a dozen national trade and professional associations as well as many individual companies.

One response that came in just yesterday is of particular interest to me and my constituents. It is from the commissioner of insurance for the State of North Carolina.

Here is the text of the letter:

DEPARTMENT OF INSURANCE,
STATE OF NORTH CAROLINA,
Raleigh, N.C., August 2, 1977.

Hon. CHARLES W. WHALEN, Jr.,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN WHALEN: thank you for bringing to my attention H.R. 7711 entitled the Product Liability Insurance Tax Equity Act.

A number of companies in North Carolina not out of choice, but of necessity, may be "going bare" on their product liability insurance. I am sure these firms would consider setting aside a fund to cover potential losses if it was to their tax advantage to do so. The North Carolina Hospital Association has formed a self insurance trust and a number of other professional groups are considering the formation of professional liability self insurance trusts. Your bill certainly would be a benefit to individuals and businesses participating in these self insurance pools. I would, of course, be concerned that these funds be set aside in a trust and that to be eligible for the tax deduction that they not be used for any other purposes. . . .

Very truly yours,

JOHN INGRAM,
Commissioner of Insurance.

Mr. Speaker, to set your mind at ease, let me assure you that H.R. 7711 does require that self-insurance reserve funds must be established as trusts. They would have to be administered subject to appropriate State and Federal fiduciary rules, so that the funds thus set aside would indeed be available when needed.

REFUSAL TO BARGAIN: THE NEED FOR LABOR LAW REFORM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. MICHAEL O. MYERS) is recognized for 5 minutes.

Mr. MICHAEL O. MYERS. Mr. Speaker, the National Labor Relations Board—NLRB—has criticized the inequities in the National Labor Relations Act—NLRA—which allow determined employers to violate the law with impunity. That employers can get away with breaking the law is particularly evident in refusal to bargain cases. Collective bargaining is the heart and soul of the NLRA. Yet when an employer refuses to bargain the only remedy available to the Board or a court is an order to bargain—often several years after the initial obligation.

The following is but one example of how an employer unwilling to bargain can break the law for over 6 years and get away with it:

In October 1964, the United Auto Workers—UAW—won a representation election among the employees of the Ex-Cell-O Corp. in Elwood, Ind. The company objected to the election results on grounds that the union had engaged in irregular election activities. When the Regional Director of the NLRB overruled the objections, Ex-Cell-O appealed to the NLRB. The Board reviewed the case, upheld the Regional Director's decision and certified the UAW as the employees bargaining agent. This process took 1 year. Next, the company refused to bargain, announcing it was defying the Board by seeking a judicial test of the Board's certification decision.

Thus, in November 1965, 13 months after winning the election the UAW was forced to file a complaint with the NLRB against Ex-Cell-O for refusing to bargain. As is routine, the Board scheduled a hearing, which at the request of the company was twice postponed until June 1966. The UAW, fed up with company inspired delay, asked the Board for monetary compensation from Ex-Cell-O, in addition to an order to bargain. In March 1967, the NLRB Trial Examiners ruled in favor of the union, ordering Ex-Cell-O to bargain in good faith and "to compensate its employees for monetary losses incurred as a result of its unlawful conduct."

The company then appealed to the full Board, which after nearly 2 additional years of deliberations, upheld the bargaining order but denied the monetary compensation on grounds that it did not have authority under the law to make that award. The Board lamented its inability to do more:

Much as we appreciate the need for more adequate remedies in (refusal to bargain) cases we believe that as the law stands *the proposed remedy is a matter for the Congress* not the Board (emphasis added).

Underscoring its frustration, the Board added:

A mere affirmative order that an employer bargain upon request does not eradicate the effects of an unlawful delay of 2 or more years in the fulfillment of a statutory bargaining obligation. It does not put the employees in the position of bargaining strength they would have enjoyed if their employer had immediately recognized and bargained with their chosen representative. It does not dissolve the inevitable employee frustration or protect the union from a loss of employee support attributable to such delay.

Nevertheless, the penalty for Ex-Cello-O, which had defied the legal obligation to bargain for 6 years was simply an order to bargain (185 NLRB 20). The UAW appealed the Board's decision against the monetary award to the U.S. Court of Appeals. The court denied the appeal in June 1971, basically because it determined that the Board had in limiting its decision to an order to bargain operated within its mandate. On the other hand, the Court admonished "the Board to review its procedures for those cases in which the union wins the election and the company does not acquiesce, toward the objective of moving with expedition to identify those cases that raise no substantial problem and to enter a bargaining order even in advance of its decision on other matters that may require further consideration." (76 LRRM 2753).

The Thompson-Williams Labor Reform bill would resolve the issues raised by the Board and the Court of Appeals in the Ex-Cello-O case. The Board asked the Congress for more authority in refusal to bargain cases. Section 8 of H.R. 8410 would give the Board authority to order a party who illegally refuses to bargain to compensate its employees. The remedy proposed applies to the initial bargaining situation. Employees would receive the benefit of the average wage settlement negotiated by workers at plants where collective bargaining proceeded lawfully. This provision would take the profit out of violating the law and speed the process of collective bargaining in good faith.

LEGISLATION TO AMEND INTERNAL REVENUE CODE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ROSTENKOWSKI) is recognized for 5 minutes.

Mr. ROSTENKOWSKI. Mr. Speaker, at the request of the Treasury Department, I am introducing a bill which would amend section 896 of the Internal Revenue Code to permit the President to take retaliatory action in the case of foreign countries with integrated tax systems which discriminate against investment in those countries by U.S. shareholders.

Certain foreign countries such as Germany and France have in recent years adopted integrated tax systems under which a refund is paid to resident shareholders of part or all of the corporate tax paid with respect to distributed profits. In certain of these countries the refund is paid to resident shareholders but not to U.S. shareholders. Consequently, the corporate tax burden increases in direct proportion to the foreign corporation's degree of U.S. ownership.

This bill would give the President authority, if he determines that a foreign country does not accord investment by U.S. residents treatment comparable to investments by residents of that foreign country, to tax at comparably discriminatory rates investment in the United

States by nationals or residents of that country.

At the time the task force on foreign source income of the Committee on Ways and Means released its report earlier this year, the members of the task force expressed their concern about the problem of foreign integrated tax systems which discriminate against U.S. shareholders and recommended that the committee consider legislation along these lines. I am introducing this bill at this time to provide an opportunity for public comment before any committee consideration.

LEGISLATION TO REDUCE COLUMN 2 DUTY RATES ON IMPORTED SILK FABRICS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. AuCoin) is recognized for 5 minutes.

Mr. AuCOIN. Mr. Speaker, today I am introducing a bill that in and of itself may be of little significance. However, as a symbol, the bill has the potential to be tremendously significant.

The legislation would reduce the column 2 duty rates on imported silk fabric. The prime beneficiary of this duty reduction would be the People's Republic of China.

For the People's Republic of China, the weaving of silk fabrics is a cottage industry, engaged in by the people of almost every village and town. It is not the largest industry in China, but Chinese officials tell American businessmen it may be one of the most important because of its long, historic significance to their ancient country. Chinese silk is the best in the world and when it is exported from their country, their pride goes with it.

Chinese silk exports have been a staple in Sino-United States trade for many years. Even though other fabrics have come to dominate U.S. markets, silk still retains an important niche in the marketplace.

When Sino-United States relations underwent a thaw in 1972, U.S. imports of Chinese silk fabrics increased from $3,000 in 1971, $209,000 in 1972, and $455,000 in 1973.

Not surprisingly, Chinese silk imports to the United States tapered sharply in 1974, the year the Trade Reform Act was passed. But even the duties imposed as a result of that act have not completely dried up the U.S. thirst for silk fabrics, as Chinese exports to America totaled $195,000 in 1975.

In contrast to up and down Sino-United States trade is Japan which is the major importer of Chinese silk fabrics and raw silk. Japan's gradual rapprochement with the People's Republic of China beginning in the 1960's and culminating with formal diplomatic recognition in 1972 are attributed as major factors in improved Sino-Japanese silk trade, which grew from $7.9 million in 1970 to $56.8 million in 1975.

Currently, there is no U.S. duty on silk yarn, largely because there is no raw silk production in the United States.

My bill does not propose eliminating, or suspending duty rates in silk fabric in recognition of a small domestic industry involvement and capacity. There has been some slight difference of opinion on how much domestic capacity exists in the production of silk fabric. I am advised by the International Trade Commission that insufficient information is at hand to make a firm conclusion. Consequently, I have requested Mr. Daniel Minchew, Chairman of the International Trade Commission, to instruct that a study be made to determine whether reduction in duty rates on imported silk fabric would cause any harm to domestic textile manufacturers.

My own belief at this point is that at most there would be a minute impact. For example, in 1960, the Tariff Commission held hearings to determine what textile fabrics should be included in a quota system and found silk fabric imports not harmful to domestic industry. At that time, silk fabric imports were 17 times larger than they were in 1976. This is largely so because silk is a luxury item, costing today something around $11 per pound while synthetic fabrics sell at 90 cents a pound.

While the physical impact of the bill is important in that it will make imported silk fabrics, especially those from the People's Republic of China, slightly less expensive, the main objective I have for this legislation is what it will symbolize.

Earlier this year, I introduced companion bills that would extend U.S. export credits through the Export-Import Bank to the People's Republic of China. The purpose of those bills is to serve as tools for a gradual, incremental economic rapprochement with the People's Republic of China.

If the initiative launched with the 1972 Shanghai communique is to be kept alive, we must continually seek ways to move toward normalization of our relations with the People's Republic of China. Still faced with the "Two China" question which at this moment is unresolvable without a major upheaval, I believe small, symbolic steps are extremely important, and necessary.

Distinguished columnist Joseph Kraft holds a similar view as expressed in a recent article published in the July 28 Washington Post in advance of Secretary of State Cyrus Vance's trip to the Far East. It said:

> Against this background, the visit to the People's Republic of China by Secretary of State Vance holds a fair prospect. The Chinese are unlikely to demand that Washington abandon all connection with Peking. On the contrary, there is hope that Vance can set the stage for forward motion in Sino-American relations on a wide range of secondary issues such as trade, credits and cultural exchange. Progress on these items can move steadily forward over several years until the day when American opinion is finally prepared for the break with Taiwan that must eventually come as the price for full normalization of relations with Peking.

I believe the bills I introduced earlier dealing with U.S. export credits to the People's Republic of China, and the bill I introduce today to reduce import duties on silk fabric, are the kind of small, but symbolic tools Secretary Vance needs to carry to leaders in Peking.

In a recent letter to Secretary Vance, I made this suggestion, noting,

> There is great advantage in the timing of your trip to the People's Republic of China. All indications are that China is prepared to negotiate for large imports, including entire processing plants, oil drilling and production equipment and sophisticated technology such as telecommunications equipment. The Chinese appear to have whittled down their debt and are in a position to look at large new purchases.

The stakes in normalizing commercial relations with the People's Republic of China are large. In my letter to Secretary Vance, I also said,

> In years to come, I foresee a vital trading partnership among Pacific Rim countries, laced together by strong commercial ties between the United States, Japan and the People's Republic of China. This will be good for our nation and for my state in particular, as it will stimulate U.S. productivity, generating jobs and new opportunities.

The bill I introduce today will not bring all this about, but it is a beginning step down a road we must, and inevitably will, travel.

FOOD STAMPS—AN OVERDUE OVERHAUL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. Levitas) is recognized for 5 minutes.

Mr. LEVITAS. Mr. Speaker, as we consider the food stamp program and its future, several hard questions must be asked. Why should we have a food stamp program at all? Why should we taxpayers pay to feed others? If there should be a food stamp program of any sort, what changes or reforms are needed in order to make it work and eliminate fraud?

Our Nation has always been humane and our people humanitarian. Unlike some other nations and people on this Earth, we are unwilling to see human beings, who are unable to provide for themselves, starve in the streets. This concern stems, I believe, from our religious heritage in the Judaeo-Christian tradition. Samuel Johnson said:

> A decent provision for the poor is the true test of a civilization.

Therefore, I think it is clear that we will have in the future, as we have had in the past, some form of program which will provide basic nutrition to stave off starvation of our neediest people.

In the past, we have had a variety of programs to meet this need. The surplus commodity programs and other forms of food programs have been used to serve this purpose. The food stamp program is merely the most recent method of dealing with this problem. Before food stamps, we had the surplus commodity program which gave away surplus food at distribution centers to eligible poor recipients. However, the

administrative costs and the problems inherent in giving away the commodities led Congress to believe that it would be better to utilize the free enterprise market system to distribute the food by employing food stamps and letting the recipient exchange the coupons for food at the grocery store. Thus, Congress set up the food stamp program in 1964.

As is frequently the case, what may have been a good and workable idea at first, when run by the Federal Government soon turns into an administrative nightmare rife with fraud and abuse, failing to fulfill the purposes for which it was intended. Thus it came to pass with the food stamp program. The results: soaring administrative costs; fraud in the use of the stamps; theft of the purchase money funds; exclusion of the neediest; inclusion in the program of persons who were not in need. Even some perfectly able-bodied people were receiving benefits they either were not or should not have been eligible to receive.

Evidently a major overhaul and reform of the system is needed, if the program is to be continued at all. The steps taken by the House this year in passing H.R. 7171 are a first effort in achieving reform. As the Senate-House conference progresses and final action is taken, we will see how that comes out.

Some of the major actions taken by the House in its food stamp reform bill this year to overhaul the system, should be noted:

First, the bill tightens the standards of eligibility for food stamp recipients. Only those people whose annual income is at or below the poverty level will be eligible to receive food stamps. The bill trims the food stamp rolls of college students, persons whose resources are above the poverty level, or other persons who should have never been eligible.

The new bill also mandates work registration requirements so that recipients who can work must register for work, search for work, accept available work, and continue to work or lose food stamp eligibility. Also, any household whose head has voluntarily quit a job without good cause will not be eligible to participate in the program for 60 days.

The reform also provides for pilot "workfare" projects to be established in the States. In these projects, if those who register for work are not able to find jobs in the private sector within 30 days, they will have to accept public service jobs at the minimum wage rate, paid in food stamps, in order to earn their food stamp allotment each month. The change in approach from "welfare" to "workfare" is a major breakthrough.

It must be obvious that work registration and workfare are going to trim the food stamp rolls of people who are able to work but prefer not to. When resources are finite—and as a result of an amendment by Georgia Congressman DAWSON MATHIS we also are establishing a ceiling limit on the amount which can be appropriated for the food stamp program, for the first time in the program's history—only those who are truly in need should participate and this is what these reforms are trying to accomplish.

Another aspect of the present system which was due for reform is that which required that a portion of the food stamps be purchased by the recipients. This misleading provision allowed people to believe that food stamps are not "free" but are paid for by food stamp recipients. It is time that we recognize the food stamp program for what it is, a way of providing food to the poor who cannot provide for themselves. The purchase price of food stamps never covered the full value of the stamps much less the administrative costs of the program. The truth is that the food stamp program cost American taxpayers over $5 billion last year alone. Obviously these costs were not covered by any food stamp purchase moneys. Even the portion of food stamps which were purchased were really giveaways because most people who purchase food stamps do so with money provided by the Federal Government through other programs like welfare and SSI. Food stamp recipients have merely been conduits for transferring money from the Department of Health, Education, and Welfare to the Department of Agriculture, with the loss of administrative costs and other slippage in between.

By not requiring that a portion of the food stamps be purchased, we have labeled the food stamp program for what it is, and proceeded to make those changes that will try to enable it to fulfill its purpose, while at the same time cutting down on the fraud and abuse and waste.

The biggest bonus to the American taxpayer of eliminating the purchase provision is that we are at the same time reducing the total amount of food stamps a person will receive by about 30 percent which will result in taking $3 billion worth of food stamps out of circulation. That is $3 billion worth of food stamps less for fraud, black marketing, and abuse. That means $3 billion less food will be purchased by food stamps than heretofore.

We will also eliminate the 17,000 sellers of stamps who were handling the purchase money—which passed through, slipped between their fingers, and, in too many instances, was pocketed. The accounting, handling, and transfer of these funds was expensive and resulted in millions of dollars of loss.

It is estimated that this measure will reduce the administrative costs of the program and save taxpayers $35 million, as well as reduce the number of Government employees it took to administer the program and account for that money.

Finally, it has become glaringly apparent that the food stamp program is not even attaining its basic goal—the feeding of the poorest people in the country. The truly indigent, living a hand-to-mouth existence, are so dependent on an immediate cash flow, that they are unable to accumulate for 2 weeks the money required to purchase the stamps—these people are simply too poor to take part in the program that was basically intended to help them and not people who drive up to the store in large cars.

Americans will take care of the unavoidably poor, the handicapped, the hungry—but we are not to be expected to take care of those who refuse to make the attempt to care for themselves. I believe that the steps Congress is taking to overhaul the food stamp program are evidence of America's traditional will to make "a decent provision for the poor," while reasserting our traditional beliefs that those who are able, must work for their keep.

ANNOUNCEMENT AS TO VOTE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANIELSON) is recognized for 5 minutes.

Mr. DANIELSON. Mr. Speaker, I was compelled to be absent from one vote on Thursday, August 4, 1977, in order to attend a meeting at the White House. I missed rollcall vote No. 502, and would like to announce how I would have voted had I been present. Rollcall No. 502, House agreed to a motion to resolve itself into the Committee of the Whole; 378 yeas to 3 nays. I would have voted "yea."

UTAH'S WORKFARE PROGRAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Utah (Mr. MCKAY) is recognized for 5 minutes.

Mr. MCKAY. Mr. Speaker, the welfare reform issue has been a subject of great interest recently. Americans are looking to the announcement of the President's new welfare proposals for solutions to skyrocketing welfare roles and welfare abuses.

I would like to draw your attention to Utah's innovative and successful approach to public assistance programs. In the 18 July 1977 edition of U.S. News & World Report, Utah's "workfare" program, with its emphasis on putting welfare recipients to work, is described. The program's record has been so successful that several other States are now patterning their plans after the Utah approach.

The workfare program is meeting the challenges of providing vocational training and jobs to those that are able to work and removing from the welfare rolls those that are able but refuse. In addition, many participants are experiencing new dignity as they make it on their own.

I invite consideration of Utah's successful model as a possible guide in combating the Nation's welfare ills. I am also submitting the following U.S. News & World Report article for your information:

WHEN STATES TELL PEOPLE THEY MUST WORK FOR WELFARE

The idea that able-bodied people should be required to work for their welfare money is spreading rapidly across the U.S.

One such "workfare" program attracting nationwide attention is operating smoothly in Utah.

So successful is the Utah plan in moving people off relief rolls that half a dozen other States are taking a look at it as a possible model for programs of their own. Some believe it might even be useful to the Carter Administration in its search for national welfare reforms.

Besides Utah, at least 16 States have stiffened their work requirements or added new work incentives in the last two years. A number of other States and many cities have some kind of program aimed at putting relief recipients to work. And the Federal Government's Work Incentive Program—known as WIN—is steadily stepping up its pace in finding jobs for welfare recipients.

On the job, on the dole. The Utah plan is unique in several respects. It is sterner and goes further than most other programs. It is mandatory. And it doesn't just train people for future jobs. It actually puts them to work while they are still drawing welfare payments.

In most places, such work requirements apply only to people on programs financed by State or local funds, such as "general assistance" or "direct relief."

Utah's plan applies to those who receive Aid to Families with Dependent Children (AFDC), a huge, nationwide program that draws heavily upon federal funds. Utah officials say theirs was the first work requirement approved by the Department of Health, Education and Welfare for application to AFDC.

"Utah is the first State where people earn their welfare grants," claims the program's co-ordinator, Usher T. West.

Officially, Utah's method is called a work-experience and training program. But its training is not the usual type done in classrooms. Trainees learn to work by actually working. If private employment cannot be found for them, they are put to work for public agencies, doing jobs that are needed by State or local governments. They serve as teachers' aides in their neighborhood schools or plant trees in public parks, for example. They work three days a week but remain on the welfare rolls until they find regular jobs.

Only ill, aged or disabled persons or mothers with children under 6 years of age are exempted. All others are told to take one of the jobs offered to them or lose all or at least a part of their welfare payments.

Those who participate in the program are helped by the State to find jobs in private industry. Many are doing so.

In one six-month period, from July through December of last year, 782 people were assigned to the work program. Of that total, 311 were removed because they did not perform as required. But 11 people were hired by the sponsors who gave them their training jobs, and 218 found other kinds of employment. In addition, 109 mothers found enough work to reduce the amount of welfare funds needed to support their families.

"Feeling great." A 32-year-old mother of two children was hired recently as a full-time office worker in Salt Lake City's assistance-payments administration, the same office that handed her welfare checks for 13 years before she took job training for two years. During the instruction period, she says, "even though I was getting welfare I felt I was working for it." And now, she adds, "With my new job I am barely making ends meet. But I feel great because I am making it on my own."

Utah officials point out that communities as well as individuals benefit from the program. Some agencies, such as private nonprofit organizations that are constantly short of funds, report that the services of welfare recruits have been invaluable.

One self-help agency in Salt Lake City, for instance, had the funds to buy insulation for the homes of elderly poor people, but lacked money to hire workers to install it. Welfare trainees have been assigned to the job. Another self-help group put trainees to work repairing the homes of elderly Salt Lake City residents.

A question of legality. Some critics charge that, Utah's job-training effort is nothing more than a thinly disguised public-works program that uses underpaid welfare recipients in place of regular employees.

Legal-service lawyer Lucy Billings says she is considering filing a court suit against the program on the ground that it violates federal regulations that people cannot be required to work for their welfare payments.

It took Utah three years to get its program approved by the U.S. Department of Health, Education and Welfare. For 18 months, HEW withheld federal contributions to Utah's program for Aid to Families with Dependent Children. It cost the State almost a million dollars to make the AFDC payments entirely from State funds. But many Utah people feel that it was well worth the cost.

Utah officials concede that their program might not work so well in other parts of the country, especially in big cities where population is denser and welfare rolls are much larger. Of Utah's nearly 1.2 million residents, only 39,000 are getting money grants of aid. Also, it is suggested, labor unions in more-industrialized States might oppose welfare people being given jobs that might be sought by union members.

But in the view of Robert W. Hatch, a field director for the Utah assistance-payments administration, public acceptance of the idea that welfare recipients should work for their money is spreading throughout the nation. Says Hatch: "I think that in time, putting welfare clients to work will become a common practice."

In fact, a trend in that direction is already apparent.

Oklahoma has a 2-year-old work-experience program that was passed by the legislature at the urging of Governor David Boren. It requires that anyone 18 or older in a family receiving Aid to Families with Dependent Children must visit the local employment office and sign up for a job that's available.

In 1975, there were 2,300 persons participating in the Oklahoma program. Many worked in State institutions, hospitals or in county offices for $5 a day to offset expenses, plus their regular AFDC checks.

"They are usually placed in jobs where they can easily be trained and hopefully be picked up by the business community," says a State spokesman. Last year, more than 700 persons were placed in permanent positions outside the government.

The risk of rejecting work. The Texas legislature recently passed legislation to supplement the Federal Government's Work Incentive Program. Welfare recipients must register for work, and if they reject a job without a good reason, their benefits may be cut off after an administrative review.

North Carolina's legislature this year passed a law requiring welfare recipients to register for work.

As the law's sponsor, State Senator E. Lawrence Davis of Winston-Salem, explains it: A family head who fails to register is taken off the rolls. But aid to his or her children will continue as "protective payments" made through some other person or perhaps an agency, such as a church. Since the law did not take effect until July 1, it's too soon to tell how effective it will be.

A part-time work force. In the State of New York, all employable persons receiving general welfare-assistance payments have, since May 1, been required to work three days a week in a local-government agency if jobs are available.

There are about 60,000 such persons, and State Social Services Commissioner Philip Toia says: "We're hoping to develop jobs within local-government agencies for at least 30,000 of those employables within the next three months. We're hoping that, when faced with working three days a week, many will go and get a full-time job."

One problem is that four fifths of the employables covered by the program are in New York City, where in the last two years thousands of public employes have been laid off in the city's effort to cope with a financial crisis. "I anticipate some complaints from the municipal workers' unions," say Assistant Welfare Commissioner Irwin Brooks. However, according to a *New York Daily News* poll published May 23, about 87 per cent of residents in the New York metropolitan area approve of the new workfare program.

Work-for-welfare bills similar to New York's are pending in several States, including Connecticut and New Jersey.

Massachusetts is one of the States studying the Utah plan of mandatory work for heads of AFDC families. Since 1975, Massachusetts has barred all employable persons from direct relief or general-assistance rolls. The State of Rhode Island followed suit last September, cutting its relief case load by more than 20 per cent.

Million-dollar savings. Bridgeport, Conn., started last year a plan requiring employable people receiving welfare to work one or two days a week, depending on the amount of their aid. About 300 persons out of a case load of 1,330 are now working. If they fail to work for a period of two weeks, their benefits are automatically terminated.

Result. Bridgeport's case load has been cut 45 per cent in a year's time, with a million-dollar reduction in the city's welfare budget.

Milwaukee County, Wis., has a locally run pay-for-work program requiring all able-bodied welfare applicants to take specially created jobs in municipal or county departments. They are paid $2 an hour for a 32-hour workweek.

One experiment being watched closely is a "supported work" program run by the Manpower Demonstration Research Corporation, a nonprofit, tax-exempt organization set up with the support of the Ford Foundation and five Federal Government agencies—principally the Department of Labor.

It has 15 projects in 13 States that provide jobs, mostly with public or nonprofit agencies, for more than 2,000 marginally employable people, including AFDC mothers. Instead of welfare checks, they get paychecks at minimum-wage rates.

A mixture of welfare funds and grants is used to finance the program. The workers will be helped to find permanent jobs in private industry once they have developed the necessary skills.

Many towns and some States have found that the administration of work-for-aid programs is too costly to justify the small numbers put to work. But the search for practicable systems goes on—and widens.

In the words of Fritz Kramer, a manpower specialist with the Labor Department: "A number of States are exploring ways to provide jobs in either the public or the private sector to get people off the welfare rolls."

A Federal Agency That Finds Jobs

After years of costly failure, the Federal Government's Work Incentive Program (WIN) is improving its performance in finding jobs for people on welfare rolls.

Last year, WIN placed more than 210,000 persons in jobs. That was almost twice the number it placed in the entire first four years of its life, from 1968 through 1971.

The upturn began in 1972, after the program's emphasis was shifted from job training to job finding.

WIN's targets are the people in the huge Aid to Families with Dependent Children (AFDC) program. About half of those for whom jobs are found are enabled to get off the AFDC rolls entirely, officials say, with the other half able to get by on reduced benefits.

Despite WIN's efforts, the number receiving AFDC payments has hit a new high of more than 3.6 million families, which contain a total of nearly 11.3 million individuals.

CONGRESSIONAL BLACK CAUCUS POSITION ON ENERGY POLICY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. MITCHELL) is recognized for 5 minutes.

Mr. MITCHELL of Maryland. Mr. Speaker, energy policy will be the subject of major debate and decisions for a long time to come. The House is considering legislation which is the first step in responding to what has been described as an energy "crisis." The Congressional Black Caucus has put forth a position statement on energy policy which I am inserting in the RECORD for the benefit of our colleagues in Congress and for the public. Our primary concern is that the price mechanism not be used as the primary means of controlling energy use. We are concerned that with energy, as with other policies involving large shifts of money, the poor will be hurt the most by the decisions on those policies. For that reason, we urge careful consideration of this statement and reflection upon the impact of energy policy decisions on the poor.

THE CONGRESSIONAL BLACK CAUCUS STATEMENT ON NATIONAL ENERGY POLICY, AUGUST 1977

OIL AND NATURAL GAS PRICING

The Administration proposes to reduce oil and gas consumption by using prices and taxes as a rationing device. As a national policy, this would institutionalize OPEC's artificially high fuel prices, which do not reflect the cost of production. The demand for fuel will become a function of people's ability to pay higher prices. Those who are well off can continue to consume large amounts of fuel. This option is not available to poor and low income people who already find it difficult to meet skyrocketing energy costs.

The oil equalization tax would place a tax on the difference between the domestic price of oil and the world price of oil. This tax would significantly raise the consumer cost of home heating oil, gasoline, and high energy-intensive products. The equalization tax rebates do not cover the indirect cost of increases in the production of goods. These increases include the increased processing and transport costs of food and clothing, costs which will be absorbed by the consumer.

The Caucus also feels that OPEC equivalency pricing on natural gas is an inadequate way to curb natural gas consumption. The price of natural gas must also reflect the cost of production. The industry cannot be allowed to arrive at an artificially high price that would strain consumer budgets. However, special provisions must be made to avoid penalizing low income households who already pay a disproportionate amount of their income for fuel. As a means of reducing fuel consumption, the Caucus recommends increased use of acceptable alternative technologies, and stringent conservation measures rather than price increases.

HORIZONTAL DIVESTITURE

Unless the oil and gas companies are forced to divest themselves of alternative energy sources, they will continue to keep supplies low in order to maximize their profits. For example, today 24 oil and gas companies control approximately 44 percent of leased coal reserves, yet only 8 of the 24 currently produce coal on their leased land. As long as the oil companies are allowed to control alternative energy sources, the domestic price of fuel will continue to be controlled by OPEC and the major oil companies, and the market cannot operate in a free and unfettered manner. We support horizontal divestitute by oil and gas companies.

CONSERVATION

The National Energy Plan is insufficient as a conservation measure. The goal is to increase efficiency so that the same amount of fuel can do more work. It is not enough simply to provide tax credits for home insulation. Low income households do not earn enough to take advantage of tax credits. Grants and low interest loans must be provided. Mandatory lighting, heating, and machinery efficiency standards for industry as well as standards for all home appliances should be imposed. The Caucus endorses a ban on energy inefficient cars. Simply taxing them is a discriminatory policy which perpetuates conspicuous fuel consumption by the affluent.

UTILITIES

The present utility rate structure subsidizes industry at the expense of the residential and small commercial consumer. The Caucus supports the elimination of the declining block rate and endorses the concept of peak hour pricing. The oil utility user tax should be eliminated in areas where the Environmental Protection Agency has granted exemptions from coal conversion for environmental reasons.

JOBS AND MINORITY PARTICIPATION

Between 1950 and 1971, a total national employment increased 41% while jobs in the energy-producing industries increased only 5.5%. In the past, U.S. energy production has been capital intensive. The National Energy Plan must include a commitment to alternative technologies which are high labor intensive in order that we may tackle the problems of energy and unemployment together.

The new Department of Energy should adopt as a priority the support and enhancement of minority business participation in the energy field, particularly in newly developing and expanding areas such as solar energy and refining technologies. In addition, the Small Business Administration should establish, by industry type, dollars and contracts goals for minority business participation in the SBA 8(a) contract program. Standard operating procedures and other regulatory safeguards and incentives should be established to ensure that there be at least a 10 percent set-aside for minority businesses, as has been done with the Public Works legislation.

HOUSING

Energy policy will have a profound impact on the housing industry. The weatherization program should be expanded to provide grants for households with incomes less than $8,000 and low interest rate loans for households with incomes between $8,000 and $14,000. A refundable tax credit should be provided for the installation of home solar and wind energy devices.

TRANSPOPTATION

Regional differences are of crucial importance in the national energy picture. In the West and in rural areas, "captive drivers" who must buy large amounts of gas may have to pay more in fuel costs and taxes than the President plans to give them in rebates. The national energy policy should account for these discrepancies.

Non-drivers are likewise affected. If mass transit fares go up, rebates may not be adequate compensation. Surface mass transit should be subsidized by government in order that the increased operating costs not be passed on to the passenger.

ALTERNATIVE TECHNOLOGIES

The Caucus supports the move away from dependence on oil and natural gas as primary fuel sources, and encourages conversion to coal where environmentally practical. Additionally, a crash program should be undertaken to develop alternative renewable energy sources. These include solar, wind, geothermal, and other technologies with ready sophistication for immediate implementation, and which are environmentally acceptable.

THE ROLE OF GOVERNMENT IN ENERGY PLANNING

The Congressional Black Caucus believes that the government must take an active role in guaranteeing adequate supplies of energy at the most competitive prices. We believe that the Federal government should assume responsibility for the importation of petroleum products, and that the leasing procedures applied to federal lands and waters be revised.

The multinational oil companies have been willing participants in the recent price increases promulgated by OPEC. These firms see higher OPEC price levels as serving their own interests by reinforcing the monopoly-distorted price of oil. A government importer could not only obtain a more competitive price from producing nations, but could designate where the oil would go in the U.S., strengthening the independent refining and distributing network within the U.S.

As evidenced by last winter's natural gas emergency, the federal leasing procedure has failed to produce compliance from non-producing lessees. The procedure should be amended to allow the government to purchase the services of private firms to extract resources from government properties, and to allow the government to auction those products in the domestic market.

LEGISLATION TO STOP THE BOOTLEGGING OF CIGARETTES

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from New York (Ms. HOLTZMAN) is recognized for 30 minutes.

Ms. HOLTZMAN. Mr. Speaker, today Mr. FISH and I are introducing a bill to stop the bootlegging of cigarettes, which deprives New York and other States of millions of tax dollars every year. Federal criminal penalties and assistance are sorely needed to prevent the interstate smuggling of cigarettes in avoidance of local tax laws.

Contrary to popular belief, cigarette smuggling is a pervasive, serious crime with a major impact on many States. Cigarette tax evasion activities cost 14 States, New York, Massachusetts, Maine, Connecticut, New Jersey. Pennsylvania, Ohio, Florida, Arkansas, Minnesota, Wisconsin, Texas, and Washington, an estimated $391 million in revenue losses each year. Overall, the Nation's net revenue loss from cigarette bootlegging was estimated at $337 million in fiscal year 1975.

The basic cause of cigarette bootlegging is the great disparity in State taxes. Tax rates range from 2 cents a pack in the State with the lowest taxes, to 23 cents in New York City. A substantial impetus exists for criminal activity, since there is a $2.10 profit to be made on a carton of bootleg cigarettes in New York City. Over 480 million packs of cigarettes are smuggled into New York State every year; 384 million of these are bootlegged into New York City. In other words, out of every two packs of cigarettes sold in New York City, one is bootlegged. Cigarette trafficking costs New York City taxpayers $85 million annually in lost tax revenues from legitimate sales.

Although New York provides the most glaring example of the effects of smuggling operations, other States also suffer severe financial loss from the trafficking in contraband cigarettes. New Jersey has lost about $119 million in taxes. Pennsylvania has lost $176 million. Connecticut's estimated revenue loss is $86 million. The problem is not confined to the Eastern seaboard States. Illinois has lost an estimated $75 million in tax revenues, and Ohio has incurred an approximate $30 million loss.

Cigarette smuggling is a major source of income for organized crime groups. In fiscal year 1975–76, illegal profits in eight Eastern States were estimated at $97.9 million. These profits, in turn, finance other illegal operations, such as narcotics and loan-sharking.

State efforts to curtail cigarette smuggling have been simply ineffective. The authority of State tax enforcement personnel does not extend beyond the borders of their respective States. Furthermore, State law enforcement efforts are not coordinated. Individual States only keep records on suspected smugglers and trafficking operations within their respective borders. Interstate cooperation in the fight against trafficking is rare, and so one jurisdiction does not have easy access to potentially helpful information compiled by another jurisdiction. Therefore, since cigarettes can easily be transported across State lines, it is practically impossible to apprehend bootleggers once they leave a particular State.

Given the interstate nature of smuggling operations, Federal regulation is the best way to combat the problem. Our bill would complement State efforts to enact and enforce cigarette tax laws. My legislation would make it unlawful knowingly to ship, transport, receive, or possess contraband cigarettes. Persons who distribute more than 20,000 cigarettes in a single transaction would be required to maintain records of their shipment, receipt, sale, or other disposition, according to rules prescribed by the Secretary of the Treasury. Any violation of these Federal regulations of trafficking would result in a maximum fine of $10,000, or 2 years' imprisonment, or both.

Contraband cigarette trafficking is a problem which adversely affects millions of Americans. Stiff Federal regulations are necessary to crack down on this criminal activity. We, therefore, urge speedy enactment of this bill.

The text follows:

H.R. 8854

A bill to amend title 18 of the United States Code to eliminate racketeering in the sale and distribution of cigarettes, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

STATEMENT OF FINDINGS AND PURPOSE

SECTION 1. (a) The Congress finds that—

(1) there is a widespread traffic in cigarettes moving in or otherwise affecting interstate or foreign commerce, and that the States are not adequately able to stop the movement into and sale of such cigarettes in violation of their tax laws through the exercise of their police power;

(2) there is a causal relationship between the flow of cigarettes into interstate commerce to be sold in violation of State laws and the rise of racketeering in the United States;

(3) hundreds of millions of dollars have been realized annually in profits from the sale of such cigarettes in violation of State laws, and such profits have been channelled into other illicit activities;

(4) a sharply expanded Federal role in the fight against cigarette smuggling is essential if there is to be an effective law enforcement effort against cigarette smuggling, since the interstate nature of the crime places individual States at too great a disadvantage to handle these problems effectively;

(5) certain records maintained by dealers in cigarettes will have a high degree of usefulness in criminal, tax, and regulatory investigations.

(b) It is the purpose of this Act to provide a timely solution to a serious crime problem and to help provide relief to many cities and States.

SEC. 2. Title 18, United States Code, is amended by inserting immediately after chapter 113 thereof the following new chapter:

"Chapter 114.—TRAFFICKING IN CONTRABAND CIGARETTES

"Sec.
"2341. Definitions.
"2342. Unlawful acts.
"2343. Recordkeeping and reporting.
"2344. Penalities.
"2345. Effect on State law.
"2346. Enforcement and regulations.

"§ 2341. Definitions

"As used in this chapter—

"(1) the term 'cigarette' means—

"(A) any roll of tobacco wrapped in paper or in any substance not containing tobacco, and

"(B) any roll or tobacco wrapped in any substance containing tobacco which, because of its appearance, the type of tobacco used in the filler, or its packaging and labeling, is likely to be offered to, or purchased by, consumers as a cigarette described in subparagraph (A);

"(2) the term 'contraband cigarettes' means a quantity in excess of twenty thousand cigarettes, bearing no evidence of the payment of applicable State cigarette taxes in the State where they are found, if such State requires a stamp, impression or other indication to be placed on packages or other containers of cigarettes to evidence payment of cigarette taxes, and which are in the possession of any person other than—

"(A) a person holding a permit issued pursuant to chapter 52 of the Internal Revenue Code of 1954 as a manufacturer of tobacco products or as an export warehouse proprietor, or a person operating a customs bonded warehouse pursuant to section 311 or 555 of the Tariff Act of 1930 (19 U.S.C. §§ 1311 or 1555) or an agent of such person;

"(B) a common or contract carrier, if the cigarettes are designated as such on the bill of lading or freight bill;

"(C) a person licensed or otherwise authorized by the State where the cigarettes are found to deal in cigarettes and to account for and pay applicable cigarette taxes imposed by such State; or

"(D) an officer, employee, or other agent of the United States or a State, or any agency or instrumentalities of the United States on a State (including any political subdivision of a State) having possession of such cigarettes in connection with the performance of his official duties;

"(3) the term 'common or contract carrier' means a carrier holding a certificate of convenience or necessity or equivalent operating authority from a regulatory agency of the United States or of any State;

"(4) the term 'State' means any State, or the District of Columbia;

"(5) the term 'dealer' means any person who sells or distributes in any manner any quantity of cigarettes in excess of 20,000 in a single transaction; and

"(6) the term 'Secretary' means the Secretary of the Treasury or the delegate of the Secretary of the Treasury."

"§ 1286. Unlawful acts

"(a) It shall be unlawful knowingly to ship, transport, receive, or possess contraband cigarettes.

"(b) It shall be unlawful to knowingly make any false statement or representation with respect to the information required by this chapter to be kept in the records of a dealer.

"§ 1287. Recordkeeping and reporting

"Each dealer shall maintain such records of shipment, receipt, sale, or other disposition of cigarettes at such place, for such period, and in such form as the Secretary may by regulations prescribe.

"§ 1288. Penalties

"(a) Whoever violates any provision of this chapter or regulations promulgated thereunder shall be sentenced to pay a fine of not more than $10,000, or to be imprisoned for not more than two years, or both.

"(b) Any contraband cigarettes involved in any violation of the provisions of this chapter shall be subject to seizure and forfeiture, and all provisions of the Internal Revenue Code of 1954 relating to the seizure, forfeiture, and disposition of firearms, as defined in section 5845(a) of that Code, shall, so far as applicable, extend to seizures and forfeitures under the provisions of this chapter.

"§ 1289. Effect on State law

"Nothing in this chapter shall be construed to affect the concurrent jurisdiction of a State to enact and enforce State cigarette tax laws, to provide for the confiscation of cigarettes and other property seized in violation of such laws, and to provide penalties for the violation of such laws.

"§ 1290. Enforcement and regulations

"The Secretary shall enforce the provisions of this chapter and may prescribe such rules and regulations as he deems reasonably necessary to carry out the provisions of this chapter.".

SEC. 3. (a) Except as provided in subsection (b), the provisions of chapter 114 of title 18, United States Code, shall take effect on the first day of the first month which begins more than one hundred and twenty days after enactment.

(b) The following sections of chapter 114 of title 18, United States Code, shall take effect on the date of enactment of this Act: Sections 2341, 2342(a), 2344, 2345, and 2346.

SEC. 4. The title analysis of title 18, United States Code, is amended by inserting immediately below the item relating to chapter 114 the following:

"114. Trafficking in contraband cigarettes ..... 2341.".

SEC. 5. (a) Section 1(b) of the Act of August 9, 1939, c. 618, 53 Stat. 1291, as amended (49 U.S.C. 781(b)), is amended by (1) striking out "or" at the end of paragraph 2, (2) striking out the period at the end of paragraph 3 and inserting in lieu thereof "; or", and (3) adding after paragraph 3 the following new paragraph 4 to read as follows:

"(4) Any cigarettes, with respect to which there has been committed any violation of any provision of chapter 114 of title 18 or any regulation issued pursuant thereto.".

(b) Section 7 of the Act of August 9, 1939, c. 618, 53 Stat. 1291, as amended (49 U.S.C. 787), is amended by (1) striking out "and" at the end of subsection (e), (2) striking out the period at the end of subsection (f) and inserting in lieu thereof "; and", and (3) adding after subsection (f) the following new subsection (g) to read as follows:

"(g) The term 'cigarettes' means 'contraband cigarettes' as now or hereafter defined in section 2341(b) of title 18.".

A TRIBUTE TO DR. THOMAS J. BUSEY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. FLYNT) is recognized for 5 minutes.

Mr. FLYNT. Mr. Speaker, I would like to congratulate Dr. Thomas J. Busey, of Fayetteville, Ga., who celebrated his 83d birthday on June 26, 1977. While many individuals can lay claim to achieving this age, few have contributed more to the welfare of the community in which they live.

Dr. Busey, a 1916 graduate of Emory Medical College, completed his internship and residence requirements in hospitals in Augusta, Ga., and Jacksonville, Fla. After meeting these requirements, he volunteered and served his country during World War I. Following World War I, Dr. Busey began private practice in Fayette County, Ga., settling first in Tyrone in 1919 and then moving to Fayetteville in 1925.

Dr. Busey, who was accepted to practice at all major hospitals in Atlanta, created and operated a local hospital in Fayetteville during World War II. During that period he saw as many as 100 patients a day and regularly made house calls throughout Fayette and Clayton Counties. His schedule extended from early morning to late at night, 7 days a week. For over 10 years, he was the only physician in Fayette County including the period of World War II. Also during that time, Jonesboro was without a physician and he was frequently called to administer to patients in that town.

While actively practicing medicine in Fayette County, Dr. Busey performed medical services for the Selective Service Board and for the Veterans Administration. Dr. Busey retired from the active practice of medicine in 1971 after 55 years of service.

During his entire life in Fayetteville, Dr. Busey has been a dedicated member and supporter of the Fayetteville Methodist Church. He was active on the building committee of the original building and served for many years in a number of official capacities.

Dr. Busey is widely known for his participation in civic affairs. He has been a Mason for over 50 years serving as master of the lodge five times. He served as commander of the American Legion and was a significant influence in obtaining the American Legion clubhouse in Fayetteville in the 1930's. He contributed the land for the Margaret Mitchell Library and participated extensively in the efforts to build and furnish the library. He was a charter member of the Fayette County Kiwanis Club and the Fayette County Lion's Club.

Dr. Busey is the father of three daughters and one son. His daughters are: Helen, Mrs. John F. Wood of Gaithersburg, Md.; Ethel, Mrs. William C. Thompson of Huntsville, Ala.; and Edith, Mrs. William M. Hamilton of Westlake, Ohio. His son, Dr. T. J. Busey, Jr. is a physician residing in Fayette County but practicing in East Point, Ga. He is also the proud grandfather of eight grandchildren and two great grandchildren.

Mr. Speaker, over the years it has been Dr. Busey's character to go about his daily routine without attracting attention. However, today I feel it only fitting that Dr. Busey be commended for his numerous contributions to his fellow man.

RECODIFICATION OF FEDERAL CRIMINAL LAWS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Carolina (Mr. MANN) is recognized for 5 minutes.

Mr. MANN. Mr. Speaker, the Subcommittee on Criminal Justice is presently studying proposals to recodify Federal criminal laws. We have two bills pending before us: H.R. 2311, introduced by the gentleman from Maine (Mr COHEN), and H.R. 6869, introduced by the chairman of the Committee on the Judiciary (Mr. RODINO). Mr. RODINO's bill is identical to a bill introduced in the other body by Senators JOHN L. MCCLELLAN and EDWARD M. KENNEDY (S. 1437).

The scope of Federal criminal laws is quite broad. It is important, therefore, that the subcommittee hear from as many interested persons and organizations as possible. We hope to begin our hearings after the Congress returns from the August recess. Anyone who is interested in testifying at our hearings, or in submitting a written statement, should contact the subcommittee in room 2137, Rayburn House Office Building (telephone 202/225-0406). It would be most helpful in planning the subcommittee's schedule if interested persons and organizations would contact us by September 15.

In connection with this project, I should like to direct my colleagues to a speech recently given by the Solicitor General of the United States to the Prosecuting Attorneys Association of Michigan. In the course of his speech, the Solicitor General discussed briefly the role of the Federal Government in criminal law enforcement. He called for reducing the Federal role, noting—

Whenever federal prosecutors preempt the prosecution in areas of overlapping jurisdiction the state criminal justice machinery appears less attractive to well-qualified personnel, and the state system loses an opportunity to improve its own quality, capacity and responsibility by handling an important and sometimes complex matter. Furthermore, particularly when the primary impact of a crime is local, community loses the opportunity to have prosecutorial discretion properly exercised by its officers who may be more responsive to local values and sentiments. Accordingly, we should encourage state and local prosecutors to take a larger role in law enforcement in several substantive areas, and the federal authorities should defer to this responsible exercise of state sovereignty.

The Solicitor General's speech covered a number of topics related to criminal law. While we might not agree with all of his conclusions, I think we would all agree that his remarks are thought-provoking—and entertaining. I am, therefore, including his speech at this point in the RECORD.

ADDRESS BY THE HONORABLE WADE H. MCCREE

Many people have asked how to address me, now that I am no longer a judge. Well, I find "general" a very uncomfortable locution. During the recent American Law Institute meeting in Washington, I was standing under the marquee of the Mayflower Hotel when someone came up and said, "Hello, general." And I looked around for someone in uniform, but the only person I saw in uniform looked like an admiral, and he turned out to be the doorman. I will answer to judge, or, my name, and not be at all offended to be addressed without a title. It can provide amusement, of course. I received a letter the other day that referred to me as the Soliciting General, and another that referred to me as the Solicitor for the General. I'm still waiting for Simon Sobeloff's acme, I guess, when somebody addressed him as Celestial General. That hasn't come yet.

One year ago I had never considered the possibility of leaving the bench, and I knew very little about what the Solicitor General did. As a matter of fact, I wasn't certain that I cared for him because I only remembered two occasions when I had even had reason to inquire who he was. Once was when he confessed error in a case involving a dissenting opinion of mine which he followed. I thought he was a wonderful person then. The other occasion was when he confessed error when I wrote a unanimous opinion for the Sixth Circuit. Then, of course, I didn't think very much of him.

I had never seriously considered the possibility of leaving the judiciary, but I was a little restless. My reasons were varied. I had been a judge for more than 20 years, and I secretly yearned to get out in front of the bench. Of course, I was also distressed by the disgraceful judicial salary situation which I had endured through three college tuitions which have now dwindled down to two and these two are seniors. At least we think so. We haven't all of the results from the university.

During this period of vulnerability to overtures, I was taken to the top of the mountain by a diversified conglomerate corporation and was offered a vice-presidency and was shown a promised land flowing with the

milk and honey of instant affluence, including the use of a corporate jet. But when I found out how specialized my activities as general counsel would be, I knew that I would not be very happy. I also took the matter up with my dear friend, Judge Walter Ely, who told me that I wouldn't want to do that anyway once I had been in Government service, and it turned out he was right.

You know, judges are the ultimate generalists, and I had enjoyed the broad scope of judicial concern too long to adjust to specialization. You really can't make any money in the law, I suspect, unless you are something of a specialist.

In any event, I thought I'd just remain on the bench and play out the rest of the string, which really wasn't too bad at that. Then Judge Bell called me up one day and asked me whether I would serve as the Solicitor General. For the first time I inquired into the duties of the Office of Solicitor General and I learned that he, too, is a generalist, as much as is any federal judge and that he also has the excitement of appearing as an advocate and for the best client in the world, the United States of America.

I had become reconciled to a life of genteel poverty, so I took the plunge and the $5,000 pay reduction. And although I'm in the same ball game now, I'm a player instead of an umpire. Instead of being certain the lawyers will laugh at my jokes, I am stoking up my risibilities to enable me to laugh at judges' jokes.

There are other similarities and differences. I don't always argue appeals the way news people think that I should and they sometimes let me know. But, then, I didn't always decide cases the way they thought I should either, and they often are no more familiar with the appellate record now than they were with the record I had to consider when I was a judge. So we endure.

I can report to you that the Carter Administration has made few changes so far in the third branch style, even if cardigan sweaters have replaced suit jackets at some White House functions. There are no bib overalls in the Supreme Court.

The Chief Justice still insists upon a cutaway coat and stripped trousers and a vest, and the vest must match the coat.

A special assistant to former Attorney General Levi rented a cutaway and striped trousers, but was given a pearl gray vest at a somewhat avant garde haberdashery. He appeared to argue a case and in mid-argument, I am told, the marshal handed him a note from the bench. He read it and blanched. The press gallery buzzed with speculation. What sacred communication was this, and unilateral too. After the argument he shared it with his colleagues. It was an aspiration: We hope you will enjoy the wedding reception you plan to attend following the argument.

The representatives of the government still wear traditional attire when they appear in the Supreme Court. Since a cutaway coat had never been part of my regular wardrobe, I duly rented a suit and like Secondhand Rose in secondhand clothes I appeared in my borrowed finery when I was presented to the Court for my first argument.

The five deputies and thirteen assistants who comprise my professional staff also argue appeals in the Court and most of them have their own outfits, often purchased from a predecessor and adjusted to fit the wearer. These suits hang in the office closets of my assistants and me, too, and it frequently can be determined who will be an oralist on a given day because he shows up in the morning wearing a white shirt.

Then these intellectually appearing lawyer assistants of mine, like Clark Kent, the mild-mannered reporter of the Daily Planet, slip into their simulated telephone booths, change apparel and emerge as superadvocates, able to leap a lapse of legal logic in a single circumlocution.

Seriously, the professional staff of five deputies and thirteen assistants is the most scintillating aggregation of lawyers I've ever known.

The average age of the assistants, who are the equivalents of associates in a law firm, is 30, and of the deputies who are like partners, is about 45. Only the first deputy is as old and he's older by a few years than I. He represents the institutional continuity of the office. As a matter of fact, next fall he should surpass John W. Davis' record for having argued the most cases in the Supreme Court.

The magnet that holds these people in government is the opportunity to argue in the Supreme Court, something each one has a chance to do each term of Court. And they stay here despite the price of real estate. Since I've been in Washington only several months, my views are of necessity impressionistic, but of one thing I'm absolutely certain: There are no real estate prices anywhere in the world like those in Washington, D.C. The rate of real estate inflation for the past four years has been estimated at about two percent a month, twenty-five percent a year or a hundred percent over the past four years. Imagine being told that a modest three-bedroom about 30 years old costs a hundred and fifty thousand dollars. Obviously I haven't yet purchased a home because I have to sell mine and then win the state lottery.

I have an efficiency apartment that gives me a better understanding of the tiger cages employed in Vietnam. It is furnished and has a fold-down bed that Procrustes would have approved. It is the most reasonable one I could find and my one room only costs something more than $300 a month. There is a compensation, however, I'm only 1.6 miles from the Justice Department. That's slightly more than Seattle Slew had to run, and I can walk to the office in a half hour across the mall and past the Smithsonian Institution. The route is indeed an inspirational way to begin a busy day, as I view on the left the Washington Monument and on the right the Capitol of the United States. I enjoy every minute of my walk and I don't for a single minute regret my decision to give up a life estate for a tenancy at will.

I'd like to talk briefly about the functions of the Solicitor General's Office and about another subject that merits the careful consideration of us all.

The Solicitor General has two principal functions, as you probably know. I didn't, so I'm taking the liberty to believe that maybe someone else doesn't know either. The first is to conduct the federal government's Supreme Court litigation, and the second is to determine whether the federal government should seek appellate review of cases decided adversely to it. Another, but more limited, task is to decide whether the federal government will intervene or decide to file amicus curiae in pending appellate proceedings. Let's talk about the second, which is the the least familiar.

Whenever a district court decides adversely to the Government and the order is appealable, and appeal my may not be taken to the court of appeals without the authority of the Solitor General. Much of our time is spent considering requests for approval to take appeals to the United States Court of Appeals. Also, although the original authorization, to appeal, if given, includes the privilege of requesting reconsideration, a suggestion for reconsideration en banc may not be made without the approval of the Office of the Solicitor General.

The staff studies the comments and recommendations prepared by the appellate sections of the several divisions of the Department of Justice and of the General Counsel's offices of the various executive departments. It then makes recommendations to the Solicitor General, who has the final say whether an appeal will be authorized. Rarely, if ever, does the Attorney General concern himself with these matters, and I can tell you to date he has not concerned himself with any of them, except upon my initiative when I've had occasion to ask for his views.

We have a heavy workload. In the Supreme Court term ending July 6, 1976, the Solicitor General participated in 2,219 cases or about 47 percent of the Supreme Court's total case load in all categories.

This included over 1,500 responses to petitions for certiorari filed by private parties, 50 petitions for certiorari filed by the government which we prepared, 49 amicus curiae briefs on the questions of certiorari, 13 jurisdictional statements—of course, that's the direct appeal—and 16 amicus curiae briefs on the merits.

Of 179 argued cases the last full term of the court, the government was a party or amicus in 121. We considered 622 cases in which the writ might have been filed and 17 direct appeals that might have been requested. Out of the 622 cases, we authorized the filing in fifty-two cases. In only 50 instances was a petition for certiorari filed, but 38 of the 50 were granted, which gives you some idea of how seriously the Supreme Court takes an application by the Solicitor General's office. Less than six percent of all the other petitions for certiorari were granted.

We considered 1,384 recommendations for appeal and authorized 503, or about a third. Thus in a sense we protect the courts of appeals by eliminating two-thirds of the cases that United States attorneys might want to file. When we turn them down it sometimes concerns the merits, sometimes it concerns the justice of it.

My final comment is about another subject, but prefaced by a disclaimer because I have not submitted this to anybody at Washington. I want to speak a few words about court reform. Court reform, like sunspots and locust visitations, seems to reappear in cycles, and this year it seems to be very much on everybody's mind in Washington.

I suggest that each proposed reform should be subjected to careful scrutiny and that three fundamental questions might be asked before embracing any proposal. First, how desirable and important is the objective that the proposal is expected to achieve. Second, to what extent can the objectives be attained by the adoption of the suggested reform, and third, what disadvantages may result and are the costs that must be sustained within tolerable limits.

We must keep ever in mind the cyclical incidence of the public mood for reform. Although we might hope to keep the public eye focused on the needs of the courts, the public agenda is likely to change after the adoption of a few court reforms and one of the costs of adopting any particular proposal is a loss of the net long-term advantages of other reforms that may be foregone. Accordingly, careful attention should be devoted to establishing program priorities. All too often proponents of court reform place too much emphasis on the first question, the desirability of the objective, and neglect to examine with sufficient care the actual costs and possible undesirable side effects.

For example, some persons are asserting

that the best way to relieve the severe pressure on the federal judiciary is to reduce access to the courts. Certainly there can be little doubt that the population increase, the congressional enactment of new causes of action and an increased judicial willingness to accept jurisdiction of issues that were once considered non-justiciable have created an overload that not only delays relief for litigants, but also threatens the quality of dispositions. And it is equally clear that we cannot continue to increase the number of judges indefinitely without depreciating the attractiveness of judicial office and thereby threatening the quality of the bench, and collegiality is made more difficult to achieve with the creation of every additional judgeship.

If some classes of cases must be excluded from federal jurisdiction, great care must be exercised in determining which ones are to be selected. All too often proposals call for the exclusion of actions in which poor or powerless people seek to invoke the remedies that federal statutes afford them against powerful institutions, private and public, and of suits brought by private citizens to challenge the legitimacy of governmental action.

In both categories of cases, the social, political and economic resources available to the contending parties are likely to be grossly unequal.

Accordingly, if these controversies are to be excluded from federal adjudication, we may expect popular dissatisfaction with the government's failure to afford the means of obtaining justice to segments of the community most vulnerable to exploitation.

Furthermore, barring or postponing access for the actions most frequently mentioned as candidates for such treatment would not necessarily save significant amounts of judge time. Lawsuits have a tendency to preempt available judge time and whenever significant numbers of cases are removed from the jurisdiction of a court, other actions seem to flood in to fill the newly created void.

Truth in lending cases, a popular contender for exclusion, in fiscal year 1976 were less than two percent, and civil rights actions comprised less than ten percent of all cases filed in the federal courts. The bulk of cases commenced directly in both state and federal courts involve the criminal justice system.

In the federal courts, tort and contract actions comprised about twenty percent each, about six percent were labor cases and about seven percent involved real property.

If the primary purpose of barring access is to ease the judicial caseload, then some of its proponents contemplate eliminating the wrong group of cases. The fact that the bulk of criminal cases implicate the criminal justice system suggests that the best way to ease the crisis in our courts is to reduce the number of criminal trials.

We should also reduce the role of the federal government in enforcing the criminal laws. Of course, under recent interpretations of the commerce clause, there is usually always a justification for asserting federal jurisdiction and imposing federal criminal regulation. But the constitutional feasibility of asserting federal law ought not obscure the fact that in many cases the investigation and prosecution might be better left to state authorities.

Whenever federal prosecutors preempt the prosecution in areas of overlapping jurisdiction, the state criminal justice machinery appears less attractive to well-qualified personnel, and the state system loses an opportunity to improve its own quality, capacity and responsibility by handling an important and sometimes complex matter.

Furtherance, particularly when the primary impact of a crime is local, a community loses the opportunity to have prosecutorial discretion properly exercised by its officers who may be more responsive to local values and sentiments. Accordingly, we should encourage state and local prosecutors to take a larger role in law enforcement in several substantive areas, and the federal authorities should defer to this responsible exercise of state sovereignty.

Over the past decade plea bargaining has become formally accepted, and indeed officially encouraged, as the principal method of processing charges against offenders. Nevertheless, if the caseload is to be reduced, measures must be adopted to decrease the number of crimes that are committed. According to the popular myth, the high incidence of crime is largely a function of the shortcomings of the criminal justice system. If judges and prosecutors would only work harder; if they were more severe in sentencing convicts; if we could abolish the procedural reforms of the Warren court; if we could restore the death penalty; if only our legal system would stop mollycoddling criminals; then, so goes the myth, we could eliminate or at least control crime.

Superficially this is an attractive program, as many candidates for public office have demonstrated, and I cannot gainsay the great need constantly to improve our criminal justice system and to increase the effectiveness of law enforcement.

Certainly increasing the certainty and severity of punishment would raise the perceived costs of criminal conduct and would thereby discourage unlawful activity on the part of persons whose crimes are premeditated and are based, however crudely, on long-run cost-benefit analyses. Clearly, this applies to white-collar crime and to major drug traffickers. Its applicability to street crime is less certain. The difficulty is that the causes of crime are complex and may not be eliminated simply by blaming the courts and by manipulating the criminal justice system.

Students of human behavior tell us that there are some persons who will always engage in antisocial behavior, despite the fact that society has given them every opportunity to advance their interests by lawful means. Certainly and severity of punishment may well be the appropriate societal response to this element. Yet, perversely, amidst all the clamor for tough treatment of criminals, many offenders who would be most likely deterred by punishment were handled with kid gloves. Only rarely are convicted price fixers sent to prison, and, whenever they are, only for brief sentences.

There is, however, another national phenomenon that we should not overlook as we seek explanations for the causes of crime. Every racial and economic group that is found at the bottom of the social ladder in any region of the country is also found disproportionately represented in the prison population of that region.

Just a few statistics:

In New York the Puerto Rican population is five percent of the general population. It is 17 percent of the prison population.

The black population in New York is 12 percent, but 52 percent of the prison population.

In California the black population is 7 percent, but 25 percent of the prison population; in Florida 15 percent, but 45 percent of the criminal population; in my own state of Michigan 11 percent of the total population, but 46 percent of the prison population; in New Jersey 11 percent of the total population, 64 percent of the prison population.

Whether black, Hispanic, Indian or poor white, most prison inmates are from the segments of the community that are systematically excluded from equal access to whatever advantages are afforded to the more favored residents. A comparison of Law Enforcement Assistance Administration surveys of the population of state prisons in American with the 1970 census affirms that black and Hispanic prisoners are represented disproportionately to their numbers in the general society in our prisons.

Prisoners were also disproportionately unemployed before arrest and those who were employed before arrest had been working for a significantly shorter time than had the rest of the population. Thirty-one percent of all prisoners incarcerated in state prisons in 1974 were unemployed for a full month before the crime for which they were arrested. Also, they had lower status and lower paying jobs than most people. Prisoners, too, have less formal education and fare less well on achievement tests than do the general population.

Or course, people do not commit crimes simply because they are poor. But poverty and our treatment of it often exacerbate other problems that foster crime. For example, family stability decreases the incidence of crime among the outcast segments of society. In Dade County, Florida, black persons constitute only 15 percent of the population, but commit 75 percent of the violent crime. Cuban-Americans, who brought a remarkably strong family structure when they emigrated from Cuba constitute a third of the population but commit only 12 percent of the violent crime.

Poverty often destabilizes the family, and our welfare system accelerates that process. For example, the "man-in-the-house" regulations discourage husbands from living openly with their wives and children. Accordingly, the Cuban-American family structure is gradually weakening, and the incidence of crime in the Cuban-American community is increasing.

Furthermore, many persons are driven to crime because they perceive no other escape from the desperate condition of poverty. Their general education and preparation for the job market is frequently so inadequate that they seldom succeed in obtaining long-term employment. Their health is often so bad that they cannot get work on a regular basis, and when they find jobs, they are the first to be fired when business takes a turndown. Indeed, the correlation between unemployment and the size of the prison population has been found to be so close that many prison administrators, including the Director of the United States Bureau of Prisons, predict the need for prison space partly on the basis of unemployment projections.

We cannot regard as just a society that erects barriers to achievement by selected segments of its population and then warehouses them in prison when they predictably fail to overcome the obstacles that it has created.

No tinkering with the criminal justice system will significantly reduce the incidence of crime committed by this segment of the society because its cause is not found in the way the criminal justice system operates.

Unfortunately, society expects the criminal justice system to handle more than it effectively can. But crime will inevitably outstrip whatever resources we may devote to deterrence, investigation, adjudication and rehabilitation unless we attempt to eliminate some of the root causes of crime.

Because the Nation has assigned to its judges and prosecuting attorneys, state and Federal, the task of processing the social rejects who are punished for their subcaste status, judges must take a leading role in making the Nation aware of the root causes of crime. Only with such awareness will the Nation cease to rely solely on repression and begin to develop solutions that will treat the

underlying social causes. Only then will it cease to blame the judicial system for a problem it neither created nor can solve on its own.

I believe Chief Justice Burger has suggested that education might provide a constructive way to help prisoners develop a stake in a crime-free life upon their release. Certainly the possibility of allowing prisoners to shorten their time through educational achievement, to both learn and earn their way to freedom, is not one to be set aside lightly. It will require many adjustments, not the least of which are adjustments in social attitudes, but perhaps these adjustments are long overdue. There is a tendency today to move away from rehabilitation, as an effort which has been tried and failed to prove useful. While I would certainly agree that our efforts in that direction have certainly not been very successful, that is more likely attributable to the quality of the effort rather than the character of the goal.

In closing, I'll try to preach no more, but merely suggest that the quality of law enforcement, and the amount of respect it receives, is lower today among minorities than it should be. In part this may reflect second-rate education and in part it may reflect second-rate law enforcement. Prosecutors have an obligation, particularly where much of our crime occurs in the minority community, not only to prosecute crimes by minorities but also to prosecute crimes agains minorities.

The Federal Government is active in this area, of course, through the Civil Rights Division, but there is always more to be done. The answer to the crime problem is not simply to strengthen civil rights enforcement, but the more Federal, state, and local prosecutors make an aggressive effort to defend the rights of minorities and the poor, whenever and however they are victimized, the less likely it becomes that these people will nourish an atmosphere of alienation and detachment from society that itself is a major factor in contributing to crime and violence.

The first step towards achieving a law abiding society is to remove the causes of social alienation that prevent us from closing ranks against the criminal element. Our task will be difficult enough even without divisiveness. If we work to eliminate division, we may come closer to the goal to which we are all dedicated.

INTRODUCTION OF A BILL TO GUARANTEE THE PENN CENTRAL TAX DEBTS TO LOCAL AND STATE TAXING DISTRICTS

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio (Ms. OAKAR) is recognized for 5 minutes.

Ms. OAKAR. Mr. Speaker, today I have introduced a bill that will aid thousands of local and State taxing districts in the recovery of long overdue Penn Central Railroad tax dollars.

The Penn Central Transportation Co. went into bankruptcy on June 21, 1970. As a result of the railroad's reorganization and financial difficulties, there is nearly $500 million in Penn Central taxes that have never been paid. These are tax dollars that fund our schools and municipal governments.

At present, the Penn Central trustees are attempting to have these localities settle for 50 percent of post-bankruptcy taxes, or 44 percent of all taxes owed. There is much dissatisfaction among the local officials over this settlement proposal. Another proposal would provide for an immediate 20 percent cash payment and the remaining 80 percent in notes issued by the Consolidated Rail Corporation—ConRail. The bill that I introduce today would provide Federal guarantees for these series C and series D ConRail notes.

Some have asked, "Why should the Federal Government guarantee the delinquent tax debts of a private corporation?" This is a legitimate question, but it neglects to take into account the history and facts of this bankruptcy proceeding.

It was the Federal Government which provided the initiative to reorganize the railroads, and it is a federally-related corporation—ConRail—which supplants the old rail lines. I would ask, "Why should the local government and local school systems be asked to subsidize the reorganization of the railroad?" Another point to remember is that the Federal Government's administrative expenses have the first lien against the bankrupt railroad. This puts State and local taxes behind those moneys that were extended to the Penn Central to keep it running after its declaration of bankruptcy. This situation is unprecedented, and would contend that it is unfair.

I wrote to the Secretary of Transportation to reverse the order of liens against the railroad. Secretary Adams chooses to leave the situation as it is. With this display of administrative inaction, I have chosen to initiate legislative action. For over 6 years, the Federal Government has stood by idly as the State and local levels of government have anxiously awaited the outcome of the Penn Central bankruptcy proceedings. It is likely this long legal battle is far from over. Mr. Speaker, it is time for the Congress to give assurances to the States and the localities.

The bill that I introduce today will insure that the series C and series D notes that ConRail offers are, indeed, good investments for our counties, cities, and school systems. By assuring the investment community that these ConRail issues are good, solid investments, we assure the local and State governments that they can continue delivery of vital services, and assure our school systems that they, too, will have the funding needed to deliver good educational services.

Mr. Speaker, I ask my colleagues to take a long and serious look at this problem and the legislative remedy that I offer. I solicit their support of my efforts, and I ask for their cosponsorship of this necessary legislation.

UTILITY TAX REFORM ACT OF 1977 INTRODUCED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. STARK) is recognized for 5 minutes.

Mr. STARK. Mr. Speaker, today, in conjunction with Senator METCALF, I am introducing the Electric Utility Tax Reform Act of 1977. This legislation is presented because current Federal tax laws that apply to utilities are harmful to both utilities and to consumers, and act to undermine the credibility and integrity of the entire regulatory process.

This legislation which exempts electric utilities from the payment of Federal corporate income taxes and establishes a usage tax on electrical consumption, will restore the States complete authority to regulate their utilities. In addition, this bill will lead to a considerable simplification of company financing and will neither increase rates to consumers, nor decrease revenues to the Treasury.

In 1975, the Nation's privately owned electric utilities computed a tax liability of over $3 billion, which was considered a legitimate expense by State regulatory authorities and passed on to the consumers in the form of higher rates. Through the use of liberal tax writeoffs, such as accelerated depreciation and investment tax credit, these companies actually paid taxes of only $833 million, which is less than 2 percent of their total revenues of $45.6 billion. The customers of these utilities, while paying for the estimated taxes in higher rates, rarely benefit from these tax credits. Federal law prohibits the State regulatory bodies, in a majority of the States, from mandating that the companies pass the credits on to the customers.

The timing of this legislation is ideal in the sense that we are in the midst of developing a coherent energy policy. Many provisions of the energy bill underscore the fact that the reliance on electricity in this country will continue to grow, and it is just this growth that has contributed to the egregious situation that the legislation seeks to address. As long as utilities continue their growth, the taxes that have been deferred through the tax credits will never be paid to the Government. In essence, we are giving electric companies an interest-free loan, that probably never will be paid to the Government, while individuals are forced to borrow money at interest rates that range up to 18 percent. This is a prime example of an injustice that is built into the tax code, and it is no wonder that people have lost faith in the regulatory process, and in the fairness of our laws.

Under present law, companies are given an incentive to create a productive capacity far in excess of their actual needs to meet peak demand. As long as a company keeps expanding, it will be able to avail itself to the investment tax credit and accelerated depreciation. In short, the customers, and the taxpayers, are subsidizing unwise business decisions to build larger facilities and wasteful ing expenses.
management policies that inflate operat-

The tax-induced bias toward overconstruction, and the fact that ratepayers must pay the companies a return on the capital that is invested is not the least expensive way to finance utility growth. If the credits, which reduce the companies' need to borrow, resulted in lower costs for customers there might be

a rationale for retaining the present system. But this is not the case.

A recent Library of Congress analysis concluded that if tax benefits were flowed-through to the customer, rather than amortized by the companies over the life of an asset, customers would be paying lower rates in the long run, even when higher financing costs are taken into account. Even when companies become profitable, and slow their expansion, thereby exhausting their tax deferrals, rates remain artificially high. These companies must ask for 50 percent more than they actually need in rate increases. The additional 50 percent is necessary to pay the Federal taxes, and the State commissions must allow the increase.

The present system provides no mechanism to promote the conservation of electrical energy. According to the Edison Electric Institute, growth in electricity consumption has once again reached the pre-oil embargo level of 7 percent annually, and our energy program will, if anything, increase this rate of growth. While my legislation imposes a usage charge to equal the tax revenues paid by the utilities, it will provide us with a means to induce conservation by scaling the tax according to consumption.

With the elimination of the complex Federal tax regulations covering the investment tax credit and accelerated depreciation, State regulatory authorities will be freed from the conflict between their responsibilities to ratepayers and the dictates of Federal law. They will be able to conduct rate-setting proceedings in a simple, straightforward manner, and they will be able to readily ascertain the effects of their decisions on both the companies and the consumers. The regulatory law, the delay between the time a rate change petition is filed and when it is finally acted upon will be diminished, and, most importantly, the process will be more understandable which should dispel the prevalent belief that the companies are scalping the public.

This legislation will also greatly simplify the accounting procedures of the companies. They will no longer have to worry about an impending tax liability in the event that they become profitable and exhaust their credits. Instead, the company will be relieved of all future tax liabilities, which should lead them to base decisions to expand on true needs rather than tax preferences. To be sure, there may be an increased cost to companies trying to raise construction capital. This increase, however, will be offset by the elimination of tax liabilities and by the higher rates of return that will be allowed by the state commissions to compensate for the decreased cash flow. Savings will also be achieved because company's operating expenses will no longer be subsidized by the Government through the tax code. This should lead to a reduction in overall operating expenses. Further, the companies will no longer require the armies of accountants and attorneys that they have needed in the past.

For ratepayers, this legislation will not, on the average, produce any immediate change in the cost of electricity. The usage tax is constructed so that rates will remain at present levels, and to insure that the Treasury receives an equivalent amount of revenues that will be lost through the exemption to the utilities. Ratepayers are already paying the Federal income tax of the companies, as it is included in the rate. Their bill will simply show the customer what portion of the bill has been going for Federal income taxes, and it will be collected by the companies in much the same way that the telephone company collects the U.S. tax from its customers. The major benefit to consumers in this bill is that they will be assured that they are paying the actual taxes owed to the Government, instead of the present method where companies collect taxes that are never paid.

The usage tax, while in its present form will lead to no significant change in either consumption or rates, will provide an effective method for future conservation efforts. Passage of this bill will allow us to base the tax on consumption, should that become necessary in future years to discourage the use of electricity. As a mechanism for promoting conservation, the usage tax is not a new idea. In 1975, S. David Freeman, who is now one of Mr. Schlesinger's assistants, proposed just such a system as a way to promote conservation.

I have discussed this proposal with many people, both in the industry and on the State regulatory boards. In general, the reaction has been very positive. Robert Batinovich, president of the California Public Utilities Commission, recently published an article outlining legislation similar to this in a journal called, "Public Utilities Fortnightly," which is an independent publication monitoring developments in the field of public utilities. The journal called Mr. Batinovich's proposal, "A more uniform taxation of utility services to replace the current confused impact of federal income taxation on utilities with a more equitable and certain result."

In sum, this legislation will be beneficial to the companies, consumers, and to the state regulatory commissions. The proposal is founded upon simplicity in the ratemaking process, and fairness in our tax system. I urge you all to support the Electric Utility Tax Reform Act of 1977.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. FOUNTAIN) is recognized for 5 minutes.

Mr. FOUNTAIN. Mr. Speaker, I was absent on rollcall No. 507 due to official business. I would have voted "yes" on the adoption of House Resolution 729 which provided funding for the Select Committee on Intelligence.

BEVERAGE CONTAINER BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. ICHORD) is recognized for 5 minutes.

Mr. ICHORD. Mr. Speaker, I am introducing today legislation which would do away with nonreturnable bottles and cans. This legislation would place a minimum 5-cent deposit on each bottle and can and eliminate "flip tops," the detachable tabs on cans. I am introducing this legislation after long thought and careful study of the problems of waste disposal and have come to the conclusion that America has become such a "throwaway" society that nondeteriorating trash has become a national problem which warrants national legislation.

I deplore the contamination of the centralization of governmental power in Washington which has resulted in the solution or attempted solution of individual problems which should be solved by the individual himself or by city, county, or State governments. However, I believe that throwaway cans and bottles have truly become national problems. For example, I am continually removing from the Jacks Fork and Current Rivers in Missouri Coors Beer cans when Coors Beer is not even sold in the State of Missouri. We are literally smothering ourselves in our own waste and debris. This legislation would help alleviate this disgraceful condition in the United States. Oregon has had a beverage container law since 1972, and roadside litter has been reduced by 83 percent during the first 2 years of the program. I believe the whole Nation can do so likewise.

A significant amount of energy and resources could be saved with the enactment of a nationwide deposit law. The Environmental Protection Agency projects an annual savings of approximately 125,000 barrels per year. Also, 530,000 tons of aluminum, 1.5 million tons of steel, and 5.2 million tons of glass could be conserved annually by 1980.

Opposition to this legislation has sometimes been based on the reduction of jobs; however, the Federal Energy Administration estimates that a beverage container law would increase employment by 118,000. This may be one of the reasons why the public favors a beverage container law. In a public opinion survey conducted for the Federal Energy Administration by the Opinion Research Corp. in February of 1975, only 15 percent of the individuals questioned were against a law requiring all soft drinks and beer to be sold in returnable bottles and cans. Furthermore, the questionnaires that I have been receiving from the Eighth Congressional District of Missouri have shown strong support for such legislation.

I believe it is time that we put a halt to the littering of our rural areas and cities. As one of my colleagues said a few years ago it is time to make some change in our "flip-top, snap-tab" throwaway society. Personally I am ready to go back to the old times when all of us returned our bottles to be washed and reused. Many children made their spending money by collecting and selling the returnable bottles to merchants and bottling plants.

I would certainly hope my colleagues will join me in this endeavor and urge and welcome their support of this legislation.

THE NEED TO CONTROL THE QUICKIE SALES AND PURCHASES OF BANKS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. ST GERMAIN) is recognized for 5 minutes.

Mr. ST GERMAIN. Mr. Speaker, in recent years, there has been growing concern about the buying and selling of financial institutions on easy credit terms. It is time for a major effort to monitor and regulate the use of credit for these purposes.

The Subcommittee on Financial Institutions Supervision, Regulation, and Insurance has investigated banking problems in Texas and other States and we have serious questions about the free-wheeling use of bank loans—and other credit—to gain control of commercial banks. These easy low down payment—and in some cases, no down payment—extensions of credit have attracted fast buck speculators into the banking industry to the detriment of local communities and the public.

To correct these problems, I have taken two steps:

First. Legislation was introduced yesterday to provide for prior approval by the Federal Deposit Insurance Corporation of all sales of bank stock which results in a change of control and would subject all financial stock to existing margin requirements. The legislation would also sharply upgrade the reporting requirements to FDIC on bank stock sales.

Second. Letters have been sent to the FDIC and the Federal Reserve Board asking them to conduct an in-depth nationwide survey of the ownership of banks, the use of loans to purchase bank stock, and the market for bank stock.

Mr. Speaker, while few cases may reach the absurdity of the Texas Rent-A-Bank situation, it is important to require that even solid legitimate bank purchasers have substantial equity in the institution they are acquiring. Grabbing control of a banking institution without putting up so much as a dime is simply not responsible in an industry that prides itself on responsibility.

Regulators in the past have done little more than wave at the practice and file away the standard change of ownership forms.

The quickie sale of the Citizens State Bank of Carrizo Springs, Tex.—which the subcommittee investigated in San Antonio last December—to various control groups, financed by easy bank credit, was a major factor in the ultimate collapse of that institution.

Through the years, a number of bank failures have followed the takeover of institutions by speculators whose entry was financed through low downpayment and no downpayment loans.

It is clearly time for the Congress to take action and to prevent this easy moving in and out of speculators more intent on milking banks for their own self-dealing purposes rather than providing for community needs.

Mr. Speaker, the problem of bank ownership and the use of easy credit to gain control of banks is not new.

In August of 1964, the Committee on Banking and Currency held hearings on this very subject.

Mr. Joseph W. Barr, then-Chairman of the Federal Deposit Insurance Corporation testified that:

> Between May, 1963 and July, 1964 seven insured banks have failed. In *each* instance, the *cause* of failure was a change of ownership of the particular bank followed by the assumption or making of bad loans which in some instances were fraudulent (emphasis added).

The legislation which followed this hearing established a reporting requirement for changes in control and loans to acquire bank stock. We now need to close the loophole which allows many bank purchasers to acquire a depository institution with no equity investment.

Mr. Speaker, I want to place in the RECORD my letters to Chairman Burns of the Federal Deposit Insurance Corporation. I would also like to insert the text of H.R. 8767.

The material follows:

U.S. HOUSE OF REPRESENTATIVES,
Washington, D.C., August 2, 1977.

Hon. ARTHUR F. BURNS,
Chairman, Board of Governors, Federal Reserve System, Washington, D.C.

DEAR MR. CHAIRMAN: As you will remember, we discussed at the monetary policy hearings last Friday a serious problem affecting banking in this country. Specifically, the so-called "Texas Rent-a-Bank" scheme through which individuals or groups buy and sell banks with little or no equity investment and often with a clear intent to use the bank's resources for personal gain which presents a clear and present danger to the health of our banking system. Since these banks are being bought by individuals or groups, approval of further acquisitions escapes the regulation provided by the bank holding company statutes. Federal bank regulatory agencies do not have explicit authority to approve sales of banks and all but three states do not provide their own regulators with such power.

At the present time, I am considering various legislative remedies for this problem based in part on the Subcommittee's investigation and hearings into the failure of Citizens State Bank in Carrizo Springs, Texas. In order for the Subcommittee to have a complete picture of this situation, however, I believe that more information on bank ownership, bank stock loans, and the market for bank stock is needed. The bank regulatory agencies have a wealth of material on this subject at their disposal and could undertake, as you stated, a study of this nature. Specifically, I request that the Board of Governors of the Federal Reserve System provide the Subcommittee with a report using all member banks as the data base which explores the ownership of member banks, loans on the stock of those banks and the market for their stock. In addition I am requesting that the FDIC conduct a similar study using state nonmember insured banks as its data base.

To help your staff, I am enclosing previous studies on this subject. The first set (*Chain Banking, The Structure of Ownership of Member Banks and the Pattern of Loans Made on Hypothecated Bank Stock*, and *The Market for Bank Stock*) was completed in the 60s and provides questionnaires and tables which might guide your staff as it develops its approach to this study. The second is the two-volume hearing record for our field hearings in San Antonio last year. Those hearings revealed that 100% loans for the acquisition of banks are not uncommon in the South and Southwest. It is my understanding that bank stock is often not subject to margin requirements thus allowing individuals, groups, and companies to obtain loans with high loan-value relationships.

You and your staff, of course, would readily know what information is currently available to you and can develop an appropriate vehicle for obtaining the needed material for this study. However, I would like to suggest that our respective staffs meet to coordinate and plan the methods and technical aspects to be used for the study.

The study I am requesting should provide the Subcommittee and the bank regulatory agencies a wealth of information on which to base future action needed to insure that banks are being operated in a safe and sound manner to serve the needs of the communities in which they are located.

Sincerely yours,

FERNAND J. ST GERMAIN,
Chairman.

U.S. HOUSE OF REPRESENTATIVES,
Washington, D.C., August 2, 1977.

Hon. GEORGE A. LEMAISTRE,
Chairman, Federal Deposit Insurance Corporation, Washington, D.C.

DEAR MR. CHAIRMAN: As you know, the Subcommittee has been very concerned with the so-called "Texas Rent-a-Bank" scheme through which individuals or groups buy and sell banks with little or no equity investment and often with a clear intent to use the bank's resources for personal gain. Evidence available to the Subcommittee to date suggests that this practice presents a clear danger to the health of our banking system. Regulatory authority is apparently not available at the federal level to preclude such purchases especially since individuals and groups do not come within the jurisdiction of the bank holding company statutes.

At the present time, I am considering various legislative remedies for this problem based in part on the Subcommittee's investigation and hearings into the failure of Citizens State Bank in Carrizo Springs, Texas. In order for the Subcommittee to have a complete picture of this situation, however, I believe that more information on bank ownership, bank stock loans, and the market for bank stock is needed. The bank regulatory agencies have a wealth of material on this subject at their disposal and could undertake a study of this nature. Specifically, I request that the Federal Deposit Insurance Corporation provide the Subcommittee with a statistical report using insured, nonmember banks as the universe which explores the ownership of such nonmember banks, loans on the stock of those banks, and the market for their stock. A similar request is being made to Chairman Burns with respect to member banks.

To help your staff, I am enclosing previous studies on this subject. The first set (*Chain Banking, The Structure of Ownership of Member Banks and the Pattern of Loans Made on Hypothecated Bank Stock*, and *The Market for Bank Stock*) was completed in the 60s and provides questionnaires and tables which might guide your staff as it develops its approach to this study.

In addition, I ask that you include in your study an analysis of portions of the change of ownership form currently used by

the FDIC. Specifically, the information contained in the sections entitled "Other Information Concerning the Effect of the Transaction Upon Control of the Bank Whose Stock is Involved" and "Action to be Taken." These sections suggest that a change in control may have an adverse effect on the bank involved and that regulatory authority is available to anticipate that effect.

You and your staff, of course, would know what information is currently available to you and can develop an appropriate vehicle for obtaining the needed material for this study. However, I would like to suggest that our respective staffs meet to coordinate and plan the methods and technical aspects of this study.

The study I am requesting should provide the Subcommittee and the bank regulatory agencies a wealth of information on which to base future action needed to insure that banks are being operated in a safe and sound manner to serve the needs of the communities in which they are located.

Sincerely,

FERNAND J. ST GERMAIN,
Chairman.

H.R. 8767

A bill to amend the Federal Deposit Insurance Act (12 U.S.C. 1811–31b), and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "Change in Bank Control Act of 1977."

SEC. 2. Paragraph (j) of section 7 of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1817(j)), is hereby amended to read as follows:

"(j)(1) Any sale, assignment, transfer, pledge or other disposition of voting stock issued by an insured bank which results in control or in a change in the control of such bank (other than a transaction approved by the Board of Governors of the Federal Reserve System pursuant to section 3 of the Bank Holding Company Act of 1956 (12 U.S.C. 1842)) must be approved in advance by the Corporation. If such approval is not obtained, the Corporation may, pending further administrative proceedings under section 8 of this Act (12 U.S.C. 1818), issue a temporary order summarily suspending deposit insurance on all funds received by such bank after the effective date of such order. As used in this subsection, the term "control" means the power, directly or indirectly, to direct or cause the direction of the management or policies of the bank.

Direct or indirect ownership by a stockholder or an affiliated group of stockholders of less than 10 percent of the outstanding voting stock shall not be considered control under this subsection.

If there is any doubt as to whether a change in outstanding voting stock would result in control or effect a change in control, such doubt shall be resolved in favor of requesting advance approval by the Corporation.

"(2) A temporary order issued under paragraph (1) of this subsection shall become effective not less than 10 days after service upon the bank and publication in a newspaper of general circulation in the locality where the bank has its head office and, unless set aside, limited or suspended by a court in proceedings authorized by this paragraph, shall remain effective and enforceable pending completion of administrative proceedings pursuant to section 8 of this Act or until such time as the Corporation shall rescind the order. Within 10 days after the bank has been served with such temporary order, it may apply to the United States District Court for the judicial district in which the home office of the bank is located, or the United States District Court for the District of Columbia, for an injunction setting aside, limiting or suspending the enforcement, operation, or effectiveness of such order pending completion of the administrative proceedings under section 8 of this Act, and such court shall have jurisdiction to issue such injunction.

"(3) Whenever an individual, company, partnership, firm, company or insured bank makes a loan or loans, secured, or to be secured, by 25 per centum or more of the outstanding voting stock of an insured bank, the individual or the president or other chief executive officer of the lendor shall promptly report such fact to the Corporation upon obtaining knowledge of such loan or loans, except that no report need be made in those cases where the stock is that of the newly organized bank prior to its opening.

"(4) The stock of all insured banks shall be subject to the prevailing margin requirements established pursuant to section 7(b) of the Securities Exchange Act of 1934 (15 U.S.C. 78g(b)).

"(5) The applications for approval and reports required by paragraphs (1) and (3) of this subsection shall contain the following information to the extent that it is known by the person making such application or report: (a) the number of shares involved, (b) the names of the sellers (or transferors), (c) the names of the purchasers (or transferees), (d) the names of the beneficial owners if the shares are registered in another name, (e) the purchase price, (f) the total number of shares owned by the sellers (or transferors), the purchasers (or transferees) and the beneficial owners both immediately before and after the transaction, and in the case of a loan or loans, (g) the names of the borrowers, (h) the amounts of the loans, (i) the name of the bank issuing the stock securing the loans, (j) the names of each lendor whether it be an insured bank or not, and (k) the terms and conditions of the loans, as well as (l) such other information as the Corporation may require by regulation or by specific request in connection with any particular application or report.

"(6) Whenever such a change as described in paragraph (1) of this subsection occurs, each insured bank shall report promptly to the Corporation any changes or replacement of its chief executive officer or of any director occurring in the next 12-month period, including in its report a statement of the past and current business and professional affiliations of the new chief executive officer or directors.

"(7) A copy of any application or report required by this subsection shall be promptly furnished to the Comptroller of the Currency if it involves control of a national or a District bank or to the Board of Governors of the Federal Reserve System, if it involves control of a State member bank. No application for approval under paragraph (1) of this subsection shall be granted by the Corporation if the appropriate Federal banking agency (other than the Corporation) has, within 15 business days after receipt of a copy thereof, recommended against approving such application."

UNITED STATES-ASIA POLICY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CRANE) is recognized for 5 minutes.

Mr. CRANE. Mr. Speaker, The question of how this Nation deals with the Republic of China on Taiwan is an important one. It transcends the immediate limits of the China question. I would like to go into this for a moment, inasmuch as it directly relates to the position of the United States in the Asian region.

What must be established first is the fact that the Republic of China is an ally of the United States, bound to this country by a mutual security treaty. The mutual relations of the Republic of China and the United States have been beneficial, in both military and economic senses. The security provided the Republic of China by the American alliance serves as a vital underpinning for the economic growth on Taiwan, growth which continues as a guarantee of the freedom of Taiwan's 16 million people. Both our security agreement and our level of economic relations, as well as the fundamental interests shared by both countries, bind the United States and the Republic of China in a historic and mutually advantageous relationship.

Second, our relationship with the Republic of China must be looked at in the context of our overall Asian policy. It is unnecessary, I think, to recite the recent history of this Nation's involvement in Asia. Our withdrawal from Vietnam; the fall of Cambodia and Laos; the withdrawal of American Forces and bases from Thailand: all suggest to the world, and to other Asian nations, a significant reduction of American power and influence in Asia. By the same token, they seriously call into question the credibility of American commitments, as in recent years long-standing commitments have either shriveled or been withdrawn. The slated withdrawal of American ground forces from South Korea can hardly be a reassuring development to those Asian nations already concerned with the credibility and durability of the American role in their region.

Words, as we all know, are cheap. Verbal commitments and espousals of friendship can, and have, been made by this country. What matters most now, in our own estimation and that of astute observers, is not so much what we say as what we do. Our actions are what count most, and those actions will in the final analysis indicate to our friends in Asia and elsewhere whether the American relationship is something that can be confidently relied upon.

This is the aspect of our relationship with the Republic of China that I am concerned with here. If this Nation were to sever its ties with the ROC—abrogating our security agreement and leaving it to drift alone in international waters—what would this say to our friends elsewhere?

If the United States is so willing to terminate a mutually beneficial relationship and a long-standing security commitment, in return for virtually nothing, that says something that can hardly be ignored elsewhere. I have to wonder, what must South Korea think of the repeated assurances of President Carter and Secretary Brown, when only a short distance away that same government is squirming every which way to rid itself of another historic friend and ally? Similar doubts must surely occur elsewhere.

What makes such a move all the more puzzling is the fact that this Nation has relatively little to gain by such a move. Virtually all diplomatic business which needs to be transacted with the Government of the People's Republic of China

can and is being effectively handled by the U.S. Liaison Office in Peking. Authoritative observers are of the opinion that ease of contact will not be appreciably improved by the upgrading of our liaison office in Peking to embassy status.

Our economic interests in the Republic of China far outweigh those in the PRC.

And shared principles and values are one aspect of the R.O.C.-U.S. relationship which an exclusive relationship with the PRC can never enjoy.

Why, then, does the Carter administration appear so determined to press ahead with full normalization of relations with Peking? The evidence suggests Peking needs us more than we need them, and that they are not about to endanger their quasi-alliance with the United States over the Taiwan question. Chinese fears of Soviet intentions appear to far outweigh their ambitions to annex Taiwan. I would submit to you, gentlemen, that the pressure for this Government to exchange its relationship with the ROC for one with the PRC originates not in the facts of the situation, but within this administration itself, and with American academics and others of similar views having influence therein. Any American move in the near future toward a derecognition of the Republic of China would surely appear, therefore, as doubly questionable, given the lack of any persuasive rationale for doing so.

How we handle our future relations with the Republic of China and the PRC is thus a matter of great relevance to the whole of our Asian policy. A unilateral abandonment of Taiwan, leaving it to its fate, will in no way increase respect for this country, either in the PRC or elsewhere. Far more likely, it will be interpreted as one further sign of weakness on the part of a nation in full retreat from Asia and the non-European world. It will undermine our credibility with our allies as well as our adversaries, and will serve little but to ease the collective sensitivities of those in this country who feel some strange compulsion that this is an imperative for our international policy.

If this Nation is to maintain its strength, both in image and reality, then it must prove itself willing to stand by its allies, its friends, and its own national interests. If not, then it must be prepared to relinquish its position both in Asia and the world.

A RETIRED FEDERAL EMPLOYEE WARNS ABOUT WEAKENING THE HATCH ACT

(Ms. HOLTZMAN asked and was given permission to extend her remarks at this point in the RECORD and to include extraneous matter.)

Ms. HOLTZMAN. Mr. Speaker, the House passed H.R. 10 which would remove most of the Hatch Act's restrictions on political activities by Federal employees. I would like to bring to the attention of my colleagues a letter I received from a constituent of mine, Ms. Ida F. Gold, who remembers what pressures Federal employees were under in pre-Hatch Act days.

DEAR MS. HOLTZMAN: Now that the House of Representatives has decisively voted to repeal the Hatch Act, I would like to share with you my worries concerning the potentially harmful effect upon Federal employees that may be caused by the removal of the restrictions upon political activity.

I am retired from the Federal Civil Service with the Department of Justice (United States Attorney's Office) in Manhattan, and my employment there preceded the enactment of the Hatch Act, and continued for many years thereafter.

I recall that early in my employment, when I was quite young, there were occasions when the clerical, civil service employees would be asked to "volunteer" some assistance in connection with the electoral process, whether it be in the nature of writing numerous personal letters of political content, or going to polling places to "demonstrate" the then new voting machines—naturally with instructions as to the specific levers to be "demonstrated." Moreover, although I personally never was asked for cash donations in addition to the above requests, I was told that the attorneys (who were political appointees) not only had to contribute money but also speaking time, etc. in order to retain their jobs.

Prior to the Hatch Act, one never felt it would be wise to refuse to "volunteer," since promotions in the office did not result from examinations, but were entirely in the hands of superiors who would make the appropriate recommendations to Washington. The mere knowledge of that fact served to prevent any possibility of refusal to do what was requested.

I want to emphasize that I believe every person has the right to support or oppose candidates and pending legislation, and to make such monetary contributions as are legal, but that such activity should be solely the voluntary act of the individual, and not in any way related to one's employment.

Following the enactment of the Hatch Act, in my own office, although the promotion procedure remained largely unchanged, not only were there no inappropriate requests made, but the personnel experienced the same freedom to express opinions concerning candidates as did the rest of the general population, without being inhibited by possible pressure and/or reprisal on the part of anyone in authority.

It is this implication of pressure that I am so concerned about in connection with the repeal of the Act—not the specific deeds, but the apprehension of certain consequences that may flow from them.

I hope that the Senate and the subsequent Conferees will see to it that specific safeguards are written into the bill to meet the above problems.

Respectfully yours,

IDA F. GOLD.

KOREAN SCANDAL

(Ms. HOLTZMAN asked and was given permission to extend her remarks at this point in the RECORD and to include extraneous matter.)

Ms. HOLTZMAN. Mr. Speaker, I have been very concerned about assuring an adequate, thorough, and complete investigation by the Justice Department of the Korean influence-buying scandal. Serious questions about the competence and adequacy of the investigation have arisen, however, as a result of correspondence I have had with Mr. Benjamin Civiletti, head of the Criminal Division, and a meeting I had this morning with the Attorney General.

I would like to share with my colleagues a statement I made on this matter today and the correspondence which has led to my concern:

STATEMENT OF REPRESENTATIVE E. HOLTZMAN

After newspaper accounts this spring indicated that the investigation of the Korea scandal was being hampered because key witnesses were no longer in the United States, I became increasingly concerned about the prospects for a thorough investigation.

For that reason on May 10, I, together with a number of my colleagues, wrote the Attorney General asking for assurances that every effort was being made to obtain the testimony of the key witnesses who had left the United States. Now, after an exchange of correspondence spanning nearly three months, and meeting with the Attorney General this morning, it is my strong impression that the Justice Department has little if any understanding of two important procedures which could be used to obtain Tong Sun Park's testimony or his presence in the United States.

The most recent letter I have received from Assistant Attorney General Benjamin R. Civiletti (July 27, 1977) claims that the Justice Department cannot use the device called letters rogatory in order to interrogate Park in England because the questions had to be written. In fact, oral questioning is clearly permitted, and, as I pointed out to the Attorney General this morning, an American attorney could actually go to England to question Park under oath.

In addition, the Department seems to be unaware of the possibility that the English Government might be able to deport Park to the United States.

The fact that the Justice Department has not pursued and apparently does not understand every method available to obtain Park's testimony, raises the most profound questions about the adequacy of this investigation.

Because of my concern that this investigation be of the highest caliber, I asked for a meeting with the Attorney General this morning to raise these issues. I sincerely hope that, as a result of our discussion, serious steps will be taken to assure that this is a competent and thorough investigation.

CONGRESS OF THE UNITED STATES,
Washington, D.C., June 23, 1977.

The Honorable GRIFFIN B. BELL,
Attorney General of the United States, Department of Justice, Washington, D.C.

DEAR MR. ATTORNEY GENERAL: We have received Assistant Attorney General Civiletti's letter dated June 16, 1977, in response to a joint Congressional letter to you of May 10, 1977 regarding the Korean investigation.

Unfortunately, Mr. Civiletti's letter misinterprets the intent of our inquiry and responds only in general terms to the specific questions we raised. We did not request, nor do we seek, any information which it would be improper for the Department to divulge. We did not contemplate that our discussions with you would encompass naming possible defendants, outlining potential criminal charges, or summarizing the evidence which has been developed to date in the investigation.

What we did specifically request were answers to the following questions:

(1) What attempts were made to question or detain for questioning in the United States any potential witnesses and/or defendants who subsequently left the country?

(2) What attempts have been made to question those witnesses and/or defendants who have left the country?

Responses to these questions relate to the procedures, if any, the Department has employed to further its investigation; the questions do not imply that the Department in any way need reveal the nature of the in-

formation any potential witnesses or defendants might provide.

While we are pleased to learn that the Justice Department has made "extensive efforts" to secure the return of all relevant witnesses not in the United States and to take their testimony abroad, the lack of further explanation makes it difficult for us to gauge how thoroughly the Department has explored all possible procedural alternatives.

For example, have the letter rogatory procedures of 28 U.S.C. § 1781 been employed to interview any witnesses abroad? The Library of Congress reports that both England, the current location of Tongsun Park, and Korea, presumably the location of the Korean diplomatic witnesses, honor letters rogatory. If this alternative has not been utilized, why not?

We would also welcome an explanation of exactly how the Department has attempted to secure the attendance of witnesses from foreign countries, either by formal procedures or under informal agreements with foreign governments. For example, could Tongsun Park be deported from England to the United States? Certainly, the broad provision in British law permitting deportation "if the Secretary of State deems his deportation to be conducive to the public good" (Halsbury's Statutes Vol. 41, Part I § 3(5)(b)), would seem to leave that possibility open. If so, what efforts has our government made to get the British to use this power? Alternatively, could Park qualify as a "resident" for purposes of 28 U.S.C. § 1783 and be subject to a subpoena to compel his attendance at a hearing in the United States? If so, was a subpoena issued and if not, why not?

We would add that our first question—relating to any attempts that may have been made to question or detain for questioning any witnesses who subsequently left the country—was not directly addressed in Mr. Civiletti's response. Although there is apparently some dispute as to whether the number of material witnesses abroad constitutes "many" or few, Mr. Civiletti concedes on the last page of his letter that there are at least three witnesses abroad in addition to Korean diplomats. Given that fact, we believe it is critical to know whether the Department of Justice explored the possibility of detaining these witnesses prior to their fleeing the United States.

We believe these questions require a response, and we believe further that the Department can answer them without compromising its desire for confidentiality in the conduct of its investigation. We respectfully reiterate our request to meet with you to discuss the Department's responses to the specific questions we have raised. Our sole purpose is to confirm that the Department has thoroughly explored all possible procedural alternatives; we repeat that the results of the investigation thus far are not intended to be a matter for discussion.

We await your prompt response.

Sincerely,

Elizabeth Holtzman, Theodore S. Weiss, Berkley Bedell, Bruce F. Vento, Richard Nolan, Pete Stark, John Burton, Robert J. Cornell.

Jerome A. Ambro, Bob Carr, Parren J. Mitchell, Tom Harkin, Dan Glickman, Stephen L. Neal, Mary Rose Oakar, Bob Edgar.

Toby Moffett, Ronald V. Dellums, Christopher J. Dodd, James J. Blanchard, Thomas J. Downey, Fred W. Richmond, Members of Congress.

DEPARTMENT OF JUSTICE,
Washington, D.C.

HON. ELIZABETH HOLTZMAN,
House of Representatives,
Washington, D.C.

DEAR CONGRESSWOMAN HOLTZMAN: The Attorney General has asked me to respond to your further inquiry of June 23, 1977, just as he had me reply to the letter of May 10 from you and a number of your colleagues. Both letters, of course, related to the Department's investigation of alleged Korean payments to certain Congressmen and, specifically, to the problem of missing witnesses.

Regarding ". . . what attempts were made to question or detain for questioning . . ." persons who have departed the United States, perhaps some background information on the then status of the Department's investigation will help in understanding what happened. In the Fall of 1976, which was during the initial stages of the Korean investigation, the Government was proceeding on the basis of allegations which were vague and unsubstantiated. We were therefore required to talk to certain witnesses simply to find out whether they had relevant information and, if so, what they knew. Similarly, it was frequently unclear whether the person himself participated in any way in the passage of money. Thus, we were often unsure during the interview whether or not the witness was being truthful. Considerable time was later spent corroborating or disproving the information given by such witnesses. Wherever we subsequently found that the witness had not been truthful, the witness was reinterviewed or subpoenaed to appear before the grand jury.

During this early phase of the investigation, two persons who were potential witnesses, though only minor ones, left the United States. At the time they left, we had no specific allegations implicating them or indicating that either one of them had particularly valuable information. Indeed, it is still uncertain that they have personal knowledge which is relevant and material to our investigation of alleged payments to Congressmen, for neither is alleged to have made or been present when payments may have been made. Nevertheless, one of them had been interviewed on two occasions prior to his departure.

Nor did the Government have any reason to believe either that these individuals would go to Korea or that they would fail to return. Both had families and businesses here and other similarly situated persons had previously gone to Korea and returned.

The one individual you refer to specifically in your letter is Tong Sun Park. Park was interviewed at the Department of Justice early last Fall, and he agreed to and did turn over certain requested documents, including his bank records. In the interview, he did not provide any information which was helpful, but, as he has since to the press, denied that he made payments as alleged. At that meeting he also stated that he was leaving the country on business and would return in approximately two weeks. Park then left the country. Shortly thereafter, news stories appeared which contained detailed allegations, most of which were attributed to sources in the intelligence community, that Park was a KCIA agent and had paid bribes to Congressmen since 1970. Park was then allegedly expelled from Korea. He did not return to the United States.

We have been informed by Park's attorney that he refuses to return to this country voluntarily to respond to written interrogatories and to meet with our investigators in a third country. In view of this attitude, and of the fact that he could properly plead the Fifth Amendment, we have made a considered judgment that letters rogatory would not be useful. In any event, the inability immediately to ask follow up questions makes this procedure too stilted to be productive in the case of Park.

Moreover, from our prior experience interviewing Park, we believe that even if he were to give answers, they would be of little value unless the questions were highly specific and contained names of Congressmen, dates, amounts and so forth. To put such detailed information in writing for handling by various persons in the United States and Great Britain would be to assume a very high risk of defamatory news stories about many U.S. Congressmen who may not have been involved with Tong Sun Park at all.

You also have inquired whether the United States can compel Park's compliance with a subpoena issued pursuant to 28 U.S.C. § 1783. It is our view that even if Park, who is neither a national nor a permanent resident alien of the United States, qualified as a "resident" and were subpoenaed under 28 U.S.C. § 1783, we would not be able to compel his presence in this country. Park would simply refuse to appear in compliance with the subpoena. We could then cause him to be held in contempt. (28 U.S.C. 1784.) While contempt is punishable by sentence of imprisonment in cases where the contemnor is personally before the court, in 1783 cases the contemnor's absence precludes such punishment. The only remedy available to the Government would be a fine not to exceed $100,000. Since Park has not returned to the U.S. to contest a tax assessment of more than five million dollars, and IRS's confiscation of his expensive residences, it seems unlikely that a fine of this amount would have much effect.

Finally, we are unaware of any act Park has committed in England which would subject him to deportation. Even if he had committed such an act, and if the extended deportation proceedings were concluded unfavorably to Park, he could only be deported to the country of his citizenship, the Republic of Korea, or to the country of his choice. Clearly, Park would not choose the United States.

The above discussion focuses on suggested courses of action which we feel are not productive. However, as I advised in my prior letter, ever since Park's departure we have been very actively engaged in a series of attempts to obtain his testimony. These attempts have included negotiations with his attorney and other means which are still in progress and which are too sensitive and volatile for discussion in this letter. We believe that to publicly disclose those efforts now would undermine the chances for their success.

We hope that you and your fellow members of Congress will support us in our efforts to uncover the true facts of this complex matter.

Sincerely,

BENJAMIN R. CIVILETTI,
Assistant Attorney General,
Criminal Division.

COMMENTS ON JUSTICE DEPARTMENT STUDY GROUP'S RECOMMENDATIONS ON FEDERAL AID FOR LAW ENFORCEMENT

(Ms. HOLTZMAN asked and was given permission to extend her remarks at this point in the RECORD and to include extraneous matter.)

Ms. HOLTZMAN. Mr. Speaker, on June 23, a Justice Department study group issued a series of recommendations for changes in the Federal program of aid for State and local law enforcement through the Law Enforcement Assistance Administration. My colleague on the House Judiciary Committee, ROBERT MCCLORY, and I have today sent the following letter to Attorney General Bell, offering some comments on the study group's proposal:

HOUSE OF REPRESENTATIVES,
Washington, D.C., August 5, 1977.

Honorable GRIFFIN BELL,
Attorney General of the United States Department of Justice, Washington, D.C.

DEAR ATTORNEY GENERAL: We appreciate your request for reaction to the Department's Study Group Report with regard to Federal aid for State and local law enforcement. While the Study Group's recommendations are not sufficiently detailed to permit a

thorough response, we would like to offer some preliminary comments. At the same time, we reserve the right to provide more detailed, individual comments subsequently.

We are pleased that the Study Group has embraced the goals of improving the national research effort in law enforcement, encouraging and enabling State and local governments to implement successful anticrime programs, increasing the effectiveness of projects funded by LEAA, and reducing bureaucratic red tape. These were our objectives in writing the 1976 authorizing legislation, and we believe the Justice Department can go a long way toward attaining them under existing law.

Specifically, we would call to your attention sections 303(b), 303(a)(17), and 402(c) of the Omnibus Crime Control and Safe Streets Act. These sections, as amended in 1976, direct LEAA to assess the likely effectiveness of projects contained in State plans, assure that projects are evaluated, and collect and disseminate information about successful or promising projects to State and local governments. They, thus, require LEAA to carry out precisely the kind of strong research and development, testing, implementation, and evaluation effort called for by the Study Group.

If LEAA administers these sections and its other powers properly, with the emphasis on program success rather than bureaucratic interference, LEAA can assure that all States take advantage of the best available answers (whether developed at the Federal, State or local level) to the problems of crime. In this manner, red tape can be cut, wasteful expenditures avoided and effective programs implemented. Furthermore, LEAA can use the National Institute for Law Enforcement and Criminal Justice, together with its own authority to award discretionary grants under Parts C and E, to develop and encourage the implementation of the "national program models" called for by the Study Group.

While we believe that the foregoing actions, as required by the Congress and recommended by the Study Group, can and should be taken immediately, we are deeply concerned about certain other recommendations made by the Study Group. The Congress has found it advisable to require that States spend a certain portion of their LEAA funds on programs to improve correctional systems and speed criminal trials. The clear lesson of LEAA's history is that without such requirements, these critical components of the criminal justice system were neglected in favor of excessive concentration on hardware and the police function. To abandon the requirements, as the Study Group would do, invites a return to those problems for which LEAA was severely and justifiably criticized. Similarly, we question the Study Group's apparent desire to reverse Congressional decisions that funding should be provided for community anticrime programs and for efforts to combat crime related to drug and alcohol abuse.

We do not believe the Study Group's "direct assistance" proposal is sufficiently defined or developed to permit responsible comment. We would, however, like to point out several questions that it raises. They are:

1. How are funds to be apportioned among States? If factors other than population are to be used, what factors (given the conceded unreliability of the FBI's Uniform Crime Reports)?

2. How are funds to be distributed to localities? If by formula, what formula can adequately accommodate the needs of high crime areas? If formula funds can only go to jurisdictions of a certain size, how can smaller jurisdictions get funds? What formula can provide the flexibility to allow a small jurisdiction to implement a major project in a single year, with others implementing equivalent projects in subsequent years?

3. If local jurisdictions do not get formula grants, how will they receive funds? If they receive discretionary grants, at whose discretion will it be? LEAA? State legislatures? The agency which performs the State's "criminal justice coordination function?"

4. Will each local jurisdiction have to demonstrate a criminal justice coordination capacity before receiving funds even for a single project?

5. Will the proposal that Federal funds go through the normal appropriations process in each State and locality (even though such funds would presumably retain their distinctive character and be designated for specific projects) add further delay and red tape to the system?

Until these questions are answered, presumably in the form of a legislative proposal submitted to the Congress, we cannot accurately assess the impact of the Study Group's recommendations.

Two years remain under the current LEAA authorization. We believe this allows the Department of Justice sufficient time to implement those most important features of the Study Group's recommendations that are contained in existing law, and to demonstrate that it can run an effective program of law enforcement assistance.

To this end, we would urge the Department to fill the top positions at LEAA which have been left vacant too long. In addition, we question the wisdom of the Department's decision to close the LEAA regional offices. If the effectiveness of State plans and the projects they contemplate is to be increased, it will require close cooperation between State and local agencies on the one hand, and knowledgeable Federal professionals familiar with local conditions, on the other. Regional offices should be best equipped to act for LEAA in this context. Finally, we would hope the Department will seek to improve LEAA's capacity to administer the program and to assure the continued funding of useful projects by working against further reductions in LEAA funds.

We look forward to working with you and the Department to provide a genuinely effective program of aid for improving law enforcement and criminal justice throughout the nation.

Sincerely,

ELIZABETH HOLTZMAN,
Member of Congress.
ROBERT MCCLORY,
Member of Congress.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. ST GERMAIN, for August 5, 1977, for 5 minutes.

(The following Members (at the request of Mr. EDWARDS of Oklahoma) to revise and extend their remarks and include extraneous material:)

Mr. KEMP, for 20 minutes, today.
Mr. CLEVELAND, for 5 minutes, today.
Mr. DERWINSKI, for 5 minutes today.
Mr. SARASIN, for 5 minutes, today.
Mr. WHALEN, for 5 minutes, today.
Mr. QUIE, for 5 minutes, today.

(The following Members (at the request of Mr. WEISS) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. FLOOD, for 5 minutes, today.
Mr. MOSS, for 5 minutes, today.
Mr. CHARLES H. WILSON of California, for 5 minutes, today.
Mr. ASPIN, for 5 minutes, today.
Mr. REUSS, for 20 minutes, today.
Mr. VANIK, for 5 minutes, today.
Mr. DRINAN, for 5 minutes, today.
Mr. LE FANTE, for 5 minutes, today.
Mr. PREYER, for 5 minutes, today.
Mr. MICHAEL O. MYERS, for 5 minutes, today.
Mr. ROSTENKOWSKI, for 5 minutes, today.
Mr. AUCOIN, for 5 minutes, today.
Mr. LEVITAS, for 5 minutes, today.
Mr. DANIELSON, for 5 minutes, today.
Mr. MCKAY, for 5 minutes, today.
Mr. MITCHELL of Maryland, for 5 minutes, today.
Ms. HOLTZMAN, for 30 minutes, today.
Mr. FLYNT, for 5 minutes, today.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 948. An act for the relief of Chin Ah Park and Chin Suk Park; to the Committee on the Judiciary;

S. 1003. An act for the relief of Me Young Lee; to the Committee on the Judiciary;

S. 1306. An act to provide temporary authority to the Administrator of the Small Business Administration to facilitate water conservation practices and emergency actions to mitigate the impacts of the 1976–1977 drought; to the Committee on Small Business; and

S. 1617. An act to establish a program of ocean pollution research and monitoring, and for other purposes; to the Committee on Science and Technology.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1377. An act to amend the statute of limitations provisions in section 2415 of title 28, United States Code, relating to claims by the United States on behalf of Indians.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 1952. An act to amend the corporate name of AMVETS (American Veterans of World War II), and for other purposes;

H.R. 4991. An act to authorize appropriations for activities of the National Science Foundation, and for other purposes;

H.R. 6179. An act to amend the Arms Control and Disarmament Act to authorize appropriations for fiscal year 1978, and for other purposes;

H.R. 6370. An act to authorize appropriations to the United States International Trade Commission, to provide for greater efficiency in the administration of the Commission, and for other purposes; and

H.J. Res. 372. Joint resolution to authorize the President to issue a proclamation designating the week beginning on November 20, 1977, as "National Family Week."

BILL PRESENTED TO THE PRESIDENT

Mr. THOMPSON, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, a bill of the House of the following title:

H.R. 6689. To authorize fiscal year 1978 appropriations for the Department of State, the U.S. Information Agency, and the Board for International Broadcasting, and for other purposes.

ADJOURNMENT

Mr. WEISS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock p.m.) pursuant to the provisions of House Concurrent Resolution 317, 95th Congress, the House adjourned until Wednesday, September 7, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS,

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2099. A letter from the Director, Defense Mapping Agency, transmitting notice of the agency's intention to consolidate its Hydrographic and Topographic Centers, pursuant to section 612 of Public Law 94–431; to the Committee on Armed Services.

2100. A letter from the Secretary of Labor, transmitting the annual report on the administration of the Black Lung Benefits Act of 1972, covering calendar year 1976, pursuant to section 426(b) of the Federal Coal Mine Health and Safety Act of 1969, as amended (86 Stat. 155); to the Committee on Education and Labor.

2101. A letter from the Chairman, Commission on Security and Cooperation in Europe, pursuant to section 6 of the Public Law 94–304; to the Committee on International Relations.

2102. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting reports concerning visa petitions approved according certain beneficiaries third and sixth preference classification, pursuant to section 204(d) of the Immigration and Nationality Act, as amended (79 Stat. 915); to the Committe on the Judiciary.

2103. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of certain aliens, pursuant to section 212(d)(6) of the act (66 Stat. 182); to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MURPHY of New York: Committee on Merchant Marine and Fisheries. Report on allocation of budget totals to subcommittees (Rept. No. 95–573). Referred to the Committee of the Whole House on the State of the Union.

Mr. PREYER. Select Committee on Ethics H.R. 7401. A bill to provide for complete financial disclosure by Members of the House of Representatives, Senators, officers of either House of Congress, and certain individuals employed by Members, Senators, or committees of either House of Congress. With amendment (Rept. No. 95–574). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. Report on the Federal Trade Commission Regional Office Operations (Rept. No. 95–575). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. Report on the effectiveness of the export promotion policies and programs of the Departments of Commerce and State (Rept. No. 95–576). Referred to the Committee of the Whole House on the State of the Union.

Mr. MURPHY of Illinois: Committee on Rules. House Resolution 743. Resolution providing for the consideration of H.R. 3. A bill to strengthen the capability of the Government to detect, prosecute, and punish fraudulent activities under the medicare and medicaid programs, and for other purposes (Rept. No. 95–577). Referred to the House Calendar.

Mr. ZABLOCKI: Committee on International Relations. House Resolution 724. Resolution to express the House of Representatives deep concern over the disregard of basic human rights in Cambodia; with amendment (Rept. No. 95–578). Referred to the House Calendar.

Mr. ROBERTS: Committee on Veterans' Affairs. H.R. 4341. A bill to amend title 38, United States Code, to eliminate the requirement for inspections of the mobile home manufacturing process by the Administrator of Veterans' Affairs; with amendment (Rept. No. 95–579). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROBERTS: Committee on Veterans' Affairs. H.R. 8698. A bill to deny entitlement to veteran's benefits to certain persons who would otherwise become so entitled solely by virtue of the administrative upgrading under temporarily revised standards of less than honorable discharges for service during the Vietnam era, and for other purposes (Rept. No. 95–580). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 3813. A bill to amend the act of October 2, 1968, an act to establish a Redwood National Park in the State of California, and for other purposes; with amendment (Rept. No. 95–581). Referred to the Committee of the Whole House on the State of the Union.

Mr. GIAIMO: Committee on the Budget. House Concurrent Resolution 341. Concurrent resolution revising the congressional budget for the U.S. Government for the fiscal year 1978 (Rept. No. 95–582). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. Report on major reforms needed in the Community Services Administration (Rept. No. 95–583). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. H.R. 8588. A bill to reorganize the executive branch of the Government and increase its economy and efficiency by establising Offices of Inspector General within the Departments of Agriculture, Commerce, Housing and Urban Development, the Interior, Labor, and Transportation, and within the Community Services Administration, the Energy Research and Development Administration, the Environmental Protection Agency, the Federal Energy Administration, the General Services Administration, the National Aeronautics and Space Administration, the Small Business Administration, and the Veterans' Administration, and for other purposes; with amendment (Rept. No. 95–584). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROBERTS: Committee on Veterans' Administration. H.R. 8175. A bill to amend the Veterans' Administration Physician and Dentist Pay Comparability Act of 1975, approved October 22, 1975, as amended, in order to extend certain provisions thereof, and for other purposes; with amendment (Rept. No. 95–585). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROBERTS: Committee on Veterans' Affairs. H.R. 8701. A bill to amend title 38, United States Code, to increase the rates of vocational rehabilitation, educational assistance, and special training allowance paid to eligible veterans and persons, to make improvements in the educational assistance programs, and for other purposes (Rept. No. 95–586). Referred to the Committee of the Whole House on the State of the Union.

Mr. BINGHAM: Committee on International Relations. H.R. 8638. A bill to provide for more efficient and effective control over the proliferation of nuclear explosive capability with amendment (Rept. No. 95–587). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ULLMAN (for himself and Mr. CONABLE):

H.R. 8811. A bill to amend section 7447 of the Internal Revenue Code of 1954 with respect to the revocation of an election to receive retired pay as a judge of the Tax Court; to the Committee on Ways and Means.

By Mr. ALEXANDER:

H.R. 8812. A bill to name a certain Federal building in Jonesboro, Ark., the E. C. "Took" Gathings Building; to the Committee on Public Works and Transportation.

By Mr. ANDERSON of California (for himself, Mr. JOHNSON of California, Mr. RONCALIO, Mr. ERTEL, Mr. FARY, and Mr. MINETA):

H.R. 8813. A bill to amend the Federal Aviation Act of 1958 to improve air service and provide flexibility in air fares; to the Committee on Public Works and Transportation.

By Mr. AuCOIN:

H.R. 8814. A bill to reduce until June 30, 1980, the column 2 rates of duty on woven fabrics of silk; to the Committee on Ways and Means.

By Mr. BADILLO:

H.R. 8815. A bill to provide that any bank or depository institution situated in a standard metropolitan statistical area must invest 25 percent of its mortgage portfolio in loans secured by real property situated in inner cities located within the standard metropolitan statistical area in which the depository institution is situated; to the Committee on Banking, Finance and Urban Affairs.

H.R. 8816. A bill to establish a special impact job creation program for areas of high youth unemployment; to the Committee on Education and Labor.

H.R. 8817. A bill to provide that any community-based organization which desires to receive any Federal financial assistance shall comply with membership and democratic selection requirements established in the Community Services Act of 1974; to the Committee on Education and Labor.

By Mr. BAFALIS:

H.R. 8818. A bill to amend the Internal Revenue Code of 1954 to eliminate the adjusted gross income limitation on the credit for the elderly, to increase the amount of such credit, and for other purposes; to the Committee on Ways and Means.

By Mr. BOLAND (for himself, Mr. CONTE, Mr. BEARD of Rhode Island, Mr. BURKE of Massachusetts, Mr. CLEVELAND, Mr. COHEN, Mr. COTTER, Mr. D'AMOURS, Mr. DODD, Mr. DRINAN, Mr. EARLY, Mr. EMERY, Mr. HARRINGTON, Mrs. HECKLER, Mr. JEFFORDS, Mr. MCKINNEY, Mr. MARKEY, Mr. MOAKLEY, Mr. MOFFETT, Mr. ST GERMAIN, Mr. SARASIN, Mr. STUDDS, and Mr. TSONGAS):

H.R. 8819. A bill to provide a program for the rehabilitation of the Nation's railroads; to the Committee on Interstate and Foreign Commerce.

By Mr. BONKER:

H.R. 8820. A bill to amend title II of the Social Security Act to increase to $5,000 the amount of outside earnings which (subject to further increases under the automatic adjustment provisions) is permitted to an individual each year without any deductions from benefits thereunder; to the Committee on Ways and Means.

By Mr. BRECKINRIDGE:

H.R. 8821. A bill to provide that increases in rates of pay for Members of the House of Representatives under section 225 of the Federal Salary Act of 1967 shall not take effect before the Congress following the Congress in which such increases are recommended, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. BROWN of California:

H.R. 8822. A bill to require the Secretary of Agriculture to periodically report to the Congress on the status, condition, and productive potential of privately owned forest land; to the Committee on Agriculture.

By Mr. BROWN of California (for himself, Mr. WYDLER, Mr. WALKER, Mr. WIRTH, Mr. AMBRO, Mr. SCHEUER, Mr. WALGREN, Mr. BEILENSON, Mr. WATKINS, Mr. LUJAN, Mr. WINN, and Mr. EDGAR):

H.R. 8823. A bill to establish a program of environmental research and development related to ocean pollution, and for other purposes; to the Committee on Science and Technology.

By Mr. BROWN of Ohio:

H.R. 8824. A bill to require the President to appoint a Special Prosecutor to investigate and prosecute acts by agents of foreign governments to influence elected and nonelected officials and employees of the United States; to the Committee on the Judiciary.

By Mr. CAPUTO:

H.R. 8825. A bill to amend the Export-Import Bank Act of 1945 to eliminate financings harmful to domestic U.S. employment; to the Committee on Banking, Finance and Urban Affairs.

By Mr. CARR (for himself, Mr. WHITLEY, Mr. BURGENER, and Mr. WHITEHURST):

H.R. 8826. A bill to increase deposit insurance from $40,000 to $100,000 for accounts which qualify as individual retirement accounts and accounts established under qualified (Keogh) plans for the self-employed; to the Committee on Banking, Finance and Urban Affairs.

By Mr. CARR:

H.R. 8827. A bill to amend the Federal Aviation Act of 1968 to provide for criteria for the provision of air navigation and traffic control facilities and services, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. CARR (for himself, Mr. BAUCUS, Mr. PATTEN, and Mr. MARKEY):

H.R. 8828. A bill to provide for equalizing the costs of unemployment compensation, revising the extended benefits program, and for other purposes; to the Committee on Ways and Means.

By Mr. CAVANAUGH (for himself, Mr. MITCHELL of Maryland, Mr. FAUNTROY, Mr. NEAL, Mr. TSONGAS, Mr. MATTOX, Mr. MCKINNEY, and Mr. STEERS):

H.R. 8829. A bill to protect the constitutional rights of citizens of the United States and to prevent unwarranted invasions of privacy by prescribing procedures and standards governing the disclosure of certain financial information by depository institutions to governmental agencies and for other purposes; to the Committee on Banking, Finance, and Urban Affairs.

By Mr. DEL CLAWSON (for himself, Mr. BADHAM, Mr. DUNCAN of Tennessee, Mr. EMERY, Mr. FISH, Mr. GOLDWATER, Mr. GUYER, Mr. HYDE, Mr. LENT, Mr. PRITCHARD, Mr. QUIE, and Mr. WINN):

H.R. 8830. A bill to amend title 5 of the United States Code to establish a uniform procedure for congressional review of agency rules which may be contrary to law or inconsistent with congressional intent, to expand opportunities for public participation in agency rulemaking, and for other purposes; jointly, to the Committees on the Judiciary and Rules.

By Mr. COHEN (for himself, and Mr. EMERY):

H.R. 8831. A bill relating to the effect which Federal enrollment and licensing of vessels employed in the fisheries has with respect to certain State restrictions on engaging in commercial fishing within State boundaries; to the Committee on Merchant Marine and Fisheries.

By Mr. CORMAN (for himself, Mr. AKAKA, Mr. BROWN of California, Mr. COCHRAN of Mississippi, Mr. CONTE, Mr. DICKS, Mr. DOWNEY, Mr. FASCELL, Mr. GILMAN, Mr. GUYER, Mr. KOCH, Mr. KREBS, Mr. LAFALCE, Mr. MCCORMACK, Mr. MOTTL, Ms. OAKAR, and Mr. YATRON):

H.R. 8832. A bill to amend title XVIII of the Social Security Act to provide for the coverage of certain psychologists' services under the supplementary medical insurance benefits program established by part B of such title; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. CORMAN (for himself, Mr. BARNARD, Mr. CAPUTO, Mr. CONTE, Mr. KILDEE, and Mr. KRUEGER):

H.R. 8833. A bill to amend title XVIII of the Social Security Act to authorize payment under the medicare program for certain services performed by chiropractors; jointly, to the committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. CORMAN (for himself, Mr. BAUCUS, Mr. BONKER, Mr. MAZZOLI, Ms. MIKULSKI, Mr. SNYDER, Mr. WALGREN, and Mr. WINN):

H.R. 8834. A bill to amend title XVIII of the Social Security Act to authorize payment under the supplementary medical insurance program for optometric and medical vision care; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. CORMAN (for himself, Mr. MURPHY of Pennsylvania, and Mr. NIX):

H.R. 8835. A bill to amend title XVIII of the Social Security Act for the purpose of including community mental health centers among the entities which may be qualified providers of service for medicare purposes; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. CORRADA (for himself, Mr. AKAKA, Mr. WON PAT, Mr. HEFTEL, and Mr. YOUNG of Alaska):

H.R. 8836. A bill to provide financial assistance for the transportation from ports in the United States to the noncontiguous States and territories of cargo which is required to be transported by a vessel built in and documented under the laws of the United States by the Merchant Marine Act of 1920; to require that the charge for transporting such cargo be reduced by the amount of such assistance; and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. COUGHLIN:

H.R. 8837. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. DICKS:

H.R. 8838. A bill to amend title 38 of the United States Code to exempt from determinations with respect to annual income payments made to member employees of State soldier's homes; to the Committee on Veterans' Affairs.

By Mr. DORNAN (for himself, Mr. BAFALIS, Mr. MURPHY of Pennsylvania, Mr. STRATTON, Mr. GUYER, Mr. JEFFORDS, Mr. HYDE, Mr. SYMMS, Mr. ICHORD, Mr. JENRETTE, Mr. MCDONALD, Mr. TRIBLE, Mr. BAUCUS, Mr. RUDD, Mr. ROE, Mr. BURKE of Florida, Mr. RICHMOND, Mr. EDWARDS of Oklahoma, Mr. QUAYLE, and Mr. GILMAN):

H.R. 8839. A bill to amend the Export Administration Act of 1969 to provide for greater congressional oversight of exports of items which are subject to export controls imposed for purposes of national security; to the Committee on International Relations.

By Mr. DUNCAN of Tennessee:

H.R. 8840. A bill to amend title XVIII of the Social Security Act to remove the requirement that prior hospitalization is necessary before extended care facility benefits are available under the medicare program; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. FAUNTROY (for himself, Mr. BARNARD, Mr. GEPHARDT, Mr. MATTOX, Ms. OAKAR, Mr. PATTISON of New York, Mr. SEIBERLING, and Mrs. SPELLMAN):

H.R. 8841. A bill to provide for additional assistance for the preservation of historic structures under title I of the National Housing Act, section 312 of the Housing Act of 1964, and the act of October 15, 1966 (80 Stat. 917); jointly, to the Committees on Banking, Finance and Urban Affairs, and Interior and Insular Affairs.

By Mrs. FENWICK:

H.R. 8842. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce; to grant additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange service; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. FLYNT (for himself, and Mr. JENKINS):

H.R. 8843. A bill to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, fabric, yarn or fiber, and for other purposes; to the Committee on the Judiciary.

By Mr. FRASER:

H.R. 8844. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for the cost of removal of trees required by the United States or a State or local government to be removed to prevent the spread of diseases caused by pests; to the Committee on Ways and Means.

By Mr. FRASER (for himself, Mr. BADILLO, Mr. BEDELL, Mr. BINGHAM, Mr. BRODHEAD, Mr. CAPUTO, Mr. CARNEY, Mr. CORNELL, Mr. DIGGS, Mr. FAUNTROY, Mr. FLOOD, Mr. GILMAN, Mr. HANNAFORD, Mr. HARRINGTON, Mr. LE FANTE, Mr. LEHMAN, Mr. MARKEY, Ms. MIKULSKI, Mr. MITCHELL of Maryland, Mr. MOAKLEY, Mr. MURPHY of Pennsylvania, Mr. MICHAEL O. MYERS, Mr. NEAL, Mr. PATTERSON of California, and Mr. PATTISON of New York):

H.R. 8845. A bill to establish a comprehensive program of long-term care services for aged individuals, and to provide for the creation of community long-term care centers and State long-term care agencies as part of a new administrative structure for the organization and delivery of such services; jointly to the Committees on Agriculture, Education and Labor, Interstate and Foreign Commerce, the Judiciary, and Ways and Means.

By Mr. FRASER (for himself, Mr. PEASE, Mr. REUSS, Mr. RODINO, Mr. ROSENTHAL, Mr. SEIBERLING, Mr. SIMON, Mr. STOKES, Mr. WEAVER, Mr. CHARLES WILSON of Texas, Mr. WINN, Mr. YATRON, and Mr. ZEFERETTI):

H.R. 8846. A bill to establish a comprehensive program of long-term care services for aged individuals, and to provide for the creation of community long-term care centers and State long-term care agencies as part of a new administrative structure for the organization and delivery of such services; jointly, to the Committees on Agriculture, Education and Labor, Interstate and Foreign Commerce, the Judiciary, and Ways and Means.

By Mr. GOLDWATER (for himself, Mr. BADHAM, Mr. DORNAN, Mr. EDWARDS of Oklahoma, Mr. GOODLING, Mr. GUYER, Mr. HARKIN, Mr. HARRINGTON, Mr. KOCH, Mr. KOSTMAYER, Mr. LAFALCE, Mr. LEHMAN, Mrs. LLOYD of Tennessee, Mr. MINETA, Mr. MURPHY of Pennsylvania, Mr. PANETTA, Mr. QUIE, Mr. ROUSSELOT, Mrs. SPELLMAN, Mr. TREEN, and Mr. WHITEHURST):

H.R. 8847. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for the purchase and installation of certain teletypewriters for use by individuals whose sight, hearing, or speech is impaired; to the Committee on Ways and Means.

By Mr. HALL (for himself, Mr. JONES of Tennessee, Mr. BAFALIS, Mr. BURLESON of Texas, Mr. DERWINSKI, Mr. HYDE, Mr. MILFORD, Mr. STUMP, Mr. GUYER, Mr. FLOWERS, Mr. KEMP, Mr. ERTEL, Mr. WINN, Mr. ANDREWS of North Carolina, Mr. DICKS, Mr. SYMMS, Mr. HUGHES, Mr. SIMON, Mr. AUCOIN, Mr. WHITLEY, Mr. DORNAN, Mr. MAZZOLI, Mrs. SPELLMAN, and Mr. MINETA):

Seminole Indians in dockets 73 and 151 before the Indian Claims Commission, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. WEAVER:

H.R. 8911. A bill to amend the Export Administration Act of 1969 to prohibit exportation of the pelts of any fur-bearing animal and products made from such pelts, unless the Secretary of the Interior determines that such exportation will not result in a decline in the population of such animal, excluding animals raised in captivity; to the Committee on International Relations.

By Mr. WHELAN:

H.R. 8912. A bill to amend the Small Business Act to expand assistance under such Act to minority small business concerns, to provide statutory standards for contracting and subcontracting by the United States with respect to such concerns, and to create a Commission on Federal Assistance to Minority Enterprise, and for other purposes; jointly, to the Committees on Small Business, Government Operations, and Banking, Finance and Urban Affairs.

By Mr. WHALEN (for himself, Mr. SEIBERLING, Mr. BINGHAM, Mr. JONES of Oklahoma, and Mr. PANETTA):

H.R. 8913. A bill to provide that certain cost-of-living and other increased benefits received under title II of the Social Security Act will not be considered as income for purposes of determining eligibility and the amount of benefits of participants in the food stamp program and for purposes of determining eligibility and the amount of benefits of participants in certain programs concerning surplus agricultural commodities; to the Committee on Agriculture.

H.R. 8914. A bill to provide that social security benefit increases occurring after May 1977 shall not be considered as income or resources for the purposes of determining the eligibility for or amount of assistance which any individual or family is provided under certain Federal housing laws; to the Committee on Banking, Finance and Urban Affairs.

H.R. 8915. A bill to amend title XIX of the Social Security Act to make certain that individuals otherwise eligible for medicaid benefits do not lose such eligibility, or have the amount of such benefits reduced, because of increases in monthly social security benefits; to the Committee on Interstate and Foreign Commerce.

By Mr. WHALEN (for himself, Mr. BLANCHARD, Mr. CORNWELL, Mr. EVANS of Indiana, Mr. GILMAN, and Mr. PATTERSON of California):

H.R. 8916. A bill to provide that any increase in the rate of pay for Members of Congress proposed during any Congress shall not take effect earlier than the beginning of the next Congress; to the Committee on Post Office and Civil Service.

By Mr. WHALEN (for himself, Mr. SEIBERLING, Mr. BINGHAM, Mr. JONES of Oklahoma, and Mr. PANETTA):

H.R. 8917. A bill to amend title 38 of the United States Code to make certain that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced because of increases in monthly social security benefits; to the Committee on Veterans' Affairs.

By Mr. WHALEN (for himself, Mr. WALGREN, Mr. MCCLOSKEY, Mr. LEACH, Mr. GRADISON, and Mr. FORSYTHE):

H.R. 8918. A bill to amend the Internal Revenue Code of 1954 to provide that trusts established for the payment of product liability claims and related expenses shall be exempt from income tax, and that a deduction shall be allowed for contributions to such trusts; to the Committee on Ways and Means.

By Mr. WHALEN (for himself, Mr. SEIBERLING, Mr. BINGHAM, Mr. JONES of Oklahoma, and Mr. PANETTA):

H.R. 8919. A bill to amend the Social Security Act to make certain that recipients of aid to families with dependent children and recipients of supplemental security income benefits will not have the amount of such aid or benefits reduced because of increases in monthly social security benefits; to the Committee on Ways and Means.

By Mr. WHALEN (for himself, Mr. BEDELL, Mr. BENJAMIN, Mr. PATTISON of New York, Mr. SIMON, and Mrs. SPELLMAN):

H.R. 8920. A bill to amend title II of the Social Security Act to reduce the effect of wage and price fluctuation on old-age, survivors, and disability insurance benefits, with such benefits being computed on the basis of the worker's 10 or less years of highest earnings; to the Committee on Ways and Means.

By Mr. WHALEN (for himself, Mr. FARY, Mr. GUYER, Mr. MYERS of Indiana, Mr. PEPPER, Mr. SIMON, Mr. VAN DEERLIN, and Mr. CHARLES WILSON of Texas):

H.R. 8921. A bill to amend the Internal Revenue Code of 1954 to exclude from the gross income of an individual the first $5,000 received from civil service and Foreign Service retirement annuities; to the Committee on Ways and Means.

By Mr. WINN (for himself and Ms. KEYS):

H.R. 8922. A bill to amend the Natural Gas Act to provide certain limitations on gas curtailment plans; to the Committee on Interstate and Foreign Commerce.

Mr. WOLFF (for himself and Mr. PRITCHARD):

H.R. 8923. A bill to restore to certain institutions of higher learning their rights to determine academic standards of progress with respect to veterans and to provide counseling to veterans whose educational assistance allowance is discontinued under certain circumstances, and for other purposes; to the Committee on Veterans' Affairs.

Mr. YATRON (for himself, Mr. GUDGER, Mr. BEDELL, and Mrs. SPELLMAN):

H.R. 8924. A bill to amend the Immigration and Nationality Act to change certain criteria for determining whether an alien is excludable from admission to, or deportable from, the United States as a public charge and to provide that an alien may not be admitted to the United States unless a citizen of the United States enters into an enforceable agreement to provide support to such alien for a period of 5 years after admission; to the Committee on the Judiciary.

By Mr. DERWINSKI (for himself, Mr. BURGENER, Mr. COLLINS of Texas, Mrs. HOLT, Mr. ROSTENKOWSKI, Mr. WAGGONNER, and Mr. CHARLES WILSON of Texas):

H.J. Res. 576. Joint resolution to authorize the construction and maintenance of a monument to General Draza Mihailovich in the District of Columbia, in recognition of the role he played in saving the lives of approximately 500 U.S. airmen in Yugoslavia during World War II; to the Committee on House Administration.

By Mr. JACOBS (for himself, Mrs. KEYS, Mr. BEVILL, Mr. ENGLISH, Mr. HALL, Mrs. HOLT, Mr. HUCKABY, Mr. KETCHUM, Mr. LOTT, Mr. MCCLORY, Mr. STUMP, and Mr. WHITLEY):

H.J. Res. 577. Joint resolution to amend the Constitution of the United States to provide for balanced budgets and elimination of the Federal indebtedness; to the Committee on the Judiciary.

By Mr. NOLAN (for himself, Mr. ADDABBO, Mr. ANDERSON of California, Mr. BADILLO, Mr. BALDUS, Mr. BAUCUS, Mr. BEVILL, Mr. BINGHAM, Mr. BLOUIN, Mr. BOLAND, Mr. BONIOR, Mr. BRADEMAS, Mr. BRECKINRIDGE, Mr. BRODHEAD, Mr. BROWN of California, Mr. BURGENER, Mrs. BURKE of California, Mr. PHILLIP BURTON, Mr. CARNEY, Mr. CAVANAUGH, Mrs. CHISHOLM, Mr. CLEVELAND, Mr. COHEN, Mr. CONTE, and Mr. CORMAN):

H.J. Res. 578. Joint resolution authorizing the President to proclaim the third week of May of 1978 and 1979, as "National Architectural Barrier Awareness Week"; to the Committee on Post Office and Civil Service.

By Mr. NOLAN (for himself, Mr. VENTO, Mr. CORNWELL, Mr. CORRADA, Mr. D'AMOURS, Mr. DODD, Mr. DOWNEY, Mr. DRINAN, Mr. DUNCAN of Tennessee, Mr. EDGAR, Mr. EDWARDS of Oklahoma, Mr. EILBERG, Mr. FAUNTROY, Mr. FINDLEY, Mr. FISHER, Mr. GIBBONS, Mr. GILMAN, Mr. GLICKMAN, Mr. GORE, Mr. GRASSLEY, Mr. GUYER, and Mr. HANNAFORD):

H.J. Res. 579. Joint resolution authorizing the President to proclaim the third week of May 1978 and 1979 as "National Architectural Barrier Awareness Week"; to the Committee on Post Office and Civil Service.

By Mr. NOLAN (for himself, Mr. HOWARD, Mr. JEFFORDS, Mr. JENRETTE, Mr. KETCHUM, Mrs. KEYS, Mr. KILDEE, Mr. KINDNESS, Mr. KOSTMAYER, Mr. KREBS, Mr. LAGOMARSINO, Mr. LENT, Mr. LLOYD of California, Mrs. LLOYD of Tennessee, Mr. MCHUGH, Mr. MAGUIRE, Mr. MARKEY, Mr. MARKS, Mr. MARLENEE, Mr. MAZZOLI, Mrs. MEYNER, Ms. MIKULSKI, Mr. MIKVA, Mr. MILLER of California, and Mr. MINETA):

H.J. Res. 580. Joint resolution authorizing the President to proclaim the third week of May of 1978 and 1979 as "National Architectural Barrier Awareness Week"; to the Committee on Post Office and Civil Service.

By Mr. NOLAN (for himself, Mr. MOFFETT, Mr. MURPHY of Pennsylvania, Mr. NEAL, Mr. NICHOLS, Ms. OAKAR, Mr. O'BRIEN, Mr. OTTINGER, Mr. PANETTA, Mr. PATTERSON of California, Mr. PRESSLER, Mr. QUIE, Mr. RAHALL, Mr. RICHMOND, Mr. RODINO, Mr. ROE, Mr. ROSENTHAL, Mr. SANTINI, Mr. SIMON, Ms. SPELLMAN, Mr. SPENCE, Mr. STANGELAND, Mr. STARK, Mr. STEERS, and Mr. STOKES):

H.J. Res. 581. Joint resolution authorizing the President to proclaim the third week of May 1978 and 1979 as "National Architectural Barrier Awareness Week"; to the Committee on Post Office and Civil Service.

By Mr. NOLAN (for himself, Mr. VENTO, Mr. WATKINS, Mr. WEISS, Mr. WHITEHURST, Mr. BOB WILSON, Mr. CHARLES WILSON of Texas, Mr. WINN, Mr. YATRON, Mr. ZEFERETTI, Mr. WAXMAN, Mr. HORTON, Mr. MOAKLEY, and Mr. HAWKINS):

H.J. Res. 582. Joint resolution authorizing the President to proclaim the third week of May 1978 and 1979 as "National Architectural Barrier Awareness Week"; to the Committee on Post Office and Civil Service.

By Mr. OBERSTAR (for himself and Mr. MICHAEL O. MYERS):

H. Con. Res. 336. Concurrent Resolution urging the Soviet Union to release Yurij Shukhevych from prison on humanitarian grounds; to the Committee on International Relations.

By Mr. KOCH (for himself, Mr. GUYER, Mr. SOLARZ, Mr. COTTER, Mrs. MEYNER, Mr. ADDABBO, Mr. KOSTMAYER, Mr. MARKS, Mr. MAZZOLI, Mr. WAXMAN, Ms. OAKAR, Ms. MIKULSKI, Mr. HANSEN, Mr. MITCHELL of Maryland, Mr. BUCHANAN, Mr. EILBERG, Mr. FARY, Mr. WALGREN) :

H. Con. Res. 337. Concurrent Resolution urging the Soviet Union to release Yurij Shukhevych from prison on humanitarian grounds; to the Committee on International Relations.

By Mr. KOCH (for himself, Mr. GUYER, Mr. SOLARZ, Mr. GILMAN, Mr. COTTER, Mrs. MEYNER, Mr. ADDABBO, Mr. KOSTMAYER, Mr. MARKS, Mr. MAZZOLI, Mr. WAXMAN, Ms. OAKAR, Mr. SIMON, Ms. MIKULSKI, Mr. HANSEN, Mr. BUCHANAN, Mr. EILBERG, Mr. FARY, Mr. WALGREN, Mr. ROE, and Mr. RICHMOND) :

H. Con. Res. 338. Concurrent resolution urging the Soviet Union to release Mykola Rudenko and Oleksa Tykhy; to the Committee on International Relations.

By Mr. KOCH (for himself, Mrs. FENWICK, Mr. DODD, Mr. ARCHER, Mr. PHILLIP BURTON, Mr. BRODHEAD, Mr. KEMP, Mr. BONIOR, Mr. WOLFF, Mr. MOAKLEY, Mr. BLANCHARD, Mr. CRANE, Mr. DRINAN, Mr. RODINO, Mr. LONG of Maryland, Mr. RANGEL, Ms. HOLTZMAN, Mr. NEDZI, Mr. ROSENTHAL, Mr. OTTINGER, Mr. FRASER, Mr. BEVILL, Mr. HYDE, Mr. PEASE, and Mr. HORTON) :

H. Con. Res. 339. Concurrent resolution urging the Soviet Union to release Mykola Rudenko and Oleksa Tykhy; to the Committee on International Relations.

By Mr. LENT (by request) :

H. Con. Res. 340. Concurrent resolution calling for the convening of a convention for proposing amendments to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. ANDERSON of Illinois (for himself, Mr. RHODES, Mr. COHEN, Mr. GOLDWATER, Mr. HAGEDORN, Mrs. HOLT, and Mr. PRESSLER) :

H. Res. 744. Resolution providing for the consideration of the bill (H.R. 8125) to provide for the appointment of a special prosecutor in appropriate cases, and to require the Attorney General to make a preliminary investigation of alleged improper influence in Congress to determine whether or not such a special prosecutor should be appointed for any cases arising therefrom; to the Committee on Rules.

By Mr. BONKER (for himself and Mr. DICKS) :

H. Res. 745. Resolution relating to the future telecommunications policy of the Nation; to the Committee on Interstate and Foreign Commerce.

By Mr. DORNAN (for himself, Mr. BEILENSON, Mr. ROUSSELOT, Mr. BURGENER, Mr. WIGGINS, Mr. KETCHUM, Mr. MOORHEAD of California, Mrs. PETTIS, Mr. DON H. CLAUSEN, Mr. ASHBROOK, and Mr. BEARD of Tennessee) :

H. Res. 746. Resolution commending Francis Gary Powers; to the Committee on Post Office and Civil Service.

By Mr. FINDLEY (for himself, Mr. BYRON, Mr. GOLDWATER, Mr. HAGEDORN, Mr. JENKINS, Mr. MANN, Mr. MIKVA, Mr. MONTGOMERY, and Mr. PEASE) :

H. Res. 747. Resolution to maximize local nighttime radio service; to the Committee on Interstate and Foreign Commerce.

By Mrs. LLOYD of Tennessee:

H. Res. 748. Resolution disapproving the proposed deferral (D77-58A) of budget authority for the Clinch River breeder reactor; to the Committee on Appropriations.

By Mr. McDONALD (for himself, Mr. ARCHER, Mr. CONABLE, Mr. FREY, Mr. STANTON, Mr. TEAGUE, Mr. CORCORAN of Illinois, Mr. RINALDO, Mr. GAMMAGE, and Mr. EVANS of Delaware) :

H. Res. 749. Resolution to amend the Rules of the House of Representatives to establish the Committee on Internal Security, and for other purposes; to the Committee on Rules.

By Mr. TREEN:

H. Res. 750. Resolution relative to establishing a national telecommunications policy; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BADILLO:

H.R. 8925. A bill for the relief of Fernando Gutierrez Lazo and Dolores Moya Machado; to the Committee on the Judiciary.

By Mr. COHEN:

H.R. 8926. A bill for the relief of Gregory Wayne Olsen; to the Committee on the Judiciary.

H.R. 8927. A bill for the relief of Monika Grantz; to the Committee on the Judiciary.

By Mr. DORNAN:

H.R. 8928. A bill for the relief of Nguyen Cong Hoan; to the Committee on the Judiciary.

By Mr. PRICE:

H.R. 8929. A bill for the relief of Dr. Cosme R. Cagas, Mrs. Linda San Diego Cagas, Elcee Cagas, Chess Cagas, Georgina Cagas, and Chester Cagas; to the Committee on the Judiciary.

By Mr. RYAN:

H.R. 8930. A bill to confer U.S. citizenship posthumously upon Leopoldine Marie Schmid; to the Committee on the Judiciary.

By Mr. SOLARZ:

H.R. 8931. A bill for the relief of Joseph W. Mottola, Brooklyn, N.Y.; to the Committee on the Judiciary.

By Mr. TREEN:

H.R. 8932. A bill for the relief of Hannah Cunningham; to the Committee on the Judiciary.

By Mr. YOUNG of Florida:

H.R. 8933. A bill for the relief of Dr. Virgilio Follosco Floresca and Thelma Pulido Floresca; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

173. By the SPEAKER: Petition of the Yankee Division Veterans Association, Inc., Boston, Mass., relative to proposed changes in the code of conduct for prisoners of war; to the Committee on Armed Services.

174. Also, petition of the council of the city of New York, N.Y., relative to creation of a Federal bank to loan money to cities; to the Committee on Banking, Finance and Urban Affairs.

175. Also, petition of the Yankee Division Veterans Association, Inc., Boston, Mass., relative to the Panama Canal and Canal Zone; to the Committee on International Relations.

176. Also, petition of the Yankee Division Veterans Association, Inc., Boston, Mass., relative to shipping imported oil in American-flag tankers; to the Committee on Merchant Marine and Fisheries.

177. Also, petition of the Yankee Division Veterans Association, Boston, Mass., relative to the American Battle Monuments Commission; to the Committee on Veterans' Affairs.

REGULATION OF LOBBYING ACT

In compliance with Public Law 601, 79th Congress, title III, Regulation of Lobbying Act, section 308(b), which provides as follows:

(b) All information required to be filed under the provisions of this section with the Clerk of the House of Representatives and the Secretary of the Senate shall be compiled by said Clerk and Secretary, acting jointly, as soon as practicable after the close of the calendar quarter with respect to which such information is filed and shall be printed in the CONGRESSIONAL RECORD.

The Clerk of the House of Representatives and the Secretary of the Senate jointly submit their report of the compilation required by said law and have included all registrations and quarterly reports received.

REGISTRATIONS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following registrations were submitted for the second calendar quarter 1977:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19_____

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).

(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) Description, (*b*) quantity distributed; (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following quarterly reports were submitted for the second calendar quarter 1977:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19_____

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).
(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports. ☐

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $_____Dues and assessments
2. $_____Gifts of money or anything of value
3. $_____Printed or duplicated matter received as a gift
4. $_____Receipts from sale of printed or duplicated matter
5. $_____Received for services (e.g., salary, fee, etc.)

6. $_____TOTAL for this Quarter (Add items "1" through "5")
7. $_____Received during previous Quarters of calendar year

8. $_____TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $_____TOTAL now owed to others on account of loans
10. $_____Borrowed from others during this Quarter
11. $_____Repaid to others during this Quarter

12. $_____"Expense money" and Reimbursements received this Quarter

Contributors of $500 or more (from Jan. 1 through this Quarter)

13. Have there been such contributors?

Please answer "yes" or "no": _____

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and Address of Contributor* ("*Period*" from Jan. 1 through _____, 19____)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Expenditures (other than loans)

1. $_____Public relations and advertising services
2. $_____Wages, salaries, fees, commissions (other than item "1")
3. $_____Gifts or contributions made during Quarter
4. $_____Printed or duplicated matter, including distribution cost
5. $_____Office overhead (rent, supplies, utilities, etc.)
6. $_____Telephone and telegraph
7. $_____Travel, food, lodging, and entertainment
8. $_____All other expenditures

9. $_____TOTAL for this Quarter (Add "1" through "8")
10. $_____Expended during previous Quarters of calendar year

11. $_____TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302(b).

12. $_____TOTAL now owed to person filing
13. $_____Lent to others during this Quarter
14. $_____Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More

In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7–11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7–15, 8–15, 9–15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

A. Bruce Adams, 2030 M Street NW., Washington, D.C. 20036.
B. Common Cause, 2030 M Street NW., Washington, D.C. 20036.
D. (6) $4,499.97. E. (9) $11.40.

A. John J. Adams, Suite 1040, 1730 Pennsylvania Avenue NW., Washington, D.C. 20006.
B. Ethyl Corp., 330 South Fourth Street, Richmond, Va.
D. (6) $175.

A. John J. Adams, Suite, 1060, 1730 Pennsylvania Avenue NW., Washington, D.C. 20006.
B. Vepco, Seventh and Franklin Streets, Richmond, Va.
D. (6) $450.

A. William P. Adams, 1600 I Street NW., Washington, D.C. 20006.
B. Motion Picture Association of America, Inc., 1600 I Street NW., Washington, D.C. 20006.

A. Aerospace Industries Association of America, Inc., 1725 DeSales Street NW., Washington, D.C. 20036.
D. (6) $11,069.34. E. (9) $11,069.34.

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following reports for the first calendar quarter of 1977 were received too late to be included in the published reports for that quarter:

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19_____

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).
(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

SENATE—*Friday, August 5, 1977*

(Legislative day of Tuesday, July 19, 1977)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by Hon. JAMES R. SASSER, a Senator from the State of Tennessee.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

The Lord shall preserve thy going out and thy coming in from this time forth, and even forevermore.—Psalms 121: 8.

Let us pray:

O God of grace and glory, who has watched over our going out and our coming in, our early openings and late closings, we thank Thee for Thy presence guarding, guiding, correcting and judging our efforts. We thank Thee for adding Thy strength to our weakness, for leaders who lead, for Members exerting their energies for maximum achievement, for workers in obscure places supporting the public effort, and for all those beyond this place who help shape the national policy. In the coming days, take what we have done and are doing and perfect it all more nearly like unto Thy kingdom on Earth. Abide with us wherever we may be, granting unto us the peace of those who love the Lord and strive to do His will. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The second assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., August 5, 1977.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable JAMES R. SASSER, a Senator from the State of Tennessee, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. SASSER thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from California is recognized.

THE JOURNAL

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Journal of the proceedings of yesterday, Thursday, August 4, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate go into executive session to consider nominations on the Executive Calendar.

Mr. BAKER. Mr. President, reserving the right to object—and I shall not object—the nominations on the Executive Calendar, beginning with National Credit Union Administration and continuing on the second page through those nominations placed on the Secretary's desk, are cleared for consideration and confirmation. We have no objection to proceeding to executive session.

There being no objection, the Senate proceeded to the consideration of executive business.

The ACTING PRESIDENT pro tempore. The clerk will state the first nomination.

NATIONAL CREDIT UNION ADMINISTRATION

The second assistant legislative clerk read the nomination of Lawrence Connell, Jr., of Connecticut, to be Administrator of the National Credit Union Administration.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

THE JUDICIARY

The second assistant legislative clerk read the nomination of T. F. Gilroy Daly, of Connecticut, to be U.S. district judge for the District of Connecticut.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

DEPARTMENT OF JUSTICE

The second assistant legislative clerk read the nomination of George V. Grant, of New York, to be U.S. marshal for the Southern District of New York.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

DEPARTMENT OF LABOR

The second assistant legislative clerk read the nomination of Roland Ray Mora, of California, to be Deputy Assistant Secretary of Labor for Veterans' Employment.

Mr. CRANSTON. Mr. President, in urging the Senate to confirm the nomination of Roland R. Mora to be the first Deputy Assistant Secretary of Labor for Veterans' Employment—DAS—I think it is important to clarify for the benefit of my colleagues a number of concerns which the Committee on Veterans' Affairs, which I am privileged to chair, has in regard to the implementation by the Department of Labor of the Deputy Assistant Secretary position.

Section 601 of Public Law 94–502, the Veterans' Education and Employment Assistance Act of 1976, enacted on October 15, 1976, establishes the DAS position within the Department of Labor "to be the principal adviser to the Secretary of Labor with respect to the formulation and implementation of all departmental policies and procedures to carry out . . . all Department of Labor employment, unemployment, and training programs to the extent that they affect veterans."

The nomination of Roland Mora for this new position was received by the Senate on June 6, 1977, and referred jointly to the Veterans' Affairs and Human Resources Committees. I chaired a joint confirmation hearing on June 9. Following the hearing, Mr. Mora submitted to the committees, on June 29, written responses to 28 issues which were raised at the hearing.

On June 17, Under Secretary of Labor Robert Brown appeared before the Subcommittee on Health and Readjustment which I chair on the Committee on Veterans' Affairs, and presented testimony regarding veterans' employment. At that time, he responded to a series of questions relating to the new DAS position.

Mr. President, it is our desire that Mr. Mora begin his new and important role as Deputy Assistant Secretary with the strongest possible support within the Department to assist him in carrying out effectively the demanding and unprecedented responsibilities which he will be undertaking.

After carefully reviewing the responses received from the Department and from the nominee during this process, the Committee on Veterans' Affairs continued to be deeply concerned about a number of issues that could potentially hinder the ability of the DAS to carry out the intent and mandate of the law.

In light of these concerns, Mr. President, all of the members of the Senate Veterans' Affairs Committee—Senator STAFFORD, the ranking minority member, and Senators TALMADGE, RANDOLPH, DURKIN, STONE, MATSUNAGA, THURMOND, and HANSEN—on July 21, 1977, joined in a letter to Secretary of Labor Ray Marshall in order to seek to clarify a number of issues which were of particular concern to the committee. These issues include staffing of the DAS office, travel funds and office expenses, pay grade of the DAS, clearance role in policy formulation, and the DAS' role as principal adviser to the Secretary for veterans matters.

Mr. President, I ask unanimous consent that a copy of our letter be printed in the RECORD at this point, together with a copy of the response from Secretary Marshall which was received by the Senate Veterans' Affairs Committee on August 2.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., July 21, 1977.

Hon. F. RAY MARSHALL,
Secretary of Labor,
Washington, D.C.

DEAR MR. SECRETARY: We are writing to express our concern in regard to the establishment of the statutory position of

Deputy Assistant Secretary of Labor for Veterans Employment (DAS), for which the President has nominated Roland Mora to be the first such office-holder.

Section 601 of Public Law 94–502, the Veterans' Education and Employment Assistance Act of 1976, established the DAS position within the Department of Labor "to be the principal advisor to the Secretary of Labor with respect to the formulation and implementation of all departmental policies and procedures" to carry out the purposes of chapters 41 (Job Counseling, Training, and Placement Service for Veterans), 42 (Employment and Training of Disabled and Vietnam Era Veterans), and 43 (Veterans' Reemployment Rights) of title 38, United States Code. In addition, the DAS is mandated to serve as the principal advisor to the Secretary with respect to the formulation and implementation of all departmental policies and procedures to carry out "all other Department of Labor employment, unemployment, and training programs to the extent they affect veterans."

We agree with your statement following your swearing-in that the unemployment problems among veterans, particularly disabled, minority and Vietnam-era veterans, must be among the "highest priorities"—these veterans "continue to bear a disproportionate share of the unemployment that exists today. . . . We cannot permit ourselves to become insensitive to the plight of thousands of Vietnam-era veterans who have borne the brunt of our involvement in a regrettable war and continue to bear a disproportionate share of the Nation's economic distress." (Statement, Secretary of Labor Ray Marshall, January 27, 1977.)

The Senate Veterans' Affairs Committee's report (No. 94–1243, 94th Cong., 2d Sess.) accompanying S. 969, ultimately enacted as Public Law 94–502, stressed the importance of consolidating responsibilities for veterans' employment matters at an appropriate level of accountability. The Committee on Veterans' Affairs had found that the Director of the Veterans Employment Service "was located at too low a level within the Department of Labor to carry out the congressional mandates in an effective and expeditious fashion." (Id. at page 139.) We believe that the implementation of the DAS position is a fundamental part of the Federal Government's efforts to provide veterans with meaningful job employment opportunities.

We are aware of your interest in assisting unemployed veterans and your concern that Roland Mora be enabled to do a first-rate job as the first DAS. However, we believe it important to bring to your attention concerns which, if unresolved, could seriously hinder the efforts of the DAS and, indeed, the Department of Labor, in alleviating veterans unemployment. We believe that it is imperative that these matters be resolved expeditiously so that we can move ahead to fill the DAS position. In this regard, we would appreciate your consideration of and comments on the following matters:

1. Staffing. The DAS designate, Roland Mora, in his written response to questions asked at the June 9 joint confirmation hearing before the Committees on Veterans' Affairs and Human Resources, and received by the Committees on June 29, reported that the Department of Labor has agreed to provide the DAS with a staff of three: a Special Assistant, GS–14; an Administrative Assistant, GS–12; and a Secretary, GS–8/9. (Mora responses, Question 2.) On June 17, Undersecretary of Labor Robert Brown testified before the Subcommittee on Health and Readjustment of the Committee on Veterans' Affairs that the DAS would be provided with four staff positions—the same as the staffing for the Undersecretary, himself. (Employment hearing transcript, June 17, at page 29.) We believe that the DAS, given the very demanding and unprecedented obligations of his new post, will need at least the four-person staff promised by the Undersecretary.

2. Travel Funds and Office Expenses. We believe that it is vitally important that the DAS be provided with sufficient new funds for necessary travel and office expenses. Mr. Mora's written response to a question in regard to travel money states that "the Department of Labor has already budgeted a total of $5,824,000 during Fiscal Year 1977 and $5,941,000 during Fiscal Year 1978 for which [he] will be responsible. Incorporated into this figure is $30,000 for travel of the DASVE and his immediate staff." (Mora responses, Question 5.)

It appears from this answer that the funds allocated to the DAS have been obtained by reducing the amount of money which the Veteran Employment Service (VES) would otherwise have been allocated. In addition, we are concerned that $30,000 may not be sufficient to support adequate travel and office expenditures. We would like to know how that figure was reached and whether it represents a reallocation of travel money already budgeted for the VES, and, if so, whether you believe that is an appropriate response.

3. Pay Grade. We are concerned that the grade of the DAS be established at a level which will enable him to meet his obligations effectively. Currently within the Department there are 10 Deputy Assistant Secretaries. Five are GS–17's; three are GS–18's; one is a GS–16; and one is a level V. During the hearing on June 17, 1977, the following exchange between Senator Thurmond and Undersecretary Brown took place:

Mr. THURMOND. Mr. Brown, do we understand correctly that the Deputy Assistant Secretary for Veterans Employment, an office created last year, will be on a co-equal basis as the current Deputy Assistant Secretary for Employment and Training [DAS–ET]? Mr. Brown, they are both Deputy Assistant Secretaries. Are they going to be on a co-equal basis?

Mr. BROWN. Senator, they are—as I indicated to the Chairman before, I believe, there are 10 Deputy Assistant Secretaries in [the] Department. We intend to make, in our judgment, as co-equal a relationship as possible.

In order to assure that relationships are "co-equal", it would seem that the DAS (VE) and the DAS(ET)—both of whom have important responsibilities and serve as deputies to the Assistant Secretary for Employment and Training—should be accorded similar stature in pay level. Although we recognize that the Manpower Administrator (DAS–ET) is mandated at level V (5 U.S.C. 5316(88)), we believe that consideration should be given to establishing the DAS at a level V also, pursuant to 5 U.S.C. 5317; or at least, at a GS–18. Such an elevation would seem appropriate in light of the GS levels of other employees within the Employment and Training Administration. It is the Committee's understanding, for example, that the Deputy Administrator of the United States Employment Service is a GS–17.

4. Clearance Process. Undersecretary Brown, on June 17, testified that the United States Employment Service (USES) will clear all departmental responses to inquiries in regard to chapter 41, title 38, United States Code (Job Counseling, Training and Placement Services for Veterans). This would seem an unnecessary and inevitably time-consuming clearance step for matters exclusively within the jurisdiction of the VES since the Department has assured the Committees that VES is being removed from the jurisdiction of USES and placed directly under the DAS. Similarly, it seems inappropriate for the Administrator of the U.S. Employment Service to be given clearance authority over responses bearing the signature of the DAS. This was apparently the case for Mr. Mora's responses to questions submitted on June 29, 1977. We do not believe such a clearance step should exist.

5. Role as Principal Advisor to the Secretary. The Committee is concerned that the Deputy Assistant Secretary actively carry out his statutorily mandated duties "in the formulation and implementation of . . . policies and procedures" in regard to the veterans' affirmative action and mandatory job listing programs (chapter 42, title 38, United States Code) administered by the Office of Federal Contract Compliance, and the Veterans Reemployment Rights program (chapter 43, title 38, United States Code). However, we are informed that this responsibility will be generally discharged by the DAS consulting with and providing "guidance to these organizations (OFCC and OVRR) on the formulation and implementation of their policies and programs as they affect veterans." (Mora response, Question 9.) This description of the DAS's responsibilities in regard to chapters 42 and 43 would appear to dilute considerably the DAS role envisioned in the statute.

We believe the DAS should have an explicit clearance role regarding the policies and procedures of the section 2012 and OVRR programs.

We are also concerned that the DAS will not be involved to the extent necessary in the implementation and formulation of policies and procedures in regard to Comprehensive Employment and Training Act (CETA). With respect to the relationship of the DAS to the promulgation of CETA regulations affecting veterans, we are informed that the DAS "will advise the Assistant Secretary for Employment and Training concerning issues raised by the regulations." That described role of the DAS in the promulgation of regulations does not, without more, conform with the formulation and implementation role required by law. The importance of the DAS in the formulation of CETA policy is underscored by the upcoming enactment of H.R. 6138, Youth Employment and Demonstration Projects.

Section 305 of that Act mandates the Secretary to take appropriate steps to increase participation of certain veterans in public service employment programs and job training opportunities. Although the Conference Committee deleted the Senate-passed provision that the Secretary of Labor consult with the DAS with respect to implementing this mandate, the conferees noted "that under the law, the Deputy Assistant Secretary is the principal advisor to the Secretary on all matters relating to veterans' employment and [the conferees] believe that such consultation would be a matter of normal procedure . . . ." (S. Rept. No. 95–456, at page 43).

We believe that the DAS should be intimately and actively involved in the formulation and implementation of policies and procedures for CETA to the extent veterans are affected and for the affirmative action, job listing, and reemployment rights programs. This involvement should include an express role of clearance and an assurance of direct access to you and the Undersecretary regarding all such policies and procedures when the clearance process does not, in the DAS's judgment, resolve his concerns.

The administrative implementation of the DAS position should spell out this role.

We are extremely anxious to have your

consideration of a response to the above matters at your earliest convenience.

ALAN CRANSTON,
Chairman.
ROBERT T. STAFFORD,
Ranking Minority Member.
HERMAN E. TALMADGE,

CLIFFORD P. HANSEN,

U.S. DEPARTMENT OF LABOR,
Washington, D.C., August 2, 1977.

Hon. ALAN CRANSTON,
Chairman, Committee on Veterans Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN AND MEMBERS OF THE COMMITTEE: Thank you for your joint letter of July 21, inquiring about certain administrative arrangements relating to the new office of Deputy Assistant Secretary for Veterans' Employment. I am in full agreement with the views expressed in the Committee's letter. It is imperative that we move ahead to fill the Deputy Assistant Secretary position. I think that Roland Mora is an excellent candidate for the position. I hope that his confirmation can be effected in the very near future.

You may be sure that one of the highest priorities of this Department is addressing the unemployment problems of veterans, and particularly disabled, minority and Vietnam-era veterans.

Your letter requested my consideration of several internal matters in the office of the Deputy Assistant Secretary. My responses are listed below:

1. Staffing. I have reviewed the staffing plans for the immediate office of the Deputy Assistant Secretary for Veterans' Employment and have concluded that a staff of four positions, as mentioned by Under Secretary Brown in the hearings on June 17, will be provided.

2. Travel Funds. The $5,941,000 of Fiscal Year 1978 funds cited as the amount for which the Deputy Assistant Secretary for Veterans' Employment will be responsible, is the Veterans Employment Service budget for that year. However, it does not include financing the immediate office of the Deputy Assistant Secretary. Funds for that office were determined after the preparation of the Fiscal Year 1978 estimates. The Veterans Employment Service budget includes $369,000 for travel. The estimate of $30,000 for the immediate office of the Deputy Assistant Secretary's travel is exceedingly generous by standards applied to all other components of the Department.

3. Pay Grade. We considered the grade level of the new Deputy Assistant Secretary very carefully. We also considered the duties and responsibilities of that position in relation to the program responsibilities of other Deputy Assistant Secretary positions in the Department. Our review resulted in allocation of the new position at the GS–17 level. Executive Level V positions in the Department of Labor all have very broad, line program management responsibilities. The Deputy Assistant Secretary for Employment and Training, for example, has line responsibility for employment and training programs amounting to $20.7 billion in Fiscal Year 1977, including the Department's part of the President's economic stimulus package. The new Deputy Assistant Secretary for Veterans' Employment position is primarily policy advisor to the Secretary, with line management responsibility only for the Veterans Employment Service. While this is an important role, it does not embrace the broad responsibilities of other Deputy Assistant Secretary positions. The GS–17 level is held by other officials who have significant responsibilities commensurate with those of the Deputy Assistant Secretary for Veterans Affairs. I, therefore, believe that allocation of this position at the GS–17 level is appropriate.

4. Clearance Process. Under terms of the Wagner-Peyser Act, the director of the United States Employment Service is responsible for programs of placement and job counseling. Therefore, issuance of policy guidance or interpretation pertaining thereto is of primary concern to that office. It is appropriate that the Employment Service exercise clearance over certain Veterans Employment Service matters. Such "clearance," of course, will not apply to matters exclusively within the jurisdiction of the Veterans Employment Service. Until the Deputy Assistant Secretary is confirmed and officially on the job, the Veterans Employment Service remains under the jurisdiction of the Administrator, United States Employment Service, and all official materials are cleared by his office.

5. Role as Principal Advisor to the Secretary. The Deputy Assistant Secretary for Veterans' Employment will be expected to actively carry out his responsibilities to me as principal advisor in the formulation and implementation of policies and procedures related to chapters 42 and 43 of the United States Code. He will also be responsible for chapter 41 (vis-a-vis jobs and training under the Comprehensive Employment and Training Act, et al.), and all other matters pertaining to veterans. Under Secretary Brown's letter to you of June 23, 1977, makes it explicit that the Deputy Assistant Secretary will have direct access to both our offices on any and all matters affecting veterans whenever our involvement is necessary. On other business, the Deputy Assistant Secretary will work closely with the line Assistant Secretaries and their staffs on policy and procedures for most effectively dealing with veterans' needs. I believe that it is unsound administration to establish two structures with line management responsibilities for the same program; or to separate the administration of an operating program along "clients-to-be-served" lines. I am convinced that the role of the Deputy Assistant Secretary for Veterans' Employment is workable and in complete compliance with the statute as we have designed it.

I hope that this letter responds fully to the matters raised in your letter of July 21. I reiterate my concern that we move forward expeditiously to fill the position of the Deputy Secretary for Veterans' Employment.

Sincerely,

RAY MARSHALL,
Secretary of Labor.

Mr. CRANSTON. Mr. President, to summarize briefly the results of this correspondence, Mr. Mora has been assured one additional staff position—for a total of four positions—but no additional funds for travel and office expenses have been allocated and no increase in grade level above GS–17 has been made. In addition, the Director of the U.S. Employment Service will continue to be able to exercise clearance over certain Veterans' Employment Service matters. The Secretary also indicated that while the DAS will have direct access to the Secretary and the Under Secretary, he will work within the line management of the assistant secretaries.

These responses are not as forthcoming as we had hoped, Mr. President. Mr. Mora's position and responsibilities within the Department have not been as clearly or firmly established as would be desirable and as may be necessary. However, we have done our very best to gain the commitments that we could, and now I strongly believe that the Senate should act to confirm Mr. Mora's nomination.

I also recognize the administration's concern for the employment needs of veterans. The commitment of the Department of Labor is evidenced by the implementation of such initiatives as Project HIRE and the Disabled Veterans' Outreach program—both programs, at last, showing signs of success.

Nevertheless, I remain deeply concerned about certain internal decisions and relationships in the Department that will undoubtedly impact on the position of the new DAS. I believe, however, that any difficulties that do arise will have to be dealt with at that time, and that no purpose would be served in delaying the confirmation further. We now have on the record an unusually large amount of congressional intent and certain commitments that have been made by the Department to implement the law fully. The committee will be watching developments in this area very closely, and I intend to do all I can to insure the success of the DAS office and of Mr. Mora.

Mr. Mora will, I feel sure, do his utmost to serve veterans, and will work hard to promote increased employment for this segment of the population.

He is, as Secretary Marshall said in his August 2 letter, "an excellent candidate for the position". I am certain he will bring to the Department an increased awareness of the problems of veterans—especially Vietnam-era, disabled, and minority veterans—and a renewed and strengthened commitment to serving the employment needs of those who have served this Nation in time of conflict.

I urge the Senate to take prompt and favorable action on the nomination at this time.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

U.S. ARMY

The second assistant legislative clerk read the nomination of Col. James Clifford Good, to be brigadier general.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Maj. Gen. Harold Robert Aaron, to be lieutenant general.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

U.S. NAVY

The second assistant legislative clerk read the nomination of Vice Adm. John G. Finneran, U.S. Navy, to be vice admiral on the retired list.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Real Adm. Charles H. Griffiths, U.S. Navy, to be vice admiral.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

NOMINATIONS PLACED ON THE SECRETARY'S DESK

The second assistant legislative clerk proceeded to read sundry nominations placed on the Secretary's desk in the Air Force, Army, and Navy.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

Mr. CRANSTON. Mr. President, I ask unanimous consent that it be in order to reconsider en bloc the vote by which all the nominations were confirmed.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. CRANSTON. I move to reconsider the vote.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CRANSTON. I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

DEPARTMENT OF JUSTICE

Mr. ROBERT C. BYRD. Mr. President, I have a nomination, which has been reported from the Committee on the Judiciary, of Mr. William H. Shaheen, of New Hampshire, to be U.S. attorney for the district of New Hampshire. I ask unanimous consent that the 1-day rule be waived and that the Senate proceed immediately to its consideration.

The PRESIDING OFFICER (Mr. ANDERSON). Is there objection? Without objection, it is so ordered.

The clerk will state the nomination.

The second assistant legislative clerk read the nomination of William H. Shaheen, of New Hampshire, to be U.S. attorney for the district of New Hampshire.

Mr. DURKIN. Mr. President, I strongly support the nomination of Mr. William Shaheen of Dover, N.H., to the position of U.S. Attorney for the District of New Hampshire.

Mr. Shaheen is a graduate of the University of Mississippi Law School, where he graduated No. 2 in his class and served two terms as president of the law school student body. Mr. Shaheen has served as city attorney for the city of Somersworth, N.H., and is a partner in the law firm of Keefe, Dunnington and Shaheen.

I am proud to support this excellent nomination and am confident that Bill Shaheen will well serve the citizens of New Hampshire and the Nation.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. I move to reconsider the vote by which the nomination was confirmed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate resume consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

TIME-LIMITATION AGREEMENT—S. 977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, at such time as S. 977, relating to the primary energy source of electric powerplants and major fuel-burning installations, is called up and made the pending business before the Senate, there be a time limitation on debate of 2 hours, to be equally divided between Mr. JACKSON and Mr. HANSEN; that there be a time limitation on any amendment thereto of 1 hour; that there be a time limitation on one amendment by Mr. KENNEDY of 4 hours, with the proviso that, if a tabling motion fails, there be no time limitation on that amendment; and that there be a time limitation of 30 minutes on any amendment to an amendment, debatable motion, appeal, or point of order, if such is submitted to the Senate; and that the agreement be in the usual form.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, reserving the right to object for just a moment, to make sure that I fully understand the last provisions of the majority leader's request, let me repeat them as they sounded to me.

The request is that there is an amendment by Mr. KENNEDY, on which there would be a time limitation of 4 hours; that if there is a tabling motion against the Kennedy amendment, which does not prevail—that is to say, the Kennedy amendment is not tabled—then there would be no time limitation on the bill and that other amendments would be in order on which there would be no time limit.

Mr. ROBERT C. BYRD. There would be no time limitation on that amendment; provided further that no other amendment dealing with divestiture, indirectly or directly, be in order——

Mr. BAKER. Present or prospective.

Mr. ROBERT C. BYRD. Present or prospective—be in order.

Mr. BAKER. With that understanding, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The text of the agreement is as follows:

Ordered, That when the Senate proceeds to the consideration of S. 977 (Order No. 336), a bill to require that new and, to the extent practicable, existing electric powerplants and major fuel-burning installations, in categories to be determined, utilize other than natural gas or petroleum as their primary energy source in compliance with applicable environmental requirements, and for other purposes, debate on any amendment in the first degree (except an amendment by the Senator from Massachusetts (Mr. Kennedy), on which there shall be 4 hours: *Provided,* That if a motion to table the Kennedy amendment fails, there shall be no time limitation on the Kennedy amendment: *Provided further,* That no other amendment dealing with divestiture shall be in order) shall be limited to 1 hour, to be equally divided and controlled by the mover of such and the manager of the bill; debate on any amendment in the second degree shall be limited to 30 minutes, to be equally divided and controlled by the mover of such and the manager of the bill; and debate on any debatable motion, appeal, or point of order which is submitted or on which the Chair entertains debate shall be limited to 20 minutes, to be equally divided and controlled by the mover of such and the manager of the bill: *Provided,* That in the event the manager of the bill is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or his designee: *Provided further,* That no amendment that is not germane to the provisions of the said bill shall be received.

Ordered further, That on the question of the final passage of the said bill, debate shall be limited to 2 hours, to be equally divided and controlled, respectively, by the Senator from Washington (Mr. Jackson) and the Senator from Wyoming (Mr. Hansen): *Provided,* That the said Senators, or either of them, may from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, debatable motion, appeal, or point of order.

NATIONAL SCIENCE FOUNDATION—CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, on behalf of Mr. KENNEDY, I submit a report of the committee of conference on H.R. 4991 and ask for its immediate consideration.

Mr. BAKER. Mr. President, reserving the right to object, and there is no objection, the conference report is privileged and we are prepared to proceed with it.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4991) to authorize appropriations for activities of the National Science Foundation, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of July 20, 1977.)

Mr. KENNEDY. Mr. President, the

conference report on the authorization for the National Science Foundation which is before the Senate today is the result of 2 months of negotiations between our conferees and the conferees representing the House. During that period the differences between the two bills were examined in detail and every effort was made to incorporate the major concerns of each body, and of especially interested individual members, into the final bill. In my view, the compromise we are bringing to a vote today merits the full support of the Senate. It was approved unanimously by the House yesterday.

As chairman of the Senate conferees I want to call to the attention of my colleagues the major funding provisions of the final bill.

First, the conference agreement authorizes $884,250,000 for the Foundation for fiscal year 1978. This is an 11-percent increase over the Foundation's 1977 operating budget. The funds are to be available as follows:

Mathematical and physical sciences and engineering, $246,500,000.

Astronomical, atmospheric, Earth, and ocean sciences, $210,500,000.

U.S. antarctic research program, $47,475,000.

Biological, behavorial, and social sciences, $142,500,000.

Basic research stability grants, $4,500,000 or 2 percent of basic research support, whichever is less.

Science education program, $83,300,000.

Research applied to national needs, $75,850,000.

Scientific, technological, and international affairs, $20,900,000.

Program development and management, $47,825,000.

Special foreign currency, $4,900,000.

Second. The conference agreement further designates funds for particularly important programs as follows:

Graduate fellowships, $11,900,000.

Continuing education for scientists and engineers, $1,200,000.

Resource center for science and engineering, $3,000,000.

Minorities, women, and the handicapped in science, $2,500,000.

Science for citizens, $1,800,000.

Public understanding of science, $2,600,000.

Ethics and values in science and technology, $1,400,000.

Comprehensive assessment of science education in 2-year colleges, $500,000.

Comprehensive assistance to undergraduate science education, $14,500,000.

Precollege teacher development, $6,000,000.

Policy Research and Analysis, $4,000,000.

Twelve and one-half percent of applied research support for small businesses.

Twenty-five percent of applied research support for applied social research and policy-related scientific research.

Major differences in policy between the House and Senate bills were resolved as follows:

Two-year authorization: The Senate bill provided a 2-year authorization for the Foundation. The House bill authorized funds for only 1 year. The conference agreement provides funding for 1 year.

The Senate conferees worked diligently for adoption of the Senate position on this issue—a position endorsed by the National Science Board. We repeatedly stressed our conviction that there would be significant advantages to a 2-year bill. The arguments we presented in support of our position were:

Greater stability in providing Foundation support for critical research/educational projects and programs which require long-term funding commitments and management would be possible.

Foundation staff time released as a result of two-year authorizations could be used to assess the effectiveness of current programs and research strategies as well as the adequacy of the Foundation's response to the needs of the Nation's scientific and engineering constituencies. At the same time, Congress would have increased time for oversight of the Foundation's programs and funding levels.

The Foundation's staff would be provided with greater opportunities to expand long-range planning activities and to prepare decision-making position papers for the Congress on major issues regarding the Nation's short-range, medium-range, and long-range outlooks for science and engineering.

Additional lead time would be available for the Foundation to consult with local and state Government officials across the country on their specific scientific and technological needs.

The House conferees agreed that there would be significant advantages to this approach.

However, because the House hearings and floor debate had not covered programs proposed for fiscal year 1979, the House Conferees advised that a 2-year bill would face serious difficulties on the House floor. For this reason, we agreed to a 1-year bill this year—and are working with the House committee members to urge them to hold hearings next year on a 2-year measure.

Industrial research: The Senate bill provided for equal competition between industrial and academic researchers, for increased support for cooperative research between industry and universities and for fellowship exchange programs between the two sectors. The House bill authorized none of these new efforts.

The conference agreement provides for increased cooperative research, urges the Foundation to initiate an industry-university fellowship exchange program, and calls for the Foundation to report to the Congress on the potential for increased industry participation in NSF-supported basic research.

The Senate and House committees will review the results of this report prior to reauthorization hearings next year and it is my expectation that it will provide us with the information we need to make definitive recommendations.

Science for citizens: The Senate bill authorized a $5 million program, including direct assistance for public interest groups, to assist citizen groups in developing information and in improving public understanding of policy issues with significant scientific and technical aspects. The House provided $100,000 and limited its use to an evaluation of past efforts.

The conference agreement provides for a $1.8 million program—a 50-percent increase over last year's program—and authorizes direct assistance for public interest groups.

I believe that we have made a significant breakthrough with this program, which now becomes permanent law. It will impose a minimum of redtape on citizen groups applying for funding. It will only be necessary for the groups to demonstrate that they meet the general principles applied by the IRS in determining eligibility for 501(c)(3) exemptions—the groups will not be required to have formal status under that section.

Resource center for science and engineering: The Senate bill provided for two of these centers to be established. The House bill authorized funds only for planning grants. The conference agreement provides for the establishment of one center.

In agreeing on one center, the conferees drafted the provision so that it becomes permanent law. It is the further intent of the conferees that additional centers should be established if experience warrants such action. This is particularly important, as the center program is designed to serve both poor and minority communities. To limit activities to just one center would make it extremely difficult to fulfill the intent of the program to increase the participation of minorities and the poor in research careers in science and to make scientific and technical resources available to those communities.

A $1.5 million minority graduate scholarships program is also authorized.

Policy research: The Senate bill provided that not more than $2 million was to be available for these activities in the STIA Directorate. The House bill provided $4.5 million. The conference agreement provides $4 million.

Because the overall funding for STIA provided in the conference agreement is $1.7 million below the budget request I strongly urge the Foundation to carry over unobligated policy research funds from fiscal year 1977 to meet the $4 million activity authorized in the conference agreement. Such a carryover will enable other STIA activities, particularly support for the upcoming UN Conference on Science and Technology, to go forward as planned in the budget request.

Amendments to the NSF Act: The conferees approved the following amendments to the NSF Act:

First. An increase in the maximum allowable compensation for members of the National Science Board to conform more closely with rates of compensation of similar bodies in other Federal agencies;

Second. Reinstatement of the National Science Board's annual report which had been eliminated by legislation establishing the Office of Science and Technology Policy;

Third. A change in working of the NSF

Act with regard to geographic distribution to assure that the Foundation continues to evaluate constructive ways to strengthen the participation of all regions of the country in the Foundation's programs.

Precollege curricula: The House bill extended Federal controls to the activities of local schoolboards with regard to the selection of teaching materials. Similar restrictions were defeated by the Committee on Human Resources and were not included in the Senate bill.

The conference agreement provides simply that curriculum activities supported by the Foundation, where they involve pre-college students, be conducted in conformance with local schoolboard procedures and with the prior consent of the local authority responsible for the schools.

Conflict of interest: The House bill included a provision establishing procedures to avoid conflicts of interest on the part of NSF employees and peer reviewers. The Senate bill did not include a similar provision, though inquiries carried out by the Subcommittee on Health and Scientific Research had pointed to the need for strengthened safeguards in this area. The conference agreement includes new procedures, but makes a distinction between the reporting requirements for NSF employees and those for peer reviewers, who volunteer their time and expertise.

Instrumentation set-aside: The Senate bill provided that 15 percent of the funds available for instrumentation be available for the purchase of equipment costing $25,000 or less. The House bill did not include a similar provision.

The statement of managers accompanying the conference agreement urges such a set-aside. This support is to be made available, whether or not the equipment required is included as part of a larger research grant and is expected to be of particular assistance to researchers in small colleges and universities.

International cooperation: The Senate bill emphasized the importance of bilateral agreements between the United States and Western Europe and between the United States and neighboring countries in the Western Hemisphere. The House bill did not include a similar provision. The conference agreement authorizes this new emphasis and assures that it will be carried out in a manner consistent with the Nation's foreign policy objectives.

Interdisciplinary studies: The Senate bill provided sustained support for interdisciplinary teams working on research problems of national importance. The House bill did not include a similar provision. The statement of managers accompanying the conference report urges the Foundation to make such sustained support available.

Nitrogen fixation: The Senate bill provided an additional $2 million for nitrogen fixation research in fiscal year 1978. The House bill provided no increase over the budget request. The conference agreement includes an additional $1 million for work in this area.

Applied social research: The House bill provided that $23 million in applied research funds would be available for applied social research and policy-related scientific research. The Senate bill did not set aside a specific amount, but included these activities under the RANN authorization. The conference agreement provides that 25 percent of RANN funds will be available for these programs, thereby assuring a balanced RANN effort in the event that the authorized RANN program is not fully funded.

Young scientists: The Senate bill authorized 3-year, nonrenewable grants for scientists and engineers whose Ph. D.'s were awarded within the last 5 years. The House bill did not include a similar provision. It is my hope, and that of the subcommittee chairman in the House, Mr. THORNTON, that the NSF will begin such a program in fiscal year 1978.

Precollege teacher training: The Senate bill provided $8 million for this program and set aside half of the funds to train teachers in providing instruction which emphasizes the interaction between science and society. The House bill did not include a similar provision. The conference agreement provides $6 million for this program and the statement of managers stipulates that 25 percent of the funds are to be available for the training called for in the Senate bill.

Mr. President, the conference agreement as described in my remarks includes every major program emphasis adopted by the Senate. Compromises were made with regard to levels of funding and detailed implementation. In my view this conference agreement, with the exception of the refusal of the House to agree to a 2-year bill at this time, fully reflects the Senate position and will be well received by the public and by the scientific community. I urge its adoption.

Mr. JAVITS. Mr. President, I urge my colleagues to support the conference report on H.R. 4991, the National Science Foundation Authorization Act for fiscal 1978.

The administration requested $879 million for NSF; this measure authorizes $879.35 million. It reflects a careful assessment by the Senate Human Resources Committee and the House Science and Technology Committee of the amounts requested by the administration for particular programs in scientific research and science education.

Both the Senate and House bills provided for increases in science education funds over the administration request of $75.7 million. Our final compromise of $83.3 million is a good one in my opinion. This can be considered a net increase of $12.1 million for science education for the following reason: the $4.5 million requested for research initiation and support under science education has been shifted to a new program, basic research stability grants, which is a separate line item in the bill, but which is expected to provide similar kinds of support in a more effective way.

The increased funds for science education include a tripling of the administration request of $1 million to $3 million for a Resource Center for Science and Engineering, to expand opportunities in science and engineering for minority students and students from low-income families. It also increases by 50 percent the authorization for minority traineeships.

Support for the program for minorities, women, and the handicapped in science is increased one-half million dollars over the budget request, as is support for graduate fellowships. We agreed to authorize $1.8 million for the science for citizens program—$3.2 million less than the Senate bill provided, but $1.7 million above the House recommendation. We have provided another one-half million dollars for a comprehensive assessment of science education in 2-year colleges—a matter of concern in both the House and Senate, for which there was not any request in the original budget submission. In addition, we have increased the authorization for precollege teacher training programs from a requested $4 million to $6 million and have urged NSF to use not less than 25 percent of these program funds to train teachers in methods that will encourage students to explore the interaction of science and society.

The lack of emphasis on the importance of science education has been of particular concern to me; and this agreement was reached through initiatives on both the Senate and House sides. It reflects two important and growing needs in our Nation today—the need for a broadly informed citizenry that understands the significance of science for society, and the need for training the very best scientists and engineers to meet the challenges that lie ahead—new energy sources, protecting our oceans and atmosphere, and increasing our production of food, among many other areas that will directly affect our lives and those of our children.

The measure reflects strong support for basic scientific research. Such research programs are the Nation's most effective means for insuring that U.S. science remains second to none.

Mr. President, I note that the Senate and House Appropriations Committees agreed to appropriate funds for NSF's three basic research directorates, its Antarctic research program, and its scientific, technological, and international affairs directorate at the full level provided in the authorization conference report—$667.9 million. Thus, we can say that the Foundation's basic research programs are being funded at the level authorized—a level only slightly below the administration request.

There is one feature missing in the authorization conference agreement that I had very much hoped to see—a 2-year authorization. The Senate bill contained such a provision; the House bill did not. The National Science Board and the scientific community have indicated that a 2-year authorization was not only acceptable but desirable. The conferees agreed that a 2-year authorization would be useful in establishing a longer range framework for policy planning and that it could enable the Appropriations Committees to give more consideration to these policies.

In my view, it is essential that the Congress move to a multiyear authorization. We should not be reformulating policies each year—policies that the other committees do not have time even to study before they appropriate the funds—and too little time looking at the Nation's long-range needs in science and providing stable, consistent programs to meet those needs. We are losing the forest for the trees, so to speak, by each year examining individual programs and forgetting—or not having time for—the broad policy questions with which the Congress should be concerned.

A recent editorial in Change, June 1977, noted:

Unfortunately, the price of highly sophisticated research is not only a wider public understanding of these issues but also continued high national investments. The trouble with science is that it is not enough to be very good. It must be very, very good. Two second-rate research efforts do not add up to one superb effort. It is not the kind of mathematics that is easy to support politically in egalitarian terms. But here, excellence is a national necessity.

It is important that we remain responsive to this national interest. Thus, authorized funding for NSF programs should be longer-ranged because basic science research itself is a long-range undertaking. The research projects of today might not have an impact for 5 or 10 years; the yearly reauthorization process, however, makes it difficult for the Congress to think in these terms and even implies an unwillingness to do so which, in my judgment, is unwise.

While I support the Senate position in favor of a 2-year authorization for these programs, I am mindful of the concerns expressed by the managers on the part of the House that their body had not fully considered this approach. I have discussed this issue with Congressman RAY THORNTON, Chairman, and Congressman HAROLD HOLLENBECK, ranking minority member of the Subcommittee on Science, Research, and Technology of the Science and Technology Committee. Representative THORNTON has indicated that his committee is also concerned with the issue of predictability in authorizing long-term research, and is pledged to a thorough examination of the efficacy of multi-year authorizations in order to improve the management and stability of our Nation's basic science research effort. I am grateful to him for this view.

Mr. President, while I am genuinely disappointed that we were unable to reach agreement for a 2-year authorization this year, we have every reason to believe that both bodies may be able to reach accord on this issue next year.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

(Routine morning business transacted and additional statements submitted are printed later in today's RECORD.)

AUTHORITY FOR THE SECRETARY OF THE SENATE TO RECEIVE AND REFER A MESSAGE FROM THE PRESIDENT ON AUGUST 6

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to receive a message from the President of the United States on welfare reform, on Saturday, August 6, and that the Secretary be authorized to refer that message jointly to the Committee on Finance, the Committee on Human Resources, and the Committee on Agriculture, Nutrition, and Forestry.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

FOREIGN ASSISTANCE APPROPRIATIONS, 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the foreign assistance appropriations bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order, the Senate will now resume consideration of H.R. 7797, which the clerk will state by title.

The legislative clerk read as follows:

A bill (H.R. 7797) making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1978, and for other purposes.

The Senate resumed the consideration of the bill.

The PRESIDING OFFICER. Time for debate on this bill is limited to 5 hours, with 1 hour each under the control of the Senator from Hawaii (Mr. INOUYE) and the Senator from Pennsylvania (Mr. SCHWEIKER), and with 3 hours under the control of the Senator from Virginia (Mr. HARRY F. BYRD, JR.); with 1 hour on any amendment in the first degree, except three amendments by the Senator from Alabama (Mr. ALLEN), on which there shall be no time limitation and no tabling motions thereto in order; with 30 minutes on any amendment in the second degree; and with 20 minutes on any debatable motion, appeal, or point of order.

The question is on agreeing to the committee amendment on page 4.

Who yields time?

Mr. HARRY F. BYRD, JR. Mr. President, until the manager of the bill is able to get to the floor, I plan to suggest the absence of a quorum and request that the time be equally divided between the opponents, the 2 hours allotted on the bill and the 3 hours allotted to the Senator from Virginia, and charge the time equally.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. Mr. President, from the 3 hours allotted to the Senator from Virginia, I yield myself such time as I may need.

First, I commend the able Senator from Hawaii (Mr. INOUYE) for the conscientious and diligent work he has done on the pending measure, H.R. 7797, the foreign assistance appropriation bill. I regret to find myself in opposition to a measure which is being handled by the distinguished senior Senator from Hawaii.

While, in my judgment, the figures in this bill are much too large, I am confident that the bill would be even more unacceptable from the point of view of the Senator from Virginia were it not for the distinguished manager of the bill, Senator INOUYE, and were it not for the ranking minority member of that committee, the distinguished Senator from Pennsylvania (Mr. SCHWEIKER).

I regret to find myself in opposition.

But, frankly, I do not believe it to be wise, or logical, or warranted for the Congress of the United States to be considering the approval of a measure which would increase by 27 percent the amount of foreign assistance which is being given to 100 countries scattered throughout the world.

For fiscal 1977, the comparable legislation approved by Congress called for an appropriation of $5.6 billion for this part of the foreign aid program.

The bill before us today would appropriate $7.1 billion for fiscal 1978. That represents an increase of 27 percent in the overall cost.

To me, that is totally unjustified.

Mr. President, the foreign aid bill before the Senate, totaling $7.1 billion, is only a part of the total amount of tax dollars taken from the pockets of the working people and then disbursed to 100 nations throughout the world.

The total for foreign assistance for the fiscal year 1976 was $6,994,402,000.

For fiscal 1977, the current fiscal year, the total appropriated was $9,290,286,000.

Now we come to fiscal 1978, and the total appropriated approaches $10 billion, the exact figure being $9,964,264,000.

Mr. President, what is being done, if this measure is approved by the Senate, is that the amount of funds appropri-

ated for foreign aid for fiscal 1978 will be $10 billion, in round figures, compared to fiscal 1976, when the Congress appropriated $7 billion, in round figures. That represents an increase of almost 50 percent in that short period of 2 years.

But this is not all.

The figures I have just cited—and I will use round figures for clarity—of $7 billion for fiscal 1976, $9 billion for fiscal 1977, and $10 billion for fiscal 1978 do not include another very important item, and that is the amount of foreign assistance rendered through the Export-Import Bank.

For fiscal 1976, that figure was $4 billion, in round figures; for fiscal 1977, the current fiscal year, it is $4 billion; and for fiscal 1978, for which Congress is now appropriating, the figure will be $5.5 billion.

So the grand total of the transfer of U.S. resources to foreign nations for the 3 fiscal years is as follows: For fiscal 1976, the transfer of U.S. resources to foreign nations was $11 billion, again using round figures; for fiscal 1977, the transfer of U.S. resources to foreign nations was $13.5 billion; and for fiscal 1978, it is proposed that $15.5 billion of U.S. resources be transferred to foreign nations.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator yield, without losing his right to the floor and without any time being charged against his time?

Mr. HARRY F. BYRD, JR. I am glad to yield.

INTERNATIONAL TRADE COMMISSION AUTHORIZATION, 1978—CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, the conference report has been cleared on the other side of the aisle. On behalf of Mr. LONG I submit a report of the committee of conference on H.R. 6370 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6370) to authorize appropriations to the International Trade Commission for fiscal year 1978, to provide for the Presidential appointment of the Chairman and Vice Chairman of the Commission, to provide for greater efficiency in the administration of the Commission, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of July 21, 1977.)

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. SCHWEIKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FOREIGN ASSISTANCE APPROPRIATIONS, 1978

The Senate continued with the consideration of H.R. 7797.

Mr. INOUYE. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. HARRY F. BYRD, JR. I yield.

REQUEST FOR TIME-LIMITATION ON AMENDMENTS

Mr. INOUYE. Mr. President, I ask unanimous consent that time on any amendment which, under the previous order, was granted 1 hour be reduced to 30 minutes on each side.

The PRESIDING OFFICER. Is there objection?

Mr. HARRY F. BYRD, JR. Mr. President, I object to that for the time being. We might work something out later.

The PRESIDING OFFICER. Objection is heard.

The Senator from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, the figures show that instead of our Government getting its foreign aid programs under control, the Government is going in just the opposite direction.

Foreign aid programs began in 1946, some 30 years ago, and during that period of time, including the current fiscal year, the United States will have provided more than $231 billion in a vast program of foreign assistance which has directly benefited most of the nations of the world.

Those figures are not figures the Senator from Virginia developed. Those figures—and indeed all the figures I have cited—come directly from the report of the Committee on Appropriations and are included in the committee report which accompanies the pending legislation.

Most of the figures I have cited this morning are on page 6 of that committee report. So while the United States during the past 30 years has contributed more than $231 billion in foreign assistance to other nations, with that in mind one would think our transfer of U.S. resources to other nations would be declining after that long period of time and that vast amount of money would be declining. But this bill provides for a substantial increase in the amount of U.S. dollars being provided to other nations.

Of course, the only place our Government can get funds to send to foreign countries is out of the pockets of the working people of our Nation.

I think it is very important, Mr. President, that the trend be reversed.

But what is happening is that the amounts of funds being taken from the pockets of the working people and transferred to other nations are being accelerated rather than decreased.

I might point out, too, in many cases these funds are being given to heads of government, and what I am going to say next I cannot document, and I do not pretend to. But I am convinced that in many cases the funds intended for good purposes, for helping better the lives of people in those countries, are being siphoned off by leaders of governments.

I feel our entire foreign aid program needs to be totally reexamined.

I think it can be and should be very substantially reduced. Yet, as I have mentioned earlier, instead of being reduced or even held at a steady level, it is being very substantially increased.

The legislation before us dramatizes that very clearly when it provides for a 27 percent increase as compared to last year's appropriation in these fields.

To indicate the increase, I quote from page 6 of table I of the Appropriations Committee report in which it lists the grand total for foreign assistance for fiscal year 1976 as $7 billion in round figures, and the proposed figure for 1978 is $10 billion in round figures.

Mr. President, I do not plan to do it at the moment, but at a later time I shall ask unanimous consent to insert in the RECORD a summary, by country, of the huge amounts which have been transferred from the United States to a multitude of countries, more than 100 different countries, throughout the world.

If I may, at this point, I would like to ask several questions of the distinguished floor manager of the bill. Could the Senator from Hawaii give the total amount of appropriations, assuming the legislation is passed, the total amount of appropriations, in this and other bills for fiscal 1978 that will be given to the United Nations?

Mr. INOUYE. To the United Nations?

Mr. HARRY F. BYRD, JR. To the United Nations.

Mr. INOUYE. If you are talking about all funds, assessed and voluntary——

Mr. HARRY F. BYRD, JR. Yes, all funds assessed and voluntary and all other ways that they are transferred from American taxpayers to the United Nations.

Mr. INOUYE. It is approximately $500 million.

Mr. HARRY F. BYRD, JR. Approximately $500 million. I thank the Senator.

I wonder if the Senator has information showing what countries, and in what amounts, have received funds from the World Bank, say, for fiscal 1976, fiscal 1975, fiscal 1977, whichever fiscal year the information might be available?

Mr. INOUYE. The World Bank, as the Senator is well aware, provides loans and they are not making grants. Are we talking about grants?

Mr. HARRY F. BYRD, JR. In the case of the international financial institutions they would be presumably loans. Where the soft loan windows are involved one could argue whether they were loans or grants.

But in any case, what loans or grants have been made by the various international financial banks to the various countries?

Mr. INOUYE. We do not have in the files the names of the countries and amounts these countries have received in loans during the current year from the various international and financial institutions.

Mr. HARRY F. BYRD, JR. Whether they be soft loans or hard loans, as to not only the World Bank but also the

various international banking institutions to which the Federal Government makes tremendous contributions in dollars, would it not be well for Congress to have available to it exactly how the funds are being handled and in which countries loans are being made and in which amounts?

Mr. INOUYE. I completely agree with the distinguished Senator. As the committee report indicates, we have been trying now for several years to bring about a better understanding between Congress and the various international financial institutions. For example, at the present time, I think it would be of great interest to the people of the United States to know the names of the depository banks in which approximately $10 billion of cash reserves of the various international development banks are now being deposited.

Mr. HARRY F. BYRD, JR. Do we not have that information?

Mr. INOUYE. By an arrangement we are not permitted to make these figures public.

Mr. HARRY F. BYRD, JR. Yet the American public, the American taxpayers, pay the larger share of all of these funds going into these financial institutions.

Mr. INOUYE. If the Senator will look on page 1262 of the committee hearing transcript, the Senator will have, by country and by institution, the amounts applied for and amounts granted, but this does not give all of the information that the Senator seeks. For example, the purpose of the loan.

Mr. HARRY F. BYRD, JR. If I may say so, I am not sure it gives any unless I misread it. What this says on page 1262 is cumulative subscriptions and contributions to the international development lending institutions by member countries.

But my question was what do these international banking institutions do with the money after we give it to them? To whom does the money go?

We know it goes to heads of governments. Which heads of government?

Which governments and in what amounts?

Mr. INOUYE. I am certain we can get it for the Senator for his information. It is the same thing with the information relating to deposits. We would like to reach that stage some day when we can make it public. I think it would be of great interest not only to the people of the United States but also Members of Congress to know exactly whese these deposits are being held.

On page 1266 there is at least most of the information being sought by the Senator. These are the commitments made by the banks to the various countries. But unfortunately this information does not tell the Senator for what purpose.

Mr. HARRY F. BYRD, JR. Then this information is cumulative and does not include what might have been done in the more recent years, I assume.

Mr. INOUYE. No. This is as of December 31, 1976.

Mr. HARRY F. BYRD, JR. Yes. it is cumulative.

Mr. INOUYE. From the time the banks began.

Mr. HARRY F. BYRD, JR. Yes. These are cumulative commitments.

Mr. INOUYE. Yes. So, it does not precisely respond to the Senator's question as to how much was granted last year.

Mr. HARRY F. BYRD, JR. In regard to the huge deposits, to which the able Senator from Hawaii refers, that information he says is not available to the Senate.

Mr. INOUYE. It is available on a classified basis. This is by prior agreement with the members of the bank, but we are not permitted to make the list public.

Mr. HARRY F. BYRD, JR. So it puts it in the category of a CIA, does it?

Mr. INOUYE. International CIA. If the Senator will look on page 124 of the committee report, as I indicated, as of 31 January 1977, well over $10 billion in liquid assets of the banks were held in various securities and in sundry commercial and governmental financial institutions throughout the world. Unfortunately, we cannot give the Senator the names of these banks. Someday we will get it for the Senator.

Mr. HARRY F. BYRD, JR. Some banks somewhere are making huge sums, huge profits, I would assume, off of these deposits.

Mr. INOUYE. Obviously.

Mr. HARRY F. BYRD, JR. And it occurs to me that that is information that should be available to Congress and to the public.

After all, the public is supplying the funds; the U.S. taxpayer is supplying most of the funds in almost every case.

Mr. INOUYE. As the Senator is aware, that is the position of the committee, but unfortunately it is opposed by the Department of the Treasury and by the banks themselves. But let me assure the Senator that we are doing all that is in our power to make the names available for public disclosure.

Mr. HARRY F. BYRD, JR. Why would the Department of Treasury object to having Congress know where these funds are being deposited?

Mr. INOUYE. I presume as a member of the bank they go along with the unanimous decision of the bank.

Mr. HARRY F. BYRD, JR. This helps explain, I think, why there is so much pressure for all of these foreign aid programs.

I have been convinced for a long time that big banks, both in this country and in other countries, are being greatly advantaged by the foreign assistance program.

I think this is one area where big banks are getting an advantage, and yet we are not even permitted to know where the money is being deposited.

I see no reason why we should not be informed as to which of these huge banks, both in this country and elsewhere, are getting the benefit of these tremendous deposits.

I think the Senator from Hawaii mentioned $10 billion.

Mr. INOUYE. In liquid assets.

Mr. HARRY F. BYRD, JR. In liquid assets.

Mr. INOUYE. But for the most part these are short-term deposits, because they are immediately taken out to serve as a basis for loans.

Mr. HARRY F. BYRD, JR. Well, we are not certain, I do not suppose, as to just how short term they are in all cases.

We do know, even on the short term, that banks generally scramble around right much to try to get deposits, because it is to their financial advantage to do so.

Did the Senator from Hawaii say that provision is being made to get this information?

Mr. INOUYE. Yes. We have been working on this for several months now, and we were hoping that we could have resolved it by today. In fact, it is in the process of being worked out at the present time.

Mr. HARRY F. BYRD, JR. Mr. President, I want to say again as I said in my opening remarks, and I do not believe the Senator from Hawaii had come in at that point, that I think that the Senator from Hawaii has done a tremendous job on handling this legislation and developing it. While it is not acceptable in size, the size is too great, and thus is not acceptable to the Senator from Virginia, I am sure it would have been more unacceptable had it not been for the dedicated work of the able Senator from Hawaii.

Mr. INOUYE. The Senator's generous remarks are very much appreciated.

Mr. HARRY F. BYRD, JR. I know, too, the concern that has been expressed in the committee report as to the salaries which prevail at the international banking institutions, and I know also that our Secretary of the Treasury, Mr. Blumenthal, has expressed concern to the international banks in this regard.

I think the unfortunate aspect is that the bank officials, the presidents of the various banks do not have to pay income taxes. Take the World Bank, for example. The president of the World Bank, and as a matter of fact all of its employees, but I am speaking now of the higher echelon, as a practical matter they pay no income tax.

To put it another way: The American taxpayer pays the income taxes for the officers and employees of the international banking institutions, the salaries being set to provide for this.

Now, when the top officials in an agency like the international banks pay no income tax, naturally they have somewhat less concern as to the amount of tax funds that would be appropriated to their institutions than they might have if they were subject to the income tax the same as any other American citizen. I am speaking now of American citizens.

Mr. Robert S. McNamara, who is the head of the World Bank, is an American citizen and has his income taxes paid by the American taxpayer. Or, to put it another way, his salary is set in such a way that he gets the net salary when one disregards the income taxes.

I think that this is an undesirable situation. Here are the World Bank sal-

aries, on page 129 of the report. If I am reading this correctly—and the Senator from Hawaii can correct me if I am not—the way I read it, the President of the World Bank gets a gross equivalent of $111,570. That is substantially higher than any public official, any Cabinet officer, any Supreme Court Justice, and of course, any Member of Congress. It is substantially higher than any U.S. official except the President of the United States himself.

The Senior Vice President is in the same category, with $106,950. The Executive Directors, $83,830. The Alternate Executive Directors, $61,730.

The professionals, class Q, the Vice Presidents, $97,320. Class P, $89,570. O, $86,470. N, $74,960. M, $64,560. And all of those officials are paid substantially higher salaries than are the highest officials of Government in our country.

Mr. INOUYE. Mr. President, will the Senator yield?

Mr HARRY F. BYRD, JR. Yes.

Mr. INOUYE. The Senator is well aware that the committee agrees with him completely, and has so stated in the committee report.

As the Senator is aware, in our committee bill we have provided language whereby our executive, the U.S. Executive Director of the Bank, will receive no more than his superior. At the present time, the Executive Director representing the U.S. interests at the World Bank receives more than the Secretary of the Treasury. So what we are trying to do is bring his pay level down to that of the assistant secretary, his superior. We are also trying to reduce the salary of the Executive Director.

Mr. HARRY F BYRD, JR. Actually, that is a part of the bill which is before the Senate now.

Mr. INOUYE. The Senator is correct, yes.

Mr. HARRY F. BYRD, JR. But, of course, that applies only to the Executive Director. and I guess to the alternate Executive Director, I am not sure.

Mr. INOUYE. Of the United States.

Mr. HARRY F. BYRD, JR. Of the United States. It does not apply to the President or the Senior Vice President, both of whom are U.S. citizens.

Mr. INOUYE. They are U.S. citizens, but they are employees of the international institution.

Mr. HARRY F. BYRD, JR. It does not apply to these other individuals either.

What I am pointing out, and what the committee report, indeed, points out, and what I am sure the Senator from Hawaii concurs in, is that in appropriating funds to these international banking institutions, we are turning over vast sums of American tax dollars. After doing that, we lose all power and all authority as to how those funds will be used, as to what salaries will be paid, and as to what countries loans will be made to, or what countries to which loans cannot be made.

So we are turning these vast sums of American tax dollars over to the international banking institutions without any strings attached.

In previous comments on the Senate floor, the argument has been made that these banks do quite well with the funds, and that money which is loaned to various countries sometimes, or frequently, comes back to this multitude of international banks.

What is never pointed out is that none of that money—none of it—ever comes back to the U.S. Treasury. Once that money is appropriated to the international banking institutions, that money is gone insofar as the American taxpayer is concerned. The banking institutions may get repaid from time to time on their loans, but that money does not come back to the American Government.

At a later date, at the conclusion of my remarks, I wish to put into the RECORD an article from the Washington Post of July 23, the caption of which is "Blumenthal Asks Cap on International Bank Salaries." I shall not do that right at the present time; I will get to it a little later, at a later time.

At this time, Mr. President, I do again commend the able Senator from Hawaii for an excellent speech which he made in the Senate on June 14, 1977, pointing out—and I think it is the first time this has been done so forthrightly—that commitments of U.S. tax funds can be made only by the Congress.

The Senator from Hawaii in that Senate address on June 14, 1977, in which he presented an amendment, I assume to the International Financial Institution authorization bill, stated:

> My amendment to the bill reported by the Senate Foreign Relations Committee makes a clear statement of fact: The commitment of U.S. resources to international financial institutions, or indeed to any purpose, is subject to the appropriation of those resources. This is an incontestable statement grounded in the bedrock of the Constitution.

I think the Senator from Hawaii is so right. As a result of the speech by the Senator from Hawaii it may be different in the future. In the past so many of our colleagues have argued that once the executive branch makes an agreement as to how much the United States will contribute to these various international financial institutions, that is regarded as being an obligation of our Government. I believe it is quite important that the Senator from Hawaii has made clear that it is indeed not a commitment until the Congress appropriates the funds.

The Senator from Hawaii made another statement which I think should be repeated.

> Mr. President, in a statement notable for both its sweeping grandure and for its departure from reality, the Foreign Relations Committee report declares: "The power of commitment rests with the authorizing committee." I would like to most humbly say this is preposterous.

There, again, those are the words of the able Senator from Hawaii. The Senator from Virginia would like to associate himself with those remarks.

Then the Senator from Hawaii goes on to say:

> The authorizing committee has the power to recommend the authorization of U.S. participation in international funding arrangements. The authorizing committee has the power to recommend the authorization to a level of participation. The authorizing committee does not have the power to commit U.S. resources.

Then another splendid statement in that speech by Senator INOUYE:

> The commitment of U.S. resources follows from and can only follow from the appropriation by law of those resources.

I believe that is a vitally important contribution which the able Senator from Hawaii has made to this whole area of appropriating tax funds to these international organizations.

Mr. President, how much time have I utilized?

The PRESIDING OFFICER. The Senator has used 45 minutes.

Mr. HARRY F. BYRD, JR. Mr. President, at this time I ask unanimous consent to have printed in the RECORD the historical totals of U.S. economic and military assistance to foreign nations for the fiscal year 1946 through 1977. This table gives the countries and the amount which went to each country.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

HISTORICAL TOTALS OF U.S. ECONOMIC AND MILITARY ASSISTANCE

The following table presents summary and detail information relating to the totality of U.S. foreign assistance (economic and military) furnished to other nations during the period fiscal year 1946–76. It has been extracted from information assembled and presented by the Agency for International Development in the current edition of its publication, U.S. Overseas Loans and Grants.

HISTORICAL UNITED STATES FOREIGN ASSISTANCE [1]

Summary for all countries

Total, economic and military assistance, fiscal years 1946–76	$191,833,400,000
Total, other U.S. loans and grants, fiscal years 1946–76	30,596,700,000
Total, fiscal year 1977 (estimated)	9,290,286,000
Grand total, U.S. foreign assistance, fiscal years 1946–77	[2] 231,720,386,000

Detail by Region and Country (Fiscal Years 1946–1976)

A. Near East and South Asia	45,138,700,000
Afghanistan	498,200,000
Bahrain	1,200,000
Bangladesh	1,015,600,000
Cyprus	85,400,000
Egypt	2,269,800,000
Greece	4,894,400,000
India	9,494,800,000
Iran	2,172,500,000
Iraq	95,500,000

Information as of September 30, 1976.

[1] Basic data (fiscal years 1946–1976) taken from "U.S. Overseas Loans and Grants and Assistance from International Organizations," a publication of the Agency for International Development. See this publication for explanation and detail. Summary totals may differ slightly due to use of full numbers.

[2] Through September 30, 1976, repayments of principal and interest of both economic and military loans total $21,461,600,000. In addition, it is estimated that $496,843,900,000 will be repayed on AID loans in fiscal year 1977.

Mr. HARRY F. BYRD, JR. Now, Mr. President, I ask unanimous consent to have printed in the RECORD an article from the Washington Post of Saturday, July 23, 1977, captioned "Blumenthal Asks 'Cap' on International Bank Salaries."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, July 23, 1977]

BLUMENTHAL ASKS "CAP" ON INTERNATIONAL BANK SALARIES

(By Hobart Rowen)

Treasury Secretary W. Michael Blumenthal plans to ask the heads of the World Bank and International Monetary Fund to put a "cap" on further increases in the tax-exempt salaries those institutions pay.

Because of the exemption the salaries are 30 to 40 per cent higher than they look, and also about the same percentage above those paid for comparable U.S. government jobs.

Blumenthal in an interview scored the bank and IMF salary levels as "excessive" and warned that "if we hadn't put some limits" on the pay at international agencies, Congress is likely to place restrictions on U.S. contributions to them.

The discrepancy between pay levels at the international lending institutions and U.S. scales comes about because they pick up the tax bills for U.S. citizens and pay generous allowances for dependents.

As an example, Blumenthal pointed out that Edward Fried, U.S. executive director for the World Bank, is paid $47,500. Theoretically, that's a notch below an assistant secretary of the treasury at $50,000. But Blumenthal estimated that Fried's tax-exempt pay is the equivalent of a taxable $75,000 to $80,000, or better than anyone in the U.S. government except the President and the Vice President.

World Bank President Robert S. McNamara is paid the equivalent of $116,000, against Blumenthal's Cabinet level salary of $66,000.

According to a World Bank spokesman, the bank reimburses its U.S. employees, dollar for dollar, for federal and state taxes, at a cost of about $15 million a year. That provides a salary worth up to $90,000 for any American who happens to be a bank vice president, up to $70,000 for a department head, and around $60,000 for a senior specialist, such as an economist. IMF scales are similar.

"We're very much concerned about this problem," Blumenthal said. "We just don't think that excessive salaries considerably above virtually everybody in this government are essential . . . The fact is they create great difficulty for us to get the collaboration of the Congress."

He cited the recent action of the Senate Appropriations Committee that reported an aid bill to the floor reducing salaries of six top U.S. officials at the World Banks, the Inter-American Bank, and the Asian Development bank from the $80,000 level to a maximum of $50,000. Whether this provision survives a conference session with the House remains to be seen.

Blumenthal was also highly critical of "lavish" subsidies he said the lending agencies pay for "restraurants," "travel of wives, all sorts of things." In a recent floor speech, Rep. C. W. Young (R.-Fla.) charged that the World Bank makes personal loans to employees at 4 per cent interest using funds intended "for the poorest of the poor."

Officials at the agencies vigorously contest the charge that their salaries are too high. A World Bank spokesman said in an interview that Bank salaries are less than those paid by the United Nations, or by the European Common Market in Brussels. At all of the affected agencies the argument is made that high salaries are necessary to attract highly-qualified professionals.

The tax-exempt status provides a net benefit for a U.S. employee of the Bank, compared with U.S. salaries, the spokesman conceded, "but only because we are in the business of sustaining real wages, as do most governments, with the notable exception of the U.S. government."

The bank spokesman said that the average real wage in the bank has risen less than 1 per cent a year since 1970, and emphasized that "tax dollars" supporting national contributions to the bank "do not pay (our) salaries" The money, he said comes out of bank earnings on loans.

"We reserve the right to determine how to operate (the World Bank) effectively," he said, "and our salary structure is part of that." As for Young's report to low-interest loans, he said they had been made largely

to non-Americans settling here for the first time, and that none of the funds came from money earmarked for loans.

A key IMF official said the agency "has to pay a significant expatriation allowance to get people to come here. Washington is not regarded as that ideal."

But Blumenthal insists that "we would have to deal with this (salary problem) in some practical way probably in step-by-step negotiations with McNarmara and IMF Managing Director H. J. Witteveen.

Blumenthal recognizes that the salary issue is a difficult and sensitive one for McNamara and Witteveen to handle. No one objects to salary levels except the United States. An effort by former Treasury Secretary William E. Simon to block an IMF increase last year resulted in a one-day walkout.

"The question is: 'What is an adequate salary to attract competent people from different countries to come here to do this job?' Washington is not the Sahara desert and I really don't think you have to pay someone $100,000 and give them all these fringes to bring them here," Blumenthal said.

Mr. HARRY F. BYRD, JR. Because of its importance, unless there be objection on the part of the able Senator from Hawaii, I ask unanimous consent to have printed in the RECORD the speech which the able Senator made to the Senate on June 14, 1977, so that the RECORD will be complete on this particular point.

Mr. INOUYE. I have no objection.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

UP AMENDMENT NO. 420

Mr. INOUYE. Mr. President, I send to the desk my amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Hawaii (Mr. INOUYE) for himself and Mr. SCHWEIKER proposes unprinted amendment No. 420.

Mr. INOUYE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning with "needing" on page 11, line 15, strike out all that follows through the period on line 23, and insert in lieu thereof a period and the following new sentence: "It also notes that the availability of funds for the United States contribution to these international financial institutions is contingent upon future action by the Congress appropriating the necessary sums and thereby establishing the level of contributions for any given fiscal year.".

Beginning with page 12, line 13, strike out all that follows "That" through "Acts" on line 15, and insert in lieu thereof the following: "any subscription to additional shares shall be made only after the amount required for such subscription has been appropriated".

Beginning with page 13, line 10, strike out all that follows "That" through "Acts" on line 11, and insert in lieu thereof the following: "any commitment to make payment for such additional subscriptions shall be made subject to obtaining the necessary appropriations".

Beginning with page 14, line 2, strike out all that follows "That" through "Acts" on line 3, and insert in lieu thereof the following: "any commitment to make such contributions shall be made subject to obtaining the necessary appropriations".

Beginning with page 14, line 16, strike out all that follows "That" through "Acts" on line 19, and insert in lieu thereof the following: "any subscription to additional shares shall be made only after the amount required for such subscription has been appropriated".

Beginning with page 15, line 3, strike out all that follows "That" through "Acts" on line 5, and insert in lieu thereof the following: "any commitment to make such contribution shall be made subject to obtaining the necessary appropriations".

Beginning with page 15, line 18, strike out all that follows "That" through "Acts" on line 19, and insert in lieu thereof the following: "any commitment to make such contribution shall be made subject to obtaining the necessary appropriations".

Mr. INOUYE. Mr. President, the amendment I have sent to the desk appears, on the face of it, to involve no more than the restoration of language in the House bill bearing on provisions governing the commitment of resources to the international financial institutions.

In essence, that is what the amendment does. But, I suggest that we must carefully attend to the consequences of this amendment, for it is of great significance to U.S. participation in agreements to replenish the resources of international financial institutions, and it goes to the heart of the conduct and operation of the U.S. Senate—the committee system.

My amendment to the bill reported by the Senate Foreign Relations Committee makes a clear statement of fact: the commitment of U.S. resources to international financial institutions, or, indeed, to any purpose, is subject to the appropriation of those resources. This is an incontestible statement, grounded in the bedrock of the Constitution.

Mr. President, I believe that the adoption of this amendment is essential to the rational implementation of U.S. foreign policy and to the rigorous application of Senate procedure. In a moment I will suggest a number of the reasons which cause me to propose my amendment, but first there is one thing I would like to note in passing.

The Foreign Relations Committee report suggests that the committee went to great lengths to avoid having a point of order raised against sections of the bill which appear to be in violation of the requirements of the Congressional Budget and Impoundment Act. I am of the opinion that a point of order could be held against this bill, but I prefer to treat substantive issues which are directly linked to the commitment of U.S. resources to the international financial institutions. I leave it to the Budget Committee to decide whether or not to raise a point of order.

I would only note here that, according to the report:

"It was felt by a number of Members of the Committee that the Budget Act had been written without full consideration of its ramifications on the conduct of U.S. foreign affairs."

Once I have stated my objections to the reported bill, I believe that many here will agree that the reported bill, itself, was apparently "written without full consideration of its ramifications on the conduct of U.S. foreign affairs."

Mr. President, in a statement, notable both for its sweeping grandeur and for its departure from reality, the Foreign Relations report declares, and I quote:

"The power of commitment rests with the authorizing committee."

I would like to most humbly say this is preposterous.

The authorizing committee has the power to recommend the authorization of U.S. participation in international funding arrangements;

The authorizing committee has the power to recommend the authorization of a level of participation;

The authorizing committee does not have the power to commit U.S. resources. To assert that it does is to invade terrain reserved to the Appropriations Committee. The commitment of U.S. resources follows from, and can only follow from, the appropriation, by law, of those resources.

For the United States to make a cogent, authoritative, and valid pledge to contribute resources to an international financial institution, that pledge must be subject to the appropriation of amounts necessary to fulfill the pledge. When there is no recognition of the requirement for an appropriation, intention is confused with aspiration.

Representatives of the United States in international negotiations can say that the United States hopes to contribute a certain sum—that is an aspiration. But, if by subscription, in the absence of an appropriation, they indicate that the United States intends to contribute a certain sum, they are making a hollow pledge. The commitment can be fulfilled only after funds are appropriated. It is therefore, necessarily a conditional commitment.

What the administration sought to do—what my amendment seeks to do—what the House bill does—is to state, in the face of the law authorizing U.S. participation in international funding arrangements, this clear distinction between aspiration and intention, between hope and fulfillment, between the process of commitment as the Foreign Relations Committee would see it, and as it really is.

In the past the United States has, unfortunately, made pledges in advance of appropriations without fully expressing their contingent nature. Because of this, when the Congress has declined to appropriate the full amount pledged by administration officials in international meetings, confusion has been engendered at home, mistrust abroad.

In recent times, the highest authorities in the U.S. Government have declared publicly:

"We have up until now defaulted on the word of honor of our country . . . Other countries have kept their word. We have broken our word so far."

This ad hominum argument is repeatedly voiced in requests to the Congress for appropriations of ever increasing contributions to the international financial institutions. Allow me to quote the congressional presentation of the Agency for International Development:

"Failure of the United States to meet our commitments has been very damaging."

And again:

"Delay in fulfilling U.S. pledges has been taken . . . as a discouraging sign of the inability of the United States to honor its commitments. . . ."

Mr. President, I submit that these statements, which question the honor of our country, put intense pressure on the Appropriations Committee to blindly approve whatever amounts are requested by the administration. We are told that our national honor must be upheld, that the United States has made commitments in international negotiations, that a failure of the Appropriations Committee to abide by these pledges is inimical to the interests of the United States.

Our national honor is at stake. But, with all of the talk about U.S. commitments in

international agreements, I think that some may have forgotten that we have, indeed, made solemn commitments—to our own people.

Every appropriations bill which emerges from the Congress carries the phrase:

"That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated . . ."

There is much in that phrase. It says that the resources of the U.S. Treasury are limited—there is only so much money.

Others can go to London, to Paris, to Vienna, and Rome—to all of the grand capitals of the world, pledging U.S. support for a multitude of purposes, but it is the Appropriations Committee which must weigh, in its singular responsibility, the competing demands for money "not otherwise appropriated."

Some may regard U.S. participation in international financial institutions as a grand potluck ceremony, in which the wealth of the United States is to be given away, but the Appropriations Committee must husband the resources of our country—that there may be enough to meet our national goals. The needs of our own people must be placed in the balance when we weigh the needs of the international community; our goals at home must be balanced against our goals in the international arena. We cannot pledge what we do not have, and we do not have everything.

That is why U.S. contributions to international financial institutions are—and must be—subject to appropriations.

That there may be no doubt, let me state that it is the considered judgment of the Appropriations Committee that any pledge, commitment, or subscription to increase U.S. participation in any international financial institution, which does not specify that it is subject to appropriation, is not valid. This traditional position of the Appropriations Committee was amplified in a letter by its chairman, Senator JOHN MCCLELLAN, to the then Secretary of the Treasury, William E. Simon. The letter, sent on January 15, 1975, stated:

It has been the longstanding view of the committee that only the enactment of an appropriation bill can obligate the United States to any given payment to the international development banks . . . it should now be clearly understood that the Congress is not committed to any given funding level until that figure is actually appropriated.

On April 30, 1976, the then chairman of the House Appropriations Subcommittee on Foreign Operations, Mr. Passman, and I joined in a letter to Secretary Simon. Our letter stated our belief that "the possibility of any misunderstanding" could be avoided by making pledges to international financial institutions "clearly contingent upon appropriation of the amount involved."

Mr. President, I ask unanimous consent that the text of these two letters be printed in the RECORD at the close of my remarks.

The PRESIDING OFFICER. (Mr. METZENBAUM). Without objection, it is so ordered.

(See exhibit 1.)

Mr. INOUYE. Mr. President, perhaps I can make a further observation which will serve to cut away the thickets of ambiguity which have surrounded this issue.

The report of the Foreign Relations Committee notes that committee members were concerned that the President could be precluded from making "an unconditional, multiyear commitment under which the U.S. incurs financial obligations." Consequently, the reported bill provides for multiyear authorizations.

Now, were we to accept the proposition that authorization of U.S. participation in multiyear funding agreements is sufficient to enable the administration to unconditionally pledge, on behalf of the United States, payment of specific amounts in future years, future Congresses would be bound—de facto, if not de jure—to appropriate the necessary funds.

This proposition is antithetical to the traditional and established procedures of the Senate. It is, moreover, of doubtful validity on constitutional grounds. Neither the administration nor Congress can bind future Congresses to any given level of contributions. My amendment would avoid this legislative imbroglio by making U.S. contributions subject to the annual appropriations process.

Now let me turn to another reason that caused me to offer this amendment. It, too, is concerned with the nature of U.S. commitments to international financial institutions.

The reported bill does not require the appropriation of callable capital. The House bill does.

The administration and the Appropriations Committees of the House and the Senate have taken the position that all callable capital contributions should be appropriated by Congress. By restoring the language of the House bill, my amendment will insure that this is done.

The Appropriations Committees have long contended that to pledge callable capital in the absence of appropriations is to circumvent the established budgetary and appropriations processes and to contravene our concerted efforts to eliminate "backdoor funding" of Federal programs.

On April 30, 1976, Congressman Passman and I joined in a letter to the then Secretary of the Treasury in which we said:

"Although the callable capital of the banks may constitute a 'virtual risk free obligation' it is very much an obligation."

On October 8, 1976, I wrote to Secretary Simon protesting his proposal to pledge callable capital "after the Congress—had—considered and specifically declined to appropriate the full amount requested by the President." I might add that Secretary Simon had not even informed the House Appropriations Committee of his proposed action. And, on February 2, of this year, the chairman of the House Appropriations Subcommittee on Foreign Operations joined me in a letter to Secretary of the Treasury Blumenthal, informing him that it was our collective judgment that all pledges of callable capital "should follow only upon the provision of budget authority in an appropriation bill."

Mr. President, I ask unanimous consent that the text of these letters be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. INOUYE. Secretary Blumenthal agreed with the position of the two Appropriations Committees and the administration amended the fiscal year 1978 budget presentation to incorporate requests for the appropriation of callable capital.

Now the Foreign Relations Committee has reported a bill which, for the first time, attempts to provide a legislative justification for pledging callable capital without an appropriation. It has done so notwithstanding the definition of callable capital found in its report:

"Callable capital is a guarantee and an obligation backed by the full faith and credit of the United States."

Mr. President, I hope I have made it abundantly clear that guarantees and obligations—if they are to be backed by the full faith and credit of the United States—if they are to have credibility and meaning—must be based on the appropriation of funds. My amendment, which, as I have said, restores the House language on this matter, would give meaning to pledges of callable capital by making them subject to appropriation.

If I may summarize at this point, the reported bill raises jurisdictional and procedural matters of consequence. The issues at hand do not stem from some petty squabble between the two Senate committees, for they turn not only on how we are to conduct the business of the Senate, but also on how the United States is to give credibility and meaning to its position in international funding agreements. I believe that these issues can be resolved by the adoption of my amendment.

Before yielding the floor, Mr. President, I shall respond to several matters that have been brought up by our distinguished colleague from Minnesota.

As you recall, Mr. President, he was quite concerned that the Appropriations Committee would insist upon full funding of callable capital to international banks but just 10 percent for military sales.

There is a basic difference involved. In the case of military sales we are dealing with entities that are subject to the laws of the United States; in fact, for the most part they are agencies of the Government.

In the case of the international banks, we are dealing with international institutions over which we have no control and little ability to direct.

It may be of interest to colleagues to note, for example, that notwithstanding all of the demands we have made for austerity, for cutting down unnecessary expenses and bringing about greater efficiency, the international banks still insist upon paying the highest salaries of all international organizations.

For example, at the present time the Secretary of the Treasury, the man who is in charge of our involvement of international financial institutions, under the new pay raise receives a gross of $66,000. Our U.S. delegate, the man who is appointed by the Secretary of the Treasury to the World Bank, is now paid at an annual rate of $83,800. In this case the subordinate to the Secretary of the Treasury gets more than he. And the delegate's deputy gets paid $61,700. At this juncture, it might be well to note that the pay of a U.S. Senator is $57,000, which is incidentally equivalent to the eighth pay level in the World Bank. The U.S. delegate to the International American Development Bank is paid at an annual rate of $77,750 and his assistance get $56,000.

Furthermore, at the present time the World Bank has liquid assets in excess of $7.5 billion. I grant you that these are obligations against loans but they are amounts not yet expended. These funds have been placed on deposit throughout the world. I believe the location of these deposits should be public information. Can anyone answer why they are not? These are reasons why we insist upon 100 percent funding of callable funds.

Mr. President, please note that my amendment has nothing to do with the level of funding. In fact, as a member of the Appropriations Committee. I have been always sympathetic with goals of our development banks. At the same time I have my responsibility as a Senator and as a chairman of my committee to point out that to permit the present bill to pass without amendment would be a travesty. Therefore, I ask that Senators agree with the amendment and support it.

Mr. HARRY F. BYRD, JR. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER (Mr. NUNN). The question is on agreeing to the committee amendment. Does each Senator yield back his time?

Mr. HARRY F. BYRD, JR. What is the amendment, Mr. President?

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

On page 4, line 14, after the word "university," strike all through line 25.

Mr. ALLEN. Mr. President, is this the amendment we were on at the time of the recess last night, Mr. President?

The PRESIDING OFFICER. The Senator is correct.

Mr. CLARK. Will the Senator from Hawaii yield for a question?

Mr. INOUYE. Yes.

Mr. CLARK. Is this the amendment which would affect the ceilings on the Namibia Institute?

Mr. INOUYE. This is the amendment which would remove a ceiling for the United Nations Namibia Institute.

Mr. CLARK. And the amendment would have the effect only of removing that ceiling?

Mr. INOUYE. The committee amendment would have stricken out the House language that ran from line 14 to line 25. The effect would be to just take off the ceiling.

Mr. CLARK. I know there had been some discussion before I arrived last night about writing a prohibition into the bill prohibiting money in the bill to be spent for the Namibia Institute. That is not at issue in this amendment, as I interpret this?

Mr. INOUYE. The committee amendment does not prohibit the use of funds, but last night before adjournment the manager of the bill and the distinguished Senator from Alabama did discuss the possibility of amending this section to prohibit the use of funds in this bill for the Namibia Institute.

Mr. CLARK. But that amendment is not before us at this time?

Mr. INOUYE. Not at this time.

Mr. CLARK. I thank the Senator.

Mr. ALLEN. Will the Senator yield?

Mr. INOUYE. I will be glad to yield.

Mr. ALLEN. I wonder why that would not be before the Senate. The distinguished manager of the bill made a proposed modification of the committee amendment. The Senator from Alabama and the Senator from Virginia agreed to that modification. I am somewhat surprised that that modification is not to be offered at this time.

Mr. INOUYE. I was under the impression that at that time the staffs of the three Senators were trying to work out the language. In fact, the Senator was sitting here discussing it with the staff.

Mr. ALLEN. Have the staffs worked out the language?

Mr. INOUYE. I have a substitute.

Mr. ALLEN. The Senator has a substitute?

Mr. INOUYE. Yes.

Mr. ALLEN. That is going to be offered at the conclusion of the allotted time?

Mr. INOUYE. I will either offer the substitute or work from the committee amendment.

May I suggest that we call a quorum and consider together for a while?

Mr. ALLEN. That would suit me.

Mr. INOUYE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. INOUYE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. INOUYE. Mr. President, Senator ALLEN, Senator CLARK, and I have been in conference on this matter and, in accordance with our agreement, I would like to make the following changes.

On page 4, line 3, the committee would like to modify the number $243,850,000 to $224,750,000, and restore the House language which was stricken from line 14 to and including line 25 on page 4.

The PRESIDING OFFICER. The Chair would observe that it would take unanimous consent to make such a change, and the Chair would further observe that this figure that has been quoted has already been modified by the committee.

Mr. INOUYE. Mr. President, I ask unanimous consent that the figure $243,850,000, appearing on line 3, page 4, be amended to read $224,750,000.

The PRESIDING OFFICER. That figure is no longer in the bill. The figure is now $234 million, as modified.

Mr. INOUYE. Mr. President, I ask unanimous consent that the figure $234,350,000 appearing on line 3, page 4, be amended to read $224,750,000, and that the House language that was stricken by the committee on page 4, from line 14 to line 25, be restored.

The PRESIDING OFFICER. Is there objection?

Mr. ALLEN. Mr. President, reserving the right to object, and I do not plan to object, the House passed the bill with the figure $257,000,000. Heretofore, it was modified by the committee down to $234 million. The distinguished Senator now is suggesting modifying it again and reducing it further by $9 million. Is that correct?

Mr. INOUYE. The Senator is correct.

Mr. ALLEN. As I understand it, the reason for this modification is that the House bill has this $9 million for the U.N. Cyprus peacekeeping force at another place in the bill.

Mr. INOUYE. The Senator is correct.

Mr. ALLEN. If this action were not taken, there would be two $9 million items, which could result in an appropriation of $18 million. But the Senator's requested modification would remove that possibility and limit the amount to $9 million, if the conferees agree on that figure. Is that correct?

Mr. INOUYE. The Senator is correct.

Mr. ALLEN. Since the Senate has no $9 million figure in it, it could end up with no appropriation for this purpose. Is that correct?

Mr. INOUYE. That is correct.

Mr. ALLEN. I thank the Senator.

Mr. CLARK. Mr. President, reserving the right to object, I had not realized that the amendment would include the change of the figure. If the unanimous-consent request is agreed to and the $9 million is removed here, does it affect any part of the United Nations funding or international organization funding other than Cyprus?

Mr. INOUYE. We would have to make one change, which would appear on page 9, and I was about to make the unanimous-consent request. That appears on lines 20 to 24. That is to restore the House language.

Mr. CLARK. But the unanimous-consent request would affect only Cyprus?

Mr. INOUYE. The Senator is correct.

Mr. CLARK. I thank the Senator.

The PRESIDING OFFICER. Is there objection?

Mr. SARBANES. Mr. President, reserving the right to object, do I correctly understand that later in the bill, on page 9, the House language, which provided for funding of the peacekeeping force—which, of course, is an enormously important element in maintaining peace in the area—would be restored?

Mr. INOUYE. I was just about to make the unanimous-consent request.

Mr. SARBANES. I understand the point that it should not be in two places, but it should be in one place and not eliminated altogether.

Mr. INOUYE. After this unanimous-consent request is granted, I shall make another unanimous-consent request to restore the House language.

Mr. ALLEN. Mr. President, reserving the right to object, I think the way to handle that would be to kill the Senate amendment to the item on page 9. That would leave the House language in the bill. It would not be in conference. We would be assured of the peacekeeping force, but we would not have the possibility of having paid twice.

Mr. SARBANES. That is correct. I understand it is agreeable to the Senator from Alabama.

I withdraw my reservation.

The PRESIDING OFFICER. Is there objection to changing the figure on page 4, line 3, disagreeing to the committee amendment on the same page from lines 14 to 25, and disagreeing to the committee amendment on page 9, striking lines 21 to 24?

Mr. ALLEN. Lines 21 to 24.

Mr. INOUYE. Lines 20 through 24.

The PRESIDING OFFICER. Lines 20 through 24. Is there objection? The Chair hears none, and it is so ordered.

Mr. ALLEN. Mr. President, as I understand it, by the modification, the ceilings provided for these agencies and functions of the U.N., provided by the House, will be accepted by the Senate, and this matter will not be in conference. I ask the distinguished Senator from Hawaii if that is correct.

Mr. INOUYE. The Senator is correct.

Mr. ALLEN. So whatever ceiling the House set could not be exceeded in conference on this item on page 4.

Mr. INOUYE. The Senator is correct.

Mr. ALLEN. I think that is a good resolution of the issue.

Mr. INOUYE. Mr. President, may we proceed? I yield back the remainder of my time.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator yield?

Mr. INOUYE. I yield.

Mr. HARRY F. BYRD, JR. Mr. President, unless the Senator from Alabama feels otherwise, so far as the Senator

from Virginia is concerned, the amendments beginning on page 5 through page 9 taking into consideration what has already been done at the end of page 9, could be handled en bloc, if it should be the desire of the manager of the bill to do so.

Mr. ALLEN. I would rather check it. If the Senator does not mind, perhaps we can have a short quorum call.

Mr. INOUYE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. There is no time remaining. The Senator from Alabama has time.

Mr. ALLEN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Hawaii suggested the absence of a quorum. The Senator from Hawaii has time on the bill.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SCHWEIKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHWEIKER. Mr. President, I ask unanimous consent that John Napier, of the Judiciary Committee; Ed Kenney, of the Armed Services Committee; and Jim Bennett, of the Judiciary Committee, be allowed the privilege of the floor during the consideration of the foreign assistance appropriation bill.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. SCHWEIKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. INOUYE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. INOUYE. Mr. President, I ask unanimous consent that the committee amendments appearing on page 5 through line 11 on page 9 be considered en bloc and accepted.

The PRESIDING OFFICER. Without objection, they are considered and agreed to en bloc.

The amendments agreed to en bloc are as follows:

On page 5, line 3, strike "$25,000,000" and insert "$19,800,000";

On page 5, beginning with line 4, strike through and including line 9;

On page 5, line 17, strike "$20,000,000" and insert "$30,000,000";

On page 5, line 20, following "expended" insert a colon and *"Provided*, That no part of such appropriation may be available to make any contribution of the United States to the Sahel development program in excess of 10 per centum of the total cash contributions to such program";

On page 6, line 1, strike "$39,000,000" and insert "$38,000,000: *Provided*, That not to exceed $3,000,000 shall be for the United Nations Fund for Drug Abuse Control: *Provided further*, That $12,475,000 shall be available only for programs in Mexico";

On page 6, line 18, strike "except as otherwise provided by law,";

On page 6, line 20, strike "purposes for which appropriated" and insert "appropriation account and under the same terms, conditions, and limitations as originally provided in appropriations Acts";

On page 7, line 1, following "amended," insert "are, if deobligated, hereby continued available";

On page 7, line 2, beginning with "purpose" strike through and including "programs" in line 14, and insert in lieu thereof: appropriation account and under the same terms, conditions, and limitations as originally provided in appropriations Acts: *Provided*, That the Appropriations Committees of both Houses of the Congress are notified fifteen days in advance of the obligation of such funds for activities, programs, projects, type of materiel assistance, countries or other operations not justified or in excess of the amount justified for fiscal year 1978.

On page 7, beginning with line 22, insert: The Mutual Security Appropriation Act, 1956, is amended by striking out section 108 thereof.

On page 8, line 18, strike "unless the Appropriations Committees of both Houses of the Congress are previously notified fifteen days in advance";

On page 9, line 2, before the period, insert a colon and the following: *"Provided further*, That none of the funds appropriated under this heading may be used to carry out those provisions of section 903 of the Foreign Assistance Act of 1961 which pertain to the Sinai support mission".

On page 9, line 5, strike out "531" and insert in lieu thereof "497, 531, and 533".

On page 9, line 6, immediately after the second comma insert the following: "and those provisions of section 903 of the Foreign Assistance Act of 1961 which pertain to the Sinai support mission,".

On page 9, line 6, strike out "$2,214,700,000" and insert in lieu thereof "$2,202,200,000".

The PRESIDING OFFICER. The clerk will report the next amendment.

The assistant legislative clerk read as follows:

On page 9, beginning with line 12, insert: Loan Allocation, Security Supporting Assistance: Of the new obligational authority appropriated under this Act for Security Supporting Assistance, not to exceed $856,800,000 shall be available for grants: *Provided*, That of the amounts available for loans, not to exceed $865,400,000 shall be available for loans with maturities in excess of thirty years following the date on which funds were originally made available under such loans.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. INOUYE. I will be very happy to yield, sir.

Mr. ALLEN. This is a similar matter to the matter we had up on the first amendment.

The PRESIDING OFFICER. Who yields time?

Mr. INOUYE. I yield——

Mr. ALLEN. Would the Senator yield 10 minutes?

Mr. INOUYE. Ten minutes.

Mr. ALLEN. May I ask unanimous consent that the time be equally divided inasmuch as I seek to engage in colloquy with the distinguished manager of the bill? I ask that unanimous consent.

Mr. SCHWEIKER. Is that on this amendment?

Mr. ALLEN. Yes; we are on this amendment.

Mr. President, I ask unanimous consent that the time consumed be charged equally to both sides.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is ordered.

Mr. ALLEN. I would like to inquire as to how much money in all is available for a loan in this area inasmuch as this amendment would allow $856,800,000 to be loaned with maturities in excess of 30 years, and I assume that would mean up to 100 years, for that matter, because that would be in excess of 30 years. How much is the total fund of which this amount is carved out for loans in excess of 30 years?

Mr. INOUYE. The gross amount is $1,065,400,000.

Mr. ALLEN. In other words, approximately 80 percent of these loans can go up to 100 years; is that right? You said less than $1.1 billion, so apparently some 80 percent of these loans can go up as high as 50, 60, 100 years.

Mr. INOUYE. Forty years.

Mr. ALLEN. It just says in excess of 30 years.

Mr. INOUYE. In excess of 30 years. In other words, the others will have to be matured in 30 years——

Mr. ALLEN. Or less.

Mr. INOUYE. Or less.

Mr. ALLEN. Yes. But 80 percent of them——

Mr. INOUYE. I would like to point out to the Senator, if I may, this is the first time Congress has attempted to allocate the loans under this program, security supporting assistance, in different maturities. Up until now the officials of different administrations have insisted that all of the loans be made on a 40-year basis. We decided——

Mr. ALLEN. There is nothing here that even limits it to 40 years. It just says you can lend 80 percent of it approximately in loans with maturities in excess of 30 years, with no ceiling.

What disturbs me is that——

Mr. INOUYE. There is a ceiling which is set by the authorization bill, and the ceiling is 40 years.

Mr. ALLEN. Yes; but this does not refer to any ceiling. It says this could be a new authority with the go-ahead of whatever language there is now. This would be an act of Congress.

Mr. INOUYE. The authorization would control this section. All this says is it can mature any time between 30 and 40 years.

Mr. ALLEN. But the section does not say that, of course. I think it is fine that the distinguished Senator says the committee is saying that some of these loans can be made in excess of 30 years. But why did you pick 20 percent as the number or the percentage that had to be under 30 years? Would not a much higher percentage be more in order?

Mr. INOUYE. This is the first time it has been attempted. I should point out to the Senator this step was taken with the disagreement on the part of the administration.

Mr. ALLEN. Will these loans be made to sovereign nations?

Mr. INOUYE. These are loans being

made primarily to Egypt, Syria, Jordan, and Israel.

Mr. ALLEN. I wonder why we would lend for such a long term?

Mr. INOUYE. Because of their present economic condition.

Mr. ALLEN. You do not think they are going to improve in the next 30 years then?

Mr. INOUYE. Well, for example, in the case of Israel, as the Senator is well aware, the income of the average wage earner in the State of Israel is at the present time approximately $3,400. Of that amount, 70 percent is subject to taxes, involuntary purchases of bonds, and other assessments. In other words, average Israeli wage earners are the highest-taxed people in the world.

Furthermore, because of the present circumstances, 35 percent of the gross national product of the State of Israel is now being set aside for defensive purposes as compared to approximately 6 percent in the United States.

From any calculation this is a very high percentage to be set aside for purposes of warfare, whether defensive or offensive.

The per capita income in Egypt is at present $280. The Secretary of State, as the Senator is well aware, is presently visiting these countries. He is now, I believe, in Amman conferring with King Hussein. He is hoping that, together with the program in this bill and his persuasive power, he will be able to bring the parties together and finally resolve their differences. As long as their differences exist there is always the possibility that the United States, because of our friendly relations with Israel, may get involved.

The Middle East is very important to the United States, not just because of cultural reasons but for economic reasons as well. This is where the oil is.

Therefore, when we took this initiative, we realized it was a modest attempt, but we felt if we cut further beyond the 20 percent it would make the Secretary's job that much more difficult.

Mr. ALLEN. Well, now actually with the economic conditions of some of these nations they really are not economically capable of conducting a war unless the United States furnishes the money for both sides to be able to go to war.

I have noted these appropriations in recent years as between Egypt and Israel pretty well balance off. I believe in this bill $785 million goes to Israel, and $750 million goes to Egypt. So actually we are providing the capability for both nations to wage war against each other; is that not correct?

Mr. INOUYE. No. There is a technical difference. We are providing not only economic assistance to the State of Israel, we are also providing military assistance. In the case of Egypt that is not the case.

Mr. ALLEN. It is the practice of Congress after some of these loans have been on the books for a year or two or three to come in and forgive these loans, turn them into grants.

I wonder if the Senator could tell the Senate how much volume in dollars has been converted from a loan to a gift under this type of loan in the last 3 years, I will ask?

Mr. INOUYE. In the case of security supporting assistance loans to the Middle East countries, I am happy to advise the Senator that all of the loans have been paid on time.

Mr. ALLEN If they are able to do that it looks like they would not need this in excess of 30 years if they are able to do so well.

Mr. INOUYE. But, as the Senator knows, the payments come as they mature, and these are long-term loans with no interest during the first 10 years.

Mr. ALLEN. Yes.

Possibly their ability to repay has come in part from the fact that much of it has been forgiven; is that correct? I say possibly their ability to be current on some of these loans comes about by reason on the conversion of the loans into grants; is that correct?

Mr. INOUYE. No, the bill sets aside a certain amount of grants and certain amount of loans.

Mr ALLEN. I know. But even after the loans have been made is it not the Senator's understanding that loans on occasion have been forgiven or granted?

Mr. INOUYE. Not in the past 3 years.

Mr. ALLEN. To recipient countries.

Mr. INOUYE. It has not been done with the concurrence of the Appropriations Committee.

Mr. ALLEN. What?

Mr INOUYE. The Appropriations Committee has not approved any transfer of an account from the loan to the grant portfolio.

Mr. ALLEN. Is it not a fact, though, that some loans have been turned into grants by being forgiven?

Mr. INOUYE. The Senator is correct, but if we are speaking of this account, none of the loans have been forgiven or made into grants. If the Senator is speaking of loans that were made in the past to countries like India, Pakistan, Bangladesh; yes, some of these loans have been either modified, forgiven, or made into grants.

Mr. ALLEN. None to the Mideast countries?

Mr. INOUYE None to the Middle East.

Mr. ALLEN. I wish the Senator would check on that. I wish the Senator would check on this information while we are discussing the bill. Later on we might go back into that.

Mr. INOUYE. If the Senator has different information, I would like to receive it now.

Mr. ALLEN. What did the Senator say?

Mr INOUYE. If the Senator has information which would raise a question, I would be pleased to receive it.

Mr. ALLEN. I wanted the Senator to advise me inasmuch as he has the staff facilities on this and I will make query independently. I was asking for information.

Mr. INOUYE. As I have been trying to point out, there are many accounts in this bill, but, as far as this specific account is concerned, the loans have been properly made; and at maturity dates, payments have been made; and none of these loans have been converted or modified into grants.

However, in other programs, for example, Public Law 480, payments are made in local currencies. In the country of India payments were to be made in local currency, in Indian rupees, which are soft currency funds. We had accumulated over a $3 billion equivalent in rupees, as the Senator is aware, over a period of many years, and we forgave the Indian Government over $2 billion of that amount.

Mr. ALLEN. Who has the power to forgive these loans? Does the executive have that power?

Mr. INOUYE. With the concurrence of Congress.

Mr. ALLEN. They do not have authority on their own to forgive?

Mr. INOUYE. They can renegotiate.

Mr. ALLEN. Or declare amnesty on it? They do not have authority to do that.

Is the Senator wedded to the $865 million figure? Would the Senator be willing to reduce that down to a 50-percent level in excess of 30-year loans?

Mr. INOUYE. We have studied this matter at great depth because this is the first time this allocation is being made.

The administration, in submitting its proposal for loans, had done so under the assumption that the loans would be for 40 years, and what we are doing now is to change that. We feel that the 20 percent is a prudent amount as a beginning. I can assure the Senator from Alabama that the next fiscal year we will confer and advise the administration that arrangements should be made to increase the portfolio for loans of less than 30 years. But I would think that at this stage to reduce it further would be disruptive of the Secretary's peace mission at the present time.

Mr. ALLEN. I thank the Senator for this information.

Mr. INOUYE. I yield back the remainder of my time.

Mr. ALLEN. I yield.

Mr. HARRY F. BYRD, JR. Could I ask one question in that regard?

Mr. INOUYE. Yes.

Mr. HARRY F. BYRD, JR. Would it help to serve the concerns of Senator ALLEN and also take care of the Senator's concerns if we were to insert in excess of 30 years but not beyond 40 years? The Senator's feeling is that that is not necessary, I assume.

Mr. INOUYE. Because the controlling law in the authorizing bill sets the limit at 40 years.

Mr. ALLEN. It would not hurt anything to put in the 40, though, would it?

Mr. INOUYE. Not at all.

Mr. ALLEN. To accept that.

Mr. INOUYE. We felt it would be redundant, that is all.

Mr. ALLEN. It is not redundant in this bill. We have to run down another bill to find the redundancy.

Mr. INOUYE. In other words, on line 17 after the word 30 years but not to exceed 40 years.

Mr. HARRY F. BYRD, JR. Correct.

Mr. ALLEN. Will the Senator make that modification?

Mr. INOUYE. Mr. President, I ask

unanimous consent that on line 17 after the words "30 years," the following be inserted, "but not to exceed 40 years."

The PRESIDING OFFICER (Mr. MORGAN). Without objection, it is so ordered.

Mr. INOUYE. Mr. President, I yield back the remainder of my time.

Mr. ALLEN. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The clerk will state the next committee amendment.

The assistant legislative clerk read as follows:

On page 10, line 6, strike "$215,200,000" and insert "$210,200,000";

The PRESIDING OFFICER. Who yields time?

UP AMENDMENT NO. 740

Mr. INOUYE. Mr. President, I believe my distinguished colleague, Senator HEINZ, wishes to submit an amendment which does not affect the committee amendment just announced, and I ask unanimous consent that we take Senator HEINZ' amendment at this time.

The PRESIDING OFFICER. Is there objection?

Mr. SCHWEIKER. Mr. President, I want to say that I support my colleague from Pennsylvania and feel it is a good amendment, and I am pleased to join with the chairman of the committee in accepting the amendment.

The PRESIDING OFFICER. Hearing no objection, the amendment will be stated.

Mr. HEINZ. Mr. President, I believe the amendment is at the desk.

The legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ) proposes unprinted amendment No. 740.

Mr. HEINZ. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 28, between lines 12 and 13, insert the following:

"SEC. 507. None of the funds appropriated or otherwise made available by this Act to the Export-Import Bank and funds appropriated by this Act for direct foreign assistance may be obligated for any government which aids or abets, by granting sanctuary from prosecution to, any individual or group which has committed an act of international terrorism, unless the President of the United States finds that the national security requires otherwise.".

Mr. HEINZ. Mr. President, the purpose of my amendment is to give the President a flexible policy tool to deal with the increasing threat—and reality—of international terrorism.

International terrorism in our society has grown at a frightening rate. Terrorist acts have occurred throughout the world; no nation is safe from the violence and horror of this phenomenon. Terrorists have struck children, travelers, and athletes. There is no pattern to their chaos and no jurisdiction for their disregard of laws and governments. A brief review of terrorist acts will illustrate the randomness and violence with which they act.

Our recent plague of international terrorism began escalating nearly a decade ago. On August 28, 1968, the U.S. Ambassador to Guatemala, John Gordon Mein, was assassinated by Armed Forces of the Revolution. He was the first U.S. Ambassador ever assassinated. Previously, in January 1968, two U.S. military attachés had been slain in Guatemala. Just 2 years later, the Popular Front for the Liberation of Palestine (PFLP) tried to hijack five airliners in 1 week: an attempt on El Al was foiled; a Pan Am plane was flown to Cairo and blown up; Swissair, TWA, and BOAC jets were hijacked to Dawson's Field, Jordan, and destroyed. This action precipitated a civil war in Jordan.

After 1970, assaults on diplomats increased. The Quebec Minister of Labour and Immigration, Pierre Laporte, was kidnaped by a Quebec separatist movement and later found murdered. In May 1971, guerrillas of the Turkish People's Liberation Army kidnaped and then killed the Israeli Consul General in Istanbul. In November 1971, Jordanian Prime Minister Wasfi Tal was also killed—this time by Black September terrorists in Cairo.

While the list of public figures murdered in terrorist plots grew, so did the literally hundreds of civilian casualties. Perhaps the most horrifying terrorist strike was the Black September attack on Israeli athletes at the Olympic games in Munich, Germany. With world attention focused on this traditional event, terrorists slaughtered 11 Israelis; mastermind Abu Daoud was ultimately apprehended, arrested, and then released by France on January 11, 1977. Other infamous massacres of innocent people include the Lod Airport killings on May 30, 1972, the bombing of the Tower of London on July 17, 1974, and the Palestinian bombing of a TWA flight from Tel Aviv to New York on September 8, 1974. 26 were killed and over 70 injured at Lod; 42 were killed or injured in London; all 88 passengers died in the TWA attack. Last summer, on June 27, 1976, another major hijacking occurred. Guerrillas commandeered an Air France jetliner departing from Athens to Uganda, threatening to kill all passengers and crew. Only a courageous July 4 rescue by Israel soldiers saved innocent lives and ended a week of terror.

Mr. President, this amendment is very simple. It prohibits any of the direct funds or Export-Import Bank funds in this bill from going to any government aiding or abetting international terrorism by granting sanctuary to individuals or groups which have committed acts of terrorism.

There are several things the amendment does not do. It does not affect those funds being channeled through international financial institutions or other multilateral organizations. It does not specify particular countries which will be denied funding. It does not specify particular acts of terrorism which would be covered by the amendment.

The objective of this amendment is to provide the President with a policy tool that can be used to show other nations we are serious about combating terrorism, without locking him into an inflexible structure that provides no maneuvering room. In providing this policy tool we should not simply try to punish those nations that have pursued courses of action we do not like, but rather we should give the President a lever he can use to encourage policy changes by other governments. Arbitrary aid cutoffs on our part provide no behavior modification incentives and turn our policy into one of retribution.

My amendment, on the other hand, gives maximum flexibility to the President by leaving to him the judgment of when a government is aiding or abetting terrorism, and by permitting him to waive this prohibition if our national security requires it.

Likewise, the operative words in the amendment—"aid or abets" and "act of international terrorism"—are deliberately broad in order to make clear that our particular concern is with a nation's commitment to the cause of terrorism as exemplified by a pattern of behavior. In particular, this amendment seeks to deal with those committed states whose support of international terrorists is a systematic element of their policies, as exemplified by the granting of sanctuary. Other actions which should concern us include active financial support of terrorist groups, permitting such groups to exist openly and train freely within a country's borders, and violating any of the three international conventions on aviation and aircraft that deal with terrorist activities—Tokyo 1963, The Hague 1970, and Montreal 1971.

An important exclusion in the amendment is its omission of international financial institutions. These institutions, such as the World Bank and the Inter-American Development Bank have proved to be responsible and effective facilitators of economic development. Their continued credibility and independence hinges on their ability to make judgments in economic rather than political terms. It has already been made clear that these institutions cannot accept funds with strings attached, and it serves no useful purpose to seek to attach such strings.

Moreover, the conference report on the authorization for international financial institution funding makes clear that our representatives to the institutions shall use their voice and vote to advance the cause of human rights, the latter term specifically defined to include denying assistance to governments which "provide refuge to individuals committing acts of international terrorism by hijacking aircraft." Thus a similar principle has already been incorporated into the international financial institutions legislation, and there is no need for further action at this point.

Given the way the amendment is drafted and the fact that decisions under it are left to the President, it is difficult to estimate at this point what immediate effect there might be. My concern, of course, is not with immediate effect but

with the usefulness of this policy tool throughout the coming year, but nonetheless a few words should be said about what impact it is likely to have. In doing so, I am somewhat hesitant to mention specific countries, since it is not my intention that Congress make that judgment. Two appropriate examples, however, of countries which by anybody's standards might be regarded as having aided or abetted international terrorism are Libya and Iraq.

Perhaps the nation most responsible for aid to terrorism is Libya. In recent years, Libya has been the resting and planning place for several international terrorists: Illich Ramirez Sanchez—better known as "Carlos"—mastermind of the 1975 raid on the OPEC ministers conference in Vienna; the Japanese Red Army, JRA, attackers of the American Consulate in Kuala Lumpur; Hans Joachim Klein, a member of the Carlos attack team at Vienna; Wilfred Base, another Carlos associate killed last June by Israeli soldiers during the rescue of hostages in Entebbe, Uganda. The Libyans, however, supply more than asylum to their "guests."

With huge oil revenues and stockpiles of Soviet weaponry, Libya is the traditional armorer and financier of terrorist groups. The Christian Science Monitor reports that terrorists from Eritrea, Syria, Somalia, South Yemen, Chad, Morocco, Tunisia, Thailand, the Philippines, Panama, Sardinia, and Corsica all have received Libyan assistance. In 1972, Libyan aid to the Black September killers of Israeli athtletes supposedly totaled many millions of dollars; some intelligence sources also claim that Carlos was rewarded with between $1 million and $2 million for kidnapping the OPEC oil ministers. Libya is considered to be the source of Soviet rocket launchers that the Irish Republican Army has used against police and military outposts in Northern Ireland. They are also responsible for the distribution of Strela missiles seized in an attempted Palestinian attack at Rome Airport in 1973. Three of the terrorists arrested were later flown to Tripoli, the capital of Libya.

The situation in Iraq is also grim. The Abu Ali Iyad training camp currently covers several miles in central Iraq. Equipped with its own arms factory, the camp is filled with Palestinians and others receiving guerrilla training from al-Fatah defector Abu Nidal. There is little doubt that terrorist sympathy is not a new development in Iraq. Black June terrorists operating from this country appear to be responsible for a string of incidents in 1976: the attack on Damascus' Semiramus Hotel in September, assaults on Syrian embassies in Rome and Islamabad in October, the attack on Amman's Intercontinental Hotel in November, and the attempted assassination of Syrian Foreign Minister Abdel Khaddam in December. The Iraqi Black June attacks on moderate Arab states stem from a vigorous "rejectionist" policy, that is, a refusal to accept a negotiated settlement to the Arab-Israeli dispute. It is noteworthy in this regard, that acts of terrorism growing out of the Middle East situation have been directed against both Arabs and Israelis, and that both sides in the controversy have an interest in controling these fanatics.

Iraq also now seems to be the main base for the Popular Front for the Liberation of Palestine, PFLP, and its terrorist planner Waddieh Haddad. The extent of their terrorist-aiding activity remains high. The Iraqi mission to the United Nations was recently discovered purchasing and distributing 200 fully automatic machine guns. These weapons, experts state, were "ideal for terrorists."

With respect to both these countries our formal relations are not extensive, and the short-term effect of this amendment, if the President were to make such a finding in either of these cases, would not be great. Neither country receives direct assistance, either economic or military, from the United States.

The major immediate impact would be with respect to the Export-Import Bank. In fiscal 1976 Libya received slightly more than $6.5 million in short term insurance, just under $1 million in medium term insurance, and one loan of $180,000 from the Bank. Prior year extensions were at somewhat lower levels.

Likewise, in fiscal 1976, Iraq received approximately $3.3 million in short term insurance. In both cases, assistance like this would be precluded were the President to determine that Libya and Iraq were aiding and abetting international terrorism by granting sanctuary.

There are, of course, other countries periodically mentioned as ones whose governments assist terrorists, notably the Democratic People's Republic of Yemen, but in any case, I think it is fair to say that the immediate impact of this amendment, if any, will be with respect to Export-Import Bank activity rather than our direct assistance programs. I would reiterate, however, that any cutoff of funds is not automatic and is not specified in this amendment. The President will have discretion to use this limitation in ways that will discourage other states from promoting terrorism.

It is my belief that this amendment represents a strong statement of our commitment to deal forcefully with countries that support international lawlessness and fanaticism, and at the same time provides a flexible tool for the President in actually dealing with other nations. It will not force us into precipitous or unwise action, but it will give the President a lever that he badly needs to influence the irresponsible behavior of other nations.

In sum, terrorism results in deplorable acts perpetrated on individual and innocent human beings. We are dealing with international outlaws who fear no government or established order, and who show no compassion or humanity toward their victims. Terrorism is the grossest violation of human rights. We must act first and foremost to stamp out terrorism if our commitment to human rights is to have meaning and credibility. I am sure we all feel that an effective law must be passed to curb the freedom of the terrorist, and I urge my colleagues to support this amendment.

Mr. President, I have discussed this amendment with the managers of the bill, the distinguished Senator from Hawaii (Mr. INOUYE) and the distinguished Senator from Pennsylvania (Mr. SCHWEIKER), and I understand that they feel they can accept the amendment, and if that is correct, I would be glad to yield back the remainder of my time.

Mr. CLARK. Will the Senator from Pennsylvania mind a few sentences of explanation?

Mr. HEINZ. Certainly.

Mr. INOUYE. I shall explain it.

This amendment provides that none of the funds appropriated or made available by this act to the Export-Import Bank and none of the funds appropriated by this act for foreign assistance may be obligated for any government which aids or abets, by granting sanctuary from prosecution, any individual or group which has committed an act of international terrorism, unless the President of the United States finds that the national security requires otherwise.

Mr. CLARK. I thank the Senator.

Mr. INOUYE. Mr. President, I yield back the remainder of my time and I am pleased to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. HEINZ. I shall proceed for 30 seconds to thank the managers of the bill for their very great courtesy and I appreciate their understanding in taking this amendment.

Mr. INOUYE. I thank the Senator very much.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, on behalf of Mr. INOUYE, I take such time as I may consume on the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONSIDERATION OF CERTAIN MEASURES ON THE UNANIMOUS CONSENT CALENDAR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the measures on the Unanimous Consent Calendar which have been cleared, all of which have been cleared at least 24 hours.

The PRESIDING OFFICER. Without objection, it is so ordered.

FAIR DEBT COLLECTION PRACTICES ACT

The Senate proceeded to consider the bill (H.R. 5294) to amend the Consumer Credit Protection Act to prohibit abusive practices by debt collectors, which had been reported from the Committee on Banking, Housing, and Urban Affairs

with an amendment to strike all after the enacting clause and insert the following:

That the Consumer Credit Protection Act (15 U.S.C. 1601 et seq.) is amended by adding at the end thereof the following new title:

"TITLE VIII—DEBT COLLECTION PRACTICES

"Sec.
"801. Short title.
"802. Findings and purpose.
"803. Definitions.
"804. Acquisition of location information.
"805. Communication in connection with debt collection.
"806. Harassment or abuse.
"807. False or misleading representations.
"808. Unfair practices.
"809. Validation of debts.
"810. Multiple debts.
"811. Legal actions by debt collectors.
"812. Furnishing certain deceptive forms.
"813. Civil liability.
"814. Administrative enforcement.
"815. Reports to Congress by the Commission.
"816. Relation to State laws.
"817. Exemption for State regulation.
"818. Effective date.

"§ 801. Short title

"This title may be cited as the 'Fair Debt Collection Practices Act'.

"§ 802. Findings and purpose

"(a) There is abundant evidence of the use of abusive, deceptive, and unfair debt collection practices by many debt collectors. Abusive debt collection practices contribute to the number of personal bankruptcies, to marital instability, to the loss of jobs, and to invasions of individual privacy.

"(b) Existing laws and procedures for redressing these injuries are inadequate to protect consumers.

"(c) Means other than misrepresentation or other abusive debt collection practices are available for the effective collection of debts.

"(d) Abusive debt collection practices are carried on to a substantial extent in interstate commerce and through means and instrumentalities of such commerce. Even where abusive debt collection practices are purely intrastate in character, they nevertheless directly affect interstate commerce.

"(e) It is the purpose of this title to eliminate abusive debt collection practices by debt collectors, to insure that those debt collectors who refrain from using abusive debt collection practices are not competitively disadvantaged, and to promote consistent State action to protect consumers against debt collection abuses.

"§ 803. Definitions

"As used in this title—

"(1) The term 'Commission' means the Federal Trade Commission.

"(2) The term 'communication' means the conveying of information regarding a debt directly or indirectly to any person through any medium.

"(3) The term 'consumer' means any natural person obligated or allegedly obligated to pay any debt.

"(4) The term 'creditor' means any person who offers or extends credit creating a debt or to whom a debt is owed, but such term does not include any person to the extent that he receives an assignment or transfer of a debt in default solely for the purpose of facilitating collection of such debt for another.

"(5) The term 'debt' means any obligation or alleged obligation of a consumer to pay money arising out of a transaction in which the money, property, insurance, or services which are the subject of the transaction are primarily for personal, family, or household purposes, whether or not such obligation has been reduced to judgment.

"(6) The term 'debt collector' means any person who uses any instrumentality of interstate commerce or the mails in any business the principal purpose of which is the collection of any debts, or who regularly collects or attempts to collect, directly or indirectly, debts owed or due or asserted to be owed or due another. Notwithstanding the exclusion provided by clause (G) of the last sentence of this paragraph, the term includes any creditor who, in the process of collecting his own debts, uses any name other than his own which would indicate that a third person is collecting or attempting to collect such debts. For the purpose of section 808(6), such term also includes any person who uses any instrumentality of interstate commerce or the mails in any business the principal purpose of which is the enforcement of security interests. The term does not include—

"(A) any officer or employee of a creditor while, in the name of the creditor, collecting debts for such creditor;

"(B) any person while acting as a debt collector for another person, both of whom are related by common ownership or affiliated by corporate control, if the person acting as a debt collector does so only for persons to whom it is so related or affiliated and if the principal business of such person is not the collection of debts;

"(C) any officer or employee of the United States or any State to the extent that collecting or attempting to collect any debt is in the performance of his official duties;

"(D) any person while serving or attempting to serve legal process on any other person in connection with the judicial enforcement of any debt;

"(E) any nonprofit organization which, at the request of consumers, performs bona fide consumer credit counseling and assists consumers in the liquidation of their debts by receiving payments from such consumers and distributing such amounts to creditors;

"(F) any attorney-at-law collecting a debt as an atttorney on behalf of and in the name of a client; and

"(G) any person collecting or attempting to collect any debt owed or due or asserted to be owed or due another to the extent such activity (i) is incidental to a bona fide fiduciary obligation or a bona fide escrow arrangement; (ii) concerns a debt which was originated by such person; (iii) concerns a debt which was not in default at the time it was obtained by such person; or (iv) concerns a debt obtained by such person as a secured party in a commercial credit transaction involving the creditor.

"(7) The term 'location information' means a consumer's place of abode and his telephone number at such place, or his place of employment.

"(8) The term 'State' means any State, territory, or possession of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any political subdivision of any of the foregoing.

"§ 804. Acquisition of location information

"Any debt collector communicating with any person other than the consumer for the purpose of acquiring location information about the consumer shall—

"(1) identify himself, state that he is confirming or correcting location information concerning the consumer, and, only if expressly requested, identify his employer;

"(2) not state that such consumer owes any debt;

"(3) not communicate with any such person more than once unless requested to do so by such person or unless the debt collector reasonably believes that the earlier response of such person is erroneous or incomplete and that such person now has correct or complete location information;

"(4) not communicate by post card;

"(5) not use any language or symbol on any envelope or in the contents of any communication effected by the mails or telegram that indicates that the debt collector is in the debt collection business or that the communication relates to the collection of a debt; and

"(6) after the debt collector knows the consumer is represented by an attorney with regard to the subject debt and has knowledge of, or can readily ascertain, such attorney's name and address, not communicate with any person other than that attorney, unless the attorney fails to respond within a reasonable period of time to communication from the debt collector.

"§ 805. Communication in connection with debt collection

"(a) COMMUNICATION WITH THE CONSUMER GENERALLY.—Without the prior consent of the consumer given directly to the debt collector or the express permission of a court of competent jurisdiction, a debt collector may not communicate with a consumer in connection with the collection of any debt—

"(1) at any unusual time or place or a time or place known or which should be known to be inconvenient to the consumer. In the absence of knowledge of circumstances to the contrary, a debt collector shall assume that the convenient time for communicating with a consumer is after 8 o'clock antimeridian and before 9 o'clock post-meridian, local time at the consumer's location;

"(2) if the debt collector knows the consumer is represented by an attorney with respect to such debt and has knowledge of, or can readily ascertain, such attorney's name and address, unless the attorney fails to respond within a reasonable period of time to a communication from the debt collector or unless the attorney consents to direct communication with the consumer; or

"(3) at the consumer's place of employment if the debt collector knows or has reason to know that the consumer's employer prohibits the consumer from receiving such communication.

"(b) COMMUNICATION WITH THIRD PARTIES.—Except as provided in section 804, without the prior consent of the consumer given directly to the debt collector, or the express permission of a court of competent jurisdiction, or as reasonably necessary to effectuate a postjudgment judicial remedy, a debt collector may not communicate, in connection with the collection of any debt, with any person other than the consumer, his attorney, a consumer reporting agency if otherwise permitted by law, the creditor, the attorney of the creditor, or the attorney of the debt collector.

"(c) CEASING COMMUNICATION.—If a consumer notifies a debt collector in writing that the consumer refuses to pay a debt or that the consumer wishes the debt collector to cease further communication with the consumer, the debt collector shall not communicate further with the consumer with respect to such debt, except—

"(1) to advise the consumer that the debt collector's further efforts are being terminated;

"(2) to notify the consumer that the debt collector or creditor may invoke specified remedies which are ordinarily invoked by such debt collector or creditor; or

"(3) where applicable, to notify the consumer that the debt collector or creditor intends to invoke a specified remedy.

If such notice from the consumer is made by mail, notification shall be complete upon receipt.

"(d) For the purpose of this section, the term 'consumer' includes the consumer's spouse, parent (if the consumer is a minor), guardian, executor, or administrator.

"§ 806. Harassment or abuse

"A debt collector may not engage in any conduct the natural consequence of which is to harass, oppress, or abuse any person in connection with the collection of a debt. Without limiting the general application of the foregoing, the following conduct is a violation of this section:

"(1) The use or threat of use of violence or other criminal means to harm the physical person, reputation, or property of any person.

"(2) The use of obscene or profane language or language the natural consequence of which is to abuse the hearer or reader.

"(3) The publication of a list of consumers who allegedly refuse to pay debts, except to a consumer reporting agency or to persons meeting the requirements of section 603(f) or 604(3) of this Act.

"(4) The advertisement for sale of any debt to coerce payment of the debt.

"(5) Causing a telephone to ring or engaging any person in telephone conversation repeatedly or continuously with intent to annoy, abuse, or harass any person at the called number.

"(6) Except as provided in section 804, the placement of telephone calls without meaningful disclosure of the caller's identity.

"§ 807. False or misleading representations

"A debt collector may not use any false, deceptive, or misleading representation or means in connection with the collection of any debt. Without limiting the general application of the foregoing, the following conduct is a violation of this section:

"(1) The false representation or implication that the debt collector is vouched for, bonded by, or affiliated with the United States or any State, including the use of any badge, uniform, or facsimile thereof.

"(2) The false representation of—

"(A) the character, amount, or legal status of any debt; or

"(B) any services rendered or compensation which may be lawfully received by any debt collector for the collection of a debt.

"(3) The false representation or implication that any individual is an attorney or that any communication is from an attorney.

"(4) The representation or implication that nonpayment of any debt will result in the arrest or imprisonment of any person or the seizure, garnishment, attachment, or sale of any property or wages of any person unless such action is lawful and the debt collector or creditor intends to take such action.

"(5) The threat to take any action that cannot legally be taken or that is not intended to be taken.

"(6) The false representation or implication that a sale, referral, or other transfer of any interest in a debt shall cause the consumer to—

"(A) lose any claim or defense to payment of the debt; or

"(B) become subject to any practice prohibited by this title.

"(7) The false representation or implication that the consumer committed any crime or other conduct in order to disgrace the consumer.

"(8) Communicating or threatening to communicate to any person credit information which is known or which should be known to be false, including the failure to communicate that a disputed debt is disputed.

"(9) The use or distribution of any written communication which simulates or is falsely represented to be a document authorized, issued, or approved by any court, official, or agency of the United States or any State, or which creates a false impression as to its source, authorization, or approval.

"(10) The use of any false representation or deceptive means to collect or attempt to collect any debt or to obtain information concerning a consumer.

"(11) Except as otherwise provided for communications to acquire location information under section 804, the failure to disclose clearly in all communications made to collect a debt or to obtain information about a consumer, that the debt collector is attempting to collect a debt and that any information obtained will be used for that purpose.

"(12) The false representation or implication that accounts have been turned over to innocent purchasers for value.

"(13) The false representation or implication that documents are legal process.

"(14) The use of any business, company, or organization name other than the true name of the debt collector's business, company, or organization.

"(15) The false representation or implication that documents are not legal process forms or do not require action by the consumer.

"(16) The false representation or implication that a debt collector operates or is employed by a consumer reporting agency as defined by section 603(f) of this Act.

"§ 808. Unfair practices

"A debt collector may not use unfair or unconscionable means to collect or attempt to collect any debt. Without limiting the general application of the foregoing, the following conduct is a violation of this section:

"(1) The collection of any amount (including any interest, fee, charge, or expense incidental to the principal obligation) unless such amount is expressly authorized by the agreement creating the debt or permitted by law.

"(2) The acceptance by a debt collector from any person of a check or other payment instrument postdated by more than five days unless such person is notified in writing of the debt collector's intent to deposit such check or instrument not more than ten nor less than three business days prior to such deposit.

"(3) The solicitation by a debt collector of any postdated check or other postdated check or other postdated payment instrument for the purpose of threatening or instituting criminal prosecution.

"(4) Depositing or threatening to deposit any postdated check or other postdated payment instrument prior to the date on such check or instrument.

"(5) Causing charges to be made to any person for communications by concealment of the true purpose of the communication. Such charges include, but are not limited to, collect telephone calls and telegram fees.

"(6) Taking or threatening to take any nonjudicial action to effect dispossession or disablement of property if—

"(A) there is no present right to possession of the property claimed as collateral through an enforceable security interest;

"(B) there is no present intention to take possession of the property; or

"(C) the property is exempt by law from such dispossession or disablement.

"(7) Communicating with a consumer regarding a debt by post card.

"(8) Using any language or symbol, other than the debt collector's address, on any envelope when communicating with a consumer by use of the mails or by telegram, except that a debt collector may use his business name if such name does not indicate that he is in the debt collection business.

"§ 809. Validation of debts

"(a) Within five days after the initial communication with a consumer in connection with the collection of any debt, a debt collector shall, unless the following information is contained in the initial communication or the consumer has paid the debt, send the consumer a written notice containing—

"(1) the amount of the debt;

"(2) the name of the creditor to whom the debt is owed;

"(3) a statement that unless the consumer, within thirty days after receipt of the notice, disputes the validity of the debt, or any portion thereof, the debt will be assumed to be valid by the debt collector;

"(4) a statement that if the consumer notifies the debt collector in writing within the thirty-day period that the debt, or any portion thereof, is disputed, the debt collector will obtain verification of the debt or a copy of a judgment against the consumer and a copy of such verification or judgment will be mailed to the consumer by the debt collector; and

"(5) a statement that, upon the consumer's written request within the thirty-day period, the debt collector will provide the consumer with the name and address of the original creditor, if different from the current creditor.

"(b) If the consumer notifies the debt collector in writing within the thirty-day period described in subsection (a) that the debt, or any portion thereof, is disputed, or that the consumer requests the name and address of the original creditor, the debt collector shall cease collection of the debt, or any disputed portion thereof, until the debt collector obtains verification of the debt or a copy of a judgment, or the name and address of the original creditor, and a copy of such verification or judgment, or name and address of the original creditor, is mailed to the consumer by the debt collector.

"(c) The failure of a consumer to dispute the validity of a debt under this section may not be construed by any court as an admission of liability by the consumer.

"§ 810. Multiple debts

"If any consumer owes multiple debts and makes any single payment to any debt collector with respect to such debts, such debt collector may not apply such payment to any debt which is disputed by the consumer and, where applicable, shall apply such payment in accordance with the consumer's directions.

"§ 811. Legal actions by debt collectors

"(a) Any debt collector who brings any legal action on a debt against any consumer shall—

"(1) in the case of an action to enforce an interest in real property securing the consumer's obligation, bring such action only in a judicial district or similar legal entity in which such real property is located; or

"(2) in the case of an action not described in paragraph (1), bring such action only in the judicial district or similar legal entity—

"(A) in which such consumer signed the contract sued upon; or

"(B) in which such consumer resides at the commencement of the action.

"(b) Nothing in this title shall be construed to authorize the bringing of legal actions by debt collectors.

"§ 812. Furnishing certain deceptive forms

"(a) It is unlawful to design, compile, and furnish any form knowing that such form would be used to create the false belief in a consumer that a person other than the creditor of such consumer is participating in the collection of or in an attempt to collect a debt such consumer allegedly owes such creditor, when in fact such person is not so participating.

"(b) Any person who violates this section shall be liable to the same extent and in the same manner as a debt collector is liable under section 813 for failure to comply with a provision of this title.

"§ 813. Civil liability

"(a) Except as otherwise provided by this section, any debt collector who fails to com-

ply with any provision of this title with respect to any person is liable to such person in an amount equal to the sum of—

"(1) any actual damage sustained by such person as a result of such failure;

"(2)(A) in the case of any action by an individual, such additional damages as the court may allow, but not exceeding $1,000; or

"(B) in the case of a class action, (i) such amount for each named plaintiff as could be recovered under subparagraph (A), and (ii) such amount as the court may allow for all other class members, without regard to a minimum individual recovery, not to exceed the lesser of $500,000 or 1 per centum of the net worth of the debt collector; and

"(3) in the case of any successful action to enforce the foregoing liability, the costs of the action, together with a reasonable attorney's fee as determined by the court. On a finding by the court that an action under this section was brought in bad faith and for the purpose of harassment, the court may award to the defendant attorney's fees reasonable in relation to the work expended and costs.

"(b) In determining the amount of liability in any action under subsection (a), the court shall consider, among other relevant factors—

"(1) in any individual action under subsection (a)(2)(A), the frequency and persistence of noncompliance by the debt collector, the nature of such noncompliance, and the extent to which such noncompliance was intentional; or

"(2) in any class action under subsection (a)(2)(B), the frequency and persistence of noncompliance by the debt collector, the nature of such noncompliance, the resources of the debt collector, the number of persons adversely affected, and the extent to which the debt collector's noncompliance was intentional.

"(c) A debt collector may not be held liable in any action brought under this title if the debt collector shows by a preponderance of evidence that the violation was not intentional and resulted from a bona fide error notwithstanding the maintenance of procedures reasonably adopted to avoid any such error.

"(d) An action to enforce any liability created by this title may be brought in any appropriate United States district court without regard to the amount in controversy, or in any other court of competent jurisdiction, within one year from the date on which the violation occurs.

"(e) No provision of this section imposing any liability shall apply to any act done or omitted in good faith in conformity with any advisory opinion of the Commission, notwithstanding that after such act or omission has occurred, such opinion is amended, rescinded, or determined by judicial or other authority to be invalid for any reason.

"§ 814. Administrative enforcement

"(a) Compliance with this title shall be enforced by the Commission, except to the extent that enforcement of the requirements imposed under this title is specifically committed to another agency under subsection (b). For purpose of the exercise by the Commission of its functions and powers under the Federal Trade Commission Act, a violation of this title shall be deemed an unfair or deceptive act or practice in violation of that Act. All of the functions and powers of the Commission under the Federal Trade Commission Act are available to the Commission to enforce compliance by any person with this title, irrespective of whether that person is engaged in commerce or meets any other jurisdictional tests in the Federal Trade Commission Act, including the power to enforce the provisions of this title in the same manner as if the violation had been a violation of a Federal Trade Commission trade regulation rule.

"(b) Compliance with any requirements imposed under this title shall be enforced under—

"(1) section 8 of the Federal Deposit Insurance Act, in the case of—

"(A) national banks, by the Comptroller of the Currency;

"(B) member banks of the Federal Reserve System (other than national banks), by the Federal Reserve Board; and

"(C) banks the deposits or accounts of which are insured by the Federal Deposit Insurance Corporation (other than members of the Federal Reserve System), by the Board of Directors of the Federal Deposit Insurance Corporation;

"(2) section 5(d) of the Home Owners Loan Act of 1933, section 407 of the National Housing Act, and sections 6(i) and 17 of the Federal Home Loan Bank Act, by the Federal Home Loan Bank Board (acting directly or through the Federal Savings and Loan Insurance Corporation), in the case of any institution subject to any of those provisions;

"(3) the Federal Credit Union Act, by the Administrator of the National Credit Union Administration with respect to any Federal credit union;

"(4) the Acts to regulate commerce, by the Interstate Commerce Commission with respect to any common carrier subject to those Acts;

"(5) the Federal Aviation Act of 1958, by the Civil Aeronautics Board with respect to any air carrier or any foreign air carrier subject to that Act; and

"(6) the Packers and Stockyards Act, 1921 (except as provided in section 406 of that Act), by the Secretary of Agriculture with respect to any activities subject to that Act.

"(c) For the purpose of the exercise by any agency referred to in subsection (b) of its powers under any Act referred to in that subsection, a violation of any requirement imposed under this title shall be deemed to be a violation of a requirement imposed under that Act. In addition to its powers under any provision of law specifically referred to in subsection (b), each of the agencies referred to in that subsection may exercise, for the purpose of enforcing compliance with any requirement imposed under this title any other authority conferred on it by law, except as provided in subsection (d).

"(d) Neither the Commission nor any other agency referred to in subsection (b) may promulgate trade regulation rules or other regulations with respect to the collection of debts by debt collectors as defined in this title.

"§ 815. Reports to Congress by the Commission

"(a) Not later than one year after the effective date of this title and at one-year intervals thereafter, the Commission shall make reports to the Congress concerning the administration of its functions under this title, including such recommendations as the Commission deems necessary or appropriate. In addition, each report of the Commission shall include its assessment of the extent to which compliance with this title is being achieved and a summary of the enforcement actions taken by the Commission under section 814 of this title.

"(b) In the exercise of its functions under this title, the Commission may obtain upon request the views of any other Federal agency which exercises enforcement functions under section 814 of this title.

"§ 816. Relation to State laws

"This title does not annul, alter, or affect, or exempt any person subject to the provisions of this title from complying with the laws of any State with respect to debt collection practices, except to the extent that those laws are inconsistent with any provision of this title, and then only to the extent of the inconsistency. For purposes of this section, a State law is not inconsistent with this title if the protection such law affords any consumer is greater than the protection provided by this title.

"§ 817. Exemption for State regulation

"The Commission shall by regulation exempt from the requirement of this title any class of debt collection practices within any State if the Commission determines that under the law of that State that class of debt collection practices is subject to requirements substantially similar to those imposed by this title, and that there is adequate provision for enforcement.

"§ 818. Effective date

"This title takes effect upon the expiration of six months after the date of its enactment, but section 809 shall apply only with respect to debts for which the initial attempt to collect occurs after such effective date.".

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. RIEGLE. This legislation would add a new title to the Consumer Credit Protection Act entitled the Fair Debt Collection Practices Act. Its purpose is to protect consumers from a host of unfair, harassing, and deceptive debt collection practices without imposing unnecessary restrictions on ethical debt collectors. This bill, which substantially modifies the House's legislation, was strongly supported by consumer groups, labor unions, State and Federal law enforcement officials, and by both national organizations which represent the debt collection profession, the American Collectors Association and Associated Credit Bureaus.

NEED FOR THIS LEGISLATION

Mr. President, debt collection abuse by third-party debt collectors is a widespread and serious national problem. Collection abuse takes many forms, including obscene or profane language, threats of violence, telephone calls at unreasonable hours, misrepresentation of a consumer's legal rights, disclosing a consumer's personal affairs to friends, neighbors, or an employer, obtaining information about a consumer through false pretense, impersonating public officials and attorneys, and simulating legal process.

Debt collection by third parties is a substantial business which touches the lives of many Americans. There are more than 5,000 collection agencies across the country, each averaging 8 employees. Last year, more than $5 billion in debts were turned over to collection agencies. One trade association which represents approximately half of the Nation's independent collectors states that in 1976 its members contacted 8 million consumers.

Hearings before the Consumer Affairs Subcommittee revealed that independent debt collectors are the prime source of egregious collection practices. While unscrupulous debt collectors comprise only

a small segment of the industry, the suffering and anguish which they regularly inflict is substantial. Unlike creditors, who generally are restrained by the desire to protect their good will when collecting past due accounts, independent collectors are likely to have no future contact with the consumer and often are unconcerned with the consumer's opinion of them. Collection agencies generally operate on a 50-percent commission, and this has too often created the incentive to collect by any means.

The primary reason why debt collection abuse is so widespread is the lack of meaningful legislation on the State level. While debt collection agencies have existed for decades, there are 13 States, with 40 million citizens, that have no debt collection laws. These States are Alabama, Delaware, Georgia, Kansas, Kentucky, Mississippi, Missouri, Montana, Ohio, Oklahoma, Rhode Island, South Carolina, and South Dakota. Another 11 States—Alaska, Arkansas, Indiana, Louisiana, Nebraska, New Jersey, Oregon, Pennsylvania, Utah, Virginia, and Wyoming—with another 40 million citizens, have laws which are so weak or incomplete that they provide little or no effective protection. Thus, 80 million Americans, nearly 40 percent of our population, have no meaningful protection from debt collection abuse.

While 37 States and the District of Columbia do have laws regulating debt collectors, only a small number are comprehensive statutes which provide a civil remedy. As an example of ineffective State laws, of the 16 States which regulate by debt collection boards, 12 require by law that a majority of the board be comprised of debt collectors.

The Banking Committee has found that collection abuse has grown from a State problem to a national problem. The use of WATS lines by debt collectors has led to a dramatic increase in interstate collections. State law enforcement officials have pointed to this development as a prime reason why Federal legislation is necessary, because State officials are unable to act against unscrupulous debt collectors who harass consumers from another State.

One of the most frequent fallacies concerning debt collection legislation is the contention that the primary beneficiaries are "deadbeats." In fact, however, there is universal agreement among scholars, law enforcement officials, and even debt collectors that the number of persons who willfully refuse to pay just debts is miniscule. Prof. David Caplovitz, the foremost authority on debtors in default, testified that after years of research he has found that only 4 percent of all defaulting debtors fit the description of "deadbeat." This conclusion is supported by the National Commission on Consumer Finance which found that creditors list the willful refusal to pay as an extremely infrequent reason for default.

The Commission's findings are echoed in all major studies: The vast majority of consumers who obtain credit fully intend to repay their debts. When default occurs, it is nearly always due to an unforeseen event such as unemployment, overextension, serious illness, or marital difficulties or divorce.

Mr. President, the serious and widespread abuses in this area and the inadequacy of existing State and Federal laws make this legislation appropriate and highly necessary.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–382), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

NATURE AND PURPOSE OF THE BILL

This legislation would add a new title to the Consumer Credit Protection Act entitled the Fair Debt Collection Practices Act. Its purpose is to protect consumers from a host of unfair, harassing, and deceptive debt collection practices without imposing unnecessary restrictions on ethical debt collectors. This bill was strongly supported by consumer groups, labor unions, State and Federal law enforcement officials, and by both national organizations which represent the debt collection profession, the American Collectors Association and Associated Credit Bureaus.

NEED FOR THIS LEGISLATION

The committee has found that debt collection abuse by third party debt collectors is a widespread and serious national problem. Collection abuse takes many forms, including obscene or profane language, threats of violence, telephone calls at unreasonable hours, misrepresentation of a consumer's legal rights, disclosing a consumer's personal affairs to friends, neighbors, or an employer, obtaining information about a consumer through false pretense, impersonating public officials and attorneys, and simulating legal process.

Debt collection by third parties is a substantial business which touches the lives of many Americans. There are more than 5,000 collection agencies across the country, each averaging 8 employees. Last year, more than $5 billion in debts were turned over to collection agencies. One trade association which represents approximately half of the Nation's independent collectors states that in 1976 its members contacted 8 million consumers.

Hearings before the Consumer Affairs Subcommittee revealed that independent debt collectors are the prime source of egregious collection practices. While unscrupulous debt collectors comprise only a small segment of the industry, the suffering and anguish which they regularly inflict is substantial. Unlike creditors, who generally are restrained by the desire to protect their good will when collecting past due accounts, independent collectors are likely to have no future contact with the consumer and often are unconcerned with the consumer's opinion of them. Collection agencies generally operate on a 50-percent commission, and this has too often created the incentive to collect by any means.

The primary reason why debt collection abuse is so widespread is the lack of meaningful legislation on the State level. While debt collection agencies have existed for decades, there are 13 States, with 40 million citizens, that have no debt collection laws. These States are Alabama, Delaware, Georgia, Kansas, Kentucky, Mississippi, Missouri, Montana, Ohio, Oklahoma, Rhode Island, South Carolina, and South Dakota. Another 11 States (Alaska, Arkansas, Indiana, Louisiana, Nebraska, New Jersey, Oregon, Pennsylvania, Utah, Virginia and Wyoming) with another 40 million citizens, have laws which in the committee's opinion provide little or no effective protection. Thus, 80 million Americans, nearly 40 percent of our population, have no meaningful protection from debt collection abuse.

While 37 States and the District of Columbia do have laws regulating debt collectors, only a small number are comprehensive statutes which provide a civil remedy. As an example of ineffective State laws, of the 16 states which regulate by debt collection boards, 12 require by law that a majority of the board be comprised of debt collectors.

The Committee has found that collection abuse has grown from a State problem to a national problem. The use of WATS lines by debt collectors has led to a dramatic increase in interstate collections. State law enforcement officials have pointed to this development as a prime reason why federal legislation is necessary, because State officials are unable to act against unscrupulous debt collectors who harass consumers from another State.

One of the most frequent fallacies concerning debt collection legislation is the contention that the primary beneficiaries are "deadbeats." In fact, however, there is universal agreement among scholars, law enforcement officials, and even debt collectors that the number of persons who willfully refuse to pay just debts is miniscule. Prof. David Caplovitz, the foremost authority on debtors in default, testified that after years of research he has found that only 4 percent of all defaulting debtors fit the description of "deadbeat." This conclusion is supported by the National Commission on Consumer Finance which found that creditors list the willful refusal to pay as an extremely infrequent reason for default.

The Commission's findings are echoed in all major studies: the vast majority of consumers who obtain credit fully intend to repay their debts. When default occurs, it is nearly always due to an unforeseen event such as unemployment, overextension, serious illness, or marital difficulties or divorce.

The committee believes that the serious and widespread abuses in this area and the inadequacy of existing State and Federal laws make this legislation necessary and appropriate.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SILETZ INDIAN TRIBE RESTORATION ACT

Th Senate proceeded to consider the bill (S. 1560) to restore the Confederated Tribes of Siletz Indians of Oregon as a federally recognized soverign Indian tribe, to restore to the Confederated Tribes of Siletz Indians of Oregon and its members those Federal services and benefits furnished to federally recognized American Indian tribes and their members, and for other purposes, which had been reported from the Committee on Indian Affairs with amendments as follows:

On page 2, beginning with line 14, strike through and including line 20, and insert "the tribe, and the provisions of the Act of June 18, 1934 (48 Stat. 984), as amended,";

On page 3, line 10, strike "order" and insert "Order";

On page 3, line 13, strike "(25 U.S.C. 691 708)" and insert "(68 Stat. 724)";

On page 4, line 3, following "roll" insert a comma and "in accordance with the terms of this Act and the tribal constitution and bylaws adopted pursuant to this Act";

On page 4, beginning with line 14, insert:

(C) he is not an enrolled member of any other tribe; or

On page 4, line 16, strike "(C)" and insert "(D)";

On page 4, line 22, following "bylaws" insert "and of this Act";

On page 6, line 1, strike "fifteen" and insert "forty-five";

On page 6, line 5, strike "thirty" and insert "sixty";

On page 6, line 22, strike "thirty' 'and insert "sixty";

On page 8, line 23, strike "this";

On page 9, beginning with line 23, strike "in each House shall give such proposed legislation priority on their calendars" and insert "of the Senate and House of Representatives";

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Siletz Indian Tribe Restoration Act".

SEC. 2. For the purposes of this Act—

(1) the term "tribe" means the Confederated Tribes of the Siletz Indians of Oregon;

(2) the term "Secretary" means the Secretary of the Interior or his authorized representative;

(3) the term "interim council" means the council elected pursuant to section 5;

(4) the term "member", when used with respect to the tribe, means a person enrolled on the membership roll of the tribe, as provided in section 4 of this Act;

(5) the term "final membership roll" means the final membership roll of the tribe published on July 20, 1956, on pages 5454—5462 of volume 21 of the Federal Register.

SEC. 3. (a) Federal recognition is hereby extended to the tribe, and the provisions of the Act of June 18, 1934 (48 Stat. 984), as amended, except as inconsistent with specific provisions of this Act, are made applicable to the tribe and the members of the tribe. The tribe and the members of the tribe shall be eligible for all Federal services and benefits furnished to federally recognized Indian tribes. Notwithstanding any provision to the contrary in any law establishing such services or benefits, eligibility of the tribe and its members for such Federal services and benefits shall become effective upon enactment of this Act without regard to the existence of a reservation for the tribe or the residence of members of the tribe on a reservation.

(b) All rights and privileges of the tribe and of members of the tribe (other than hunting, fishing, and trapping rights) under any Federal treaty, Executive Order, agreement, or statute, or under any other authority, which have been diminished or lost under the Act of August 13, 1954 (68 Stat. 724), are hereby restored and such Act shall be inapplicable to the tribe and its members after the date of enactment of this Act.

(c) This Act shall not grant or restore any hunting, fishing, or trapping right of any nature, including any direct or procedural right or advantage, to the tribe or any member of the tribe.

(d) Except as specifically provided in this Act, nothing in this Act shall alter any contractual right or obligation, or any obligation for taxes already levied.

SEC. 4. (a) The final membership roll is declared open. The Secretary, the Interim Council, and tribal officials under the tribal constitution and bylaws shall take such measures as will insure the continuing accuracy of the membership roll, in accordance with the terms of this Act and the tribal constitution and bylaws adopted pursuant to this Act.

(b) (1) Until after the initial election of tribal officers under the tribal constitution and bylaws, a person shall be a member of the tribe and his name shall be placed on the membership roll if he is living and if—

(A) his name is listed on the final membership roll;

(B) he was entitled on August 13, 1954, to be on the final membership roll but his name was not listed on that roll; or

(C) he is not an enrolled member of any other tribe; or

(D) he is a descendant of a person specified in subparagraph (A) or (B) and possesses at least one-fourth degree of blood of members of the tribe or their Siletz Indian ancestors.

(2) After the initial election of tribal officials under the tribal constitution and bylaws, the provisions of the tribal constitution and bylaws and of this Act shall govern membership in the tribe.

(c) (1) Before election of the Interim Council, verification of descendancy, age, and blood shall be made upon oath before the Secretary and his determination thereon shall be final.

(2) After election of the Interim Council and before the initial election of the tribal officials, verification of descendancy, age, and blood shall be made upon oath before the Interim Council, or its authorized representative. A member of the tribe, with respect to the inclusion of any name, and any person, with respect to the exclusion of his name, may appeal to the Secretary, who shall make a final determination of each such appeal within ninety days after an appeal has been filed with him. The determination of the Secretary with respect to an appeal under this paragraph shall be final.

(3) After the initial election of tribal officials, the provisions of the tribal constitution and bylaws shall govern the verification of any requirements for membership in the tribe, and the Secretary and the Interim Council shall deliver their records and files, and any other material relating to enrollment matters, to the tribal governing body.

(d) For purposes of sections 5 and 6, a member who is eighteen years of age or older is entitled and eligible to be given notice of, attend, participate in, and vote at, general council meetings and to nominate candidates for, to run for any office in, and to vote in, elections of members to the Interim Council and to other tribal councils.

SEC. 5. (a) Within forty-five days after the date of the enactment of this Act, the Secretary shall announce the date of a general council meeting of the tribe to nominate candidates for election to the Interim Council. Such general council meeting shall be held within sixty days after the date of the enactment of this Act. Within forty-five days after such general council meeting the Secretary shall hold an election by secret ballot, absentee balloting to be permitted, to elect nine members of the tribe to the Interim Council from among the nominees submitted to him from such general council meeting. The Secretary shall assure that notice of the time, place, and purpose of such meeting and election shall be provided to members described in section 4(d) at least fifteen days before such general meeting and election. The ballot shall provide for write-in votes. The Secretary shall approve the Interim Council elected pursuant to this section if he is satisfied that the requirements of this section relating to the nominating and election process have been met. If he is not so satisfied, he shall hold another election under this section, with the general council meeting to nominate candidates for election to the Interim Council to be held within sixty days after such election.

(b) The Interim Council shall represent the tribe and its members in the implementation of this Act and shall be the acting tribal governing body until tribal officials are elected pursuant to section 6(c) and shall have no powers other than those given to it in accordance with this Act. The Interim Council shall have full authority and capacity to receive grants from and to make contracts with the Secretary and the Secretary of Health, Education, and Welfare with respect to Federal services and benefits for the tribe and its members and to bind the tribal governing body as the successor in interest to the Interim Council for a period extending not more than six months after the date on which the tribunal governing body takes office. Except as provided in the preceding sentence, the Interim Council shall have no power or authority after the time when the duly elected tribal governing body takes office.

(c) Within thirty days after receiving notice of a vacancy on the Interim Council, the Interim Council shall hold a general council meeting for the purpose of electing a person to fill such vacancy. The Interim Council shall provide notice of the time, place, and purpose of such meeting and election to members described in section 4(d) at least ten days before such general meeting and election. The person nominated to fill such vacancy at the general council meeting who received the highest number of votes in the election shall fill such vacancy.

SEC. 6. (a) Upon the written request of the Interim Council, the Secretary shall conduct an election by secret ballot, pursuant to the provisions of section 16 of the Act of June 18, 1934 (48 Stat. 987), for the purpose of adopting a constitution and bylaws for the tribes. The election shall be held within sixty days after the Secretary has—

(1) reviewed and updated the final membership roll for accuracy, in accordance with sections 4(a), 4(b)(1), and 4(c)(1),

(2) made a final determination of all appeals filed under section 4(c)(2), and

(3) published in the Federal Register a certification copy of the membership all of the tribe.

(b) The Interim Council shall draft and distribute to each member described in section 4(d), no later than thirty days before the election under subsection (a), a copy of the proposed constitution and bylaws of the tribe, as drafted by the Interim Council, along with a brief, impartial description of the proposed constitution and bylaws. The members of the Interim Council may freely consult with members of the tribe concerning the text and description of the constitution and bylaws, except that such consultation may not be carried on within fifty feet of the polling places on the date of the election.

(c) In any election held pursuant to subsection (a), the vote of a majority of those actually voting shall be necessary and sufficient for the adoption of a tribal constitution and bylaws.

(d) Not later than one hundred and twenty days after the tribe adopts a constitution and bylaws, the Interim Council shall conduct an election by secret ballot for the purpose of electing the individuals who will serve as tribal officials as provided in the tribal constitution and bylaws. For the purpose of this election and notwithstanding any provision in the tribal constitution and bylaws to the contrary, absentee balloting shall be permitted.

SEC. 7. (a) This Act shall not be construed as establishing a reservation for the tribe, but any reservation for the tribe shall be established by an Act of Congress enacted after the enactment of this Act.

(b) The Secretary shall negotiate with the tribe, or with representatives of the tribe chosen by the tribe, concerning the establishment of a reservation for the tribe, and the Secretary shall, in accordance with subsections (c) and (d), develop a plan for the establishment of a reservation for the tribe and shall submit such plan, in the form of proposed legislation, to the Congress within two years after the date of enactment of this Act.

(c) To assure that legitimate State and local interests are not prejudiced by the creation of a reservation for the tribe, the Secretary, in developing a plan under subsection (b) for the establishment of a reservation, shall notify and consult with all appropriate officials of the State of Oregon, all appropriate local governmental officials in the State of Oregon and any other interested parties. Such consultation shall include the following subjects:

(1) the size and location of the reservation;

(2) the effect the establishment of the reservation would have on State and local tax revenues;

(3) the criminal and civil jurisdiction of the State of Oregon with respect to the reservation and persons on the reservation;

(4) hunting, fishing, and trapping rights of the tribe and members of the tribe, on the reservation;

(5) the provision of State and local services to the reservation and to the tribe and members of the tribe on the reservation; and

(6) the provision of Federal services to the reservation and to the tribe and members of the tribe and the provision of services by the tribe to members of the tribe.

(d) Any plan developed under this section for the establishment of a reservation for the tribe shall provide that—

(1) any real property transferred by the tribe or members of the tribe to the Secretary shall be taken in the name of the United States in trust for the benefit of the tribe and shall be the reservation for the tribe;

(2) the establishment of such a reservation will not grant or restore to the tribe or any member of the tribe any hunting, fishing, or trapping right of any nature, including any indirect or procedural right or advantage, on such reservation;

(3) the Secretary shall not accept any real property in trust for the benefit of the tribe or its members unless such real property is located within Lincoln County, State of Oregon;

(4) any real property taken in trust by the Secretary for the benefit of the tribe or its members shall be subject to all rights existing at the time such property is taken in trust, including liens, outstanding Federal, State, and local taxes, mortgages, outstanding indebtedness of any kind, easements, and all other obligations, and shall be subject to foreclosure and sale in accordance with the laws of the State of Oregon;

(5) the transfer of any real property to the Secretary in trust for the benefit of the tribe or its members shall be exempt from all Federal, State, and local taxation, and all such real property shall, as of the date of such transfer, be exempt from Federal, State, and local taxation; and

(6) the State of Oregon shall have civil and criminal jurisdiction with respect to the reservation and persons on the reservation in accordance with section 1360 of title 28, United States Code, and section 1162 of title 18, United States Code.

(e) The Secretary shall append to the plan a detailed statement describing the manner in which the notification and consultation prescribed by subsection (c) was carried out and shall include any written comments with respect to the establishment of a reservation for the tribe submitted to the Secretary by State and local officials and other interested parties in the course of such consultation.

SEC. 8. The Secretary may make such rules and regulations as are necessary to carry out the purposes of this Act.

THE SILETZ INDIAN RESTORATION ACT

Mr. HATFIELD. Mr. President, the Confederated Tribes of the Siletz Indians in Oregon were one of many tribes and bands of Northwest Indians to be terminated and abruptly cut off from Federal supervision by the Act of August 13, 1954. After 100 years of Federal supervision, following a forced march that uprooted the Siletz from their ancestral lands, the tribe was cut off from all Federal services and benefits, and summarily told by a capricious Government that they were to give up their cultural identity and be absorbed into the dominant white society.

At the time of termination, the once magnificent Siletz Reservation of some 1.4 million acres had dwindled to only 7,900 acres. In only a few years that, too, was gone, as the Siletz were unable to attain the measure of economic prosperity and stability required to keep their land. The tribe dispersed, officially shorn of its "Indianness."

The ostensible purpose of termination, that being to end what had come to be seen as a paternalistic relationship in which the self-determination and prosperity of Native Americans was stulified by an unresponsive bureaucracy, was meritorious, and indeed some tribes welcomed it. But others had it imposed upon them by a unilateral action of the Federal Government, destroying the historic trust relationship established by 200 years of treaties, statutes, and other agreements.

The impact of termination upon the Siletz Indians was severe, as it has been with other tribes. Instead of being assimilated into the dominant white society, the Siletz have suffered as outcasts, and have not been able to attain the economic position on which acceptance into the dominant culture depends. Statistics compiled in a 1975 survey of the social and econcmic status of the tribe bear grim witness to their plight: 44 percent unemplovment; an average family income of $3,333; a 44 percent dropout rate in high school; high incidences of disease, alcoholism, and early death.

Mr. President, I am convinced that this situation exists as a direct result of the misguided policy of termination. I believe it can be corrected if we restore Federal recognition to the Siletz, thereby making them eligible for health, education, and welfare benefits and services provided to American Indians by the Federal Government. In so doing, we should not attempt to restore the paternalistic relationship which termination sought to end. Rather, we need to maintain a philosophy of self-determination in the context of the trust relationship.

It is for these reasons that I urge adoption of S. 1560, the Siletz Indian Restoration Act.

Because of the concern expressed by many Oregon citizens about certain aspects of this legislation, I would like to briefly discuss two matters: hunting and fishing rights and the establishment of a reservation.

As was made clear repeatedly in last year's hearings on similar legislation, and again in hearings this year in both the Senate and the House of Representatives, this bill does not grant or restore any hunting or fishing rights, and says so explicitly in section 3(c): "This Act shall not grant or restore any hunting, fishing, or trapping right of any nature, including any indirect or procedural right or advantage, to the tribe or any member of the tribe."

As many of my colleagues are aware, Indian fishing rights are a matter of great controversy in the Pacific Northwest. Officials of the Oregon Department of Fish and Wildlife have been very concerned that this legislation might somehow result in the Siletz attaining superior hunting and fishing rights, free from State regulation, by virtue of their restoration to Federal recognition. But the language of this bill makes it clear that restoration of recognition will not restore any hunting or fishing rights. If those rights exist, by virtue of the unratified 1855 treaty with the Siletz, they do so despite termination and independent of this legislation. This bill does not create them, grant them, or restore them if they were lost in termination. Indeed, the tribe itself is so sure of this that it promised in testimony before the House Subcommittee on Public Lands and Indian Affairs that if any member went to court seeking superior hunting or fishing rights on the basis of this bill, it would file a brief against that effort.

On the second matter, that of the establishment of a reservation, I want to emphasize that this bill, unlike my similar legislation of last year, does not establish a reservation. Rather, it directs the Secretary of the Interior to enter negotiations with the tribe, State and local officials, and all interested parties, as to the establishment of a reservation. He is specifically directed to discuss the size and location of the reservation, its impact on tax revenues, civil and criminal jurisdiction on the reservation, the provision of State and local services, and the provision of Federal services.

Once the Secretary has completed his discussions, he is directed to submit a reservation plan, in the form of proposed legislation, to the appropriate committees of each House. This process, from initiation of discussion to submission of the plan, must be completed within 2 years of the enactment of the act.

The Committees which receive the plan are requested to give it priority on their calendars. Of course, no reservation of any sort will be created without a separate act of Congress, and there is certainly no requirement that the Committees abide by the Secretary's plan.

I want to emphasize, Mr. President, that if a reservation is established for the Siletz, that establishment will not grant or restore any hunting or fishing

rights, and again, the bill says so explicitly in section 7(d)(2): "the establishment of such a reservation shall not grant or restore to the tribe or any member of the tribe any hunting, fishing, or trapping right of any nature, including any indirect or procedural right or advantage, on such reservation."

Mr. President, I believe anyone with the ability to understand the English language should see that S. 1560 is absolutely neutral on hunting and fishing rights.

This bill has been before Congress now for a year and a half. It has been the subject of extensive debate and two Senate hearings. It is sorely needed, and I urge its adoption by the Senate.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the amendments be considered and agreed to en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments were agreed to en bloc.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-386), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

EXCERPT

PURPOSE

The purpose of this act is to restore Federal recognition, services and assistance to the Confederated Tribes of Siletz Indians of Oregon and to the tribal members. This legislation would also provide a means by which an interim tribal government can be elected as well as initiate discussions between the Secretary of the Interior and all interested local parties concerning whether a reservation should be created for the Confederated Tribes of the Siletz Indians by a separate act of Congress.

BACKGROUND

The Confederated Tribes of Siletz Indians were among the Western Oregon Tribes who were terminated pursuant to the act of August 13, 1954 (69 Stat. 724; 25 U.S.C. §§ 691-708). The BIA's termination roll published in the Federal Register in 1956 showed 929 tribal members, with another 500 roll applications in controversy. One-hundred and thirty people on the final roll are now deceased and more than 300 have moved out of Lincoln County, where the greatest number of tribal members resided at the time of termination. Most of those leaving Lincoln County now live in Willamette Valley cities (Portland, Salem, Eugene, Springfield, Albany, and the Corvallis) and castal towns. Thus, for those people for whom information is available, approximately 73 percent of the tribal members lived on or near the reservation at the time of termination. Now, approximately 27 percent of the estimated 1,750 Siletz Indians live on or near the former reservation.

Recent studies indicate that the effect of termination on the Siletz Tribe has been severe. The unemployment rate for Siletz Indians living in the former reservation area is 43.8 percent, and the median family income for a Siletz family in the area is $3,333. In 1974, 44 percent of the Siletz Indians between the ages of 17 and 25 had not finished high school, and there is a high incidence of alcoholism and other health problems, for which many members cannot afford medical care.

Restoration would make a large difference to both the individuals and the tribe as a whole in that they would be eligible for such benefits as: certain BIA programs such as Johnson-O'Malley Act funds for elementary and secondary school children in the Siletz schools; and BIA scholarship for post-secondary education for tribal youths. Tribal members could receive health benefits through HEW's Indian Health Service. The tribe would also be able to administer some BIA prgrams, which would provide jobs for tribal members, and the tribe would be eligible for certain BIA loan funds.

The Interior Department estimates the BIA program costs under the bill would be approximately $300,000 in the first year after enactment. Appropriations for these programs are authorized under existing law.

LEGISLATIVE HISTORY

Legislation to restore the Confederated Tribes of the Siletz Indians to the status of a federally recognized tribe was first introduced in the 94th Congress by Senator Hatfield with the consponsorship of Senators Bartlett, Abourezk, and Packwood. That bill, S. 2801, was the subject of 2 days of hearings before the Senate Subcommittee on Indian Affairs on March 30 and 31, 1976.

Aside from assessing the need to restore Federal recognition in order to make Federal services and benefits available to the tribe and its members, the hearing focused on the issue of hunting and fishing rights. The Oregon Assistant Attorney General argued that the bill would establish a basis for granting superior hunting and fishing rights, beyond the regulatory powers of the State, to members of the Siletz Tribe. The Assistant Attorney General recommended the addition to the bill of the so-called "McKean amendment," which would give the State clear authority to regulate hunting and fishing by the Tribe on the same basis as non-Indians.

At the hearing on S. 2801, the then Associate Solicitor for Indian Affairs, Reid Chambers, was asked what effect the State's proposed amendment would have on both the Siletz hunting and fishing rights and the obligations and liabilities of the U.S. Government. It was Mr. Chamber's opinion that the passage of a bill which abrogated any existing hunting, fishing, or trapping rights would cer'ainly expose the Federal Government to liability for taking property without due process. Mr. Chambers further pointed out that it had not yet been determined whether the Siletz had reserved to them by their unratified treaty of 1855 superior hunting and fishing rights which might be restored or denied.

Legislation similar to S. 2801 was introduced in the House of Representatives in the 94th Congress by Representative Les AuCoin, but no hearings were held on the House bill.

S. 1560 was introduced on May 18 by Senators Hatfield and Packwood and a hearing was held on July 13. Unlike last year's bill, S. 1560 does not create a reservation. Rather, it directs the Secretary of the Interior to negotiate with the tribe and local interests concerning the establishment of a reservation, and requires him to submit a plan for the establishment of a reservation to the Congress within 20 years after enactment of the bill.

Both S. 2801 and the present bill, S. 1560, are neutral on the issue of hunting and fishing rights, neither extinguishing any rights the tribal members may have nor conferring any new rights. However, at the hearing, the Fish and Wildlife Department for the State of Oregon proposed substitute legislation which would make the Siletz Indians eligible for all Federal Indian health, education, and welfare benefits but not restore them to Federal recognition. This proposal would give the State the authority to regulate Siletz Indian hunting and fishing as it does all other user groups (this is the same as the aforementioned "McKean amendment").

House hearings on identical legislation introduced by Representative Les AuCoin were held on July 14. The Subcommittee on Indian Affairs and Public Lands held a mark-up session on July 28.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SEVERANCE PAY FOR CERTAIN COMMITTEE STAFF MEMBERS

The resolution (S. Res. 239) to provide severance pay for certain committee staff members who are displaced as a result of the reorganization of Senate committee staffs caused by the committee system reorganization amendments of 1977, was considered and agreed to, as follows:

Resolved, That for purposes of this resolution—

(1) the terms "eligible staff member", new committee", and "transition period" have the meanings given to them by section 701 of S. Res. 4, Ninety-fifth Congress, agreed to February 4 (legislative day, February 1), 1977; and

(2) the term "displaced staff member" means an eligible staff member whose service as an employee of the Senate is terminated solely and directly as a result of the reorganization of the staff of a new committee caused by such S. Res. 4, and who is certified as a displaced staff member by the chairman (and, with respect to a minority employee, by the ranking minority member) of such new committee.

SEC. 2. The chairman (and, with respect to a minority employee, the ranking minority member) of each new committee shall certify to the Committee on Rules and Administration the name of each displaced staff member of such committee within ten days after the day on which this resolution is agreed to (or, in the case of a displaced staff member whose service terminates after such day, within ten days after the termination of his service).

SEC. 3. (a) Subject to the provisions of this section and sections 4 and 5, each displaced staff member shall be entitled, upon application to the Committee on Rules and Administration, to receive a gross amount of severance pay (based on a thirty-day month) equal to seven days' pay for each year of service as an employee of the Senate (and a ratable portion in the case of service for part of a year). Such application shall be made not later than the thirtieth day after the day on which this resolution is agreed to (or, in the case of a displaced staff member whose service terminates after such day, not later than the thirtieth day after the termination of his service).

(b) The maximum number of days' pay which may be taken into account in computing the gross amount of severance pay to which a displaced staff member is entitled under subsection (a) shall be ninety days' pay.

(c) For purposes of subsection (a)—

(1) in prorating severance pay for part of a year, any service insufficient to calculate severance pay for a full day shall be disregarded; and

(2) active military service shall be treated

as service as an employee of the Senate if such active military service was immediately preceded and followed (except for periods of thirty days or less) by service as an employee of the Senate.

(d) Severance pay of a displaced staff member (1) shall be computed on the basis of the per annum rate of compensation of such displaced staff member on the date of termination of his service, (2) shall commence on the day after the termination of the transition period, and (3) shall be paid on a monthly basis from the contingent fund of the Senate, upon vouchers approved by the chairman of the Committee on Rules and Administration, until such displaced staff member has been paid the gross amount to which he is entitled under this resolution.

SEC. 4. (a) A displaced staff member shall not be entitled to severance pay under section 3 unless he has served continuously (except for any period of four days or less) as an employee of the Senate for one year immediately preceding the termination of his service.

(b) A displaced staff member shall not be entitled to severance pay under section 3 if, at the time of the termination of his service, he—

(1) is receiving an annuity under subchapter III of chapter 83 of title 5, United States Code, or is entitled to receive an immediate annuity under such subchapter; or

(2) is receiving retirement or retired pay or an annuity under any other retirement law or retirement system for employees of the United States or the District of Columbia or members of the uniformed services (other than retired pay for nonregular service under chapter 67 of title 10, United States Code), or is entitled to receive such pay or an immediate annuity under such law or system.

(c) A displaced staff member shall not be paid severance pay under section 3 for any day during the period of his entitlement to severance pay on which he—

(1) is an employee of the United States or the government of the District of Columbia; or

(2) is entitled to receive a deferred annuity under subchapter III of chapter 83 of title 5, United States Code, or under any retirement law or system referred to in subsection (b)(2),

and each such day shall be subtracted from the number of days for which such displaced staff member is entitled to severance pay under section 3.

(d) A displaced staff member shall be entitled to severance pay under section 3 only if the Committee on Rules and Administration is satisfied that the displaced staff member has made reasonable efforts to obtain employment comparable to his employment as a member of a committee staff, but has been unable to do so.

SEC. 5. (a) To receive severance pay for any month (or portion thereof), a displaced staff member shall submit to the Secretary of the Senate, as soon as possible after the close of such month, a notarized statement setting forth—

(1) whether or not he was employed or self-employed during such month (or portion) or received unemployment compensation for such month (or portion); and

(2) the amount of compensation received or receivable for services performed as an employee during such month (or portion), the amount of net earnings received or receivable from self-employment during such month (or portion), and the amount of unemployment compensation received or receivable for such month (or portion).

(b) The amount of severance pay to which a displaced staff member is otherwise entitled for a month (or portion thereof) shall be reduced by the sum of the amounts set forth under subsection (a)(2) in the statement submitted by him for such month (or portion). If a statement for a month (or portion) is not submitted by a displaced staff member to the Secretary of the Senate within sixty days after the close of such month (or, if later, within sixty days after the date on which this resolution is agreed to) the gross amount of severance pay to which such displaced staff member is otherwise entitled under section 3 shall be reduced by the amount of severance pay which would otherwise have been paid to him for such month (or portion).

SEC. 6. In the event of the death of a displaced staff member, any unpaid severance pay to which the displaced staff member is entitled shall be paid to the widow or widower of the displaced staff member or, if no widow or widower, to the heirs at law or next of kin of such deceased displaced staff member.

SEC. 7. Severance pay paid under this resolution shall not be treated as compensation for purposes of any provision of title 5, United States Code. or of any other law relating to benefits accruing from employment by the United States, and the period of entitlement to such pay shall not be treated as a period of employment for purposes of any such provision or law.

SEC. 8. Upon the enactment of S. 1153, Ninety-fifth Congress, or similar legislation abolishing the Joint Committee on Atomic Energy and providing for disposition of the staff of such Joint Committee, the provisions of this resolution shall apply with respect to the displaced staff members of such Joint Committee. In applying this resolution for such purpose, the terms "eligible staff member", "new committee", and "transition period" have the meanings given to them by S. 1153 or such similar legislation.

SEC. 9. Upon the termination of the temporary Select Committee on Nutrition and Human Needs on December 31, 1977, pursuant to section 106(e) of S. Res. 4, Ninety-fifth Congress, each eligible staff member of such select committee who is serving as a member of its staff on such date shall be treated as a displaced staff member and the provisions of this resolution (other than section 2) shall apply with respect to such displaced staff member. In applying this resolution for such purpose, the transition period shall be treated as ending on December 31, 1977.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-387), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

EXCERPT

Senate Resolution 4, the "Committee System Reorganization Amendments of 1977," in its original form as referred to the Committee on Rules and Administration on January 4, 1977, contained language to provide severance pay for committee staff members who would be displaced from their jobs as a direct result of Senate approval of reorganization of the committee system.

Provision of severance pay in such cases had been recommended by the Temporary Select Committee to Study the Senate Committee System, and during its hearings on Senate Resolution 4 in January the Rules Committee endorsed the proposal in principle, but deferred action on it until the end of the transition period provided by Senate Resolution 4.

The committee discussed this matter in detail in hearings held on July 13 and July 27, at which the recommendations of the Temporary Select Committee and testimony by the Senate Financial Clerk, Mr. William A. Ridgely, and the Senate Legislative Counsel, Mr. Harry B. Littell, were carefully considered.

According to the figures supplied by the Senate Financial Clerk, a possible total of 28 individuals could be involved; the exact number can not be determined until certifications have been made to the Committee on Rules and Administration.

For purposes of Senate Resolution 389, various terms are defined as follows:

(1) "Eligible staff member" means an individual who was a member of the staff of an old committee, or of a subcommittee thereof, on February 10, 1977, and had served continuously (except for a period of 4 days or less) thereon since October 1, 1976;

(2) "New committee" means a standing, select, or special committee of the Senate which was in existence on February 11, 1977;

(3) "Transition period" means the period from February 11 through June 30, 1977; and

(4) "Displaced staff member" means an eligible staff member whose service as an employee of the Senate was terminated solely and directly as a result of the reorganization of the staff of a new committee caused by Senate Resolution 4, and who is certified as a displaced staff member by the chairman (and, with respect to a minority employee, by the ranking minority member) of such new committee.

The resolution provides that the chairman (and, with respect to a minority employee, the ranking member) of each new committee would have to certify to the Committee on Rules and Administration the name of each displaced staff member of such committee within 10 days after the date on which this resolution is agreed to.

Upon application by such displaced staff members to the Committee on Rules and Administration, they would be entitled to a gross amount of severance pay (based on a 30-day month) equal to a 7-day pay for each year of Senate service. Partial years of service would be prorated but any service that does not equal 1 full day would be disregarded. Military service would be included under certain circumstances. The maximum of a 90-day pay at the rate received on the date of termination would be paid on a monthly basis from the contingent fund of the Senate. Severance pay would be reduced by any compensation received or receivable for services performed as an employee during the period of entitlement.

In the event of death, any unpaid severance pay due a displaced staff member would be paid to the widow or widower or heirs at law or next of kin.

Employees of the Joint Committee on Atomic Energy and the Select Committee on Nutrition and Human Needs would be treated as displaced staff members under provisions of sections 8 and 9 of this resolution.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT OF COMMUNICATIONS ACT OF 1934

The Senate proceeded to consider the bill (S. 1866) to amend section 222 of the Communications Act of 1934 in order to include Hawaii in the same category as other States for the purposes of such section, which had been reported from the Committee on Commerce, Science, and Transportation with an amendment on page 1, beginning with line 6, insert the following:

SEC. 2. Section 222 of the Communications Act of 1934 (47 U S.C. 222), as amended, is further amended by adding at the end thereof the following new subsection:

"(g) (1) The authority of any carrier to provide any service or operate any facilities which it is authorized to provide or operate on the date of enactment of this subsection shall not be altered solely by the inclusion of Hawaii within the definition of 'Continental United States', nor shall such inclusion restrict or impair any carrier's eligibility after the date of enactment of this subsection for new or additional authority.

"(2) Whenever, upon a complaint or upon its own initiative, and after opportunity for a hearing, the Commission finds that any charge, classification, regulation, or practice relating to intercarrier arrangements of any carrier serving Hawaii is or will be unjust, unreasonable, discriminatory, or not in the public interest, the Commission shall determine and prescribe what charge, classification, regulation, or practice, or such other remedy as is or will be just, reasonable, nondiscriminatory and in the public interest to be thereafter followed.".

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 222(a) (10) of the Communications Act of 1934 (47 U.S.C. 222(a) (10) is amended by striking out ", except Hawaii".

SEC. 2. Section 222 of the Communications Act of 1934 (47 U.S.C. 222), as amended, is further amended by adding at the end thereof the following new subsection:

"(g) (1) The authority of any carrier to provide any service or operate any facilities which it is authorized to provide or operate on the date of enactment of this subsection shall not be altered solely by the inclusion of Hawaii within the definition of 'Continental United States', nor shall such inclusion restrict or impair any carrier's eligibility after the date of enactment of this subsection for new or additional authority.

"(2) Whenever, upon a complaint or upon its own initiative, and after opportunity for a hearing, the Commission finds that any charge, classification, regulation, or practice relating to intercarrier arrangements of any carrier serving Hawaii is or will be unjust, unreasonable, discriminatory, or not in the public interest, the Commission shall determine and prescribe what charge, classification, regulation, or practice, or such other remedy as is or will be just, reasonable nondiscriminatory and in the public interest to be thereafter followed.".

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-389), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

EXCERPT

Section 222 was enacted in 1943, in the light of special circumstances then prevailing and 16 years before Hawaii was admitted to the Union. It is now 18 years since Hawaii became a State. Experience in these years has shown that the designation of Hawaii as an international point for the purposes of section 222 has frustrated the efforts of the Federal Communications Commission and private industry to afford Hawaii similar treatment as her sister States. This disparity has resulted generally in higher rates for interstate communications to and from Hawaii, and in fewer services and facilities. Exclusion of Hawaii from the definition of "Continental United States" restricts the classes of carriers which are allowed to provide services to Hawaii. S. 1866 seeks to make available to Hawaii the same modern telecommunications facilities, services and rate-making principles which are now or will be enjoyed throughout the Continental United States. The amendment will accomplish this by including Hawaii within the definition of "Continental United States," thereby removing artificial constraints on the availability of telecommunications offerings, the entry of new carriers into the Hawaiian market and service integration into the mainland structure.

BRIEF DESCRIPTION

S. 1866 is intended to remove the anomalous designation of the State of Hawaii as an international point under section 222 of the Communications Act of 1934. The bill would amend section 222(a) (10) by including Hawaii within the definition of "Continental United States." The bill would remove the applicability of the international/domestic dichotomy to the Hawaiian market and would foster competition among all carriers serving that market. The bill would further amend section 222 by adding a new subsection, which would provide that carriers currently serving the Hawaiian market may continue to do so. Additionally, the bill would provide for the entry of additional carriers and the offering of new or additional services to the Hawaiian market, subject to the approval of the Federal Communications Commission.

BACKGROUND AND NEED

Enactment of section 222

Prior to World War II, the two major companies providing domestic telegraph services on the U.S. mainland were the Western Union Telegraph Company and the Postal Telegraph and Cable Corporation. By 1943, both domestic telegraph companies were in serious financial trouble. Telephone services were making significant inroads into the telegraph market, leaving both telegraph companies with excessive and duplicative facilities. To solve this problem, Congress enacted section 222 of the Communications Act which created a statutory antitrust exemption to allow Western Union and Postal to merge. Congress was concerned, however, that the merged entity might utilize its newfound monopoly position in domestic telegraph service to favor its own international operation at the expense of its international record service competitors. To remove this danger, the merger legislation incorporated four additional provisions.

1. Western Union was required to divest itself of its international operations.

2. Domestic and international areas of service were defined and international record carriers (IRCs) could receive messages destined for international delivery and hand over incoming messages destined for the hinterlands for delivery by Western Union.

3. Congress included a provision in section 222 requiring that Western Union distribute unrouted international telegraph among the overseas carriers according to "a just, reasonable and equitable formula".

4. In order to compensate Western Union for the use of its facilities for the delivery of international messages, section 222 provides that the parties negotiate a proper division of revenues. If an agreement cannot be negotiated, the Commission is authorized to prescribe the division of revenues.

Hawaii designated as an international point

Congress drew the international/domestic dichotomy of section 222 largely on historical and geographic bases. Hawaii was not included in the definition of the domestic service area in 1943, and thus became an international location with respect to communication services. That designation was continued by congressional enactment of section 36 of the Hawaii Omnibus Act (Public Law 86-624, approved July 12, 1960) which added the phrase "except Hawaii" to section 222(a) (10). The legislative history indicates that the designation of Hawaii as an international point indicated that further study of the status of Hawaii was necessary:

. . . to preserve, at least for the immediate future, Hawaii's exclusion from the definition (of the United States). As will appear below further consideration by the Federal Communications Commission may at a later date indicate that other or different amendments are desirable.

Hawaii has historically been regarded as outside the United States for the purposes of the transmission of telegraph messages. . . . This exclusion was apparently based on geographical considerations, rather than on political status. . . .

The amendment to section 222 is necessary now to maintain the status quo. . . . It may later develop, however, that different amendments may prove more suitable. The Federal Communications Commission has instituted an inquiry. . . . the purpose of which is to enable the Commission to receive from interested parties their views as to what changes in the Communications Act, if any, the Commission should recommend to Congress. Before making a determination as to what changes it recommends, other than the foregoing which would merely preserve current arrangements, the Federal Communications Commission will require more time to complete its inquiry.

The Commission did not recommend a change. In its 1960 decisions, *Telegraph Service With Hawaii,* 28 F.C.C. 599 and 29 F.C.C. 714, the Commission found that a change in status at that time promised no benefits for Hawaii.

Whatever validity the exclusion of Hawaii from domestic services may have had in the past, it would seem to have been lessened by the revolutionary changes which have taken place in communications technology and concurrent development of entirely new service concepts.

Domestic satellites are insensitive to distance or terrain crossed. They can be used to provide service between the contiguous States and Hawaii at far less additional cost than was the case when only submarine cable technology was available. There now are numerous services and potential rate advantages that are likely to accrue to Hawaii by a change in status.

Current industry structure

(a) *Domestic carrier.*—Today, Western Union retains its monopoly position in providing domestic telegraph service to the continental United States. In domestic record services, other than telegraph, Western Union faces competition from A.T. & T., specialized, resale, and satellite carriers who now offer a wide range of services capable of satisfying diverse customer requirements.

(b) *International record carriers.*—There are four major international record carriers: ITT, RCA, WUI and TRT. Three of these, RCA, ITT and WUI, serve Hawaii and, in combination, have direct circuits to virtually every major communications center throughout the world. TRT has recently been authorized to expand its service area. The Liberia, a subsidiary of Firestone Rubber, serve limited areas in Europe and Africa.

(c) *Other international carriers.*—The American Telephone and Telegraph Company (A.T. & T.) provides all message telephone service and all voice-only private line services from the United States mainland to international points. The Hawaiian Telephone Company (HTC) provides international and interstate, as well as intrastate, services for Hawaii. As A.T. & T's correspondent, it provides all those services A.T. & T. is authorized to provide between Hawaii and

the mainland. The Communications Satellite Corporation (Comsat), a carrier's carrier, leases satellite circuits to end service carriers

Technology and services

The sophistication of today's international record market results in large measure from the development of high quality transmission facilities. High capacity voice-grade submarine cables and satellite facilities have virtually replaced telegraph cables and HF radio for media used for overseas transmissions in 1943, and are today the backbone of the international record industry. The global satellite communications network, independently, makes possible new and innovative record and voice services as well as international television relay, and reaches global points which cables cannot serve

Voice-grade circuits in both cables and satellites are capable of transmitting alternate and simultaneous voice/data, facsimile and high-speed data and may be subdivided for telegraph and telex transmission. Although public message telegraph service was the first and for many years the predominant international record service, by 1974, telegraph revenues represented only about 13 percent of total international record service revenues with telex and leased lines accounting for 55 and 25 percent of the industry's revenues, respectively. Telex is a teletypewriter exchange system directly linking a customer's office with any other party on a carrier's telex network. A leased channel, on the other hand, is a circuit dedicated to a single customer or customer group. Leased channel services may include teleprinter, data, facsimile, alternate voice/data transmission.

Impact of section 222 upon Hawaiian communications

Disagreement as to the scope of section 222 has contributed greatly to the delay in securing new services, better rates, and new facilities for Hawaiian points. For example, because of section 222's designation as Hawaii as an international point, the Commission could not authorize provision of Western Union's MAILGRAM service. Additionally, integration of Hawaii into the domestic rate and service structure has been a long, difficult process due, at least in part, to section 222 complications.

The major class of service offerings not now available to Hawaii are those being offered on the mainland for the first time by new carriers in the competitive market. For example, Graphnet, Telenet, Tymnet, Southern Pacific and MCI are offering numerous specialized domestic services. These services consist of switching and private line services designed to meet the growing communications needs of mainland customers. AT&T has introduced Dataphone Digital Service—a private line service offering two-way transmission of digital signals at various synchronous speeds—also not available to Hawaii. Finally, as a result of the Federal Communications Commission decision prohibiting restrictions on the resale and shared use of most carrier offerings, additional services will soon be offered on the mainland. The resale and shared use decision does not apply to Hawaii, since Hawaii is classified as an international point. Many record services now offered by Western Union on the mainland are not currently offered to Hawaii through the IRCs. Included in this group of services are Braille Gram, Data Gram, Data Comm, Infomaster (stored and forward message switching), and miscellaneous new ticker services. While it is not possible to identify which of these services and carriers, and any future services or carriers, may be competitively viable in the Hawaiian market, artificial statutory constraints should not hamper their availability.

A hearing was held on S. 1162, a bill to repeal section 222, in Hawaii on April 15, 1977. Although S. 1162 is broader in scope than S. 1866, the field hearing was narrowly focused on the effect of section 222 on Hawaiian telecommunications. A subsequent hearing on S. 1866 was held in Washington, D.C., on July 21, 1977. In the two days of hearings, nearly all witnesses, including representatives from the State of Hawaii, the Federal Communications Commission, the IRCs, the Office of Telecommunications Policy, and Hawaiian business and consumer groups testified in favor of extending to Hawaii telecommunications services comparable to those available in the continental United States. On August 2, 1977 the Committee on Commerce, Science and Transportation, meeting in open executive session, ordered S. 1866 reported with an amendment.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FINANCIAL INSTITUTIONS SUPERVISORY ACT AMENDMENTS OF 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed at this time, without any time being charged on the bill for the time being, to the consideration of Calendar No. 302, with the understanding that the managers of the foreign assistance appropriation bill may at any time interrupt the consideration of Calendar Order 302 for a resumption of consideration of the foreign assistance appropriation bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 71) to strengthen the supervisory authority of Federal agencies which regulate depository institutions.

The Senate proceeded to consider the bill which had been reported from the Committee on Banking, Housing, and Urban Affairs with an amendment in the nature of a substitute.

The PRESIDING OFFICER. The time is under control.

Who yields time?

Mr. ROBERT C. BYRD. Mr. President, the minority leader and I have time.

Mr. BAKER. Mr. President, I ask the majority leader to state, if he would, or might we inquire of the Chair, the nature of the unanimous-consent limitations on the consideration of this bill?

The PRESIDING OFFICER. The clerk will state the unanimous-consent agreement.

The legislative clerk read as follows:

Ordered, That when the Senate proceeds to the consideration of S. 71 (Order No. 302), a bill to strengthen the supervisory authority of Federal agencies which regulate depository institutions, and for other purposes, debate on any amendment shall be limited to 30 minutes, to be equally divided and controlled by the mover of such and the manager of the bill, and debate on any debatable motion, appeal, or point of order which is submitted or on which the Chair entertains debate shall be limited to 20 minutes, to be equally divided and controlled by the mover of such and the manager of the bill: *Provided*, That in the event the manager of the bill is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or his designee: *Provided further*, That no amendment that is not germane to the provisions of the said bill shall be received.

Ordered further, That on the question of final passage of the said bill, debate shall be limited to 1 hour, to be equally divided and controlled, respectively, by the Senator from Wisconsin (Mr. Proxmire) and the Senator from Massachusetts (Mr. Brooke): *Provided*, That the said Senators, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, debatable motion, appeal, or point of order: *Provided further*, That this agreement may be vitiated by the Senator from Massachusetts (Mr. Brooke).

Mr. BAKER. Mr. President, I thank the Chair.

I ask the majority leader, the nongermaneness provision in this consent order, is it the majority leader's view that would prevent the introduction and consideration of any amendment dealing with the confirmation of any appointment to the office of Chairman of the Federal Reserve Board?

Mr. ROBERT C. BYRD. Indubitably so.

Mr. BAKER. I thank the majority leader.

PRIVILEGE OF THE FLOOR—H.R. 7797

Mr. BAKER. Mr. President, I ask unanimous consent that Ernest Garcia and Claude Alexander of Mr. DOLE's staff be granted privilege of the floor during the remainder of the foreign assistance bill, as and when the Senate returns to its consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONSIDERATION OF S. 977, THE COAL CONVERSION BILL, AND H.R. 7797, THE FOREIGN ASSISTANCE APPROPRIATION BILL, ON SEPTEMBER 7, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that upon the return of the Senate on September 7, if the action by the Senate on the foreign assistance appropriation bill has been completed, the Senate proceed on that date following the recognition of the two leaders or their designees under the standing order to the consideration of the coal conversion bill, S. 977, and that, in the alternative, if the Senate has not completed action on the foreign assistance appropriation bill, action on that measure be resumed immediately following the recognition of the two leaders or their designees under the standing order.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, reserving the right to object, does the majority leader have in mind to ask unanimous consent for any limitations on debate on consideration of the coal conversion measure?

Did I misunderstand? I thought that the request at this time was that we proceed to the consideration of the coal conversion after we finish consideration of the foreign aid appropriations.

Mr. ROBERT C. BYRD. That is what I asked.

Mr. BAKER. Is there already an order on the coal bill?

The PRESIDING OFFICER. The chair advises that there is an order.

Mr. BAKER. I am sorry, I misunderstood. I thank the majority leader.

Mr. ROBERT C. BYRD. Mr. President, has the request been agreed to?

The PRESIDING OFFICER. If there is no objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank the chair.

FINANCIAL INSTITUTIONS SUPERVISORY ACT AMENDMENTS OF 1977

The Senate continued with the consideration of S. 71.

Mr. ROBERT C. BYRD. Mr. President, I believe that Mr. PROXMIRE and Mr. BROOKE are ready to proceed with the consideration of Calendar No. 302, which is the pending measure.

Mr. PROXMIRE obtained the floor.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. ROBERT C. BYRD. Mr. President, for the information of the distinguished manager of the bill, a unanimous consent order has been entered that at such time as the managers of the foreign assistance appropriation bill are ready to resume consideration of that measure today, they will have the privilege of interrupting the proceedings on the now pending measure and resume consideration of that measure.

Mr. PROXMIRE. I believe this measure can be disposed of in a few minutes; but if not, I will be happy to have it set aside.

Mr. ROBERT C. BYRD. I thank the distinguished Senator from Wisconsin.

FOREIGN ASSISTANCE

Mr. HELMS. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. HELMS. I ask the majority leader if he has any anticipation of what hour the foreign aid appropriation bill will be resumed?

Mr. ROBERT C. BYRD. There are consultations at the moment which may result in my having enough knowledge on the question to respond adequately. At the moment, I cannot.

Mr. BAKER. Mr. President, if the Senator will yield, I will respond to the Senator from North Carolina by saying that at this very instant, these negotiations are underway. The majority leader and I just left. The negotiations were both energetic and promising, and I expect that we will have more information on that before long.

Mr. HELMS. As the Prince of Denmark is supposed to have said, " 'Tis a consummation devoutly to be wished."

Mr. ROBERT C. BYRD. I thank the Senator. I now have something new to memorize, which I may use later.

[Laughter.]

Mr. PROXMIRE. Mr. President, on June 30 the Committee on Banking, Housing, and Urban Affairs reported to the Senate a bill (S. 71 committee report No. 95–323) to strengthen the supervisory authority of the Federal banking agencies over financial institutions.

Mr. President, S. 71 has four titles:

Title I gives the Federal financial institutions regulatory agencies strengthened supervisory authority over depositary institutions.

Title II prohibits with certain exemptions interlocking management and directors among competing financial institutions in specified geographic areas.

Title III authorizes the FDIC to regulate the establishment of foreign banking operations by institutions it regulates in addition to making general "housekeeping" changes. The foreign banking operations of national banks and state member banks are already under such supervisory authority as exercised by the Federal Reserve.

Title IV prohibits revolving door employment practices by the heads of the Federal financial regulatory agencies and raises the salary levels of the Chairman and members of the Federal Reserve, the Chairman of the FDIC and Federal Home Loan Bank Board, and the Administrator of the National Credit Union Administration.

The four titles were the subject of consolidated hearings by the Senate Banking Committee on May 24 and 25, 1977. All interested Government agencies and parties testified on the legislation. The testimony was favorable. The committee marked up the legislation on June 15, 1977, and made a number of changes in the legislation as introduced reflecting specific points made at the hearings.

Mr. President, the banking industry has recently come under tremendous strain. Banking institutions have experienced rapid growth during the past 25 years. During the past 5 years we have seen the largest failures in the history of the Nation with the collapse of the Bank of the Commonwealth, $1 billion; the Franklin National Bank, $5 billion; the Security National Bank, $1 billion; and the Hamilton National Corp., $1 billion. More recently the number of "problem banks" has shown an upward and worrisome trend. FDIC statistics, for example, reveal that the number of institutions in the problem categories increased from $25 billion in assets at the beginning of 1976 to $75 billion at the beginning of 1977. Classified loans—that is loans that present greater than normal risk of repayment—as a percentage of capital assets increased significantly during the past 5 years.

Unfortunately, the capitalization of our banking system has not kept pace with these events. Chairman Burns testified before the Senate Banking Committee that the banking system is undercapitalized. The largest financial institutions—those institutions whose assets exceed $5 billion—are particularly undercapitalized.

Last year the House and Senate Committees asked the GAO to audit the bank regulatory agencies in the light of the increasing number of problem banks to determine how well these Federal agencies were carrying out their regulatory responsibilities. The GAO found that in some cases the bank regulatory agencies did not use the powers they already had to stop unsafe or unsound practices. But the GAO specifically recommended that the regulatory agencies powers be augmented as provided in title I of S. 71 in order to enhance the abilities of the regulators to deal with problem situations.

Title I was recommended by Chairman Burns jointly on behalf of the three bank regulators as a means of preventing problem bank situations from arising and for arriving at more timely solutions once such situations did arise. The Federal Home Loan Bank Board made a strong case before the Banking Committee for the powers contained in title I citing specific cases where lack of authority had hampered their enforcement efforts.

Mr. President, the Banking Committee has done a lot of work in the past 2 years relating to the matter of regulation of the financial system and its condition. There are proposals which the committee is considering to streamline and simplify the existing structure in various ways by merging regulatory agencies or requiring closer coordination of their operations. S. 71 may not be the complete answer to correcting the deficiencies in the regulatory process but it is an extremely important step in the right direction.

By authorizing cease and desist orders to be instituted against individuals and civil money penalties for violations of such orders, enforcement action can be tailored to the needs of particular cases and the orders should be self-enforcing. S. 71 will also tighten the restrictions on insider lending which have been the principal cause of bank failures over the course of the past 15 years.

I would prefer an outright prohibition on insider loans but I recognize the difficulty of accomplishing this aim at this time. S. 71 authorizes the removal of bank officials whose conduct demonstrates a willful disregard for the safety of the institution. And S. 71 authorizes the divestiture of nonbank subsidiaries of bank holding companies in cases where they represent a threat to the safety of a subsidiary bank.

This will insure that bank holding companies are operated for the benefit of the subsidiary banks instead of being a drain on the bank. I am convinced that correctly used by the financial institutions regulatory agencies the powers contained in S. 71 will enable them to focus on and stop specific unsafe or unsound practices.

While title I of S. 71 gives the agencies the power they need to assure a safe and sound banking system, title II will provide a healthier banking climate by prohibiting interlocking management and director relationships among competing financial institutions.

Over 50 years ago Congress prohibited interlocking employment and director relationships among commercial banks and stock savings banks. These provisions have become outdated. Title II represents the recommendations for legislation by Chairman Burns of the Federal Reserve as amended by the Banking Committee after hearings.

Title II of S. 71 recognizes that all types of financial institutions compete for depositors funds: commercial banks, savings and loan associations, mutual savings banks, trust companies and so forth. Prohibiting interlocking management and director relationships among

these institutions in the areas where they compete will benefit consumers and their communities. Competition between institutions will be assured as to price and quality of depositary and lending services. Funds flow to the community will be free from artificial distortions based on conflicting relationships.

Interlocking relationships are prohibited among these institutions in standard metropolitan statistical areas (SMSAs) or in the same or adjacent city, town, or village. And, regardless of geographic area all such interlocks between an institution with $1 billion in assets are prohibited with institutions whose assets exceed $500 million. Since title II is intended to proscribe anticompetitive interlocking relationships there are exceptions—for credit unions, for example—and the Federal Reserve is authorized to grant exceptions and to prevent evasions of the law by rule.

Title III of the legislation was recommended by the FDIC as "housekeeping" legislation. There is one provision in this title which I should mention specifically because it is more than a housekeeping provision. The Federal Reserve must give its prior approval to the establishment of foreign banking operations by national banks and State member banks of the Federal Reserve. Title III would subject banks under the jurisdiction of the FDIC—that is, state nonmember banks—to such regulatory jurisdiction. This is needed because State nonmember banks have increased in size and because their overseas operations can affect the safety and soundness of their domestic operations.

Title IV of the legislation will prohibit revolving door employment practices by the heads of financial institutions regulatory agencies who take jobs with institutions they regulate before their terms of office are completed. This provision of the legislation seeks to encourage the heads of these regulatory bodies to complete their terms of office.

The salary levels of the Chairman of the Federal Reserve and the members of the Federal Reserve are elevated respectively to level I and level II. At the same time the salary levels of the Chairman of the other bank regulatory agencies—the FDIC, the FHLBB, the Comptroller and the Administrator of the NCUA are increased to level II to maintain parity with the members of the Federal Reserve. These salary increases should encourage these officials to complete their terms of office.

Title IV places no new restrictions on post-employment for individuals completing their terms of office. However, heads of the financial institutions regulatory agencies who leave their term uncompleted would be prohibited for 2 years from taking a job with a bank or bank holding company or affiliates of a bank which they regulate.

Existing law prohibits a member of the Federal Reserve, FDIC, and the Comptroller in such circumstances from taking a job with a bank regulated by the official. No such statutory restriction applies to members of the FHLBB. Title IV will cure two deficiencies in current law.

First, the existing prohibition on employment with a bank is expanded to include bank holding companies and affiliates of such banks. This merely recognizes the reality that bank holding companies are part and parcel of their subsidiary banks. Second, the statutory proscriptions applying to the Federal Reserve, the FDIC and the Comptroller are made applicable to the FHLBB. This will give the same treatment to the heads of all the financial regulatory agencies.

In increasing the salary level of the Chairman of the Federal Reserve from level II to level I the committee has recognized the important position of the Chairman of the Federal Reserve and the important functions he performs on behalf of the Congress in conducting the monetary policy of the Nation. Cabinet status for the Chairman of the Federal Reserve is a step which should be taken.

Mr. President, I commend the legislation to my colleagues for favorable consideration.

Mr. BROOKE. Mr. President, the measure we consider today is an important step toward strengthening the supervisory authority of the Federal bank regulatory agencies over financial institutions and their affiliates.

The bill was introduced at the request of the financial regulatory agencies and represents a response to the "problem bank" situations which arose over the past few years.

Our committee has added to S. 71 the provisions contained in S. 73 relating to interlocking management and directorates at financial institutions. We have also added the provisions of S. 895, a series of "housekeeping" amendments to the Federal Deposit Insurance Act, and certain provisions of S. 1433 designed to prevent conflicts of interest.

Since the chairman has explained the principal features of the bill, I shall not repeat them here. I believe that the bill as reported is a sound bill, and I urge my colleagues to support its enactment.

UP AMENDMENT NO. 741

Mr. PROXMIRE. Mr. President, the distinguished Senator from New Hampshire has an amendment which I will offer on his behalf. I send it to the desk.

The PRESIDING OFFICER. The amendment will be stated. The second assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE), on behalf of the Senator from New Hampshire (Mr. MCINTYRE) proposes an amendment numbered 741.

The amendment is as follows:

At the end of the bill add the following:

TITLE V—CREDIT UNION RESTRUCTURING

SEC. 501. Section 102 of the Federal Credit Union Act (12 U.S.C. 1752a) is amended to read as follows:

"CREATION OF ADMINISTRATION

"SEC. 102. (a) There is hereby established in the executive branch of the Government an independent agency to be known as the National Credit Union Administration. The Administration shall be under the management of a National Credit Union Administration Board.

"(b) The Board shall consist of three members, who are broadly representative of the public interest, appointed by the President, by and with the advice and consent of the Senate. In appointing the members of the Board, the President shall designate the Chairman. Not more than two members of the Board shall be members of the same political party.

"(c) The term of office of each member of the Board shall be six years, except that the terms of the two members, other than the Chairman, initially appointed shall expire one upon the expiration of two years after the date of appointment, and the other upon the expiration of four years after the date of appointment. Board members shall not be appointed to succeed themselves except the initial members appointed for less than a six-year term may be reappointed for a full six-year term and future members appointed to fill unexpired terms may be reappointed for a full six-year term. Any Board member may continue to serve as such after the expiration of said member's term until a successor has qualified.

"(d) The management of the Administration shall be vested in the Board. The Board shall adopt such rules as it sees fit for the transaction of its business and shall keep permanent and complete records and minutes of its acts and proceedings. A majority of the Board shall constitute a quorum. Not later April 1 of each calendar year, and at such other times as the Congress shall determine, the Board shall make a report to the President and to the Congress. Such a report shall summarize the operations of the Administration and set forth such information as is necessary for the Congress to review the financial program approved by the Board.

"(c) The Chairman of the Board shall be the spokesman for the Board and shall represent the Board and the National Credit Union Administration in its official relations with other branches of the Government. The Chairman shall determine each Board member's area of responsibility and shall review such assignments biennially. It shall be the Chairman's responsibility to direct the implementation of the adopted policies and regulations of the Board.

"(f) The members of the Board shall be ineligible during the time they are in office or for two years thereafter to hold any office position, or employment in any credit union or in any financial institution in which a credit union owns stock, except that this restriction shall not apply to any member who has served the full term for which he was appointed.

"(g) The financial transactions of the Administration shall be subject to audit on a calendar year basis by the General Accounting Office in accordance with the principles and procedures applicable to commercial corporate transactions and under such rules and regulations as may be prescribed by the Comptroller General of the United States. The audit shall be conducted at the place or places where the accounts of the Administration are kept.".

SEC. 502. (a) Section 101 of the Federal Credit Union Act is amended—

(1) by striking out clause (2) and inserting in lieu thereof the following:

"(2) the term 'Chairman' means the Chairman of the National Credit Union Administration Board;";

(2) by inserting "Administration" after "Union" in clause (4).

(b) The Federal Credit Union Act is amended by striking out "Administrator" each place it appears and inserting in lieu thereof "Board", and by striking out the personal pronouns "he", "him", and "his" when referring to the Administrator and inserting in lieu thereof "it", "them", and "its" as appropriate wherever such words appear therein.

(c) Section 209 of the Federal Credit Union Act (12 U.S.C. 1789) is amended—

(1) by inserting in subsection (b)(1) the language "on a calendar year basis" immediately following "prepare annually";

(2) by inserting in subsection (b)(2) the language "on a calendar year basis" immediately following "set of accounts".

(d) Section 5108 of title 5, United States Code, is amended by adding the following new paragraph:

"(h) In addition to the number of positions authorized by subsection (a), the National Credit Union Administration is authorized without regard to any other provision to this section, to place two positions in the Administration at GS–18 and a total of fourteen positions in the Administration at GS–16 or GS–17.".

(c) Section 5313 of title 5, United States Code, is amended by adding the following new paragraph:

"(28) Chairman, National Credit Union Administration Board.".

(f) Section 5314 (92) of title 5, United States Code, is amended by striking out "Administrator of the National Credit Union Administration" and inserting in lieu thereof "Members, National Credit Union Administration Board (2)".

SEC. 503. (a) The Federal Credit Union Act (12 U.S.C. 1751–1790) is further amended by striking out "Administrator" and inserting in lieu thereof "Board" in the following sections:

(1) section 103 (12 U.S.C. 1753);
(2) section 104 (12 U.S.C. 1754);
(3) section 105 (12 U.S.C. 1755);
(4) section 106 (12 U.S.C. 1756);
(5) paragraphs (5), (8), (9), (10), (13), and (14) of section 107 (12 U.S.C. 1757);
(6) section 108 (12 U.S.C. 1758);
(7) section 109 (12 U.S.C. 1759);
(8) section 111 (12 U.S.C. 1761);
(9) section 112 (12 U.S.C. 1761a);
(10) section 13 (12 U.S.C. 1761b);
(11) section 115 (12 U.S.C. 1761d);
(12) paragraph (b)(2) of section 116 (12 U.S.C. 1762);
(13) the title of section 120 (12 U.S.C. 1766);
(14) section 120(a) (12 U.S.C. 1766);
(15) section 120(b)(1) (12 U.S.C. 1766);
(16) section 120(b)(2) (12 U.S.C. 1766);
(17) section 120(b)(3) (12 U.S.C. 1766);
(18) section 120(b)(4) (12 U.S.C. 1766);
(19) section 120(b)(5) (12 U.S.C. 1766);
(20) section 120(c) (12 U.S.C. 1766);
(21) section 120(d) (12 U.S.C. 1766);
(22) section 120(e) (12 U.S.C. 1766);
(23) section 120(f)(1) (12 U.S.C. 1766);
(24) section 120(f)(2)(A) (12 U.S.C. 1766);
(25) section 120(f)(2)(B) (12 U.S.C. 1766);
(26) section 120(g) (12 U.S.C. 1766);
(27) section 120(h) (12 U.S.C. 1766);
(28) section 120(i) (12 U.S.C. 1766);
(29) section 120(i)(3) (12 U.S.C. 1766);
(30) section 121 (12 U.S.C. 1767);
(31) section 125(b)(1) (12 U.S.C. 1771);
(32) section 125(b)(2) (12 U.S.C. 1771);
(33) section 127 (12 U.S.C. 1772a); and
(34) sections 201 to 210 (12 U.S.C. 1773–1775).

(b) Such Act is further amended by striking out the personal pronouns "he", "him", and "his" when referring to the Administrator and inserting in lieu thereof "it", "they", and "its" as appropriate wherever such words appear therein.

SEC. 504. (a) Paragraph (4) of section 101 of the Federal Credit Union Act (12 U.S.C. 1752) which begins with "The terms 'member account'" is redesignated paragraph "(5)" and the succeeding paragraphs numbered (5) through (8) are redesignated as paragraphs (6) through (9), respectively.

(b) Paragraph (5) of section 101 of the Federal Credit Union Act (12 U.S.C. 1752), as redesignated by subsection (a) of this section, is amended—

(1) by striking "(when referring to the account of a member of a credit union)";

(2) by striking "share, share certificate, or share deposit" each time it appears therein and inserting "share or share certificate" in lieu thereof;

(3) by striking "those" and inserting "share or share certificate" in lieu thereof; and

(4) by striking all language after "political subdivisions thereof" and inserting "enumerated in section 207 of this Act: *Provided*, That for purposes of insured State credit unions, reference in this paragraph to 'share' or 'share certificate' accounts includes, as determined by the Board, the equivalent of such accounts under State law;" in lieu thereof.

(c) Paragraph (9) of section 101 of the Federal Credit Union Act (12 U.S.C. 1752), as redesignated by (a) of this section, is amended by—

(1) inserting ", including the trust territories," after "several territories"; and

(2) adding the following new sentence: "The term 'branch' also includes a suboffice, operated by a Federal credit union or by a credit union authorized by the Department of Defense, located on an American military installation in a foreign country or in the trust territories of the United States.".

SEC. 505. (a) Subsection (a) of section 201 of the Federal Credit Union Act (12 U.S.C. 1781) is amended by inserting ", including the trust territories," after "several territories".

(b) Paragraph (b)(7) of such section is amended by inserting "except for accounts authorized by State law for State credit unions" before the semicolon.

(c) Such section is further amended by striking all of subsection (d) and redesignating subsection (e) as (d).

SEC. 506. (a) Section 202 of the Federal Credit Union Act (12 U.S.C. 1782) is amended by striking out "his" in the fifth sentence of paragraph (a)(1) and inserting "such officer's" in lieu thereof.

(b) Subsection (h)(3) of such section is amended to read as follows:

"(3) The term 'member account' when applied to the premium charge for insurance of accounts shall not include amounts received from other federally insured credit unions in excess of the insured account limit set forth in section 207(c)(1).".

SEC. 507. Section 208 of the Federal Credit Union Act (12 U.S.C. 1788) is amended by striking out "Special Assistance to Avoid Liquidation" and inserting "Special Assistance for Federally Insured Credit Unions" in lieu thereof.

SEC. 508. Section 105 of the Federal Credit Union Act (12 U.S.C. 1755) is amended to read as follows:

"FEES

"SEC. 105. (a) In accordance with rules prescribed by the Board, each Federal credit union shall pay to the Administration an annual operating fee which may be composed of one or more charges identified as to the function or functions for which assessed.

"(b) The fee assessed under this section shall be determined according to a schedule, or schedules, or other method determined by the Board to be appropriate, which gives due consideration to the expenses of the Administration in carrying out its responsibilities under this Act and to the ability of Federal credit unions to pay the fee. The Board shall, among other things, determine the periods for which the fee shall be assessed and the date or dates for the payment of the fee or increments thereof.

"(c) If the annual operating fee is composed of separate charges, no supervision charge shall be payable by a Federal credit union, and the Board may waive payment of any or all other charges comprising the fee, with respect to the year in which its charter is issued, or in which final distribution is made in its liquidation or the charter is cancelled.

"(d) All operating fees shall be deposited with the Treasurer of the United States for the account of the Administration and may be expended by the Board to defray the expenses incurred in carrying out the provisions of this Act including the examination and supervision of Federal credit unions.".

SEC. 509. Section 106 of the Federal Credit Union Act (12 U.S.C. 1756) is amended to read as follows:

"REPORTS AND EXAMINATIONS

"SEC. 106. Federal credit unions shall be under the supervision of the Board, and shall make financial reports to it as and when it may require, but at least annually. Each Federal credit union shall be subject to examination by, and for this purpose shall make its books and records accessible to, any person designated by the Board.".

SEC. 510. The amendments made by this title take effect upon enactment, except that the functions of the Administration of the National Credit Union Administration under the provisions of the Federal Credit Union Act as in effect on the date preceding the date of enactment of this title, shall continue to be performed by him in accordance with such provisions until such time as all the members of the National Credit Union Administration Board, established under the amendments made by this title, take office. All rules, regulations, policies, and procedures of the Administrator in effect on the date of enactment of this title shall remain in effect until amended, superseded, or repealed.

On page 132, line 7, after the period insert close quotation marks and a period.

On page 132, strike out lines 8 and 9.

On page 132, strike out lines 12 through 15.

Mr. PROXMIRE. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by Senator MCINTYRE.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR MCINTYRE

The provisions of this amendment are contained in Title 2 of S. 1665, a bill which I introduced on June 9th and which, together with a number of other bills, was the subject of hearings within the Subcommittee on Financial Institutions June 20–23. As a result of these hearings I introduced, on July 15, S. 1873, a bill which incorporates a number of proposals endorsed in the hearings. S. 1873 will be considered by the Banking Committee August 2nd.

In fashioning S. 1873, the proposals contained in this amendment to restructure the National Credit Union Administration were omitted with a view to adding them to the bill now before the Senate, S. 71, where they appropriately belong.

The hearings I referred to demonstrated once again that this amendment is noncontroversial. Indeed, it is identical to S. 3312, a bill that was reported by the Banking Committee in the last Congress.

Essentially, the principal thrust of this amendment is to transfer management of the National Credit Union Administration from a single Administrator who serves at the pleasure of the President to a three-member board with fixed terms of office. The responsibilities of the National Credit Union Administration have increased substantially and become more complex since the agency was created in 1970. With the current emphasis on financial restructuring and the emergence of new developments relating to electronic funds transfer systems, the climate in which credit unions find themselves is a dynamic one. To keep pace, an upgraded and modernized National Credit Union Administration management structure is needed.

The establishment of a three-member board will provide greater stability and continuity in establishing and carrying out policy. The broad representation provided a three-member board will permit greater ex-

perience and expertise to be brought to bear on the day-to-day complexities of managing the NCUA.

The establishment of a board is also consistent with the past actions of Congress in establishing the management structure of other Federal financial regulatory agencies.

The amendment also upgrades the salary levels of senior management and staff within the NCUA which is needed to move the NCUA closer to a position of parity with the other financial regulatory agencies.

Mr. PROXMIRE. Mr. President, so far as I know, there is no opposition to the McIntyre amendment. Senator McINTYRE desired to be here to support it. It is supported by the credit union organizations and by the National Credit Union Administration.

Mr. BROOKE. Mr. President, I have studied the McIntyre NCUA amendment. This amendment was discussed before the committee. This is to provide for the three-man board, as I understand it. It was unanimously agreed to in the committee, and I have no objection.

The PRESIDING OFFICER. Is all time yielded back?

Mr. PROXMIRE. I yield back the remainder of my time.

Mr. BROOKE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 742

Mr. PROXMIRE. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE) proposes an unprinted amendment numbered 742.

The amendment is as follows:

On page 100, line 22, after the period insert the following: "Any notice of suspension or order of removal issued under this paragraph shall remain effective and outstanding until the completion of any hearing or appeal authorized under paragraph (3) hereof unless terminated by the agency."

On page 102, strike out lines 23 through 25.

On page 103, line 1, strike out "(4)" and insert "(3)".

On page 103, line 5, strike out "(5)" and insert "(4)".

On page 103, line 9, strike out "(6)" and insert "(5)".

On page 105, line 8, after the period, insert the following: "Any notice of suspension or order of removal issued under this paragraph shall remain effective and outstanding until the completion of any hearing or appeal authorized under paragraph (3) hereof unless terminated by the Corporation."

On page 106, between lines 17 and 18, insert the following:

(3) Section 407(j)(2) of such Act (12 U.S.C. 1730(j)(2)) is amended by inserting "(1)" after "subsection (h)".

On page 108, line 7, after the period, insert the following "Any notice of suspension or order of removal issued under this subparagraph shall remain effective and outstanding until the completion of any hearing or appeal authorized under subparagraph (C) hereof unless terminated by the Board."

On page 110, strike out lines 8 though 10.

On page 110, line 11, strike out "(4)" and insert "(3)".

On page 112, line 6, after the period, insert the following: "Any notice of suspension or order of removal issued under this paragraph shall remain effective and outstanding until the completion of any hearing or appeal authorized under paragraph (3) hereof unless terminated by the Administrator."

On page 114, between lines 14 and 15, insert the following:

(3) Section 206(1)(2) of such Act (12 U.S.C. 1786(1)(2)) is amended by inserting "(1)" after "subsection (h)".

Mr. PROXMIRE. Mr. President, this amendment is proposed jointly by Senator TOWER and myself.

This amendment is a due process amendment. It would provide authorization for an appeal to the U.S. court of appeals to a bank officer or director who has been suspended or removed after a hearing upon an indictment or conviction of a crime involving dishonesty or breach of trust.

Since 1966 there has been in the law a summary suspension and removal procedure applied by the regulatory agencies against bank officers or directors. After indictment or conviction for a crime the regulatory agencies have had the power to suspend and remove such individuals without a hearing. No appeal mechanism is in the law.

In the legislation recommended by the regulatory agencies a hearing procedure was provided for but did not recommend that an appeal procedure to the courts be included.

I have considered this matter since the committee marked up the legislation. The agencies affected now have no objection to providing for an appeal of an adverse finding to a U.S. court of appeals.

This amendment would provide that and pending the completion of the proceedings a suspension would remain in effect. This will insure that the public is protected while the individual is given full recourse to the courts for review of a suspension or removal order.

Mr. BROOKE. Mr. President, I have knowledge of this amendment, and I have no objection. I yield back the remainder of my time.

Mr. PROXMIRE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment was agreed to.

Mr. PROXMIRE. Mr. President, I have no further amendments. I understand that the Senator from Massachusetts may have an amendment. Before he offers his, I wish to say this: One amendment I did have to this bill, which I will not offer, would provide for Senate confirmation of the nomination of the Chairman of the Federal Reserve Board. As I understand it, there is no opposition to that kind of amendment, provided it is prospective and does not apply to the present Chairman. The House has an amendment which would give the Senate that confirmation authority.

It seems to me that the case is just overwhelming. If there is any figure in our Government who should be subject to confirmation by the Senate, it is the Chairman of the Federal Reserve Board—the Chairman, as Chairman.

I say that because this is a very powerful position. All the indications are that it is the most powerful economic position in our Government. The Federal Reserve Board is peculiarly a legislative agency, independent of the executive branch. So we certainly should pass on the qualifications of the man to be Chairman.

Furthermore, the record is replete in showing that people who come up for a simple confirmation to the Board itself are given very brief consideration by the committee.

I made a review of the past 10 confirmations. I find that in most cases the interrogation lasted only a very few minutes, no discussion or debate. They were approved usually by polling the committee.

The confirmation was taken to the floor and approved by unanimous consent with no debate. I might point out that any one of the six members of the Board or the seven members of the Board could be reappointed by President Carter, including some very fine people, but people whose record, whose attitude, whose qualifications should be passed on as Chairmen.

However, we are not going to do that today. I hope we can do that within the next month or two because I see the House has got that in a bill which has been unanimously approved by their committee, and we will have an opportunity to pass on that later. So I will not offer the amendment. But I only do not offer it because of the strenuous objections by certain Members of the Senate who, unless they wish it to be otherwise, will remain anonymous so far as I am concerned.

Mr. BROOKE. Mr. President, the distinguished chairman has made a most eloquent statement about an amendment, of course, which he is not going to offer, for which I am very grateful he is not going to offer at this particular time.

But I have discussed this amendment at great length with the distinguished Senator from Wisconsin, and I think we will be able to work out something relative to that amendment and have it come before the Senate for its consideration.

UP AMENDMENT NO. 743

Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The second assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. BROOKE) proposes unprinted amendment No. 743.

Mr. BROOKE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add a new title as follows:

TITLE V—STANDBY LETTERS OF CREDIT

SEC. 501. The purpose of this title is to regulate standby letters of credit, guaranties, surety agreements and certain acceptances issued by commercial banks.

SEC. 502. (a) Section 5202 of the Revised Statutes, as amended (12 U.S.C. 82), is amended by inserting "(a)" after section 5202.

(b) The clause numbered "Fifth" in such redesignated section 5202(a) is amended to read:

"Fifth. Liabilities incurred under the provisions of the Federal Reserve Act, including liabilities arising from the acceptance of time drafts of the kinds described in section 13 of the Federal Reserve Act."

(c) Section 5202 is further amended by adding a new subsection (b) to read:

"Section 5202(b). No national banking association shall incur any liability arising from the acceptance of a time draft (other than liabilities arising from the acceptance of time drafts of the kinds described in section 13 of the Federal Reserve Act), or from any undertaking to make or arrange a payment in the event another person fails to do so, in an amount exceeding 50 percent of its capital stock at such time actually paid in and remaining undiminished by losses or otherwise, plus 50 percent of its unimpaired surplus fund, except that any liability which is secured by readily realizable collateral shall not be included as a liability subject to the limitation contained herein."

SEC. 503. Section 5200 of the Revised Statutes (12 U.S.C. 84) is amended by inserting immediately after the second sentence the following new sentence: "For purposes of this section, (a) where an association accepts a time draft (other than a time draft of a kind described in section 13 of the Federal Reserve Act), the amount of the acceptance shall be deemed an obligation to the association of the person who is obliged to place the bank in funds prior to the maturity of the acceptance, (b) where an association undertakes to make or arrange a payment in the event another person fails to do so, the amount involved shall be deemed an obligation of that person to the association, and (c) where the acceptance or undertaking is made in connection with the financing of the purchase of personal property for lease or sale to a user, the amount of such acceptance or undertaking shall be deemed an obligation of the user to the association; and all such transactions shall be incorporated and disclosed fully in the balance sheets and reports of condition of the issuing bank and be subject to full extension of credit analysis."

SEC. 504. Section 19(a) of the Federal Reserve Act, as amended (12 U.S.C. 461(a)), is amended by adding at the end thereof the following sentence: "For the purposes of subsection (b) of this section, any member bank acceptance (other than an acceptance of a kind described in section 13) or any undertaking by a member bank to make or arrange a payment in the event another person fails to do so shall be deemed a deposit."

SEC. 505. Paragraph 6 of section 9 of the Federal Reserve Act, as amended (12 U.S.C. 324), is amended by adding at the end thereof the following: "The provisions of sections 5200 and 5202(b) of the Revised Statutes shall apply to all State member banks and all insured nonmember State banks, so long as such banks are liable on acceptances not of a kind described in section 13 or on undertakings to make or arrange a payment in the event another person fails to do so."

SEC. 506. The provisions of this Act shall take effect upon the expiration of thirty days after the date of its enactment.

Mr. BROOKE. Mr. President, almost 3 years have passed since I introduced legislation to regulate standby letters of credit and other bank guaranties. During this time, as the amount of guaranty-type instruments has continued to grow, the potential for damaging effects on this Nation's banking system stemming from such practices has increased significantly.

When I first addressed problems attending the use of these instruments in August of 1974, the aggregate amount outstanding at the 20 largest banks alone approximately $6.9 billion. In the 3 years which have passed, the amount outstanding has risen to approximately $13 billion, while the amount outstanding nationwide is estimated at $20 billion. Indeed, there are estimates that the usage of such instruments will climb in magnitude to $50–$100 billion in the not too distant future. Clearly, the growth of such practices has gone unabated, and the attending problems have not been addressed by the banks themselves, the bank regulatory agencies or the Congress.

Chairman PROXMIRE and I introduced legislation similar to my original bill during the 2d session of the 94th Congress, and hearings were held on this legislation last year. The Committee on Banking, Housing, and Urban Affairs received wide-ranging testimony on this bill. Following the hearings on this subject, certain technical amendments were received, and considered; and they have been incorporated in the provisions before us today. It is fair to say, however, that the proposed legislation is in essence the bill which served as the basis for the Banking Committee's hearings last year.

In my judgment, we must heed the lessons of the past, and foreclose the recurrence of problems which arose in recent years involving this Nation's banking system. This amendment is designed to address problems similar to those which were involved with the failure of the United States National Bank of San Diego, and to insure that the future growth of standby letters of credit and other bank guaranties is coupled with reasonable restraints designed to insure the safety and soundness of those commercial banks engaging in such practices. In this regard, I am pleased that Chairman PROXMIRE has seen fit to join me in supporting this legislation. I believe that the addition of the amendment to S. 71 will strengthen the bill and will help to promote the safety and soundness of our banking system.

Mr. PROXMIRE. Mr. President, I am happy to support the Brooke amendment.

Standby letters of credit are guarantees issued by banks standing ready to pay the commercial paper obligations of firms that become insolvent. As such they arguably represent inherently unsafe or unsound banking practices. The three banking agencies discussed this problem. Two of them wanted to ban them outright but the third—the Comptroller of the Currency—did not.

As often happens when the banking agencies disagree, the minority prevailed. This legislation will not ban standby letters of credit, but it will control them to safe levels. So I am happy to join the distinguished Senator from Massachusetts in supporting his amendment.

Mr. President, I yield back the remainder of my time on the amendment.

Mr. BROOKE. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Massachusetts.

The amendment was agreed to.

Mr. BROOKE. Mr. President, I have no further amendments.

Mr. PROXMIRE. I have no further amendments.

The PRESIDING OFFICER. If there are no further amendments, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, were agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, and was read the third time.

The PRESIDING OFFICER. Is all time yielded back?

Mr. BROOKE. I yield back the remainder of my time.

Mr. PROXMIRE. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is, shall the bill pass?

The bill, S. 71, was passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Financial Institutions Supervisory Act Amendments of 1977".

TITLE I—SUPERVISORY AUTHORITY OVER DEPOSITARY INSTITUTIONS

SEC. 101. The Federal Reserve Act is amended by redesignating sections 29 and 30 as sections 30 and 31, respectively, and by inserting after section 28 a new section as follows:

"SEC. 29. (a) Any member bank which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such member bank who violates any provision of section 22 or 23A of this Act, or any regulation issued pursuant thereto, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Comptroller of the Currency in the case of a national bank, or the Board in the case of a State member bank, by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(b) In determining the amount of the penalty the Comptroller of the Currency or the Board, as the case may be, shall take into account the appropriateness of the penalty with respect to the size of the financial resources and good faith of the member bank or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(c) The member bank or person assessed shall be afforded an opportunity for agency hearing, upon request made within ten days

after issuance of the notice of assessment. In such hearing, all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in subsection (d). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(d) Any member bank or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the member bank is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Comptroller of the Currency or the Board, as the case may be. The Comptroller of the Currency or the Board, as the case may be, shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the Comptroller of the Currency or the Board, as the case may be, shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(e) If any member bank or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the agency, the Comptroller of the Currency or the Board, as the case may be, shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(f) The Comptroller of the Currency and the Board shall promulgate regulations establishing procedures necessary to implement this section.

"(g) All penalties collected under authority of this section shall be covered into the Treasury of the United States.".

SEC. 102. Section 19 of the Federal Reserve Act is amended by adding at the end thereof the following new subsection:

"(i)(1) Any member bank which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such member bank who violates any provision of this section, or any regulation or order issued by the Board pursuant thereto, shall forfeit and pay a civil money penalty of not more than $100 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Board by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(2) In determining the amount of the penalty the Board shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the member bank or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(3) The member bank or person assessed shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing, all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in paragraph (4). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(4) Any member bank or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the member bank is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Board. The Board shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the Board shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(5) If any member bank or person fails to pay an assessment after it has become a final and unappealable order or after the court of appeals has entered final judgment in favor of the agency, the Board shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(6) The Board shall promulgate regulations establishing procedures necessary to implement this subsection.

"(7) All penalties collected under authority of this subsection shall be covered into the Treasury of the United States.".

SEC. 103. Section 22 of the Federal Reserve Act is amended by adding at the end thereof the following new subsection:

"(h)(1) No member bank shall make any loan or extension of credit in any manner to any of its own officers, or to any person who directly or indirectly or acting through or in concert with one or more persons owns, controls, or has the power to vote more than 10 per centum of any class of voting securities of such member bank, or to any company controlled by such an officer or person, where the amount of such loan or extension of credit, when aggregated with the amount of all other loans or extensions of credit then outstanding by such bank to such officer or person and to all companies controlled by such officer or person, would exceed the limits on loans to a single borrower established by section 5200 of the Revised Statutes, as amended, in the case of a national banking association, or by the applicable State law in the case of a State member bank.

"(2) No member bank shall make any loan or extension of credit in any manner to any of its own officers or directors, or to any person who directly or indirectly or acting through or in concert with one or more persons owns, controls, or has the power to vote more than 10 per centum of any class of voting securities of such member bank, or to any company controlled by such an officer, director, or person, where the amount of such loan or extension of credit, when aggregated with the amount of all other loans or extensions of credit then outstanding by such bank to such officer, director, or person and to all companies controlled by such officer, director, or person, would exceed $25,000, unless such loan or extension of credit is approved in advance by two-thirds of the entire board of directors with the interested party abstaining from participating directly or indirectly in the voting.

"(3) No member bank shall make any loan or extension of credit in any manner to any of its own officers or directors, or to any person who directly or acting through or in concert with one or more persons, owns, controls, or has the power to vote more than 10 per centum of any class of voting securities of such member bank, or to any company controlled by such officer, director, or person, unless such loan or extension of credit is made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons and does not involve more than the normal risk of repayment or present other unfavorable features.

"(4) For purposes of this subsection, an officer, director, or person shall be considered to have control of a company if said officer, director, or person, directly or indirectly or acting through or in concert with one or more other persons—

"(A) owns, controls, or has power to vote 25 per centum or more of any class of voting securities of the company;

"(B) controls in any manner the election of a majority of the directors of the company; or

"(C) has the power to exercise a controlling influence over the management or policies of such company.

"(5) For the purposes of this subsection—

"(A) the term 'person' means an individual or company;

"(B, the term 'company' means any corporation, partnership, business trust, association, joint venture, pool syndicate, sole proprietorship, unincorporated organization, any other form of business entity not specifically listed herein, or any other trust, but shall not include any insured bank or any corporation the majority of shares of which is owned by the United States or by any State;

"(C) the term 'extension of credit' has the same meaning assigned such term in the fourth paragraph of section 23A of this Act;

"(D) a person shall be deemed to be a 'director' of a member bank or a 'person who directly or indirectly or acting through or in concert with one or more persons owns, controls or has power to vote more than 10 per centum of any class of voting securities of a member bank' if such person has such relationship with any bank holding company of which such member is a subsidiary, as defined by the Bank Holding Company Act (12 U.S.C. 1841), or with any other subsidiary of such bank holding company; and

"(E) a person shall be deemed to be an 'officer' of a member bank if such person is an officer of any bank holding company of which such member bank is a subsidiary, as defined by the Bank Holding Company Act (12 U.S.C. 1841), or with any other subsidiary of such bank holding company.

"(6) The Board of Governors of the Federal Reserve System may prescribe such rules and regulations, including definitions of terms, as it deems necessary to effectuate the purposes and to prevent evasions of this subsection. The Board may further prescribe rules providing a reasonable period of time after the date of enactment of this subsection within which the amount of outstanding loans or extensions of credit made prior to such date of enactment shall be reduced so as to conform to the limitations of this subsection.".

SEC. 104. (a) Section 5 of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1844), is amended by adding at the end thereof the following new subsection:

"(e)(1) Notwithstanding any other provision of this Act, the Board may, whenever it has reasonable cause to believe that the continuation by a bank holding company of any activity or of ownership or control of any of its nonbank subsidiaries, other than a nonbank subsidiary of a bank, constitutes a serious risk to the financial safety, soundness, or stability of a bank holding company subsidiary bank and is inconsistent with sound banking principles or with the purposes of this Act or with the Financial Institutions Supervisory Act of 1966, order the bank holding company or any

such nonbank subsidiaries, after due notice and opportunity for hearing, and after considering the views of the bank's primary supervisor, which shall be the Comptroller of the Currency in the case of a national bank or the Federal Deposit Insurance Corporation and the appropriate State supervisory authority in the case of an insured nonmember bank, to terminate such activities or to terminate (within one hundred and twenty days or such longer period as the Board may direct in unusual circumstances) its ownership or control of any such subsidiary either by sale or by distribution of the shares of the subsidiary to the shareholders of the bank holding company. Such distribution shall be pro rata with respect to all of the shareholders of the distributing bank holding company, and the holding company shall not make any charge to its shareholders arising out of such a distribution.

"(2) The Board may in its discretion apply to the United States district court within the jurisdiction of which the principal office of the holding company is located, for the enforcement of any effective and outstanding order issued under this section, and such court shall have jurisdiction and power to order and require compliance therewith, but except as provided in section 9 of this Act, no court shall have jurisdiction to affect by injunction or otherwise the issuance or enforcement of any notice or order under this section, or to review, modify, suspend, terminate, or set aside any such notice or order.".

(b)(1) Section 408(h) of the National Housing Act (12 U.S.C. 1730a(h)) is amended by adding immediately after "under subsection (a)(2)(D)" in paragraphs (3)(A) and (3)(B) of subsection (h) the phrase "or under subsection (h)(5)" and is amended by redesignating paragraph (h)(5) as (h)(6) and by adding a new paragraph (h)(5) to read as follows:

"(5)(A) Notwithstanding any other provision of this section, the Corporation may, whenever it has reasonable cause to believe that the continuation by a savings and loan holding company of any activity or of ownership or control of any of its noninsured subsidiaries constitutes a serious risk to the financial safety, soundness, or stability of a savings and loan holding company's subsidiary insured institution and is inconsistent with the sound operation of an insured savings and loan institution or with the purposes of this section or with the Financial Institutions Supervisory Act, order the savings and loan holding company or any of its subsidiaries, after due notice and opportunity for hearing, to terminate such activities or to terminate (within one hundred and twenty days or such longer period as the Corporation directs in unusual circumstances) its ownership or control of any such noninsured subsidiary either by sale or by distribution of the shares of the subsidiary to the shareholders of the savings and loan holding company. Such distribution shall be pro rata with respect to all of the shareholders of the distributing savings and loan holding company, and the holding company shall not make any charge to its shareholders arising out of such a distribution.".

"(B) The Corporation may in its discretion apply to the United States district court within the jurisdiction of which the principal office of the company is located, for the enforcement of any effective and outstanding order issued under this section, and such court shall have jurisdiction and power to order and require compliance therewith, but except as provided in subsection (k), no court shall have jurisdiction to affect by injunction or otherwise the issuance or enforcement of any notice or order under this section, or to review, modify, suspend, terminate, or set aside any such notice or order.".

(2) Section 406(f) of the National Housing Act (12 U.S.C. 1729(f)) is amended to read as follows:

"(f)(1) In order to prevent a default in an insured institution or in order to restore an insured institution in default to normal operation, the Corporation is authorized, in its discretion and upon such terms and conditions as it may determine, to make loans to, to purchase the assets of, or to make a contribution to, an insured institution or an insured institution in default.

"(2) Whenever an insured institution is in default or, in the judgment of the Corporation, is in danger of default, the Corporation may, in order to facilitate a merger or consolidation of such insured institution with another insured institution or the sale of the assets of such insured institution and the assumption of its liabilities by another insured institution and upon such terms and conditions as the Corporation may determine, purchase any such assets or assume any such liabilities, or make loans to such other insured institution, or guarantee such other insured institution against loss by reason of its merging or consolidating with or assuming the liabilities and purchasing the assets of such insured institution in or in danger of default.

"(3) No contribution or guarantee shall be made pursuant to paragraphs (1) or (2) of this subsection (f) in an amount in excess of that which the Corporation finds to be reasonably necessary to save the cost of liquidating such insured institution in or in danger of default, but if the Corporation determines that the continued operation of such institution is essential to provide adequate savings or home financing services in its community, such limitation upon the amount of a contribution or guarantee shall not apply.".

SEC. 105. (a) Section 8 of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1847), is amended by redesignating "SEC. 8." as "SEC. 8. (a)" and by adding a new subsection (b) to read as follows:

"(b)(1) Any company which violates or any individual who participates in a violation of any provision of this Act, or any regulation or order issued pursuant thereto, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Board by written notice. As used in the section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(2) In determining the amount of the penalty the Board shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the company or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(3) The company or person assessed shall be afforded an opportunity for agency hearing upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in section 9. If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(4) If any company or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the Board, the Board shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(6) The Board shall promulgate regulations establishing procedures necessary to implement this subsection.

"(7) All penalties collected under authority of this subsection shall be covered into the Treasury of the United States.".

(b) Section 5 of the Bank Holding Company Act is amended by adding the following new paragraph:

"(e) In the course of or in connection with an application, examination, investigation or other proceeding under this Act, the Board, or any member or designated representative thereof, including any person designated to conduct any hearing under this Act, shall have the power to administer oaths and affirmations, to take or cause to be taken depositions, and to issue, revoke, quash, or modify subpenas and subpenas duces tecum; and the Board is empowered to make rules and regulations to effectuate the purposes of this subsection. The attendance of witnesses and the production of documents provided for in this subsection may be required from any place in any State or in any territory or other place subject to the jurisdiction of the United States at any designated place where such proceeding is being conducted. Any party to proceedings under this Act may apply to the United States District Court for the District of Columbia, or the United States district court for the judicial district or the United States court in any territory in which such proceeding is being conducted or where the witness resides or carries on business, for the enforcement of any subpena or subpena duces tecum issued pursuant to this subsection, and such courts shall have jurisdiction and power to order and require compliance therewith. Witnesses subpenaed under this subsection shall be paid the same fees and mileage that are paid witnesses in the district courts of the United States. Any service required under this subsection may be made by registered mail, or in such other manner reasonably calculated to give actual notice as the Board may by regulation or otherwise provide. Any court having jurisdiction of any proceeding instituted under this subsection may allow to any such party such reasonable expenses and attorney's fees as it deems just and proper. Any person who willfully shall fail or refuse to attend and testify or to answer any lawful inquiry or to produce books, papers, correspondence, memoranda, contracts, agreements, or other records, if in such person's power so to do, in obedience to the subpena of the Board, shall be guilty of a misdemeanor and, upon conviction, shall be subject to a fine of not more than $1,000 or to imprisonment for a term of not more than one year or both.".

(c) Section 408(j) of the National Housing Act (12 U.S.C. 1730a(j)), is amended by adding thereto a new paragraph (j)(4) to read as follows:

"(4)(A) Any company which violates or any individual who participates in a violation of this section, or any regulation or order issued pursuant thereto, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Corporation by written notice. As used in the section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(B) In determining the amount of the penalty the Corporation shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the company or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(C) The company or person assessed

shall be afforded an opportunity for agency hearing, upon request made within 10 days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in subparagraph (D). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(D) Any company or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the company is located, or in the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within thirty days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Corporation. The Corporation shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the Corporation shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(E) If any company or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the agency, the Corporation shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(F) The Corporation shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(G) All penalties collected under authority of this paragraph shall be covered into the Treasury of the United States.".

SEC. 106. (a)(1) Section 8(b) of the Federal Deposit Insurance Act (12 U.S.C. 1818 (b)) is amended to read as follows:

"(b)(1) If, in the opinion of the appropriate Federal banking agency, any insured bank, bank which has insured deposits, or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such a bank is engaging or has engaged, or the agency has reasonable cause to believe that the bank or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank is about to engage, in an unsafe or unsound practice in conducting the business of such bank, or is violating or has violated, or the agency has reasonable cause to believe that the bank or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank is about to violate, a law, rule, or regulation, or any condition imposed in writing by the agency in connection with the granting of any application or other request by the bank or any written agreement entered into with the agency, the agency may issue and serve upon the bank or such director, officer, employee, agent, or other person a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged violation or violations or the unsafe or unsound practice or practices, and shall fix a time and place at which a hearing will be held to determine whether an order to cease and desist therefrom should issue against the bank or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the agency at the request of any party so served. Unless the party or parties so served shall appear at the hearing personally or by a duly authorized representative, they shall be deemed to have consented to the issuance of the cease-and-desist order. In the event of such consent, or if upon the record made at any such hearing, the agency shall find that any violation or unsafe or unsound practice specified in the notice of charges has been established, the agency may issue and serve upon the bank or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank an order to cease and desist from any such violation or practice. Such order may, by provisions which may be mandatory or otherwise, require the bank or its directors, officers, employees, agents, and other persons participating in the conduct of the affairs of such bank to cease and desist from the same, and, further, to take affirmative action to correct the conditions resulting from any such violation or practice.

"(2) A cease-and-desist order shall become effective at the expiration of thirty days after the service of such order upon the bank or other person concerned (except in the case of a cease-and-desist order issued upon consent, which shall become effective at the time specified therein), and shall remain effective and enforceable as provided therein, except to such extent as it is stayed, modified, terminated, or set aside by action of the agency or a reviewing court.".

(2) Section 407(e) of the National Housing Act (12 U.S.C. 1730(e)) is amended to read as follows:

"(e)(1) If, in the opinion of the Corporation, any insured institution, institution which has insured accounts or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution is engaging or has engaged, or the Corporation has reasonable cause to believe that the institution or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution is about to engage, in an unsafe or unsound practice in conducting the business of such institution, or is violating or has violated, or the Corporation has reasonable cause to believe that the institution or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution is about to violate, a law, rule, or regulation, or any condition imposed in writing by the Corporation in connection with the granting of any application or other request by the institution or any written agreement entered into with the Corporation, including any agreement entered into under section 403 of this title, the Corporation may issue and serve upon the institution or such director, officer, employee, agent, or other person a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged violation of violations or the unsafe or unsound practice or practices, and shall fix a time and place at which a hearing will be held to determine whether an order to cease and desist therefrom should issue against the institution or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the Corporation at the request of any party so served. Unless the party or parties so served shall appear at the hearing by a duly authorized representative, they shall be deemed to have consented to the issuance of the cease-and-desist order. In the event of such consent, or if upon the record made at any such hearing, the Corporation shall find that any violation or unsafe or unsound practice specified in the notice of charges has been established, the Corporation may issue and serve upon the institution or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution an order to cease and desist from any such violation or practice. Such order may, by provisions which may be mandatory or otherwise, require the institution or directors, officers, employees, agents, and other persons participating in the conduct of the affairs of such institution to cease and desist from the same, and, further to take affirmative action to correct the conditions resulting from any such violation or practice.

"(2) A cease-and-desist order shall become effective at the expiration of thirty days after service of such order upon the institution or the party or parties so served (except in the case of a cease-and-desist order issued upon consent, which shall become effective at the time specified therein), and shall remain effective and enforceable except to such extent as it is stayed, modified, terminated, or set aside by action of the Corporation or a reviewing court.

"(3) This subsection and subsections (f), (g), (h), (j), (k), (m)(3), (n), (o), (p), and (q) of this section shall apply to any savings and loan holding company, and to any subsidiary (other than an insured institution) of a savings and loan holding company, as those terms are defined in section 408 of this title, and to any affiliate service corporation of an insured institution in the same manner as they apply to insured institutions.".

(3) Section 5(d)(2) of the Home Owners' Loan Act, as amended (12 U.S.C. 1464(d)(2)), is amended to read as follows:

"(2)(A) If, in the opinion of the Board, any association or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association is engaging or has engaged, or the Board has reasonable cause to believe that the association or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association is about to engage, in an unsafe or unsound practice in conducting the business of such association, or is violating or has violated or the Board has reasonable cause to believe that the association or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association is about to violate, a law, rule, or regulation, or charter, or any condition imposed in writing by the Board in connection with the granting of any application or other request by the association or any written agreement entered into with the Board, the Board may issue and serve upon the association or such director, officer, employee, agent, or other person a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged violation or violations or the unsafe or unsound practice or practices, and shall fix a time and place at which a hearing will be held to determine whether an order to cease and desist therefrom should issue against the association or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such association. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the Board at the request of any party so served. Unless the party or parties so served shall appear at the hearing by a duly authorized representative, they shall be deemed to have consented to the issuance of the cease-and-desist order. In the event of such consent, or if upon the record made at any such hearing, the Board

shall find that any violation or unsafe or unsound practice specified in the notice of charges has been established, the Board may issue and serve upon the association or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such association an order to cease and desist from any such violation or practice. Such order may, by provisions which may be mandatory or otherwise, require the association or its directors, officers, employees, agents, and other persons participating in the conduct of the affairs of such association to cease and desist from the same, and, further, to take affirmative action to correct the conditions resulting from any such violation or practice.

"(B) A cease-and-desist order shall become effective at the expiration of thirty days after service of such order upon the association or the party or parties so served (except in the case of a cease-and-desist order issued upon consent, which shall become effective at the time specified therein), and shall remain effective and enforceable, except to such extent as it is stayed, modified, terminated, or set aside by action of the Board or a reviewing court.

"(C) This paragraph and paragraphs (3), (4), (5), (7), (8), (9), (10), (12) (A) and (B), (13), and (14) of this subsection (d) shall apply to any savings and loan holding company or to any subsidiary (other than an association) of a savings and loan holding company, as those terms are defined in section 408 of the National Housing Act (12 U.S.C. 1730a), as amended, and to any affiliate service corporation of an association in the same manner as they apply to an association.".

(4) Section 206(e) of the Federal Credit Union Act (12 U.S.C. 1786 (e)(1)) is amended to read as follows:

"(e)(1) If, in the opinion of the Administrator, any insured credit union, credit union which has insured accounts, or any director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such a credit union is engaging or has engaged, or the Administrator has reasonable cause to believe that the credit union or any director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union is about to engage, in an unsafe or unsound practice in conducting the business of such credit union, or is violating or has violated, or the Administrator has reasonable cause to believe that the credit union or any director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union is about to violate, a law, rule, or regulation, or any condition imposed in writing by the Administrator in connection with the granting of any application or other request by the credit union or any written agreement entered into with the Administrator, the Administrator may issue and serve upon the credit union or such director, officer, committte member, employee, agent, or other person a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged violation or violations or the unsafe or unsound practice or practices, and shall fix a time and place at which a hearing will be held to determine whether an order to cease and desist therefrom should issue against the credit union or the the director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the Administrator at the request of any party so served. Unless the party or parties so served shall appear at the hearing by a duly authorized representative, they shall be deemed to have consented to the issuance of the cease-and-desist order. In the event of such consent, or if upon the record made at any such hearing, the Administrator shall find that any violation or unsafe or unsound practice specified in the notice of charges has been established, the Administrator may issue and serve upon the credit union or the director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union an order to cease and desist from any such violation or practice. Such order may, by provisions which may be mandatory or otherwise, require the credit union or its directors, officers, committee members, employees, agents, and other persons participating in the conduct of the affairs of such credit union to cease and desist from the same, and, further, to take affirmative action to correct the conditions resulting from any such violation or practice.

"(2) A cease-and-desist order shall become effective at the expiration of thirty days after the service of such order upon the credit union or other person concerned (except in the case of a cease-and-desist order issued upon consent, which shall become effective at the time specified therein), and shall remain effective and enforceable as provided therein, except to such extent as it is stayed, modified, terminated, or set aside by action of the Administrator or a reviewing court.".

(b) Section 8(b)(3) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1818(b)(3)), is amended: (1) by inserting after "Bank Holding Company Act of 1956" a comma and the following: "and to any organization organized and operated under section 25A of the Federal Reserve Act or operating under section 25 of the Federal Reserve Act,"; and (2) by adding at the end thereof the following new sentence: "Nothing in this subsection or in subsection (c) of this section shall authorize any Federal banking agency, other than the Board of Governors of the Federal Reserve System, to issue a notice of charges or cease-and-desist order against a bank holding company or any subsidiary thereof (other than a bank or subsidiary of that bank).".

(c)(1) Sections 8(c)(1) and (2) of the Federal Deposit Insurance Act (12 U.S.C. 1818(c)(1) and (2)) are amended to read as follows:

"(c)(1) Whenever the appropriate Federal banking agency shall determine that the violation or threatened violation or the unsafe or unsound practice or practices, specified in the notice of charges served upon the bank or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank pursuant to paragraph (1) of subsection (b) of this section, or the continuation thereof, is likely to cause insolvency or substantial dissipation of assets or earnings of the bank, or is likely to seriously weaken the condition of the bank or otherwise seriously prejudice the interests of its depositors prior to the completion of the proceedings conducted pursuant to paragraph (1) of subsection (b) of this section, the agency may issue a temporary order requiring the bank or such director, officer, employee, agent, or other person to cease and desist from any such violation or practice and to take affirmative action to prevent such insolvency, dissipation, condition, or prejudice pending completion of such proceedings. Such order shall become effective upon service upon the bank or such director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank and, unless set aside, limited, or suspended by a court in proceedings authorized by paragraph (2) of this subsection, shall remain effective and enforceable pending the completion of the administrative proceedings pursuant to such notice and until such time as the agency shall dismiss the charges specified in such notice, or if a cease-and-desist order is issued against the bank or such director, officer, employee, agent, or other person, until the effective date of such order.

"(2) Within ten days after the bank concerned or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank has been served with a temporary cease-and-desist order, the bank or such director, officer, employee, agent, or other person may apply to the United States district court for the judicial district in which the home office of the bank is located, or the United States District Court for the District of Columbia, for an injunction setting aside, limiting, or suspending the enforcement, operation, or effectiveness of such order pending the completion of administrative proceedings pursuant to the notice of charges served upon the bank or such director, officer, employee, agent, or other person under paragraph (1) of subsection (b) of this section, and such court shall have jurisdiction to issue such injunction.".

(2) Section 407(f) (1) and (2) of the National Housing Act (12 U.S.C. 1730(f) (1) and (2)) is amended to read as follows:

"(f)(1) Whenever the Corporation shall determine that the violation or threatened violation or the unsafe or unsound practice or practices, specified in the notice of charges served upon the institution or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution or any institution any of the accounts of which are insured pursuant to paragraph (1) of subsection (e) of this section, or the continuation thereof, is likely to cause insolvency or substantial dissipation of assets or earnings of the institution, or is likely to seriously weaken the condition of the institution or otherwise seriously prejudice the interests of its insured members prior to the completion of the proceedings conducted pursuant to paragraph (1) of subsection (c) of this section, the Corporation may issue a temporary order requiring the institution or such director, officer, employee, agent, or other person to cease and desist from any such violation or practice and to take affirmative action to prevent such insolvency, dissipation, condition or prejudice pending completion of such proceedings. Such order shall become effective upon service upon the institution and/or such director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution and, unless set aside, limited, or suspended by a court in proceedings authorized by paragraph (2) of this subsection, shall remain effective and enforceable pending the completion of the administrative proceedings pursuant to such notice and until such time as the Corporation shall dismiss the charges specified in such notice, or if a cease-and-desist order is issued against the institution or such director, officer, employee, agent, or other person, until the effective date of any such order.

"(2) Within ten days after the institution concerned or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution has been served with a temporary cease-and-desist order, the institution or such director, officer, employee, agent, or other person may apply to the United States district court for the judicial district in which the principal office of the institution is located, or the United States District Court for the District of Columbia, for an injunction setting aside, limiting, or suspending the enforcement, operation, or effectiveness of such order pending the completion of the administrative proceedings pursuant to the notice of

charges served upon the institution or such director, officer, employee, agent, or other person under paragraph (1) of subsection (e) of this section, and such court shall have jurisdiction to issue such injunction.".

(3) Section 5(d)(3) (A) and (B) of the Home Owners' Loan Act, as amended (12 U.S.C. 1464(d)(3) (A) and (B)), is amended to read as follows:

"(3)(A) Whenever the Board shall determine that the violation or threatened violation or the unsafe or unsound practice or practices, specified in the notice of charges served upon the association or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association pursuant to paragraph (2)(A) of this subsection, or the continuation thereof, is likely to cause insolvency (as defined in paragraph (6)(A)(i) of this subsection) or substantial dissipation of assets or earnings of the association, or is likely to seriously weaken the condition of the association or otherwise seriously prejudice the interests of its savings account holders prior to the completion of the proceedings conducted pursuant to paragraph (2)(A) of this subsection the Board may issue a temporary order requiring the association or such director, officer, employee, agent, or other person to cease and desist from any such violation or practice and to take affirmative action to prevent such insolvency, dissipation, condition or prejudice pending completion of such proceedings. Such order shall become effective upon service upon the association or such director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution and, unless set aside, limited, or suspended by a court in proceedings authorized by subparagraph (B) of this paragraph, shall remain effective and enforceable pending the completion of the administrative proceedings pursuant to such notice and until such time as the Board shall dismiss the charges specified in such notice, or if a cease-and-desist order is issued against the association or such director, officer, employee, agent, or other person, until the effective date of such order.

"(B) Within ten days after the association concerned or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association has been served with a temporary cease-and-desist order, the association or such director, officer, employee, agent, or other person may apply to the United States district court for the judicial district in which the home office of the association is located, or the United States District Court for the District of Columbia, for an injunction setting aside, limiting, or suspending the enforcement, operation, or effectiveness of such order pending the completion of the administrative proceedings pursuant to the notice of charges served upon the bank or such director, officer, employee, agent, or other person under paragraph (2)(A) of this subsection, and such court shall have jurisdiction to issue such injunction.".

(4) Sections 206(f) (1) and (2) of the Federal Credit Union Act (12 U.S.C. 1786(f) (1) and (2)) are amended to read as follows:

"(f)(1) Whenever the Administrator shall determine that the violation or threatened violation or the unsafe or unsound practice or practices, specified in the notice of charges served upon the credit union or any director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union pursuant to paragraph (1) of subsection (e) of this section, or the continuation thereof, is likely to cause insolvency or substantial dissipation of assets or earnings of the credit union, or is likely to seriously weaken the condition of the credit union or otherwise seriously prejudice the interests of its insured members prior to the completion of the proceedings conducted pursuant to paragraph (1) of subsection (e) of this section, the Administrator may issue a temporary order requiring the credit union or such director, officer, committee member, employee, agents, or other person to cease and desist from any such violation or practice and to take affirmative action to prevent such insolvency, dissipation, condition, or prejudice pending completion of such proceedings. Such order shall become effective upon service upon the credit union or such director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union and, unless set aside, limited, or suspended by a court in proceedings authorized by paragraph (2) of this subsection, shall remain effective and enforceable pending the completion of the administrative proceedings pursuant to such notice and until such time as the Administration shall dismiss the charges specified in such notice, or if a cease-and-desist order is issued against the credit union or such director, officer, committee member, employee, agent, or other person, until the effective date of such order.

"(2) Within ten days after the credit union concerned or any director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union has been served with a temporary cease-and-desist order, the credit union or such director, officer, committee member, employee, agent, or other person may apply to the United States district court for the judicial district in which the home office of the credit union is located or the United States District Court for the District of Columbia, for an injunction setting aside, limiting, or suspending the enforcement, operation, or effectiveness of such order pending the completion of the administrative proceedings pursuant to the notice of charges served upon the credit union or such director, officer, committee member, employee, agent, or other person under paragraph (1) of subsection (e) of this section, and such court shall have jurisdiction to issue such injunction.".

(d)(1) Section 8(e) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1818(e)), is amended to read as follows:

"(e)(1) Whenever, in the opinion of the appropriate Federal banking agency, any director or officer of an insured bank has committed any violation of law, rule, or regulation or of a cease-and-desist order which has become final, or has engaged or participated in any unsafe or unsound practice in connection with the bank, or has committed or engaged in any act, omission, or practice which constitutes a breach of his fiduciary duty as such director or officer, and the agency determines that the bank has suffered or will probably suffer substantial financial loss or other damage or that the interests of its depositors could be seriously prejudiced by reason of such violation or practice or breach of fiduciary duty, or that the director or officer has received financial gain by reason of such violation or practice or breach of fiduciary duty, and that such violation or practice or breach of fiduciary duty is either one involving personal dishonesty on the part of such director or officer, or one which demonstrates a willful disregard for the safety or soundness of the bank, the agency may serve upon such director or officer a written notice of its intention to remove him from office.

"(2) Whenever, in the opinion of the appropriate Federal banking agency, any director or officer of an insured bank, by conduct or practice with respect to another insured bank or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to continue as a director or officer and, whenever, in the opinion of the appropriate Federal banking agency, any other person participating in the conduct of the affairs of an insured bank, by conduct or practice with respect to such bank or other insured bank or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to participate in the conduct of the affairs of such insured bank, the agency may serve upon such director, officer, or other person a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the bank.

"(3) In respect to any director or officer of an insured bank or any other person referred to in paragraph (1) or (2) of this subsection, the appropriate Federal banking agency may, if it deems it necessary for the protection of the bank or the interests of its depositors, by written notice to such effect served upon such director, officer, or other person, suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the bank. Such suspension or prohibition shall become effective upon service of such notice and, unless stayed by a court in proceedings authorized by subsection (f) of this section, shall remain in effect pending the completion of the administrative proceedings pursuant to the notice served under paragraph (1) or (2) of this subsection and until such time as the agency shall dismiss the charges specified in such notice, or, if an order of removal or prohibition is issued against the director or officer or other person, until the effective date of any such order. Copies of any such notice shall also be served upon the bank of which he is a director or officer or in the conduct of whose affairs he has participated.

"(4) A notice of intention to remove a director, officer, or other person from office or to prohibit his participation in the conduct of the affairs of an insured bank, shall contain a statement of the facts constituting grounds therefor, and shall fix a time and place at which a hearing will be held thereon. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after the date of service of such notice, unless an earlier or a later date is set by the agency at the request of (A) such director or officer or other person, and for good cause shown, or (B) the Attorney General of the United States. Unless such director, officer, or other person shall appear at the hearing in person or by a duly authorized representative, he shall be deemed to have consented to the issuance of an order of such removal or prohibition. In the event of such consent, or if upon the record made at any such hearing the agency shall find that any of the grounds specified in such notice have been established, the agency may issue such orders of suspension or removal from office, or prohibition from participation in the conduct of the affairs of the bank, as it may deem appropriate. In any action brought under this section by the Comptroller of the Currency in respect to any director, officer or other person with respect to a national banking association or a District bank, the findings and conclusions of the Administrative Law Judge shall be certified to the Board of Governors of the Federal Reserve System for the determination of whether any order shall issue. Any such order shall become effective at the expiration of thirty days after service upon such bank and the director, officer, or other person concerned (except in the case of an order issued upon consent, which shall become effective at the time specified therein). Such order shall remain effective and enforceable except to such extent as it is stayed, modified, terminated, or set aside by action of the agency or a reviewing court.".

(2) Section 407(g)(1) and (2) of the Na-

tional Housing Act (12 U.S.C. 1730(g)(1) and (2)) is amended to read as follows:

"(g)(1) Whenever, in the opinion of the Corporation, any director or officer of an insured institution has committed any violation of law, rule, or regulation or of a cease-and-desist order which has become final, or has engaged or participated in any unsafe or unsound practice in connection with the institution or has committed or engaged in any act, omission, or practice which constitutes a breach of his fiduciary duty as such director or officer, and the Corporation determines that the institution has suffered or will probably suffer substantial financial loss or other damage or that the interests of its insured members could be seriously prejudiced by reason of such violation or practice or breach of fiduciary duty or that the director or officer has received financial gain by reason of such violation or practice or breach of fiduciary duty, and that such violation or practice or breach of fiduciary duty is either one involving personal dishonesty on the part of such director or officer, or one which demonstrates a willful disregard for the safety or soundness of the institution, the Corporation may serve upon such director or officer a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the institution.

"(2) Whenever, in the opinion of the Corporation, any director or officer of an insured institution, by conduct or practice with respect to another insured institution or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to continue as a director or officer and, whenever, in the opinion of the Corporation, any other person participating in the conduct of the affairs of an insured institution, by conduct or practice with respect to such institution or other insured institution or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and in addition, has evidenced his unfitness to participate in the conduct of affairs of such insured institution, the Corporation may serve upon such director, officer, or other person a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the institution.".

(3) Section 5(d)(4) (A) and (B) of the Home Owners' Loan Act, as amended (12 U.S.C. 1464(d)(4) (A) and (B)) is amended to read as follows:

"(4)(A) Whenever, in the opinion of the Board, any director or officer of an association has committed any violation of law, rule, or regulation or of a cease-and-desist order which has become final, or has engaged or participated in any unsafe or unsound practice in connection with the association, or has committed or engaged in any act, omission, or practice which constitutes a breach of his fiduciary duty as such director or officer, and the Board determines that the association has suffered or will probably suffer substantial financial loss or other damage or that the interests of its savings account holders could be seriously prejudiced by reason of such violation or practice or breach of fiduciary duty, or that the director or officer has received financial gain by reason of such violation or practice or breach of fiduciary duty, and that such violation or practice or breach of fiduciary duty is either one involving personal dishonesty on the part of such director or officer, or one which demonstrates a willful disregard for the safety or soundness of the association, the Board may serve upon such director or officer a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the association.

"(4)(B) Whenever, in the opinion of the Board, any director or officer of an association, by conduct or practice with respect to another savings and loan association or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to continue as a director or officer and, whenever, in the opinion of the Board, any other person participating in the conduct of the affairs of an association, by conduct or practice with respect to such association or other savings and loan association or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to participate in the conduct of the affairs of such association, the Board may serve upon such director, officer, or other person a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the association.".

(4) Section 206(g) (1) through (4) of the Federal Credit Union Act, as amended (12 U.S.C. 1786(g) (1) through (4)), is amended to read as follows:

"(g)(1) Whenever, in the opinion of the Administrator, any director, committee member, or officer of an insured credit union has committed any violation of law, rule, or regulation or of a cease-and-desist order which has become final, or has engaged or participated in any unsafe or unsound practice in connection with the credit union, or has committed or engaged in any act, omission, or practice which constitutes a breach of his fiduciary duty as such director, committee member, or officer, and the Administrator determines that the credit union has suffered or will probably suffer substantial financial loss or other damage or that the interests of its depositors could be seriously prejudiced by reason of such violation or practice or breach of fiduciary duty, or that the director, committee member, or officer received financial gain by reason of such violation or practice or breach of fiduciary duty, and that such violation or practice or breach of fiduciary duty is either one involving personal dishonesty on the part of such director, committee member, or officer, or one which demonstrates a willful disregard for the safety or soundness of the credit union, the Administrator may serve upon such director, committee member, or officer a written notice of his intention to remove him from office.

"(2) Whenever, in the opinion of the Administrator, any director, committee member, or officer of an insured credit union, by conduct or practice with respect to another insured credit union or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to continue as a director or officer and, whenever, in the opinion of the Administrator, any other person participating in the conduct of the affairs of an insured credit union, by conduct or practice with respect to such credit union or other insured credit union or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to participate in the conduct of the affairs of such insured credit union, the Administrator may serve upon such director, officer, or other person a written notice of his intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the credit union.

"(3) In respect to any director, committee member, or officer of an insured credit union or any other person referred to in paragraph (1) or (2) of this subsection, the Administrator may, if he deems it necessary for the protection of the credit union or the interests of its members, by written notice to such effect served upon such director, committee member, officer, or other person, suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the credit union. Such suspension or prohibition shall become effective upon service of such notice and, unless stayed by a court in proceedings authorized by subsection (1) of this section, shall remain in effect pending the completion of the administrative proceedings pursuant to the notice served under paragraph (1) or (2) of this subsection and until such time as the Administrator shall dismiss the charges specified in such notice, or, if an order of removal and prohibition is issued against the director, committee member, or officer or other person, until the effective date of any such order. Copies of any such notice shall also be served upon the credit union of which he is a director, committee member, or officer or in the conduct of whose affairs he has participated.

"(4) A notice of intention to remove a director, committee member, officer, or other person from office or to prohibit his participation in the conduct of the affairs of an insured credit union, shall contain a statement of the facts constituting grounds therefor, and shall fix a time and place at which a hearing will be held thereon. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after the date of service of such notice, unless an earlier or a later date is set by this Administrator at the request of (A) such director, committee member, or officer or other person, and for good cause shown, or (B) the Attorney General of the United States. Unless such director, committee member, officer, or other person shall appear at the hearing in person or by a duly authorized representative, he shall be deemed to have consented to the issuance of an order of such removal or prohibition. In the event of such consent, or if upon the record made at any such hearing the Administrator shall find that any of the grounds specified in such notice have been established, the Administrator may issue such orders of suspension or removal from office, or prohibition from participation in the conduct of the affairs of the credit union, as it may deem appropriate. Any such order shall become effective at the expiration of thirty days after service upon such credit union and the director, committee member, officer, or other person concerned (except in the case of an order issued upon consent, which shall become effective at the time specified therein). Such order shall remain effective and enforceable except to such extent as it is stayed, modified, terminated, or set aside by action of the Administrator or a reviewing court.".

(e)(1) Section 8(i) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1818 (i)), is amended by redesignating section 8 (i) as 8(1)(1) and by adding at the end thereof a new paragraph as follows:

"(2)(i) Any insured bank which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such a bank who violates the terms of any order which has become final and was issued pursuant to subsection (b) or (c) of this section, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the appropriate Federal banking

agency by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(ii) In determining the amount of the penalty the appropriate Federal banking agency shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the insured bank or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(iii) The insured bank or person assessed shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in subparagraph (iv). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(iv) Any insured bank or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the insured bank is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the appropriate Federal banking agency. The agency shall promptly certify and file in such Court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the agency shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(v) If any insured bank or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the agency, the agency shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action, the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(vi) Each Federal banking agency shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(vii) All penalties collected under authority of this section shall be covered into the Treasury of the United States.".

(2) Section 407(k) of the National Housing Act (12 U.S.C. 1730(k)) is amended by adding a new paragraph (k)(3) to read as follows:

"(3)(A) Any insured institution or any institution any of the accounts of which are insured which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such an institution who violates the terms of any order which has become final and was issued pursuant to subsection (e) or (f) of this section shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Corporation by written notice. As used in this section. the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(B) In determining the amount of the penalty the Corporation shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the insured institution or person charged, the gravity of the violation, the history of previous violations and such other matters as justice may require.

"(C) The insured institution or person assessed shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in subparagraph (D). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(D) Any insured institution or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the insured institution is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Corporation. The Corporation shall promptly certify and file in such Court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the agency shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(E) If any insured institution or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the agency, the Corporation shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action, the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(F) The Corporation shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(G) All penalties collected under authority of this paragraph shall be covered into the Treasury of the United States.".

(3) Section 5(d)(8) of the Home Owners' Loan Act, as amended (12 U.S.C. 1464(5)(d)(8)), is amended by redesignating "section 5(d)(8)" as "5(d)(8)(A)" and by adding the following new paragraph:

"(B)(i) Any association which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such an association who violates the terms of any order which has become final and was issued pursuant to paragraph (2) or (3) of this subsection, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Board by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(ii) In determining the amount of the penalty the Board shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the association bank or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(iii) The association or person charged shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in subparagraph (iv). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(iv) Any association or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the association is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Board. The agency shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the agency shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(v) If any association or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the agency, the Board shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action, the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(vi) the Board shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(vii) All penalties collected under authority of this paragraph shall be covered into the Treasury of the United States.".

(4) Section 206(j) of the Federal Credit Union Act, as amended (12 U.S.C. 1786(j)), is amended by redesignating section 206(j) as 206(j)(1) and by adding a new paragraph as follows:

"(2)(A) Any insured credit union which violates or any officer, director, committee member, employee, agent, or other person participating in the conduct of the affairs of such a credit union who violates the terms of any order which has become final and was issued pursuant to subsection (e) or (f) of this section, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Administrator by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(B) In determining the amount of the penalty, the Administrator shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the insured credit union or person charged, the gravity of the violation, the history of previous violations, and other matters as justice may require.

"(C) The insured credit union or person charged shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The Administrator's determination shall be made by final order which may be reviewed only as provided in subparagraph (D). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(D) Any insured credit union or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may ob-

tain review by the United States court of appeals for the circuit in which the home office of the insured credit union is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Administrator. The Administrator shall promptly certify and file in such Court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the Administrator shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(E) If any insured credit union or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the Administrator, the Administrator shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action, the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(F) The Administrator shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(G) All penalties collected under authority of this paragraph shall be covered into the Treasury of the United States.".

SEC. 107. Section 18(j) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1828(j)), is amended by redesignating section 18(j) as "18(j)(1)" and by adding at the end thereof the following:

"(2) The provisions of section 22(h) of the Federal Reserve Act, as amended, relating to limits on loans and extensions of credit by a member bank to its officers or directors or to any individual who directly or indirectly owns, controls, or has the power to vote more than 10 per centum of any class of voting securities of such member bank or to companies controlled by such officer, director, or individual, and relating to board of director's approval of and terms of such loan, shall be applicable to every nonmember insured bank in the same manner and to the same extent as if such nonmember insured bank were a State member bank.

"(3)(i) Any nonmember insured bank which violates or any officer, director, employes, agent, or other person participating in the conduct of the affairs of such nonmember insured bank who violates any provision of section 23A or 22(h) of the Federal Reserve Act, as amended, or any lawful regulation issued pursuant thereto, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Corporation by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(ii) In determining the amount of the penalty the Corporation shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the member bank or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(iii) The nonmember insured bank or person charged shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in subparagraph (iv). If no hearing is requested as herein provided the assessment shall constitute a final and unappealable order.

"(iv) Any nonmember insured bank or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the member bank is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Corporation. The Corporation shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the Corporation shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(v) If any nonmember insured bank or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the agency, the Corporation shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(vi) The Corporation shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(vii) All penalties collected under the authority of this paragraph shall be covered into the Treasury of the United States.".

SEC. 108. Any amendment made by this title which provides for the imposition of civil penalties shall apply only to violations occurring or continuing after the date of its enactment.

SEC. 109. Section 22(g) of the Federal Reserve Act, as amended (12 U.S.C. 375a), is amended by inserting the figure "$60,000" in lieu of the figure "$30,000" in paragraph (2), and by inserting the figure "$20,000" in lieu of the figure "$10,000" in paragraph (3); and by inserting the figure "$10,000" in lieu of the figure "$5,000" in paragraph (4).

SEC. 110. (a)(1) Section 8(g) of the Federal Deposit Insurance Act (12 U.S.C. 1818(g)) is amended to read as follows:

"(g)(1) Whenever any director or officer of an insured bank, or other person participating in the conduct of the affairs of such bank, is charged in any information, indictment, or complaint authorized by a United States attorney, with the commission of or participation in a crime involving dishonesty or breach of trust which is punishable by imprisonment for a term exceeding one year under State or Federal law, the appropriate Federal banking agency may, if continued service or participation by the individual may pose a threat to the interests of the bank's depositors or may threaten to impair public confidence in the bank, by written notice served upon such director, officer, or other person, suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the bank. A copy of such notice shall also be served upon the bank. Such suspension or prohibition shall remain in effect until such information, indictment, or complaint is finally disposed of or until terminated by the agency. In the event that a judgment of conviction with respect to such crime is entered against such director, officer, or other person, and at such time as such judgment is not subject to further appellate review, the agency may, if continued service or participation by the individual may pose a threat to the interests of the bank's depositors or may threaten to impair public confidence in the bank, issue and serve upon such director, officer, or other person an order removing him from office or prohibiting him from further participation in any manner in the conduct of the affairs of the bank except with the consent of the appropriate agency. A copy of such order shall also be served upon such bank, whereupon such director or officer shall cease to be a director or officer of such bank. A finding of not guilty or other disposition of the charge shall not preclude the agency from thereafter instituting proceedings to remove such director, officer, or other person from office or to prohibit further participation in bank affairs, pursuant to paragraph (1), (2), or (3) of subsection (e) of this section. Any notice of suspension or order of removal issued under this paragraph shall remain effective and outstanding until the completion of any hearing or appeal authorized under paragraph (3) hereof unless terminated by the agency.

"(2) If at any time, because of the suspension of one or more directors pursuant to this section, there shall be on the board of directors of a national bank less than a quorum of directors not so suspended, all powers and functions vested in or exercisable by such board shall vest in and be exercisable by the director or directors on the board not so suspended, until such time as there shall be a quorum of the board of directors. In the event all of the directors of a national bank are suspended pursuant to this section, the Comptroller of the Currency shall appoint persons to serve temporarily as directors in their place and stead pending the termination of such suspensions, or until such time as those who have been suspended, cease to be directors of the bank and their respective successors take office.

"(3) Within thirty days from service of any notice of suspension or order of removal issued pursuant to paragraph (1) of this subsection, the director, officer, or other person concerned may request in writing an opportunity to appear before the agency to show that the continued service to or participation in the conduct of the affairs of the bank by such individual does not, or is not likely to, pose a threat to the interests of the bank's depositors or threaten to impair public confidence in the bank. Upon receipt of any such request, the appropriate Federal banking agency shall fix a time (not more than thirty days after receipt of such request, unless extended at the request of the concerned director, officer, or other person) and place at which the director, officer, or other person may appear, personally or through counsel, before one or more members of the agency or designated employees of the agency to submit written materials (or, at the discretion of the agency, oral testimony) and oral argument. Within sixty days of such hearing, the agency shall notify the director, officer, or other person whether the suspension or prohibition from participation in any manner in the conduct of the affairs of the bank will be continued, terminated, or otherwise modified, or whether the order removing said director, officer, or other person from office or prohibiting such individual from further participation in any manner in the conduct of the affairs of the bank will be rescinded or otherwise modified. Such notification shall contain a statement of the basis for the agency's decision, if adverse to the director, officer or other person. The Federal banking agencies are authorized to prescribe such rules as may be necessary to effectuate the purposes of this subsection.".

(2) Section 8(h)(1) of the Federal Deposit Insurance Act (12 U.S.C. 1818(h)(1)) is amended by inserting after "Any hearing provided for in this section" the following: "(other than the hearing provided for in subsection (g)(3) of this section)".

(3) Section 8(j) of the Federal Deposit Insurance Act (12 U.S.C. 1818(j)) is amended by striking out "(e)(5), (e)(7), (e)(8)" and inserting in lieu thereof "(e)(3), (e)(4)".

(4) Section 8(k) of the Federal Deposit Insurance Act (12 U.S.C. 1818(k)) is amended by striking out "paragraph (1) of subsection (g)" and inserting in lieu thereof "paragraph (1) or (3) of subsection (g)".

(5) Section 8(n) of the Federal Deposit Insurance Act (12 U.S.C. 1818(n)) is amended by adding at the end thereof the following new sentence: "Any person who willfully shall fail or refuse to attend and testify or to answer any lawful inquiry or to produce books, papers, correspondence, memoranda, contracts, agreements, or other records, if in such person's power so to do, in obedience to the subpoena of the appropriate Federal banking agency, shall be guilty of a misdemeanor and, upon conviction, shall be subject to a fine of not more than $1,000 or to imprisonment for a term of not more than one year or both.".

(b)(1) Section 407(h) of the National Housing Act (12 U.S.C. 1730(h)) is amended to read as follows:

"(h)(1) Whenever any director or officer of an insured institution, or other persons participating in the conduct of the affairs of such institution, is charged in any information, indictment, or complaint authorized by a United States attorney, with the commission of or participation in a crime involving dishonesty or breach of trust which is punishable by imprisonment for a term exceeding one year under State or Federal law, the Corporation may, if continued service or participation by the individual may pose a threat to the interests of the institution's depositors or may threaten to impair public confidence in the institution, by written notice served upon such director, officer, or other person suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the institution. A copy of such notice shall also be served upon the institution. Such suspension or prohibition shall remain in effect until such information, indictment, or complaint is finally disposed of or until terminated by the Corporation. In the event that a judgment of conviction with respect to such crime is entered against such director, officer, or other person, and at such time as such judgment is not subject to further appellate review, the Corporation may, if continued service or participation by the individual may pose a threat to the interests of the institution's depositors or may threaten to impair public confidence in the institution, issue and serve upon such director, officer, or other person an order removing him from office or prohibiting him from further participation in any manner in the conduct of the affairs of the institution except with the consent of the Corporation. A copy of such order shall also be served upon such institution, whereupon such director or officer shall cease to be a director or officer of such institution. A finding of not guilty or other disposition of the charge shall not preclude the Corporation from thereafter instituting proceedings to remove such director, officer, or other person from office or to prohibit further participation in institution affairs, pursuant to paragraph (1), (2), or (3) of subsection (g) of this section. Any notice of suspension or order of removal issued under this paragraph shall remain effective and outstanding until the completion of any hearing or appeal authorized under paragraph (3) hereof unless terminated by the Corporation.

"(2) Within thirty days from service of any notice of suspension or order of removal issued pursuant to paragraph (1) of this subsection, the director, officer, or other person concerned may request in writing an opportunity to appear before the Corporation to show that the continued service to or participation in the conduct of the affairs of the institution by such individual does not, or is not likely to, pose a threat to the interests of the institution's depositors or threaten to impair public confidence in the institution. Upon receipt of any such request, the Corporation shall fix a time (not more than thirty days after receipt of such requests, unless extended at the request of the concerned director, officer, or other person) and place at which the director, officer, or other person may appear, personally or through counsel, before one or more members of the Corporation or designated employees of the Corporation to submit written materials (or, at the discretion of the agency, oral testimony) and oral argument. Within sixty days of such hearing, the Corporation shall notify the director, officer, or other person whether the suspension or prohibition from participation in any manner in the conduct of the affairs of the institution will be continued, terminated or otherwise modified, or whether the order removing said director, officer, or other person from office or prohibiting such individual from further participation in any manner in the conduct of the affairs of the institution will be rescinded or otherwise modified. Such notification shall contain a statement of the basis for the Corporation's decision, if adverse to the director, officer, or other person. The Corporation is authorized to prescribe such rules as may be necessary to effectuate the purposes of this subsection.".

(2) Section 407(j)(1) of such Act (12 U.S.C. 1730(j)(1)) is amended by inserting after "any hearing provided for in this section" the following: "(other than the hearing provided for in subsection (h)(3) of this section)".

(3) Section 407(j)(2) of such Act (12 U.S.C. 1730(j)(2)) is amended by inserting "(1)" after "subsection (h)".

(c)(1)(a) Section 5(d)(5) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(d)(5)) is amended to read as follows:

"(5)(A) Whenever any director or officer of an association, or other person participating in the conduct of the affairs of such association, is charged in any information, indictment, or complaint authorized by a United States attorney, with the commission of or participation in a crime involving dishonesty or breach of trust which is punishable by imprisonment for a term exceeding one year under State or Federal law, the Board, may, if continued service or participation by the individual may pose a threat to the interests of the association's depositors or may threaten to impair public confidence in the association, by written notice served upon such director, officer, or other person suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the association. A copy of such notice shall also be served upon the association. Such suspension or prohibition shall remain in effect until such information, indictment, or complaint is finally disposed of or until terminated by the Board. In the event that a judgment of conviction with respect to such crime is entered against such director, officer, or other person, and at such time as such judgment is not subject to further appellate review, the Board may, if continued service or participation by the individual may pose a threat to the interests of the association's depositors or may threaten to impair public confidence in the association, issue and serve upon such director, officer, or other person an order removing him from office or prohibiting him from further participation in any manner in the conduct of the affairs of the association except with the consent of the Board. A copy of such order shall also be served upon such association, whereupon such director or officer shall cease to be a director or officer of such association. A finding of not guilty or other disposition of the charge shall not preclude the Board from thereafter instituting proceedings to remove such director, officer, or other person from office or to prohibit further participation in association affairs, pursuant to subparagraph (A), (B), or (C) of paragraph (4). Any notice of suspension or order of removal issued under this subparagraph shall remain effective and outstanding until the completion of any hearing or appeal authorized under subparagraph (C) hereof unless terminated by the Board.

"(B) If at any time, because of the suspension of one or more directors pursuant to this section, there shall be on the board of directors of an association less than a quorum of directors not so suspended, all powers and functions vested in or exercisable by such board shall vest in and be exercisable by the director or directors on the board not so suspended, until such time as there shall be a quorum of the board of directors. In the event all of the directors of an association are suspended pursuant to this section, the Board shall appoint persons to serve temporarily as directors in their place and stead pending the termination of such suspensions, or until such time as those who have been suspended, cease to be directors of the association and their respective successors take office.

"(C) Within thirty days from service of any notice of suspension or order of removal issued pursuant to subparagraph (A), the director, officer, or other person concerned may request in writing an opportunity to appear before the Board to show that the continued service to or participation in the conduct of the affairs of the association by such individual does not, or is not likely to, pose a threat to the interests of the association's depositors or threaten to impair public confidence in the association. Upon receipt of any such request, the Board shall fix a time (not more than thirty days after receipt of such request, unless extended at the request of the concerned director, officer, or other person) and place at which the director, officer, or other person may appear, personally or through counsel, before one or more members of the agency or designated employees of the Board to submit written materials (or, at the discretion of the agency, oral testimony) and oral argument. Within sixty days of such hearing, the Board shall notify the director, officer or other person whether the suspension or prohibition from participation in any manner in the conduct of the affairs of the association will be continued, terminated or otherwise modified, or whether the order removing said director, officer, or other person from office or prohibiting such individual from further participation in any manner in the conduct of the affairs of the association will be rescinded or otherwise modified. Such notification shall contain a statement of the basis for the Board's decision, if adverse to the director, officer, or other person. The Board is authorized to prescribe such rules as may be necessary to effectuate the purposes of this subsection.".

(2) Section 5(d)(7)(A) of the Home Owner's Loan Act of 1933 (12 U.S.C. 1464(d)(7)(A)) is amended by inserting after "Any hearing provided for in this section" the following: "(other than the hearing provided for in paragraph (5)(C) of this section)".

(3) Section 5(d)(13)(A)(1) of such Act (12 U.S.C. 1464(d)(13)(A)(1)) is amended by inserting after "paragraph (5)(A)" the following: "or (C)".

(d)(1) Section 206(h) of the Federal Credit Union Act (12 U.S.C. 1786(h)) is amended to read as follows:

"(h)(1) Whenever any director, committee member, or officer of an insured credit union, or other person participating in the conduct of the affairs of such credit union, is charged in any information, indictment, or complaint authorized by a United States attorney, with the commission of or participation in a crime involving dishonesty or breach of trust

which is punishable by imprisonment for a term exceeding one year under State or Federal law, the Administrator may, if continued service or participation by the individual may pose a threat to the interests of the credit union's depositors or may threaten to impair public confidence in the credit union, by written notice served upon such director, committee member, officer, or other person suspended him from office or prohibit him from further participation in any manner in the conduct of the affairs of the credit union. A copy of such notice shall also be served upon the credit union. Such suspension or prohibition shall remain in effect until such information, indictment, or complaint is finally disposed of or until terminated by the Administrator. In the event that a judgment of conviction with respect to such crime is entered against such director, committee member, officer or other person, and at such time as such judgment is not subject to further appellate review, the Administrator may, if continued service or participation by the individual may pose a threat to the interests of the credit union's depositors or may threaten to impair public confidence in the credit union, issue and serve upon such director, committee member, officer, or other person an order removing him from office or prohibiting him from further participation in any manner in the conduct of the affairs of the credit union except with the consent of the Administrator. A copy of such order shall also be served upon such credit union, whereupon such director or officer shall cease to be a director, committee member, or officer of such credit union. A finding of not guilty or other disposition of the charge shall not preclude the Administrator from thereafter instituting proceedings to remove such director, committee member, officer, or other person from office or to prohibit further participation in the affairs of the credit union, pursuant to subsection (g) of this section. Any notice of suspension or order of removal issued under this paragraph shall remain effective and outstanding until the completion of any hearing or appeal authorized under paragraph (3) hereof unless terminated by the Administrator.

"(2) If at any time, because of the suspension of one or more directors pursuant to this section, there shall be on the board of directors of a Federal credit union less than a quorum of directors not so suspended, all powers and functions vested in or exercisable by such board shall vest in and be exercisable by the director or directors on the board not so suspended, until such time as there shall be a quorum of the board of directors. In the event all of the directors of a Federal credit union are suspended pursuant to this section, the Administrator shall appoint persons to serve temporarily as directors in their place and stead pending the termination of such suspensions, or until such time as those who have been suspended cease to be directors of the credit union and their respective successors have been elected by the members at an annual or special meeting and have taken office. Directors appointed temporarily by the Administrator shall, within thirty days following their appointment, call a special meeting for the election of new directors, unless during the thirty-day period (A) the regular annual meeting is scheduled, or (B) the suspensions giving rise to the appointment of temporary directors are terminated.

"(3) Within thirty days from service of any notice of suspension or order of removal issued pursuant to paragraph (1) of this subsection, the director, committee member, officer, or other person concerned may request in writing an opportunity to appear before the Administrator to show that the continued service to or participation in the conduct of the affairs of the credit union by such individual does not, or is not likely to, pose a threat to the interests of the credit union's depositors or threaten to impair public confidence in the credit union. Upon receipt of any such request, the Administrator shall fix a time (not more than thirty days after receipt of such request, unless extended at the request of the concerned director, committee member, officer, or other person) and place at which the director, committee-member, officer, or other person may appear, personally or through counsel, before the Administrator or his designee to submit written materials (or, at the discretion of the Administrator, oral testimony) and oral argument. Within sixty days of such hearing, the Administrator shall notify the director, committee member, officer, or other person whether the suspension or prohibition from participation in any manner in the conduct of the affairs of the credit union will be continued, terminated or otherwise modified, or whether the order removing said director, committee member, officer, or other person from office or prohibiting such individual from further participation in any manner in the conduct of the affairs of the credit union will be rescinded or otherwise modified. Such notification shall contain a statement of the basis for the Administrator's decision, if adverse to the director, committee member, officer, or other person. The Administrator is authorized to prescribe such rules as may be necessary to effectuate the purposes of this subsection."

(2) Section 206(i)(1) of the Federal Credit Union Act (12 U.S.C. 1786(i)(1)) is amended by inserting after "Any hearing provided for in this section" the following: "(other than the hearing provided for in subsection (h)(3) of this section)".

(3) Section 206(i)(2) of such Act (12 U.S.C. 1786(i)(2)) is amended by inserting "(1)" after "subsection (h)".

SEC. 111. (a) Section 3(a) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)) is amended by inserting after the second sentence the following new sentence: "The Board is authorized upon application by a bank to extend, from time to time for not more than one year at a time, the two-year period referred to above for disposing of any shares acquired by a bank in the regular course of security or collecting a debt previously contracted in good faith, if, in the Board's judgment, such an extension would not be detrimental to the public interest, but no such extensions shall in the aggregate exceed three years.".

(b) Section 2(a)(5)(D) of such Act (12 U.S.C. 1841(a)(5)(D)) is amended by adding at the end thereof the following new sentence: "The Board is authorized upon application by a company to extend, from time to time for not more than one year at a time, the two-year period referred to herein for disposing of any shares acquired by a company in the regular course of securing or collecting a debt previously contracted in good faith, if, in the Board's judgment, such an extension would not be detrimental to the public interest, but no such extension shall in the aggregate exceed three years.".

(c) Section 4(c)(2) of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1843(c)(2)), is amended by striking out "shares acquired by a bank in satisfaction of a debt previously contracted in good faith, but such bank shall dispose of such shares within a period of two years" and inserting in lieu thereof the following: shares acquired by a bank holding company or any of its subsidiaries in satisfaction of a debt previously contracted in good faith, but such shares shall be disposed of within a period of two years".

TITLE II—INTERLOCKING DIRECTORS

SEC. 201. This title may be cited as the "Depositary Institution Management Interlocks Act".

SEC. 202. As used in this title—

(1) the term "depositary institution" means a commercial bank, a savings bank, a trust company, a savings and loan association, a building and loan association, a homestead association, a cooperative bank, an industrial bank, or a credit union;

(2) the term "depositary holding company" means a bank holding company as defined in section 2(a) of the Bank Holding Company Act of 1956, a company which would be a bank holding company as defined in section 2(a) of the Bank Holding Company Act of 1956 but for the exemption contained in section 2(a)(5)(F) thereof, or a savings and loan holding company as defined in section 408((a)(1)(D) of the National Housing Act;

(3) the characterization of any corporation (including depositary institutions and depositary holding companies), as an "affiliate of," or as "affiliated" with any other corporation means that—

(A) one of the corporations is a depositary holding company and the other is a subsidiary thereof, or both corporations are subsidiaries of the same depositary holding company, as the term "subsidiary" is defined in either section 2(d) of the Bank Holding Company Act of 1956 in the case of a bank holding company or section 408(a)(1)(H) of the National Housing Act in the case of a savings and loan holding company;

(B) more than 50 per centum of the voting stock of one corporation is beneficially owned in the aggregate by one or more persons who also beneficially own in the aggregate more than 50 per centum of the voting stock of the other corporation; or

(C) one of the corporations is a trust company all of the stock of which, except for directors qualifying shares, was owned by one or more mutual savings banks on the date of enactment of this Act, and the other corporation is a mutual savings bank;

(4) the term "management official" means an employee or officer with management functions, a director (including an advisory or honorary director), a trustee of a business organization under the control of trustees, or any person who has a representative or nominee serving in any such capacity; *Provided*, That if a corporator, trustee, director, or other officer of a State-chartered savings bank or cooperative bank is specifically authorized under the laws of the State in which said institution is located to serve as a trustee, director, or other officer of a State-chartered trust company which does not make real estate mortgage loans and does not accept savings deposits from natural persons, then, for the purposes of this title, such corporator, trustee, director, or other officer shall not be deemed to be a management official of such trust company: *And provided further*, That if a management official of a State-chartered trust company which does not make real estate mortgage loans and does not accept savings deposits from natural persons is specifically authorized under the laws of the State in which said institution is located to serve as a corporator, trustee, director, or other officer of a State-chartered savings bank or cooperative bank, then, for the purposes of this title, such management official shall not be deemed to be a management official of any such savings bank or cooperative bank; and

(5) the term "office" used with reference to a depositary institution means either a principal office or a branch.

SEC. 203. A management official of a depositary institution or a depositary holding company may not serve as a management official of any other depositary institution or depositary holding company not affiliated therewith if an office of one of the institutions or any depositary institution that is an affiliate of such institutions is located within either—

(1) the same standard metropolitan sta-

tistical area as defined by the Office of Management and Budget, or

(2) the same city, town, or village as that in which an office of the other institution or any depositary institution that is an affiliate of such other institution is located, or in any city, town, or village contiguous or adjacent thereto.

SEC. 204. If a depositary institution or a depositary holding company has total assets exceeding $1,000,000,000, a management official of such institution or any affiliate thereof may not serve as a management official of any other nonaffiliated depositary institution or depositary holding company having total assets exceeding $500,000,000 or as a management official of any affiliate of such other institution.

SEC. 205. The prohibitions contained in sections 202, 203, and 204 shall not apply in the case of any one or more of the following or any branch or subsidiary thereof:

(1) A depositary institution or depositary holding company which has been placed formally in liquidation, or which is in the hands or a receiver, conservator, or other official exercising a similar function.

(2) A corporation operating under section 25 or 25A of the Federal Reserve Act.

(3) A credit union being served by a management official of another credit union or a credit union being served by a management official of another depositary institution.

(4) A depositary institution or depositary holding company which does not do business within any State of the United States, the District of Columbia, any territory of the United States, Puerto Rico, Guam, American Samoa, or the Virgin Islands except as an incident to its activities outside the United States.

SEC. 206. A person whose service in any given position as a management official was not prohibited by this title at the time of the beginning of such service is not prohibited by this title from continuing to serve in that position for a period of ten years after the date of enactment of this title. The Board of Governors of the Federal Reserve System may provide a reasonable period of time for compliance with this title, not exceeding fifteen months, after any change in circumstances, other than the coming into effect of this title which makes such service prohibited by this title.

SEC. 207. This title shall be administered and enforced by—

(1) the Comptroller of the Currency with respect to national banks and banks located in the District of Columbia,

(2) the Board of Governors of the Federal Reserve System with respect to State banks which are members of the Federal Reserve System, and bank holding companies,

(3) the Board of Directors of the Federal Deposit Insurance Corporations with respect to State banks which are not members of the Federal Reserve System but the deposits of which are insured by the Federal Deposit Insurance Corporation.

(4) the Federal Home Loan Bank Board with respect to Federal savings and loan associations and institutions the accounts of which are insured by the Federal Savings and Loan Insurance Corporation, and savings and loan holding companies,

(5) the National Credit Union Administration with respect to Federal credit unions and institutions the accounts of which are insured by the National Credit Union Administration, and

(6) the Attorney General for all other institutions.

SEC. 208. The following provisions of the Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914 (Clayton Act, 38 Stat. 732, as amended), are repealed:

(a) The first three paragraphs of section 8 (15 U.S.C. 19).

(b) The words "bank or other" in the last paragraph of section 8 each time they appear.

SEC. 209. (a) Section 8(e) of the Federal Deposit Insurance Act (12 U.S.C. 1818(e)) is amended by adding at the end thereof the following new paragraph:

"(5) For the purposes of enforcing any law, rule, regulation or cease-and-desist order in connection with an interlocking relationship, the term 'officer' as used in this subsection means an employee or officer with management functions, and the term 'director' includes an advisory or honorary director, a trustee of a bank under the control of trustees, or any person who has a representative or nominee serving in any such capacity.".

(d) Section 5(d) of the Homeowners' Loan Act (12 U.S.C. 1464(d) is amended by adding at the end thereof the following new paragraph:

"(15) For the purpose of enforcing any law, rule, regulation, or cease-and-desist order in connection with an interlocking relationship, the term 'officer' as used in this subsection means an employee or officer with management functions, and the term 'director' includes an advisory or honorary director, a trustee of an association under the control of trustees, or any person who has a representative or nominee serving in any such capacity."

(c) Section 407(q) of the National Housing Act is amended by adding at the end thereof the following:

"(4) For the purpose of enforcing any law, rule, regulation, or cease-and-desist order in connection with an interlocking relationship, the term 'officer' as used in this subsection means an employee or officer with management functions, and the term 'director' includes an advisory or honorary director, a trustee of an association under the control of trustees, or any person who has a representative or nominee serving in any such capacity.".

SEC. 210. The Board of Governors of the Federal Reserve System may prescribe such rules and regulations, including authorization for a management official of a depository institution to serve as a management official of any other depository institution, as are consistent with the purposes of this title and necessary to effectuate such purposes or to prevent evasion of this title.

TITLE III—FOREIGN BRANCHING

SEC. 301. (a) Section 3(o) of the Federal Deposit Insurance Act (12 U.S.C. 1813(o)) is amended—

(1) by inserting "domestic" immediately before "branch" the first place it appears; and

(2) by inserting before the period at the end thereof a semicolon and the following: "and the term 'foreign branch' means any office, place of business, or similar establishment located outside the United States, its territories, Puerto Rico, Guam, American Samoa, and the Virgin Islands".

(b) Section 18(d) of the Federal Deposit Insurance Act (12 U.S.C. 1828(d)) is amended—

(1) by inserting "(1)" after "(d)";

(2) by inserting "domestic" between "new" and "branch";

(3) by inserting "such" between "any" and "branch"; and

(4) by adding at the end thereof the following new paragraph:

"(2) No State nonmember insured bank shall establish or operate any foreign branch, except with the prior written consent of the Corporation and upon such conditions and pursuant to such regulations as the Corporation may prescribe from time to time.".

(c) Section 18 of the Federal Deposit Insurance Act (12 U.S.C. 1828) is amended by adding at the end thereof the following new subsection:

"(1) When authorized by State law, a State nonmember insured bank may, but only with the prior written consent of the Corporation and upon such conditions and under such regulations as the Corporation may prescribe from time to time, acquire and hold, directly or indirectly, stock or other evidences of ownership in one or more banks or other entities organized under the law of a foreign country or a dependency or insular possession of the United States and not engaged, directly or indirectly, in any activity in the United States except as, in the judgment of the Board of Directors, shall be incidental to the international or foreign business of such foreign bank or entity; and, notwithstanding the provisions of subsection (j) of this section, such State nonmember insured bank may, as to such foreign bank or entity, engage in transactions that would otherwise be covered thereby, but only in the manner and within the limits prescribed by the Corporation by general or specific regulation or ruling.".

SEC. 302. The sixth sentence of section 7 (a)(3) of the Federal Deposit Insurance Act (12 U.S.C. 1817(a)(3)) is amended to read as follows: "The correctness of said report of conditions shall be attested by the signatures of at least two directors or trustees of the reporting bank other than the officer making such declaration, with a declaration that the report has been examined by them and to the best of their knowledge and belief is true and correct.".

SEC. 303. Section 8(n) of the Federal Deposit Insurance Act (12 U.S.C. 1818(n)) is amended—

(1) by inserting in the first sentence after "this section," the first place it appears therein the following: "or in connection with any claim for insured deposits or any examination or investigation under section 10(c),";

(2) by inserting "examination, or investigation or considering the claim for insured deposits," in the first sentence after "proceeding," the second place it appears therein;

(3) by striking out "proceedings" at the end of the first sentence thereof and inserting in lieu thereof "proceedings, claims, examinations, or investigations";

(4) by inserting "such agency or any" after "Any" at the beginning of the third sentence thereof; and

(5) by striking out "section" and inserting in lieu thereof "subsection" in the fourth sentence thereof.

SEC. 304. Section (8)(q) of the Federal Deposit Insurance Act (12 U.S.C. 1818(q)) is amended to read as follows:

"(q) Whenever the liabilities of an insured bank for deposits shall have been assumed by another insured bank or banks, whether by way of merger, consolidation, or other statutory assumption, or pursuant to contract (1) the insured status of the bank whose liabilities are so assumed shall terminate on the date of receipt by the Corporation of satisfactory evidence of such assumption; (2) the separate insurance of all deposits so assumed shall terminate at the end of six months from the date such assumption takes effect or, in the case of any time deposit, the earliest maturity date after the six-month period; and (3) the assuming or resulting bank shall give notice of such assumption to each of the depositors of the bank whose liabilities are so assumed within thirty days after such assumption takes effect. Where the deposits of an insured bank are assumed by a newly insured bank, the bank whose deposits are assumed shall not be required to pay any assessment upon the deposits which have been so assumed after the semiannual period in which the assumption takes effect.".

SEC. 305. (a) Section 10(b) of the Federal Deposit Insurance Act (12 U.S.C. 1820(b)) is

amended by inserting "or other institution" in the first sentence after the words "any State nonmember bank" and by striking out the last two sentences of that subsection.

(b) Section 10 (c) and (d) of the Federal Deposit Insurance Act (12 U.S.C. (c) and (d)) are amended to read as follows:

"(c) In connection with examinations of insured banks, State nonmember banks or other institutions making application to become insured banks, and affiliates thereof, or with other types of investigations to determine compliance with applicable law and regulations, the appropriate Federal banking agency, or its designated representatives, are authorized to administer oaths and affirmations, and to examine and to take and preserve testimony under oath as to any matter in respect to the affairs or ownership of any such bank or institution or affiliate thereof, and to exercise such other powers as are set forth in section 8(n) of this Act.

"(d) For purposes of this section, the term 'affiliate' shall have the same meaning as in section 23A of the Federal Reserve Act, except that the term 'member bank' in such section 23A and in section 2(b) of the Banking Act of 1933 shall be deemed to refer to an insured bank.".

SEC. 306. Section 18(c)(1)(B) of the Federal Deposit Insurance Act (12 U.S.C. 1928(c)(1)(B)) is amended by inserting after the word "deposits" the following: "(including liabilities which would be 'deposits' except for the proviso in section 3(1)(5) of this Act)".

SEC. 307. Section 1114 of title 18, United States Code, is amended by inserting before "shall be punished" the following "or any attorney, liquidator, examiner, claim agent, or other employee of the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, the Comptroller of the Currency, the Federal Home Loan Bank Board, the Board of Governors of the Federal Reserve System, any Federal Reserve bank, or the National Credit Union Administrator engaged in or on account of the performance of his official duties,".

SEC. 308. Section 5 of the Bank Service Corporation Act (12 U.S.C. 1865) is amended to read as follows:

"SEC. 5. Whenever any bank which is regularly examined by a Federal supervisory agency or any subsidiary or affiliate of such bank which is subject to examination by that agency, causes to be performed, by contract or otherwise, any bank sevices for itself, whether on or off its premises—

"(1) such performance shall be subject to regulation and examination by such agency to the same extent as if the services were being performed by the bank itself on its own premises and

"(2) the bank shall notify such agency of the existence of a service relationship within 30 days after the making of such service contract or the performance of the service, whichever occurs first.".

TITLE IV—CONFLICTS OF INTEREST

SEC. 401. This title may be cited as the "Depository Institutions Conflict of Interest Act".

SEC. 402. Section 2 of the Federal Deposit Insurance Act (12 U.S.C. 1812) is amended by striking out the sixth sentence and inserting in lieu thereof the following: "The members of the Board of Directors shall be ineligible, during the time they are in office and for a period of two years thereafter, to hold any office, position, or employment in an insured bank, in a holding company of an insured bank, or in an affiliate of a holding company of an insured bank, and may not, during such two-year period, voluntarily acquire any interest in such a bank, company, or affiliate, or exercise any voting rights attributable to the ownership of any security issued by such a bank company, or affiliate, except that this restriction shall not apply to any individual who has served the full term for which he was appointed.".

SEC. 403. The first sentence of the second paragraph of section 10 of the Federal Reserve Act (12 U.S.C. 242) is amended by adding at the end thereof the following: "The members of the Board of Governors shall be ineligible, during the time they are in office and for a period of two years thereafter, to hold any office position, or employment in a member bank, in a bank holding company or in an affiliate of a bank holding company, and may not, during such two-year period, voluntarily acquire any interest in such a bank, company, or affiliate, or exercise any voting rights attributable to the ownership of any security issued by such a bank company, or affiliate, except that this restriction shall not apply to any individual who has served the full term for which he was appointed.".

SEC. 404. Section 17 of the Federal Home Loan Bank Act (12 U.S.C. 1437) is amended by adding at the end thereof the following:

"(c) The members of the board shall be ineligible during the time they are in office and for a period of two years thereafter to hold any office, position, or employment in an insured institution, in a holding company of an insured institution, or in an affiliate of a holding company of an insured institution, and may not, during such two-year period, voluntarily acquire any interest in such an institution, company, or affiliate, or exercise any voting rights attributable to the ownership of any security issued by such an institution, company, or affiliate, except that this restriction shall not apply to any individual who has served the full term for which he was appointed. As used in this subsection, the term 'insured institution' has the same meaning as in section 401 of the National Housing Act.".

SEC. 405. (a) Section 5312 of title 5, United States Code, is amended by adding at the end thereof the following:

"(14) Chairman, Board of Governors of the Federal Reserve System.".

(b) Section 5313(10) of such title is amended by striking out "Chairman" and inserting in lieu thereof "Members".

(c) Section 5313 of such title is amended by adding at the end thereof the following:

"(24) Chairman, Board of Directors, Federal Deposit Insurance Corporation.

"(25) Chairman of the Federal Home Loan Bank Board.

"(26) Comptroller of the Currency.".

(d) Section 5314 of title 5, United States Code, is amended by striking out items 19, 20, 30, and 43.

TITLE V—CREDIT UNION RESTRUCTURING

SEC. 501. Section 102 of the Federal Credit Union Act (12 U.S.C. 1752a) is amended to read as follows:

"CREATION OF ADMINISTRATION

"SEC. 102. (a) There is hereby established in the executive branch of the Government an independent agency to be known as the National Credit Union Administration. The Administration shall be under the management of a National Credit Union Administration Board.

"(b) The Board shall consist of three members, who are broadly representative of the public interest, appointed by the President, by and with the advice and consent of the Senate. In appointing the members of the Board, the President shall designate the Chairman. Not more than two members of the Board shall be members of the same political party.

"(c) The term of office of each member of the Board shall be six years, except that the terms of the two members, other than the Chairman, initially appointed shall expire one upon the expiration of two years after the date of appointment, and the other upon the expiration of four years after the date of appointment. Board members shall not be appointed to succeed themselves except the initial members appointed for less than a six-year term may be reappointed for a full six-year term and future members appointed to fill unexpired terms may be reappointed for a full six-year term. Any Board member may continue to serve as such after the expiration of said member's term until a successor has qualified.

"(d) The management of the Administration shall be vested in the Board. The Board shall adopt such rules as it sees fit for the transaction of its business and shall keep permanent and complete records and minutes of its acts and proceedings. A majority of the Board shall constitute a quorum. Not later than April 1 of each calendar year, and at such other times as the Congress shall determine, the Board shall make a report to the President and to the Congress. Such a report shall summarize the operations of the Administration and set forth such information as is necessary for the Congress to review the financial program approved by the Board.

"(e) The Chairman of the Board shall be the spokesman for the Board and shall represent the Board and the National Credit Union Administration in its official relations with other branches of the Government. The Chairman shall determine each Board member's area of responsibility and shall review such assignments biennially. It shall be the Chairman's responsibility to direct the implementation of the adopted policies and regulations of the Board.

"(f) The members of the Board shall be ineligible during the time they are in office or for two years thereafter to hold any office, position, or employment in any credit union or in any financial institution in which a credit union owns stock, except that this restriction shall not apply to any member who has served the full term for which he was appointed.

"(g) The financial transactions of the Administration shall be subject to audit on a calendar year basis by the General Accounting Office in accordance with the principles and procedures applicable to commercial corporate transactions and under such rules and regulations as may be prescribed by the Comptroller General of the United States. The audit shall be conducted at the place or places where the accounts of the Administration are kept.".

SEC. 502. (a) Section 101 of the Federal Credit Union Act is amended—

(1) by striking out clause (2) and inserting in lieu thereof the following:

"(2) the term 'Chairman' means the Chairman of the National Credit Union Administration Board,";

(2) by inserting "Administration" after "Union" in clause (4).

(b) The Federal Credit Union Act is amended by striking out "Administrator" each place it appears and inserting in lieu thereof "Board", and by striking out the personal pronouns "he", "him", and "his" when referring to the Administrator and inserting in lieu thereof "it", "them", and "its" as appropriate wherever such words appear therein.

(c) Section 209 of the Federal Credit Union Act (12 U.S.C. 1789) is amended—

(1) by inserting in subsection (b)(1) the language "on a calendar year basis" immediately following "prepare annually";

(2) by inserting in subsection (b)(2) the language "on a calendar year basis" immediately following "set of accounts".

(d) Section 5108 of title 5, United States Code, is amended by adding the following new paragraph:

"(h) In addition to the number of positions authorized by subsection (a), the National Credit Union Administration is authorized without regard to any other provision to this section, to place two positions

in the Administration at GS–18 and a total of fourteen positions in the Administration at GS–16 or GS–17.".

(e) Section 5313 of title 5, United States Code, is amended by adding the following new paragraph:

"(28) Chairman, National Credit Union Administration Board.".

(f) Section 5314 (92) of title 5, United States Code, is amended by striking out "Administrator of the National Credit Union Administration" and inserting in lieu thereof "Members, National Credit Union Administration Board (2)".

SEC. 503. (a) The Federal Credit Union Act (12 U.S.C. 1751–1790) is further amended by striking out "Administrator" and inserting in lieu thereof "Board" in the following sections:

(1) section 103 (12 U.S.C. 1753);
(2) section 104 (12 U.S.C. 1754);
(3) section 105 (12 U.S.C. 1755);
(4) section 106 (12 U.S.C. 1756);
(5) paragraphs (5), (8), (9), (10), (13), and (14) of section 107 (12 U.S.C. 1757);
(6) section 108 (12 U.S.C. 1758);
(7) section 109 (12 U.S.C. 1759);
(8) section 111 (12 U.S.C. 1761);
(9) section 112 (12 U.S.C. 1761a);
(10) section 113 (12 U.S.C. 1761b);
(11) section 115 (12 U.S.C. 1761d);
(12) paragraph (b)(2) of section 116 (12 U.S.C. 1762);
(13) the title of section 120 (12 U.S.C. 1766);
(14) section 120(a) (12 U.S.C. 1766);
(15) section 120(b)(1) (12 U.S.C. 1766);
(16) section 120(b)(2) (12 U.S.C. 1766);
(17) section 120(b)(3) (12 U.S.C. 1766);
(18) section 120(b)(4) (12 U.S.C. 1766);
(19) section 120(b)(5) (12 U.S.C. 1766);
(20) section 120(c) (12 U.S.C. 1766);
(21) section 120(d) (12 U.S.C. 1766);
(22) section 120(c) (12 U.S.C. 1766);
(23) section 120(f)(1) (12 U.S.C. 1766);
(24) section 120(f)(2)(A) (12 U.S.C. 1766);
(25) section 120(f)(2)(B) (12 U.S.C. 1766);
(26) section 120(g) (12 U.S.C. 1766);
(27) section 120(h) (12 U.S.C. 1766);
(28) section 120(i) (12 U.S.C. 1766);
(29) section 120(i)(3) (12 U.S.C. 1766);
(30) section 121 (12 U.S.C. 1767);
(31) section 125(b)(1) (12 U.S.C. 1771);
(32) section 125(b)(2) (12 U.S.C. 1771);
(33) section 127 (12 U.S.C. 1772a); and
(34) sections 201 to 210 (12 U.S.C. 1773–1775).

(b) Such Act is further amended by striking out the personal pronouns "he", "him", and "his" when referring to the Administrator and inserting in lieu thereof "it", "they", and "its" as appropriate wherever such words appear therein.

SEC. 504. (a) Paragraph (4) of section 101 of the Federal Credit Union Act (12 U.S.C. 1752) which begins with "The terms 'member account'" is redesignated paragraph "(5)" and the succeeding paragraphs numbered (5) through (8) are redesignated as paragraphs (6) through (9), respectively.

(b) Paragraph (5) of section 101 of the Federal Credit Union Act (12 U.S.C. 1752), as redesignated by subsection (a) of this section, is amended—

(1) by striking "(when referring to the account of a member of a credit union)";

(2) by striking "share, share certificate, or share deposit" each time it appears therein and inserting "share or share certificate" in lieu thereof;

(3) by striking "those" and inserting "share or share certificate" in lieu thereof; and

(4) by striking all language after "political subdivisions thereof" and inserting "enumerated in section 207 of this Act: *Provided*, That for purposes of insured State credit unions, reference in this paragraph to 'share' or 'share certificate' accounts includes, as determined by the Board, the equivalent of such accounts under State law;" in lieu thereof.

(c) Paragraph (9) of section 101 of the Federal Credit Union Act (12 U.S.C. 1752), as redesignated by (a) of this section, is amended by—

(1) inserting ", including the trust territories," after "several territories"; and

(2) adding the following new sentence: "The term 'branch' also includes a suboffice, operated by a Federal credit union or by a credit union authorized by the Department of Defense, located on an American military installation in a foreign country or in the trust territories of the United States.".

SEC. 505. (a) Subsection (a) of section 201 of the Federal Credit Union Act (12 U.S.C. 1781) is amended by inserting ", including the trust territories," after "several territories".

(b) Paragraph (b)(7) of such section is amended by inserting "except for accounts authorized by State law for State credit unions" before the semicolon.

(c) Such section is further amended by striking all of subsection (d) and redesignating subsection (e) as (d).

SEC. 506. (a) Section 202 of the Federal Credit Union Act (12 U.S.C. 1782) is amended by striking out "his" in the fifth sentence of paragraph (a)(1) and inserting "such officer's" in lieu thereof.

(b) Subsection (h)(3) of such section is amended to read as follows:

"(3) The term 'member account' when applied to the premium charge for insurance of accounts shall not include amounts received from other federally insured credit unions in excess of the insured account limit set forth in section 207(c)(1).".

SEC. 507. Section 208 of the Federal Credit Union Act (12 U.S.C. 1788) is amended by striking out "SPECIAL ASSISTANCE TO AVOID LIQUIDATION" and inserting "SPECIAL ASSISTANCE FOR FEDERALLY INSURED CREDIT UNIONS" in lieu thereof.

SEC. 508. Section 105 of the Federal Credit Union Act (12 U.S.C. 1755) is amended to read as follows:

"FEES

"SEC. 105. (a) In accordance with rules prescribed by the Board, each Federal credit union shall pay to the Administration an annual operating fee which may be composed of one or more charges identified as to the function or functions for which assessed.

"(b) The fee assessed under this section shall be determined according to a schedule, or schedules, or other method determined by the Board to be appropriate, which gives due consideration to the expenses of the Administration in carrying out its responsibilities under this Act and to the ability of Federal credit unions to pay the fee. The Board shall, among other things, determine the periods for which the fee shall be assessed and the date or dates for the payment of the fee or increments thereof.

"(c) If the annual operating fee is composed of separate charges, no supervision charge shall be payable by a Federal credit union, and the Board may waive payment of any or all other charges comprising the fee, with respect to the year in which its charter is issued, or in which final distribution is made in its liquidation or the charter is cancelled.

"(d) All operating fees shall be deposited with the Treasurer of the United States for the account of the Administration and may be expended by the Board to defray the expenses incurred in carrying out the provisions of this Act including the examination and supervision of Federal credit unions.".

SEC. 509. Section 106 of the Federal Credit Union Act (12 U.S.C. 1756) is amended to read as follows:

"REPORTS AND EXAMINATIONS

"SEC. 106. Federal credit unions shall be under the supervision of the Board, and shall make financial reports to it as and when it may require, but at least annually. Each Federal credit union shall be subject to examination by, and for this purpose shall make its books and records accessible to, any person designated by the Board.".

SEC. 510. The amendments made by this title take effect upon enactment, except that the functions of the Administrator of the National Credit Union Administration under the provisions of the Federal Credit Union Act, as in effect on the date preceding the date of enactment of this title, shall continue to be performed by him in accordance with such provisions until such time as all the members of the National Credit Union Administration Board, established under the amendments made by this title, take office. All rules, regulations, policies, and procedures of the Administrator in effect on the date of enactment of this title shall remain in effect until amended, superseded, or repealed.

TITLE VI—STANDBY LETTERS OF CREDIT

SEC. 601. The purpose of this title is to regulate standby letters of credit, guaranties, surety agreements and certain acceptances issued by commercial banks.

SEC. 602. (a) Section 5202 of the Revised Statutes, as amended (12 U.S.C. 82), is amended by inserting "(a)" after section 5202.

(b) The clause numbered "Fifth" in such redesignated section 5202(a) is amended to read:

"Fifth. Liabilities incurred under the provisions of the Federal Reserve Act, including liabilities arising from the acceptance of time drafts of the kinds described in section 13 of the Federal Reserve Act.".

(c) Section 5202 is further amended by adding a new subsection (b) to read:

"(b) No national banking association shall incur any liability arising from the acceptance of a time draft (other than liabilities arising from the acceptance of time drafts of the kinds described in section 13 of the Federal Reserve Act), or from any undertaking to make or arrange a payment in the event another person fails to do so, in an amount exceeding 50 percent of its capital stock at such time actually paid in and remaining undiminished by losses or otherwise, plus 50 percent of its unimpaired surplus fund, except that any liability which is secured by readily realizable collateral shall not be included as a liability subject to the limitation contained herein.".

SEC. 603. Section 5200 of the Revised Statutes (12 U.S.C. 84) is amended by inserting immediately after the second sentence the following new sentence: "For purposes of this section, (a) where an association accepts a time draft (other than a time draft of a kind described in section 13 of the Federal Reserve Act), the amount of the acceptance shall be deemed an obligation to the association of the person who is obliged to place the bank in funds prior to the maturity of the acceptance, (b) where an association undertakes to make or arrange a payment in the event another person fails to do so, the amount involved shall be deemed an obligation of that person to the association, and (c) where the acceptance or undertaking is made in connection with the financing of the purchase of personal property for lease or sale to a user, the amount of such acceptance or undertaking shall be deemed an obligation of the user to the association; and all such transactions shall be incorporated and disclosed fully in the balance sheets and reports of condition of the issuing bank and be subject to full extension of credit analysis.".

SEC. 604. Section 19(a) of the Federal Reserve Act, as amended (12 U.S.C. 461(a)), is amended by adding at the end thereof the following sentence: "For the purposes of subsection (b) of this section, any member bank acceptance (other than an acceptance of a kind described in section 13) or any under-

taking by a member bank to make or arrange a payment in the event another person fails to do so shall be deemed a deposit.".

SEC. 605. Paragraph 6 of section 9 of the Federal Reserve Act, as amended (12 U.S.C. 324), is amended by adding at the end thereof the following: "The provisions of sections 5200 and 5202(b) of the Revised Statutes shall apply to all State member banks and all insured nonmember State banks, so long as such banks are liable on acceptances not of a kind described in section 13 or on undertakings to make or arrange a payment in the event another person fails to do so.".

SEC. 606. The provisions of this Act shall take effect upon the expiration of thirty days after the date of its enactment.

Mr. PROXMIRE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BROOKE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The title was amended so as to read:

A bill to strengthen the supervisory authority of Federal agencies which regulate depositary institutions, to prohibit interlocking management and director relationships between depositary institutions, to amend the Federal Deposit Insurance Act, and to encourage officials of Federal agencies responsible for the supervision of financial institutions to complete their terms of office, and for other purposes.

FOREIGN ASSISTANCE APPROPRIATIONS, 1978

The Senate continued with the consideration of H.R. 7797.

Mr. ROBERT C. BYRD. Mr. President, could we resume consideration of the foreign aid bill?

The PRESIDING OFFICER. The question recurs on the committee amendment on page 10, which the clerk will report.

The assistant legislative clerk read as follows:

On page 10, line 6, strike "$215,200,000" and insert "$210,200,000";

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum, and I ask that the time not be charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

(Mr. ZORINSKY assumed the chair.)

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess awaiting the call of the Chair.

There being no objection, the Senate, at 1:14 p.m., took a recess, subject to the call of the Chair.

The Senate reassembled at 1:55 p.m., when called to order by the Presiding Officer (Mr. ZORINSKY).

VELZORA CARR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of a measure on the calendar which has been cleared for unanimous-consent passage, Calendar No. 362.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 2563) for the relief of Velzora Carr.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was was agreed to.

AUTHORITY FOR COMMITTEES TO REPORT BILLS AND RESOLUTIONS DURING AUGUST RECESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that during the August recess, all committees be authorized to report bills and resolutions between the hours of 9 a.m. and 3 p.m. on Thursday, August 18, and Monday, August 29.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATUS OF NOMINATIONS DURING AUGUST RECESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that all nominations currently being considered by the Senate or received by the Senate be considered as remaining in status quo during the adjournment of the Senate from August 5 or 6, 1977, until September 7, 1977.

The PRESIDING OFFICER. Without objection, it is so ordered.

REPORT ON THE CONDUCT OF MONETARY POLICY (REPT. NO. 95-405)
